iii. Director's Message

iv. Taking Account

Articles

1. GDP and the Economy: Advance Estimates for the Second Quarter of 2011.

Real GDP increased 1.3 percent after increasing 0.4 percent in the first quarter. Imports slowed, federal government spending turned up, and business investment picked up. Consumer spending slowed.

6. Annual Revision of the National Income and Product Accounts: Annual Estimates for 2003–2010 and Quarterly Estimates for 2003:I—2011:I

Details of the 2011 annual revision, which incorporated newly available source data, new methodologies, and new presentations.

32. National Income and Product Accounts Tables

Annual, quarterly, and monthly statistics from the annual NIPA revision, including advance estimates for the second quarter of 2011 and preliminary estimates for June 2011.

181. GDP and Other Major NIPA Series for 1929–2011:II

Historical statistics on GDP and its components in current dollars, chained dollars, and chain-type quantity and price indexes, including statistics on national income and personal income.

211. U.S. Affiliates of Foreign Companies: Operations in 2009

The current-dollar value added of these affiliates decreased 9.1 percent to $587.9 billion. Employment by these affiliates fell 6.3 percent.

Upcoming in the Survey...

Direct Investment. Statistics on investment positions, international transactions, and the composition of investment of U.S. and foreign multinational companies.

Metropolitan Area Personal Income. Advance estimates for 2010.

Director's Message

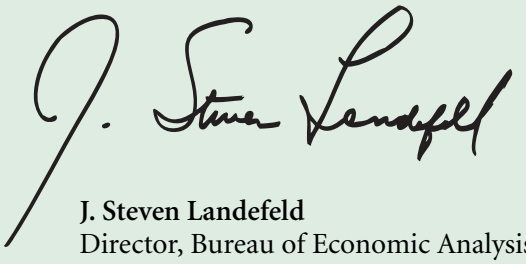
In July, the Bureau of Economic Analysis (BEA) released its 2011 annual revision of the national income and product accounts. Annual revisions, as many of our data users know, incorporate more complete, previously unavailable information as well as various improvements in methodology and presentation. In this issue, we offer an indepth look at the details of the annual revision.

We have also made additional information available in the FAQs section on our Web site:

- How did the recent GDP revisions change the picture of the 2007–2009 recession and the recovery?
- Why have the initial real GDP statistics for the fourth quarter of 2008 been revised down so much?
- How reliable are BEA's early GDP statistics and revisions?

This issue also includes our annual article on the operations of U.S. affiliates of foreign companies. Employment by these affiliates fell 6.3 percent in 2009 after rising slightly in 2008. The current-dollar value added of these firms (their contribution to gross domestic product) fell 9.1 percent after falling 5 percent in 2008.

I'd also like to mention the results of the 2010 Organizational Assessment Survey at BEA, conducted by the Office of Personnel Management. BEA's scores were high across the board, tying or exceeding the "benchmark" high scores for federal agencies of comparable size in 10 of the 12 survey categories. BEA's scores also exceeded the private sector scores in many areas. More details are provided in this month's *Taking Account*.



J. Steven Landefeld
Director, Bureau of Economic Analysis

Taking Account...

BEA gets high marks in 2010 OAS survey

Employees at the Bureau of Economic Analysis (BEA) have given the agency high marks as a place to work, according to the most recent Organizational Assessment Survey (OAS) conducted by the Office of Personnel Management in 2010.

BEA's scores were high across the board, tying or exceeding the "benchmark" high scores for federal agencies of comparable size in most of the survey's categories or "dimensions."

The OAS is a research-based survey of employees designed to help evaluate an organization's culture and work climate. The survey measures various dimensions that are considered critical to high performance, such as teamwork, customer orientation, and ethics.

The survey is administered roughly every other year at BEA, where employees voluntarily participate online. Sixty-four percent of BEA employees took the survey in 2010, a generally high participation rate.

BEA's scores, as measured by the percentage of respondents with a "favorable" response in specific dimension, were strong: teamwork (82 percent), emotional support (82 percent), strategic management (81 percent), ethics (77 percent), communication (77 percent), resources (76 percent), training (73 percent), customer orientation (73 percent), supervision (73 percent), innovation (68 percent), flexibility (66 percent), and rewards (61 percent).

Highlights of the 2010 survey include the following:

- BEA tied or exceeded the Performance America benchmark high score in 10 of the 12 dimensions. Benchmark high scores refer to the highest score recorded by surveys administered between 2007 and 2010 to federal agencies with 200 to 10,000 employees.
- BEA increased its survey scores in 11 of 12 dimensions, compared with the 2008 BEA survey.
- BEA's scores were among the highest in the federal government.
- BEA's scores tied or exceeded average private sector scores in 12 of the 15 workplace dimensions.
- BEA's highest scores—in teamwork and in emotional support—reflected a culture in which managers encourage collaboration and communication between work units and employees cooperate and share knowledge within the organization. The high scores also reflect a high level of trust in supervisors, who generally support employees' health and employees' efforts to balance work with other issues.
- BEA's scores were lowest in "flexibility" and in "rewards." In both cases, BEA's scores were comfortably above the median scores.

BEA intends to build on the results of the 2010 survey in an effort to further enhance its workplace. It intends, for example, to ask for employee volunteers to serve on committees to address selected improvement initiatives.

BEA updates book on ITAs concepts and methods

BEA has released an online publication that details the concepts and methodologies used to produce the international transactions accounts (ITAs).

The free publication is available on the BEA Web site, www.bea.gov. The ITAs—along with the related international investment position accounts—rank as one of the preeminent sources of statistics on the international economy, providing detailed information about exports, imports, and cross-border financial flows. The statistics are used by policymakers, academics, journalists, and others to study the economic interaction between the United States and the rest of the world.

This online book first presents the major concepts, definitions, and principles used in the construction of the ITAs and a brief description of the main structure of the accounts. The rest of the book presents an account-by-account description of the estimation methods used in the construction of each account for the components of the current account, the capital account, and the financial account.

GDP and the Economy

Advance Estimates for the Second Quarter of 2011

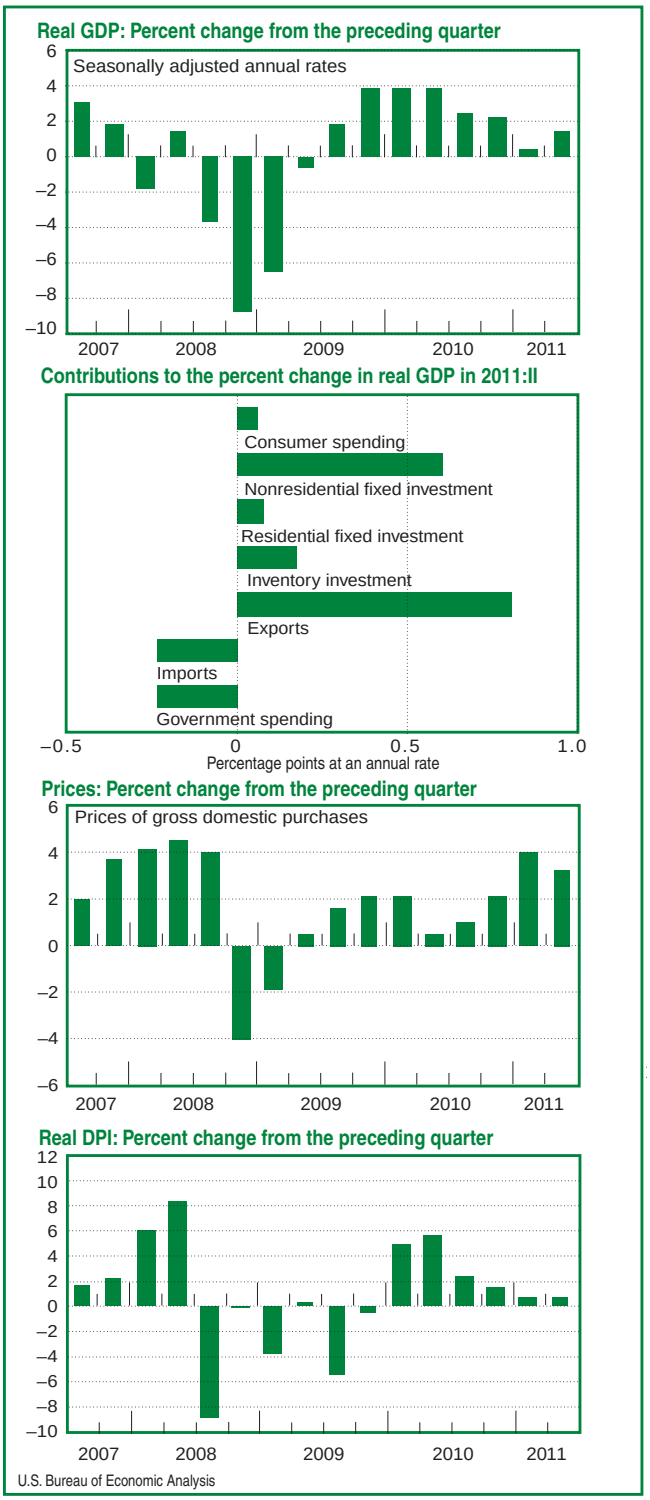
REAL GROSS domestic product (GDP) increased 1.3 percent at an annual rate in the second quarter of 2011, according to the advance estimates of the national income and product accounts (NIPAs) (chart 1 and table 1).[1] In the first quarter of 2011, real GDP increased 0.4 percent (revised).

The NIPA estimates for the first quarter of 2011 and for 2003–2010 have been revised as part of this year's annual NIPA revision. See "Annual Revision of the National Income and Product Accounts" in this issue.

The acceleration in real GDP in the second quarter primarily reflected a deceleration in imports, an upturn in federal government spending, and an acceleration in nonresidential fixed investment that were partly offset by a sharp deceleration in consumer spending.[2]

- Prices of goods and services purchased by U.S. residents increased 3.2 percent in the second quarter after increasing 4.0 percent in the first quarter (see page 3). Energy prices decelerated in the second quarter, and food prices increased at about the same rate as in the first quarter. Excluding food and energy, gross domestic purchases prices increased 2.6 percent after increasing 2.4 percent. The federal pay raise for military personnel had added about 0.1 percentage point to the first-quarter percent change in the gross domestic purchases price index.
- Real disposable personal income (DPI) increased 0.7 percent in the second quarter, the same increase as in the first quarter (see page 4), reflecting a deceleration in current-dollar DPI that was offset by a deceleration in the PCE implicit price deflator used in deriving real DPI. The deceleration in current-dollar DPI reflected a larger deceleration in personal income than in personal current taxes.
- The personal saving rate, personal saving as a percentage of current-dollar DPI, was 5.1 percent in the second quarter; in the first quarter, it was 4.9 percent.

Chart 1. GDP, Prices, Disposable Personal Income (DPI)



1. "Real" estimates are in chained (2005) dollars, and price indexes are chain-type measures. Each GDP estimate for a quarter (advance, second, and third) incorporates increasingly comprehensive and improved source data. More information can be found at www.bea.gov/about/infoqual.htm and www.bea.gov/faq/national/gdp_accuracy.htm. Quarterly estimates are expressed at seasonally adjusted annual rates, which assumes that a rate of activity for a quarter is maintained for a year.

2. In this article, "consumer spending" refers to "personal consumption expenditures (PCE)," "inventory investment" refers to "change in private inventories," and "government spending" refers to "government consumption expenditures and gross investment."

Christopher Swann prepared this article.

Real GDP Overview

Table 1. Real Gross Domestic Product (GDP) and Components

[Seasonally adjusted at annual rates]

	Share of current-dollar GDP (percent)	Change from preceding period (percent)				Contribution to percent change in real GDP (percentage points)			
	2011	2010		2011		2010		2011

Nondefense	2.7	–1.8	3.1	–2.7	–7.3	–0.05	0.09	–0.08	–0.21
State and local	12.0	–0.5	–2.7	–3.4	–3.4	–0.06	–0.33	–0.41	–0.41

1. The estimates of GDP under the contribution columns are also percent changes.

NOTE. Percent changes are from NIPA table 1.1.1, contributions are from NIPA table 1.1.2, and shares are from NIPA table 1.1.10.

Consumer spending slowed in the second quarter, adding 0.07 percentage point to real GDP growth after adding 1.47 percentage points. A downturn in motor vehicles and parts was the largest contributor to the slowdown. Services grew at the same rate as in the first quarter.

Nonresidential fixed investment accelerated, reflecting an upturn in structures that was partly offset by a deceleration in equipment and software.

Residential investment turned up, mainly reflecting an upturn in "other" structures, specifically brokers' commissions on the sale of residential structures and residential improvements.

Inventory investment slowed somewhat, contributing 0.18 percentage point to real GDP growth after contributing 0.32 percentage point.

Exports slowed somewhat. A slowdown in exports of goods was partly offset by a pickup in exports of services.

Imports decelerated sharply, reflecting decelerations in both goods and services. The deceleration in goods imports mainly reflected a downturn in automotive vehicles, engines, and parts, which was affected by supply chain disruptions resulting from the Japanese earthquake and tsunami. Petroleum and products also turned down. In contrast, "other" imports turned up. The slowdown in services mainly reflected a downturn in "other" transportation.

Federal government spending turned up, reflecting an upturn in national defense spending. Federal nondefense spending decreased more than in the first quarter.

State and local government spending decreased the same as in the first quarter. A downturn in consumption expenditures was largely offset by a smaller decrease in gross investment.

Table 2. Real Gross Domestic Product (GDP) by Type of Product

[Seasonally adjusted at annual rates]

	Share of current-dollar GDP (percent)	Change from preceding period (percent)				Contribution to percent change in real GDP (percentage points)			
	2011	2010		2011		2010		2011	
	II	III	IV	I	II	III	IV	I	II
Gross domestic product [1]	**100.0**	**2.5**	**2.3**	**0.4**	**1.3**	**2.5**	**2.3**	**0.4**	**1.3**
Final sales of domestic product	99.5	1.7	4.2	0.0	1.1	1.65	4.14	0.04	1.11
Change in private inventories	0.5	.....	.....	.....	.....	0.86	–1.79	0.32	0.18
Goods	28.2	7.9	5.9	4.9	2.5	2.12	1.63	1.36	0.70
Services	65.1	1.5	1.0	–0.1	1.0	0.98	0.65	–0.05	0.66
Structures	6.7	–8.0	1.0	–13.1	–1.2	–0.59	0.07	–0.95	–0.08
Addenda:									
Motor vehicle output	2.5	14.9	–17.4	59.2	–4.7	0.33	–0.43	1.08	–0.12
GDP excluding motor vehicle output.	97.5	2.2	2.9	–0.7	1.4	2.18	2.78	–0.73	1.40
Final sales of computers	0.6	72.7	64.2	14.7	27.4	0.29	0.29	0.08	0.15
GDP excluding final sales of computers	99.4	2.2	2.1	0.3	1.1	2.22	2.06	0.27	1.14

1. The estimates of GDP under the contribution columns are also percent changes.

NOTE. Percent changes are from NIPA table 1.2.1, contributions are from NIPA table 1.2.2, and shares are calculated from NIPA table 1.2.5.

Real final sales of domestic product, real GDP less inventory investment, increased 1.1 percent in the second quarter after increasing less than 0.1 percent in the first quarter.

Motor vehicle output turned down, subtracting 0.12 percentage point after adding 1.08 percentage points.

Final sales of computers picked up, contributing 0.15 percentage point to real GDP growth after contributing 0.08 percentage point.

Prices

Table 3. Prices for Gross Domestic Purchases

[Percent change at annual rates; based on seasonally adjusted index numbers (2005=100)]

	Change from preceding period (percent)				Contribution to percent change in gross domestic purchases prices (percentage points)			
	2010		2011		2010		2011	
	III	IV	I	II	III	IV	I	II
Gross domestic purchases [1]	**1.0**	**2.1**	**4.0**	**3.2**	**1.0**	**2.1**	**4.0**	**3.2**

Nondefense	1.5	1.1	3.4	3.4	0.04	0.03	0.09	0.09
State and local	0.7	3.8	5.5	4.5	0.09	0.45	0.63	0.51
Addenda:								
Gross domestic purchases:								
Food	0.8	2.4	5.9	5.8	0.04	0.12	0.29	0.29
Energy goods and services	6.1	25.5	42.4	14.8	0.21	0.90	1.49	0.60
Excluding food and energy	0.8	1.2	2.4	2.6	0.71	1.12	2.20	2.33
Personal consumption expenditures (PCE):								
Food and beverages for off-premises consumption	0.3	1.4	6.5	6.4	.....	.....	.....	.....
Energy goods and services	5.6	24.7	40.7	15.0	.....	.....	.....	.....
Excluding food and energy	0.8	0.7	1.6	2.1	.....	.....	.....	.....
Gross domestic product (GDP)	1.4	1.9	2.5	2.3	.....	.....	.....	.....
Exports	0.6	8.6	11.0	8.6	.....	.....	.....	.....
Imports	–2.2	8.4	19.1	12.7	.....	.....	.....	.....

1. The estimates under the contribution columns are also percent changes

NOTE. Most percent changes are from NIPA table 1.6.7; percent changes for PCE for food and energy goods and services and for PCE excluding food and energy are calculated from index numbers in NIPA table 2.3.4. Contributions are from NIPA table 1.6.8. GDP, export, and import prices are from NIPA table1.1.7.

Prices paid by U.S. residents, as measured by the gross domestic purchases price index, slowed in the second quarter. Excluding food and energy, prices picked up slightly. About 0.1 percentage point of the first-quarter increase in the price index had reflected the pay raise for military personnel, which is treated as an increase in the price of employee services purchased by the government.

Consumer prices slowed in the second quarter, reflecting a slowdown in prices paid for goods. The largest contributor to the slowdown in goods prices was a slowdown in prices paid for gasoline and other energy goods. Services prices picked up slightly.

Prices paid for nonresidential fixed investment picked up, reflecting accelerations in prices paid for equipment and software and for structures.

Prices paid for residential investment increased 1.5 percent, the same rate of increase as in the first quarter.

Prices paid by government slowed, reflecting slowdowns in prices paid by both the federal government and by state and local governments. The slowdown in federal government prices followed the first-quarter military pay raise.

Consumer prices excluding food and energy, a measure of the "core" rate of inflation, picked up, increasing 2.1 percent after increasing 1.6 percent.

The GDP price index increased 2.3 percent, 0.9 percentage point less than the increase in the price index for gross domestic purchases, reflecting a smaller increase in export prices (8.6 percent) than in import prices (12.7 percent).

Note on Prices

BEA's gross domestic purchases price index is the most comprehensive index of prices paid by U.S. residents for all goods and services. It is derived from the prices of personal consumption expenditures (PCE), private investment, and government consumption expenditures and gross investment.

BEA also produces price indexes for all components of GDP. The PCE price index is a measure of the total cost of consumer goods and services, including durable goods, nondurable goods, and services. PCE prices for food, energy goods and services, and for all items except food and energy are also estimated and reported. Because prices for food and energy can be volatile, the price measure that excludes food and energy is often used as a measure of underlying, or "core," inflation. (The core PCE price index includes purchased meals and beverages, such as restaurant meals, and pet food. See FAQ 518 on BEA's Web site.)

BEA also prepares a supplemental PCE price index, the "market-based" PCE price index, that is based on market transactions for which there are corresponding price measures. This index excludes many imputed expenditures, such as financial services furnished without payment, that are included in PCE and the PCE price index. BEA also prepares a market-based measure that excludes food and energy.

Personal Income

Table 4. Personal Income and Its Disposition

[Billions of dollars; quarterly estimates are seasonally adjusted at annual rates]

	Level	Change from preceding period

Employee contributions	424.0	2.6	1.5	–98.1	4.9
Social security rate reduction	–105.4	0.0	0.0	–105.4	0.0
In personal current taxes:					
"Making Work Pay" tax credit	0.0	0.0	0.0	38.6	0.0
Refunds, settlements, and other	–93.2	0.0	0.0	50.5	0.0

NOTE. Dollar levels are from NIPA tables 2.1 and 2.2B. CCAdj Capital consumption adjustment
IVA Inventory valuation adjustment

Personal income, which is measured in current dollars, slowed in the second quarter, increasing $132.5 billion after increasing $251.9 billion. The slowdown reflected an upturn in contributions for government social insurance (a subtraction in the calculation of personal income), decelerations in rental income of persons, in wage and salary disbursements, and in supplements to wages and salaries that were partly offset by an upturn in government social benefits to persons.

Wage and salary disbursements slowed, reflecting an extrapolation from a revised first-quarter level of wages, based on the incorporation of partial tabulations from the Bureau of Labor Statistics (BLS) quarterly census of employment, and monthly BLS employment, hours, and earnings for the second quarter.

Supplements to wages and salaries slowed, primarily reflecting a downturn in employer contributions for government social insurance for regular state unemployment programs, reflecting changes in state tax rates and wage caps that had boosted supplements in the first quarter.

Rental income of persons slowed, mainly reflecting a much smaller decrease in contract interest (an expense deducted in the calculation of rental income), reflecting drops in interest rates in the last half of 2010.

Government social benefits to persons turned up, reflecting upturns in "other" government social benefits and in Medicaid and a pickup in social security benefits that were partly offset by a slowdown in Medicare.

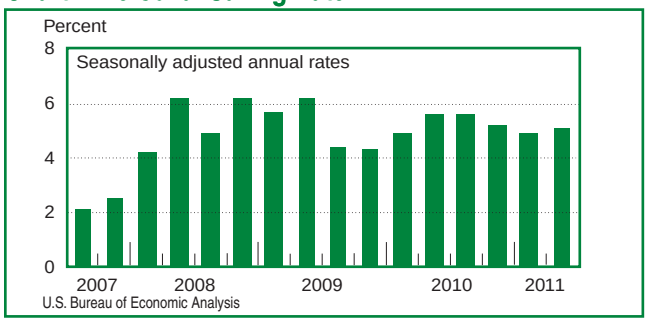
Contributions for government social insurance turned up sharply, mainly reflecting the 2.0 percentage point reduction in the social security contribution rate in the first quarter.

Personal current taxes slowed. The slowdown primarily reflected the January expiration of the Making Work Pay tax credit.

Saving

Personal saving—disposable personal income less personal outlays—was $590.6 billion in the second quarter, an increase of $26.3 billion that followed a first-quarter decrease of $23.8 billion. The upturn in second-quarter personal saving reflected a smaller increase in personal outlays than in disposable personal income.

Chart 2. Personal Saving Rate



Source Data for the Advance Estimates

Table 5. Source Data and Key Assumptions for the Advance Estimates of GDP for the Second Quarter of 2011

[Billions of dollars, seasonally adjusted at annual rates]

	2011					
	Jan.	Feb.	March	April	May	June[1]
Private fixed investment:						
Nonresidential structures:						
Value of new nonresidential construction put in place	244.5	245.3	249.9	245.4	248.3	246.9
Equipment and software:

1. Assumption.
2. Nonmonetary gold is included in balance-of-payments exports and imports, but it is not used directly in estimating exports and imports in the national income and product accounts.

Source Data and Key Assumptions for the Advance Estimates of GDP

While the advance estimates of many components of GDP are based on 3 months of source data, some estimates are based on only 2 months of data. For the following items, the number of months for which data are available is shown in parentheses.

Personal consumption expenditures: sales of retail stores (3), unit auto and truck sales (3), and consumers' shares of auto and truck sales (2);

Nonresidential fixed investment: unit auto and truck sales (3), construction spending (value put in place) (2), manufacturers' shipments of machinery and equipment excluding aircraft (3), shipments of civilian aircraft (2), and exports and imports of machinery and equipment (2);

Residential investment: construction spending (value put in place) (2), single-family housing starts (3), sales of new homes (3), and sales of existing houses (3);

Change in private inventories: trade and nondurable-goods manufacturing inventories (2), durable-goods manufacturing inventories (3), and unit auto and truck inventories (3);

Net exports of goods and services: exports and imports of goods and services (2);

Government consumption expenditures and gross investment: federal outlays (3), state and local government construction spending (value put in place) (2), and state and local government employment (3);

Compensation: employment, average hourly earnings, and average weekly hours (3); and

Prices: consumer price indexes (3), producer price indexes (3), and values and quantities of petroleum imports (2).

Unavailable source data

When source data were unavailable, BEA made various assumptions for June, including the following (table 5):

- A small decrease in nonresidential structures,
- An increase in aircraft shipments,
- An increase in single-family structures and a slight increase in multifamily structures,
- An increase in the change in inventories of nondurable-goods manufacturing industries and an increase in the change in nonmotor vehicle merchant wholesale and retail trade inventories,
- A decrease in exports of goods excluding gold and a larger decrease in imports of goods excluding gold, and
- An increase in state and local government structures.

A more comprehensive list is available on BEA's Web site.

Annual Revision of the National Income and Product Accounts

Annual Estimates for 2003–2010

Quarterly Estimates for 2003:I–2011:I

By Eugene P. Seskin and Shelly Smith

THE BUREAU of Economic Analysis (BEA) released revised estimates of the national income and product accounts (NIPAs) for 2008–2010 and for the first quarter of 2011 on July 29, 2011.[1] In addition to the revisions for these periods, this "flexible" annual revision results in revisions to current-dollar GDP and some components back to the first quarter of 2003.[2] The reference year remains 2005. In cases in which the estimates for the reference year were revised, the levels of the related index numbers and the chained-dollar estimates for the entire historical period are revised, but revisions to percent changes before the first quarter of 2003 are small. As is usual in annual NIPA revisions, these estimates incorporated newly available source data that are more complete, more detailed, and otherwise more reliable than those that were previously incorporated.

This annual revision has not greatly changed the general picture of the economy for the past several years (in keeping with research that shows that annual revisions historically have not greatly changed the overall picture painted by earlier estimates).[3] However, the revised estimates indicate that the depth of the recession was deeper and that the subsequent period of expansion was somewhat less robust. The revised estimates of the change in real GDP show that for the period of contraction from the fourth quarter of 2007 to the second quarter of 2009, real GDP decreased at an average annual rate of 3.5 percent; in the previously published estimates, it had decreased 2.8 percent. For the period of expansion from the second quarter of 2009 to the first quarter of 2011, real GDP increased at an average annual rate of 2.6 percent; in the previously published estimates, it had increased 2.8 percent.[4]

The revised *annual* estimates of prices show similar rates of change to the previously published estimates for the featured price indexes. However, the *quarterly* estimates of the rates of change for the GDP price index show notable and mostly offsetting revisions because of a change in methodology for estimating real petroleum imports (see page 27).

GDP highlights

By historical standards, the revisions to year-to-year percent changes in real GDP are typical for 2008 and 2010; however, the downward revision of 0.9 percentage point for 2009 is large. In the annual NIPA revisions since 1982, the revisions (without regard to sign) to the annual estimates have averaged 0.3 percentage point. The following are highlights of this annual revision.

- From 2007 to 2010, real GDP decreased at an average annual rate of 0.3 percent; in the previously published estimates, the rate of change in real GDP was less than 0.1 percent.[5] From the fourth quarter of 2007 to the first quarter of 2011, real GDP *decreased* at an average annual rate of 0.2 percent; in the previously published estimates, real GDP had *increased* at an average annual rate of 0.2 percent (table 1).
- The percent change in real GDP from the preceding year was revised down from a decrease of less than 0.1 percent to a decrease of 0.3 percent for 2008, was revised down from a 2.6 percent decrease to a 3.5

1. Information about the structure, definitions, presentation, and methodologies that underlie the NIPAs is available on BEA's Web site; go to www.bea.gov, and click on "Methodology Papers."

2. Flexible annual revisions that include revisions for longer periods than the traditional 3-year period were described in the June 2008 Survey of Current Business at www.bea.gov/scb.

3. BEA judges the accuracy of the estimates by whether they present the same general picture of economic activity as previous estimates in terms of long-term growth rates, trends in key components of GDP, broad features of the business cycle, including the timing and depth of recessions, the strength of recoveries, the major components contributing to growth and to contractions, and the pattern of quarterly growth. For more about the accuracy of annual revisions, see Dennis J. Fixler, Ryan Greenaway-McGrevy, and Bruce T. Grimm, "Revisions to GDP, GDI, and Their Major Components," Survey 91 (July 2011): 9–31.

4. For more on this annual revision and the 2007–2009 recession and recovery, see FAQs 1003 and 1004 on BEA's Web site.

5. The annual revisions to real GDP reflect revised current-dollar estimates, revised prices used for deflation, and revised quantities used to estimate components of real GDP by extrapolation or direct valuation. For estimates prepared by extrapolation or direct valuation, the current-dollar and chained-dollar estimates are based on independent source data; consequently, the corresponding revisions are unrelated. For a list of these components, see table 2 in "Updated Summary NIPA Methodologies," Survey 90 (November 2010): 25–29.

Alyssa E. Holdren contributed to this article.

percent decrease for 2009, and was revised up from a 2.9 percent increase to a 3.0 percent increase for 2010 (chart 1 and pages 9 and 10).

- From fourth quarter to fourth quarter, the percent change in real GDP was revised down from a 2.8 percent decrease to a 3.3 percent decrease for 2008, was revised down from a 0.2 percent increase to a 0.5 percent decrease for 2009, and was revised up from a 2.8 percent increase to a 3.1 percent increase for 2010.
- The revisions to the fourth-quarter-to-fourth-quarter rates of change in real GDP reflect revisions to the quarters within the years. For 2008, the annual rates of change in real GDP for the first quarter and the fourth quarter were revised down 1.1 percentage points and 2.1 percentage points, respectively, while the rates of change for the second quarter and the third quarter were revised up 0.7 percentage point and 0.3 percentage point, respectively. For 2009, the revision reflected downward revisions to the annual rates of change in real GDP of 1.8 percentage points and 1.2 percentage points for the first quarter and the fourth quarter, respectively; the rate for the second quarter was unrevised, and the rate for the third quarter was revised up only 0.1 percentage point. For 2010, the annual rates of change in real GDP for the first quarter and the second quarter were revised up 0.2 percentage point and 2.1 percentage points, respectively, and the rates of change for the third quarter and the fourth quarter were revised down 0.1 percentage point and 0.8 percentage point, respectively.

Gross national product	0.2	–0.2	–0.4
Gross domestic income	0.1	0.0	–0.1

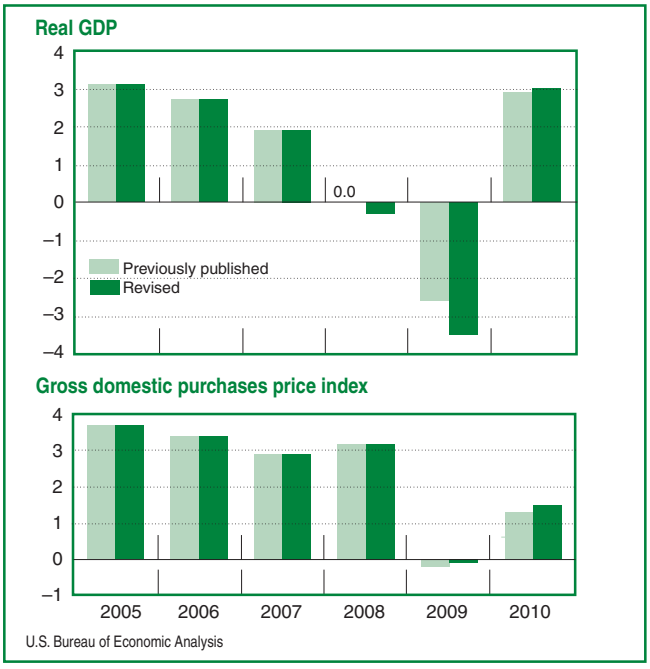
Price highlights

The revised annual estimates of prices show similar rates of change to the previously published estimates.

- The percent change from the preceding year in the price index for gross domestic purchases was unrevised at 3.2 percent for 2008, was revised up from a decrease of 0.2 percent to a decrease of 0.1 percent for 2009, and was revised up from an increase of 1.3 percent to an increase of 1.5 percent for 2010. The percent change from the preceding year in the price index for GDP was unrevised at 2.2 percent for 2008, was revised up 0.2 percentage point to 1.1 percent for 2009, and was revised up 0.2 percentage point to 1.2 percent for 2010 (chart 1 and table 2).[6]
- From the fourth quarter of 2007 to the first quarter of 2011, the average annual rate of increase in the price index for gross domestic purchases was revised up from

6. For a discussion of the difference between the gross domestic purchases price index and the GDP price index, see the box "Note on Prices" on page 3 in this issue.

Chart 1. Revisions to Annual Percent Changes in Real GDP and Gross Domestic Purchases Price Index



1.4 percent to 1.6 percent, and the average annual rate of increase in the GDP price index was revised up from 1.4 percent to 1.5 percent. The average annual rate of increase in the price index for personal consumption expenditures (PCE) was revised up from 1.6 percent to 1.7 percent, and the rate of increase in the "core" PCE price index (which excludes food and energy) was revised up from 1.5 percent to 1.6 percent.

Income and saving highlights

- From 2007 to 2010, real disposable personal income (DPI) grew at an average annual rate of 0.6 percent; in the previously published estimates, real DPI had grown at an average annual rate of 1.2 percent.
- Personal saving was revised up $144.4 billion for 2008, was revised down $102.7 billion for 2009, and was revised down $61.1 billion for 2010. Personal saving as a percentage of disposable personal income was revised up 1.3 percentage points to 5.4 percent for 2008, was revised down 0.8 percentage point to 5.1 percent for 2009, and was revised down 0.4 percentage point to 5.3 percent for 2010.
- National income was revised up $51.3 billion (or 0.4 percent) for 2008, was revised down $77.4 billion (or 0.6 percent) for 2009, and was revised up $18.5 billion (or 0.1 percent) for 2010.
- Corporate profits was revised down $14.4 billion (or 1.1 percent) for 2008, was revised up $104.0 billion (or 8.3 percent) for 2009, and was revised up $175.3 billion (or 10.8 percent) for 2010.

Improvements

These estimates also reflect a number of improvements in methodology and presentation that are discussed on pages 25–27. These improvements include the following:

- Incorporating data from the Census Bureau annual and monthly retail trade and food services surveys and from the service annual survey that have been benchmarked to the 2007 Economic Census, as well as economic census data for merchandise lines back to 2003.
- Incorporating improved quality-adjusted price indexes for deflating communication equipment in private fixed investment, in exports, and in imports back to 2003.
- Improving the method of seasonally adjusting real petroleum imports back to 2007.
- Improving the presentation of government social benefits in the personal income and outlays tables.

This article discusses the impact of the revisions on key NIPA measures, summarizes the revisions to the major aggregates, lists the major source data incorporated, and describes the changes in methodology and presentation. Appendix A presents the revised annual estimates and the revisions for the seven summary accounts of the NIPAs (see pages 29 and 30). In addition, tables presenting revised monthly, quarterly, and annual NIPA estimates and the "advance" estimates for the second quarter of 2011 are presented in "National Income and Product Accounts Tables" in this issue.

1. Percent change from the preceding period.

The annual percent change in real GDP was revised down from a decrease of less than 0.1 percent to a decrease of 0.3 percent for 2008, was revised down from a 2.6 percent decrease to a 3.5 percent decrease for 2009, and was revised up from a 2.9 percent increase to a 3.0 percent increase for 2010.

- For 2008, the largest contributors to the downward revision to the percent change in real GDP were downward revisions to PCE, to nonresidential fixed investment, and to state and local government spending.

- For 2009, the largest contributors to the downward revision to the percent change in real GDP were downward revisions to PCE, to private inventory investment, and to nonresidential fixed investment and an upward revision to imports.

- For 2010, the largest contributors to the upward revision to the percent change in real GDP were upward revisions to private inventory investment and to PCE. The contributions of these components were partly offset by downward revisions to nonresidential fixed investment, to state and local government spending, to residential fixed investment, and to exports.

Annual Estimates of Real GDP

Nondefense	–0.8	6.7	6.5	–0.2
State and local	1.4	0.3	0.0	–0.3

For 2008, the downward revision to PCE for services was to financial services and insurance (mainly health insurance) and to "other" services (mainly "net foreign travel").

The downward revision to investment in equipment and software reflected downward revisions to all categories of information processing equipment and software (computers and peripherals, software, and "other").

The downward revision to state and local government spending was mostly accounted for by a downward revision to consumption expenditures.

National defense	7.5	5.4	5.8	0.4
Nondefense	6.5	6.5	6.5	0.0
State and local	0.0	–0.9	–0.9	0.0

For 2009, the downward revision to PCE for goods was to both durable goods (mainly recreational goods and vehicles and "other" durable goods) and to nondurable goods (widespread).

The downward revision to PCE for services reflected downward revisions to financial services and insurance (specifically, "financial services furnished without payment" and portfolio management and investment advice services), recreation services, and "other" services.

The downward revision to nonresidential structures was widespread.

The downward revision to investment in equipment and software was more than accounted for by a downward revision to information processing equipment and software.

For 2010, the upward revision to PCE for services reflected upward revisions to "other" services (mainly, communication services), recreation services, financial services and insurance, and food services and accommodations.

The downward revision to investment in nonresidential structures reflected downward revisions to petroleum and natural gas drilling and to power structures.

The downward revision to residential investment was to structures (mainly residential improvements).

The downward revision to state and local government spending reflected downward revisions to consumption expenditures and to gross investment (specifically, investment in structures).

1. Percentage points.

Annual Price Indexes

Revisions to the chain-type price indexes result from the incorporation of newly available and revised source data and from the regularly scheduled incorporation of annual weights for the most recent year (2010). In this annual revision, the source data for price indexes that are used for deflation and the source data that affect implicit prices were revised.[1] The prices used for deflation also reflect updated seasonal factors, including the improved seasonal adjustment of imports of petroleum. In addition, improved price indexes for deflating PCE for property and casualty insurance and for deflating communication equipment in private fixed investment, in exports, and in imports have been incorporated. (See "Changes in Methodology and Presentation" on pages 25–27.)

The percent change from the preceding year in the price index for gross domestic purchases was unrevised at 3.2 percent for 2008, was revised up 0.1 percentage point to –0.1 percent for 2009, and was revised up 0.2 percentage point to 1.5 percent for 2010 (see chart 1 and table 5). The annual percent change in the price index for GDP was unrevised at 2.2 percent for 2008, was revised up 0.2 percentage point to 1.1 percent for 2009, and was revised up 0.2 percentage point to 1.2 percent for 2010 (see the addendum to table 5).

For 2008, the price index for gross domestic purchases was unrevised, reflecting offsetting revisions. The most notable revision was an upward revisions to the price index for fixed investment in equipment and software. The largest contributor to this revision was communication equipment prices, based on the incorporation of improved quality-adjusted price indexes (see page 26).

For 2009, the largest contributors to the upward revision to the price index for gross domestic purchases were the price index for fixed investment in equipment and software, prices associated with private inventory investment, and the price index for PCE for services. The revision to the price index for fixed investment in equipment and software again reflected the newly incorporated price indexes for communication equipment. The revision to the prices associated with private inventory investment reflected an upward revision to the prices of nondurable-goods manufacturing inventories (mainly petroleum and coal products). The revision to the price index for PCE for services primarily reflected an upward revision to the price index for financial services and insurance, mainly reflecting an upward revision to the prices of "financial services furnished without payment."

For 2010, the largest contributors to the upward revision were the price index for PCE for services and the price index for federal government spending. The revision to the price index for PCE for services again mainly reflected an upward revision to the prices of "financial services furnished without payment." The revision to the price index for federal government spending was in both defense and nondefense spending and reflected upward revisions to the implicit prices for compensation.

1. The implicit prices are computed by dividing the current-dollar estimates by the chained-dollar estimates that are derived from the quantity data used in quantity extrapolation and direct valuation. Thus, differences between the current-dollar revisions and the chained-dollar revisions to these components are reflected as revisions to their implicit prices.

1. Percent change from the preceding period.

Quarterly Estimates

Revisions to the quarterly (and monthly) NIPA estimates reflect (1) revisions to the annual estimates that reflect the incorporation of newly available annual source data, (2) the incorporation of newly available and revised monthly and quarterly source data (including updated seasonal factors that are used to indicate quarterly patterns), and (3) methodology improvements (see "Changes in Methodology and Presentation").

Real GDP. The revisions to the 13 quarterly percent changes (at annual rates) from the fourth quarter of 2007 to the first quarter of 2011 averaged 0.9 percentage point (without regard to sign). (In the annual NIPA revisions since 1979, the revisions to the quarterly estimates have averaged 0.7 percentage point.)

The quarterly revisions did not change the direction of change (increase or decrease) in real GDP for any quarter. The quarterly percent change in real GDP was revised down for 7 of the 13 quarters, was revised up for 5 of the 13 quarters, and was unrevised for 1 quarter. The largest downward revision to the percent change in real GDP was 2.1 percentage points to –8.9 percent for the fourth quarter of 2008. The largest contributors to the revision were an upward revision to imports (mostly accounted for by petroleum imports) and a downward revision to PCE (widespread within services and goods); these revisions were partly offset by an upward revision to private inventory investment.[1] The largest upward revision to the quarterly percent change in real GDP was 2.1 percentage points to 3.8 percent for the second quarter of 2010. The largest contributors to the revision were a downward revision to imports (the largest contributor was again petroleum imports) and an upward revision to PCE (the largest contributors were "other" services and recreation services).

Prices. In general, the quarterly percent changes for gross domestic purchases prices were similar to the previously published estimates; the revisions to the 13 quarterly percent changes (at annual rates) from the fourth quarter of 2007 to the first quarter of 2011 averaged 0.1 percentage point (without regard to sign). The price index was revised up for 8 quarters, was revised down for 1 quarter, and was unrevised for 4 quarters. The largest upward revision was 0.4 percentage point to both the fourth quarter of 2008 and the second quarter of 2010. For the fourth quarter of 2008, the percent change in the index was revised from –4.4 percent to –4.0 percent; the largest contributors to the revision were prices for PCE for services (mainly health care prices and prices for foreign travel by U.S. residents), prices associated with private inventory investment (mainly prices of petroleum and coal products in nondurable-goods manufacturing), and prices of equipment and software (the largest contributor being communication equipment). For the second quarter of 2010, the percent change in the index was revised from 0.1 percent to 0.5 percent; the largest contributor to the revision was prices for PCE for services (which was more than accounted for by financial services and insurance—mainly "financial services furnished without payment").

The quarterly percent changes for GDP prices were revised much more than those for gross domestic purchases prices. For GDP prices, the revisions to the 13 quarterly percent changes (at annual rates) from the fourth quarter of 2007 to first quarter of 2011 averaged 0.8 percentage point (without regard to sign). The percent change was revised up for seven quarters and was revised down for six quarters. The largest upward revision was 1.7 percentage points, from a decrease of 1.2 percent to an increase of 0.5 percent, for the fourth quarter of 2008; the largest contributor to the revision was imports of goods (more than accounted for by petroleum imports). The largest downward revision was 1.4 percentage points, from 4.5 percent to 3.1 percent, for the third quarter of 2008; the largest contributor to the revision was again petroleum imports.

1. For more on the revision history for the fourth quarter of 2008, see FAQ 1003 on BEA's Web site.

Current-Dollar NIPA Measures

This table shows NIPA components with revisions of $5.0 billion or more (in absolute value) for 2008–2010. The table also lists the major source data that were incorporated as part of this annual revision. Note that the incorporation of newly available and revised source data for a year usually results in a revision to the level of an estimate both for that year and for subsequent years.

Line	NIPA component	Billions of dollars: Revision in level 2008	2009	2010	Revised 2010 level	Major source data incorporated [1]
29	Services	–71.2	–101.9	–64.9	6,858.5	
30	Household consumption expenditures (for services)	–76.8	–123.4	–80.0	6,578.3	
31	Housing and utilities	–2.1	–4.7	–7.5	1,893.2	
32	Housing	–3.3	–6.7	–7.5	1,583.8	
	Of which:					
33	Rental of tenant-occupied nonfarm housing	4.0	7.1	4.2	359.4	Revised Census Bureau Current Population Survey/Housing Vacancy Survey (CPS/HVS) data for 2008 and 2009; new Census Bureau American Housing Survey (AHS) data for 2009; new CPS/HVS data for 2010.
34	Imputed rental of owner-occupied nonfarm housing	–5.4	–10.9	–9.1	1,203.1	Revised CPS/HVS data for 2008 and 2009; new AHS data for 2009; revised BEA constant-dollar stock data for 2009; new BEA constant-dollar stock data for 2010; new CPS/HVS data for 2010.
35	Household utilities	1.1	2.0	0.0	309.4	
36	Health care	–14.6	–19.0	–20.3	1,667.4	
	Of which:					
37	Physician services [2]	–4.6	–8.4	–15.2	391.9	Revised Census Bureau Service Annual Survey (SAS) taxable and tax-exempt revenue data for 2008 and 2009; new SAS data for 2010.
38	Paramedical services [2]	–12.2	–13.1	–17.8	269.1	Revised SAS taxable and tax-exempt revenue data for 2008 and 2009; new SAS data for 2010.
39	Hospitals [2]	–3.6	–4.0	6.9	756.4	Revised SAS taxable and tax-exempt revenue data for 2008 and 2009; new SAS data for 2010.
40	Nursing homes [2]	5.9	7.1	5.2	144.0	Revised SAS taxable and tax-exempt revenue data for 2008 and 2009; new SAS data for 2010.
41	Transportation services	–1.0	–3.0	–4.2	295.5	
	Of which:					
42	Motor vehicle maintenance and repair [2]	–0.5	–3.2	–6.9	153.0	Revised SAS taxable revenue data for 2008 and 2009; revised ARTS data for 2008; new ARTS data for 2009; new SAS data for 2010; revised MRTS data for 2010.
43	Recreation services	–1.5	–7.6	2.1	382.6	
	Of which:					
44	Membership clubs, sports centers, parks, theaters, and museums [2]	5.7	5.1	7.3	136.3	Revised SAS taxable and tax-exempt revenue data for 2008 and 2009; new SAS data for 2010.
45	Gambling [2]	–8.1	–11.3	–8.9	99.6	Revised SAS taxable revenue data for 2008 and 2009; new SAS data for 2010.
46	Other recreational services [2]	3.8	2.2	4.2	44.1	Revised SAS taxable revenue data for 2008 and 2009; new SAS data for 2010.
47	Food services and accommodations	7.0	6.7	11.6	638.0	
48	Food services [2]	1.9	–1.0	2.2	547.4	
49	Accommodations [2]	5.1	7.7	9.3	90.6	Revised ARTS data for 2008; new ARTS data for 2009; new BEA international transactions accounts estimates of nonresident spending for 2010.
50	Financial services and insurance	–41.1	–66.0	–40.4	780.2	
51	Financial services furnished without payment	–8.0	–16.8	10.5	287.9	Revised IRS data on regulated investment companies for 2008; new IRS data for 2009; new FRB flow of funds data for 2010; new trade source data on investment company securities for 2010.
52	Financial service charges, fees, and commissions [2]	–1.2	–6.9	–4.6	226.6	Revised SAS product revenue data on portfolio management and investment advice for 2008 and 2009; new SAS data for 2010.
53	Insurance	–32.0	–42.3	–46.2	265.8	
	Of which:					
54	Net health insurance [3]	–32.1	–40.8	–45.4	119.9	Revised benefits-to-premiums ratio based on new trade source data on medical insurance for 2008 and 2009; new trade source data for 2010.
55	Other services	–23.4	–29.7	–21.2	921.4	
	Of which:					
56	Telecommunication services [2]	–5.0	–9.8	–8.7	161.1	Revised SAS product revenue data for 2008 and 2009; new SAS data for 2010.
57	Internet access [2]	0.4	0.9	8.3	53.8	Revised SAS product revenue data for 2008 and 2009; new SAS data for 2010.
58	Professional and other services [2]	–3.0	–4.7	–6.6	163.3	Revised SAS taxable and tax-exempt revenue data for 2008 and 2009; new SAS data for 2010.
59	Personal care and clothing services [2]	–9.7	–11.9	–9.9	112.2	Revised SAS taxable revenue data for 2008 and 2009; new SAS data for 2010.

See the footnotes and abbreviations at the end of the table.

66	Structures	3.9	–1.7	–9.1	374.4	
	Of which:					
67	Power	0.0	–1.5	–4.5	61.7	Revised Census Bureau construction spending (value put in place) data for 2009 and 2010.
68	Petroleum and natural gas	4.2	3.1	–4.8	97.6	Revised trade source data on footage drilled for 2008–2010; revised Census Bureau Annual Capital Expenditures Survey (ACES) data for 2008; new ACES data for 2009; revised BLS producer price indexes for 2010.
69	Equipment and software	–12.9	–9.8	–16.1	1,015.7	
70	Information processing equipment and software	–13.5	–26.7	–47.1	543.8	
	Of which:					
71	Computers and peripheral equipment	–3.7	–4.4	–3.6	93.8	Revised Census Bureau Annual Survey of Manufactures (ASM) data for 2008; new ASM data for 2009; revised Census Bureau monthly industry shipments data for 2010.
72	Software	–2.5	–7.0	–25.3	257.9	Revised Census Bureau Service Annual Survey (SAS) revenue data for 2008 and 2009; new SAS data for 2010; new BLS Occupational Employment Survey data for 2010.
73	Communication equipment	–2.2	–4.2	–4.3	83.8	Revised Census Bureau ASM data for 2008; new ASM data for 2009; revised Census Bureau monthly industry shipments data for 2010.
74	Medical equipment and instruments	–5.2	–7.6	–9.6	72.1	Revised Census Bureau ASM data for 2008; new ASM data for 2009; revised Census Bureau monthly industry shipments data for 2010.
75	Industrial equipment	0.8	5.8	7.9	168.6	
	Of which:					
76	General industrial, including materials handling, equipment	1.2	5.0	6.1	60.6	Revised Census Bureau ASM data for 2008; new ASM data for 2009; revised Census Bureau monthly industry shipments data for 2010.
77	Transportation equipment	–0.3	1.4	9.7	122.7	
	Of which:					
78	Light trucks (including utility vehicles)	–0.2	–1.4	4.9	31.0	Revised trade source data on average expenditure for 2008–2009; revised trade source data on business registrations for 2010.
79	Other equipment	1.6	12.0	17.6	191.5	
	Of which:					
80	Construction machinery	2.4	6.9	10.6	35.4	Revised Census Bureau ASM data for 2008; new ASM data for 2009; revised Census Bureau monthly industry shipments data for 2010.
81	Residential	–0.1	2.6	–2.4	338.1	
82	Structures	0.0	2.8	–2.1	329.2	
83	Residential equipment	0.0	–0.2	–0.2	8.9	
84	Change in private inventories	0.0	–33.6	–4.8	66.9	
85	Farm	0.0	–5.6	–8.1	–1.6	Revised USDA data for 2008 and 2009; new USDA data for 2010.
86	Nonfarm	0.0	–27.9	3.4	68.6	
87	Change in book value	3.6	–7.6	1.4	117.6	
88	Mining, utilities, and construction	2.2	–3.4	–1.9	–2.0	Revised IRS tabulations of corporate tax return data on inventory book values for 2008; new IRS tabulations of corporate and of sole proprietorship and partnership tax return data for 2009.
89	Manufacturing	0.5	11.3	2.5	42.4	Revised Annual Survey of Manufactures (ASM) data on inventory book values for 2008; new ASM data for 2009; revised Census Bureau monthly inventory data for 2010.

See the footnotes and abbreviations at the end of the table.

252	*Equals:* Personal saving	144.4	–102.7	–61.1	592.8	

1. In these descriptions, "new" indicates this is the first time that data from the specific source are being incorporated into the component estimate for the given year, and "revised" indicates that data from the specific source were incorporated previously and now revised data from that source are being incorporated.

2. Revisions also reflect revisions to earlier years. Revised estimates begin with 2003, based on revised Census Bureau data from the Annual Retail Trade Survey and the Service Annual Survey that were benchmarked to the 2007 Economic Census, and on updated merchandise-line data from the 2007 Economic Census.

3. Revisions also reflect revisions to earlier years. Revised estimates begin with 2003, reflecting revised benefits-to-premiums ratios based on new trade source data on insurance.

4. For more information on the revisions to the International Transactions Accounts, see Mai-Chi Hoang and Erin M. Whitaker, "Annual Revision of the U.S. International Transactions Accounts," Survey of Current Business 91 (July 2011): 47–61.

5. The statistical discrepancy is gross domestic product (GDP) less gross domestic income (GDI); it is also the difference between gross national product (GNP) and gross national income (GNI), which is GDI plus net income receipts from the rest of the world. The statistical discrepancy arises because the product-side measures of GDP and GNP are estimated independently from the income-side measures of GDI and GNI.

Effects of the "Flexible" Annual Revision in Earlier Periods

As noted earlier, as part of this "flexible" annual revision, current-dollar GDP and some components were revised back to 2003. For 2003–2007, the annual percent change in real GDP was unrevised for all years except for 2004, when the growth rate was revised from 3.6 percent to 3.5 percent.

During this earlier period, current-dollar GDP for 2004–2007 was revised down; for 2003, current-dollar GDP was revised up only $0.1 billion. For 2003–2007, the most notable revisions were to PCE for services, which was revised down each year. The revisions primarily reflected the incorporation of data from the 2008 and 2009 Census Bureau Service Annual Surveys that were benchmarked to the 2007 Economic Census and of data from A.M. Best that were used to estimate medical and hospitalization insurance.[1] For 2007, an offsetting downward revision to petroleum imports reflected the incorporation of revised data from BEA's international transactions accounts.

As a result of these revisions, for 2004–2007, personal saving and the personal saving rate were revised up (see the addenda in table 8).

1. For more information, see "PCE insurance estimates" on pages 25 and 26.

1. See the box "The Statistical Discrepancy" in Robert P. Parker and Eugene P. Seskin, "Annual Revision of the National Income and Product Accounts," Survey 77 (August 1997): 19.

CCAdj Capital consumption adjustment

IVA Inventory valuation adjustment

For the most recent 3 years, national income was revised up $51.3 billion for 2008, was revised down $77.4 billion for 2009, and was revised up $18.5 billion for 2010. Gross domestic income (GDI) was revised up $61.5 billion for 2008, was revised down $78.4 billion for 2009, and was revised up $23.5 billion for 2010.

- For 2008, the revision to national income reflected upward revisions to net interest and miscellaneous payments, to supplements to wages and salaries, and to rental income of persons with capital consumption adjustment (CCAdj).
- The upward revisions were partly offset by downward revisions to corporate profits with inventory valuation adjustment (IVA) and CCAdj and to wage and salary accruals.
- The statistical discrepancy, the difference between GDI and GDP, was revised from 1.0 percent of GDP to less than 0.1 percent of GDP for 2008.

- For 2009, the revision to national income reflected large downward revisions to net interest and miscellaneous payments and to nonfarm proprietors' income.
- The downward revisions were partly offset by a large upward revision to corporate profits with IVA and CCAdj and an upward revision to rental income of persons with CCAdj.
- The statistical discrepancy was revised from 1.3 percent of GDP to 0.6 percent of GDP for 2009.

- For 2010, the revision to national income reflected large upward revisions to corporate profits with IVA and CCAdj and to rental income of persons with CCAdj.
- The upward revisions were partly offset by a large downward revision to net interest and miscellaneous payments and smaller downward revisions to nonfarm proprietors' income with IVA and CCAdj and to supplements to wages and salaries.
- The statistical discrepancy was revised from 1.1 percent of GDP to less than 0.1 percent of GDP for 2010.

Discontinuities in NIPA Foreign Transactions

The revisions to net exports of goods and services reflect the annual revision of BEA's international transactions accounts (ITAs), which incorporated new and updated source data.[1]

For most components, the revisions to the ITAs for 2008–2010 were incorporated into the NIPAs at their "best level." However, revised ITA estimates for petroleum imports were incorporated into the NIPAs beginning with 2007 (see "Seasonal adjustment of petroleum imports" on page 27).[2] As a result, there are small discontinuities between the NIPA estimates for 2007 and those for 2008 (table 10) and somewhat larger discontinuities within these categories for the estimates of goods and services due to reclassifications (see "Foreign transactions" on pages 26 and 27).

For current-dollar net exports of goods and services (and for current-dollar GDP), the change from 2007 to 2008 was overstated by $4.5 billion.

1. See Mai-Chi Hoang and Erin M. Whitaker, "Annual Revision of the U.S. International Transactions Accounts," SURVEY 91 (July 2011): 47–61.

2. The revisions to the remaining ITA components for years before 2008 will be incorporated in a future NIPA revision.

Source Data and Data Availability

Source Data Incorporated in the 2011 Annual Revision

In this annual revision, PCE is revised back to 2003 to incorporate source data from the 2007 Economic Census (specifically, data on merchandise lines) and data from the Census Bureau annual and monthly retail trade and food services surveys and from the Census Bureau service annual survey that were benchmarked to the 2007 Economic Census.

In addition, the annual revision incorporated data from the following major federal statistical sources: Census Bureau annual surveys of manufactures for 2008 (revised) and 2009 (preliminary); Census Bureau annual surveys of merchant wholesale trade and of retail trade for 2008 (revised) and for 2009 (preliminary); Census Bureau revised monthly indicators of manufactures, of merchant wholesale trade, and of retail trade for 2008–2010; Census Bureau service annual surveys for 2008 (revised), 2009 (revised), and 2010 (preliminary); annual surveys of state and local government finances for fiscal years 2007 (revised), 2008 (revised), and 2009 (preliminary); Census Bureau monthly survey of construction spending (value put in place) for 2009 and 2010 (revised); Census Bureau quarterly services survey for 2008–2010 (revised); Census Bureau current population survey/housing vacancy survey for 2010; federal government budget data for fiscal years 2010 and 2011; Internal Revenue Service tabulations of tax returns for corporations for 2008 (revised) and 2009 (preliminary) and for sole proprietorships and partnerships for 2009; Bureau of Labor Statistics (BLS) quarterly census of employment and wages for 2008–2010 (revised); BLS occupational employment survey data for 2010; Department of Agriculture farm statistics for 2008–2010 (revised); and BEA's international transactions accounts for 2008–2010 (revised).

Data Availability

An extensive set of estimates is presented in "National Income and Product Accounts" in this issue. These estimates and annual estimates for 1929 forward and quarterly estimates for 1947 forward are available on BEA's Web site at www.bea.gov.

Selected revised NIPA estimates and related estimates will be published in upcoming issues of the Survey. The September Survey will present the following NIPA tables: tables 3.15–3.17 (government spending by function) and table 7.15 (which shows the relationship between net farm income in the NIPAs and net farm income from the USDA). It will also present new estimates of fixed assets and consumer durable goods beginning with 2000.[1]

The October Survey will present the following NIPA tables: table 3.18 (reconciliation of NIPA federal government estimates with federal budget data), tables 3.20 and 3.21 (state government and local government current receipts and expenditures), and tables 3.22 and 3.23 (federal government and state and local government current receipts and expenditures seasonally unadjusted estimates). It will also present real inventories, sales, and inventory-sales ratios for manufacturing and trade for the fourth quarter of 2007 through the second quarter of 2011. In addition, revised estimates of state personal income that incorporate the results of this annual revision of the NIPAs will be presented.

The November Survey will feature the "Updated Summary of NIPA Methodologies," which lists the principal source data and estimating methods that are used in preparing the current-dollar and real estimates of GDP. In addition, NIPA table 2.9 (personal income by households and by nonprofit institutions serving households) and table 7.20 (nonprofits reconciliation table) will be presented.

NIPA table 3.19 (reconciliation of NIPA state and local government estimates with Census Bureau data) will be presented in the Survey soon after the data become available.

1. BEA's Web site will present revisions to the fixed assets accounts, beginning with 1901 for investment and 1925 for stocks and depreciation.

Changes in Methodology and Presentation

As part of the annual revision of the NIPAs, a number of changes in methodology and presentation have been incorporated.[1]

Personal consumption expenditures (PCE). Beginning with the first quarter of 2003, the estimates of PCE reflect the incorporation of (1) data from the Census Bureau annual and monthly retail trade and food services surveys and from the service annual survey that have been benchmarked to the 2007 Economic Census and (2) economic census data for merchandise lines back to 2003.

Most of the estimates of PCE for goods use a retail control methodology, in which merchandise-line (or product-line) sales at various types of retail businesses are used to weight retail sales. These merchandise-line sales are based on data from the quinquennial economic census. In general, product-based data on consumer spending are not available between censuses, and estimates for detailed PCE categories are prepared by extrapolating retail sales by kind of business using the merchandise-line data from the most recent economic census. Merchandise-line data from the 2007 Economic Census became available at the end of 2010. To more accurately reflect consumer spending patterns, BEA has incorporated these data in this flexible annual revision rather than waiting until the next comprehensive revision of the NIPAs, which is scheduled for 2013.

Similarly, the data from the annual retail trade survey and the service annual survey were benchmarked to the 2007 Economic Census this spring, and BEA has also incorporated these benchmarked surveys in this flexible annual revision. In addition, BEA has updated the "retail control group"—the PCE categories to which the control total (total retail sales) must sum. Food services industries have been removed from the control group to reflect the reclassification of food service categories from goods to services during the 2009 comprehensive revision.[2] For goods bought at grocery stores and various types of electronic stores, categories are better aligned with the retail point-of-sale scanner data now used to annually update merchandise-line allocations. Together, the incorporation of the recently released data and the updated control group will improve the accuracy of the PCE estimates and will reduce future revisions.

PCE insurance estimates. As part of the 2003 comprehensive NIPA revision, the methodology for estimating property and casualty insurance services was changed.[3] The estimates of net property and casualty insurance services are computed as total premiums minus expected losses, where total premiums consist of direct premium payments and net investment income on funds attributed to policyholders; expected losses are estimated using the framework of adaptive expectations. The difference between the expected losses and the actual losses is the net settlements of insurance services, which is recorded in the national accounts as transfer payments between business (insurers) and consumers (policyholders).

As part of this annual revision, for various types of property and casualty insurance services, beginning with the estimates for 2008, a consistent single-deflation method is used to deflate both total premiums and expected losses, based on corresponding producer price indexes (PPIs).

Previously, the estimates of net premiums and losses for some insurance services, such as private automobile insurance, were deflated using a single deflator based on consumer price indexes (CPIs), while the estimates of other insurance services, such as household insurance, were deflated using a double-deflation method with separate CPIs to deflate premiums and losses. The PPIs are more suitable for deflating insurance services than the CPIs because PPIs track changes in the total revenue received by insurers—both the total direct premiums and the investment income received by insurers.

For medical care and hospitalization insurance services, beginning with the estimates for 2003, timely and comprehensive source data from A.M. Best are incorporated to improve the annual estimates. These insurance services are estimated as premiums less benefits (or claims). First, A.M. Best data on annual premiums and benefits for private health insurance and for Medicare Advantage Plans and Medicaid Managed Care programs are used to derive an annual benefits-to-premiums ratio. Second, *total* annual premiums are estimated using data from the Medical Expenditures Panel Survey (MEPS)

1. These changes update the information in the two tables that were published in "Updated Summary NIPA Methodologies" in the November 2010 SURVEY; these tables will be updated in the November 2011 SURVEY.

2. The current estimate of PCE for purchased meals and beverages continues to be extrapolated by sales at food services and drinking places from the Census Bureau's monthly retail trade survey.

3. See Baoline Chen and Dennis J. Fixler, "Measuring the Services of Property-Casualty Insurance in the NIPAs: Changes in Concepts and Methods," SURVEY 83 (October): 10–26.

Changes in Methodology and Presentation

and from the Office of Personnel Management (OPM) on federal employees' health insurance, and these data are supplemented by the A.M Best premiums data for Medicare Advantage Plans and Medicaid Managed Care Programs.[4] Third, total annual insurance benefits are derived by applying the benefits-to-premiums ratio to the total premiums estimate.

Previously, medical care and hospitalization insurance benefits were derived using a benefits-to-premiums ratio that was based on benefits and premiums data from the Census Bureau's economic census. This ratio was held constant between census years, and the annual insurance estimates were derived by applying the ratio to annual premiums data from the MEPS and OPM, which did not cover premiums earned by private insurance carriers for Medicare Advantage Plans or for Medicaid Managed Care Programs.

Current quarterly and monthly estimates of medical care and hospitalization insurance benefits continue to be judgmental extrapolations and interpolations of the annual estimates.

Expanded use of QSS data. As part of the 2005 annual revision, BEA began incorporating data from the Census Bureau's quarterly services survey (QSS) into its estimates. Since then, the Census Bureau has expanded the coverage of the survey. Beginning with estimates for the first quarter of 2011, BEA is incorporating newly available QSS data on "other financial investment activities" into the quarterly estimates of PCE for portfolio management and investment advice services. Previously, the monthly and quarterly PCE estimates were extrapolated using 3-month moving averages of total weekly earnings data from BLS for the portfolio management and investment advice industries. About 40 percent of the quarterly estimates of PCE for services is now based on the QSS data.[5] As the Census Bureau expands the QSS to cover more industries, BEA will continue to incorporate the newly available quarterly data in order to continue to improve the estimates of PCE for services.

Communication equipment prices. In the 2010 annual revision, BEA adopted three quality-adjusted price indexes from the Federal Reserve Board's (FRB) industrial production index program to deflate business purchases of several types of communication equipment.[6] (A fourth index was already being used to deflate data networking equipment.) The FRB indexes account for changes in product quality better than the previously used price indexes, which were based on PPIs and international price indexes. As part of this year's annual revision, beginning with the estimates for the first quarter of 2003, FRB price indexes having more comprehensive product coverage are used to deflate these communication equipment estimates. However, because the FRB indexes are not available for the current quarterly estimates, the PPI for host computers will continue to be used as an indicator to extrapolate the price indexes for these types of equipment. For consistency, the adoption of the improved FRB price indexes (including the index for data networking equipment) has been carried back to the first quarter of 2003 for the deflation of exports and imports of communication equipment—the lowest deflation-level detail and a component of "other" capital goods.

Foreign transactions. BEA's international transactions accounts (ITAs) are the primary source data for foreign transactions in the NIPAs. As part of this year's annual revision of the ITAs, several types of foreign transactions were reclassified, and other important changes were made as part of a multiyear effort to modernize and enhance the accounts and to align them with updated guidelines for international economic accounts.[7] Several of these changes affect NIPA foreign transactions and are incorporated, beginning with the estimates for 2008:

- Reclassification of cruise fares in exports and imports of services from passenger fares to travel,
- Reclassification of postal services in exports and imports of services from U.S. government miscellaneous services, a subcomponent of "other" services, to "other" transportation services,
- Reclassification of fees for the rights to distribute film and television recordings from "other" private services to royalties and license fees,
- Exclusion of expenditures of foreign nationals working at international organizations in the United States from

4. The MEPS is conducted by the Census Bureau for the Department of Health and Human Services and provides national and state estimates of premiums for employer-sponsored health insurance coverage for private- and public-sector employers.

5. For a detailed list of the PCE components that are estimated using the QSS, see FAQ 315 on BEA's Web site.

6. See Eugene P. Seskin and Shelly Smith, "Annual Revision of the National Income and Product Accounts," Survey 90 (August 2010): 23.

7. For further details on these changes, see Hoang and Whitaker.

Changes in Methodology and Presentation

"other" private services and inclusion of their compensation in compensation of employees, and

- Change in the recording of U.S. government income on holdings and allocations of special drawing rights from a net basis to a gross basis.

Seasonal adjustment of petroleum imports. As part of the 2009 comprehensive revision, BEA began seasonally adjusting petroleum import prices and began deriving seasonally adjusted real petroleum imports by deflation because oil prices exhibited a seasonal pattern: prices for the second and third quarters tended to be higher than the prices for the first and fourth quarters.[8] However, more recent analysis has shown that the extreme volatility in petroleum prices, particularly during 2007–2009, substantially affected the estimated seasonal factors for recent periods. To improve the seasonal adjustment, beginning with the first quarter of 2007, the estimates of real petroleum imports are derived by directly seasonally adjusting the quantity data for imported petroleum from BEA's ITAs at the detailed end-use level (crude oil, fuel oil, other petroleum products, and liquefied petroleum gases). Both the chained-dollar values of petroleum imports at the detailed end-use level, which are derived by direct valuation, and the corresponding current-dollar estimates are also revised, beginning with the estimates for the first quarter of 2007; all the other revisions associated with the ITAs are incorporated on a "best-level" basis beginning with the estimates for the first quarter of 2008.[9] (See "Discontinuities in NIPA Foreign Transactions" on page 23.)

State and local government investment in motor vehicles. Beginning with 2008, the annual and current quarterly estimates of state and local government expenditures on motor vehicles, which account for about 30 percent of state and local government investment in equipment, reflect motor vehicle registration data from a trade source and average purchase price information developed at BEA. Previously, the annual estimates were derived from Census Bureau government finances data that are available with a 2-year lag. Specifically, annual motor vehicle investment was estimated as a proportion of total equipment expenditures from the government finances data based on information from BEA's input-output accounts. Current quarterly estimates were based on a judgmental trend of the annual estimates.

Rental income of persons. Beginning with 2008, the estimates of rental income of persons reflect an improved methodology for calculating the effective rate of interest on mortgage debt outstanding, which is used to derive the estimates of mortgage interest paid—the largest expense deducted in the calculation of rental income. The new method is based on up-to-date monthly mortgage servicing data on detailed loan characteristics, including loan type, loan performance, current interest rate, and unpaid balance. Previously, the effective rate of interest was based on a perpetual inventory of mortgage loans with interest payments by mortgage type calculated on the debt outstanding for each quarter's (past and current) loan originations. This reliance on aggregate loan information required a number of assumptions in the calculation of the effective rate of interest. The use of the newly incorporated loan-specific information provides a more accurate picture of loan performance in the mortgage market and will improve the estimates of mortgage interest paid.

This change in the methodology for deriving mortgage interest paid is also reflected in the revised annual and quarterly estimates of net interest and personal interest income and the extrapolation of the current monthly and quarterly estimates of these components.

Presentation of government social benefits. In tables 2.1 and 2.6, which show personal income and its components, a new, consistent presentation of government social benefits focuses on the largest and most significant programs: social security, Medicare, Medicaid, unemployment insurance, veterans benefits, and "other" benefits. Previously, social security and Medicare were shown as "old-age, survivors, disability, and health insurance benefits," and Medicaid was part of "other" benefits. In addition, for consistency, unemployment compensation for ex-service members is now classified as unemployment insurance benefits in these tables. Previously, in these tables, it was included as veterans benefits, but in table 3.12 (government social benefits), it was included as unemployment insurance of federal employees. In addition, in table 3.12 "old-age, survivors, and disability insurance" is now shown as "social security," and "hospital and supplementary medical insurance" is now shown as "Medicare."

Acknowledgments

Brent R. Moulton, Associate Director for National Economic Accounts, supervised the preparation of this year's annual revision of the national income and product accounts. Pamela A. Kelly, Chief of the Government Division, and Robert J. Kornfeld, Deputy Chief of the National Income and Wealth Division, directed major parts of the revision. Carol E. Moylan, Associate Director for Industry Accounts and former Chief of the National Income and Wealth Division, directed the early planning of the revision.

BEA staff who made significant contributions to the revision are listed below.

Estimate coordination and review: David F. Sullivan, Alyssa E. Holdren, Eugene P. Seskin, Shelly Smith, David B. Wasshausen.

Personal consumption expenditures: Michael Armah. *Goods:* Harvey L. Davis, Jr., Yukun Fung, Megan E. Groll, Everette P. Johnson, Danit E. Kanal. *Services:* Kyle J. Brown, Robert N. Ganz III, Christina D. Hovland, Teresita D. Teensma, Matthew D. Tschetter.

Investment and Foreign transactions: Jennifer A. Ribarsky. *Inventories, foreign transactions, and prices:* Harry Johnson, Jr., Michael M. Cortez, Marissa J. Crawford, Jeff Hall, Corttney C. Penberthy, Enrico Tan. *Structures, equipment and software:* Jeffrey W. Crawford, Velma P. Henry, Lindsay Orphanides, Marlyn Rodriguez, Linden L. Webber.

Federal government: Benjamin A. Mandel, Peter G. Beall, Stan J. Bellotti, Andrew P. Cairns, Andrea L. Cook, Raymen G. LaBella, Mark S. Ludwick, Ann Miller, Kyle D. Mulgrew, Farah Naz, Michelle D. Robinson, Mary L. Roy, Benyam Tsehaye, Andrew E. Vargo, Bryan Williams, Keith Zipay.

State and local government: Bruce E. Baker, Steven J. Andrews, Michelle S. Grier, Natalie M. Hayes, Angela C. Padalecki, Brian E. Parks.

Personal income: Kurt Kunze. *Employee compensation:* Janet H. Kmitch, Elizabeth C. Bernstein, James E. Rankin, Kate L. Shoemaker, Brian J. Smith. *Business income:* Howard I. Krakower, Andrew W. Hodge, M. Greg Key, Martin L. Simmons, Jerry L. Stone, Garth K. Trinkl, Dennis R. Weikel. *Property income:* Michael N. Hayes, Louise V. Lusby, Denise A. McBride, Charles S. Robinson, Andrew G. Schmidt, Elizabeth M. Terroni.

Consumption of fixed capital: Private: David B. Wasshausen, Michael T. Cusick, Michael D. Glenn, Lisa A. Lynn, Nadia F.P. Sadée. *Government:* Jennifer A. Bennett, Mark A. Bailey, Mark A. Ledbetter, Christopher B. Mbu.

Computer systems and operations: Brendan J. Leary, Michael J. Boehm, Wanda Y. Chambers, Benjamin D. Cowan, Scott G. He, Douglas J. Klear, Sung H. Lee, Ethan C. Lincoln, Sandip Mehta, Ross F. Metzger, Michael J. Ocasio, Andrew J. Pinard, James J. Raley III, Michael D. Randall, Karl V. Rohrer, David Rozenshtein.

Supplemental review materials: Duane G. Hackmann, Virginia H. Mannering, Kristina L. Maze, Bonnie A. Retus, David F. Sullivan.

NIPA information: Stephen H. Andrews, Debra M. Blagburn, Lisa S. Mataloni.

Secretarial and program assistance: Esther M. Carter, Katherine Dent, Beverly B. Goodwin, Angela P. Pointer.

Other contributors to the statistical improvements include Baoline Chen and Brian K. Sliker.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Table 3.10.4. Price Indexes for Government Consumption Expenditures and General Government Gross Output

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Table 3.10.6. Real Government Consumption Expenditures and General Government Gross Output, Chained Dollars

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

Table 3.11.4. Price Indexes for National Defense Consumption Expenditures and Gross Investment by Type

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

To the rest of the world [12]	43	**13.3**	**15.5**	**16.1**	**16.6**

1. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.
2. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.
3. Consists of payments for medical services for dependents of active duty military personnel at nonmilitary facilities.
4. Consists of mustering out pay, terminal leave pay, and adjusted compensation benefits.
5. Prior to October 2008, benefits for the Supplemental Nutrition Assistance Program were called Food Stamp benefits.
6. Refundable tax credits represent the outlays that are distributed to an individual when the amount of federal refundable tax credits exceeds the individual's federal income tax liabilities. Refundable tax credits include the federal earned income tax credit, the child tax credit, the health coverage tax credit, and, beginning in 2009, the Making Work Pay tax credit, the American opportunity tax credit, and the government retiree tax credit, as well as credits for alternative minimum tax payments made in prior years.
7. Consists largely of payments to nonprofit institutions, aid to students, and payments for medical services for retired military personnel and their dependents at nonmilitary facilities.
8. Consists of general medical assistance and state child health care programs.
9. Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.
10. Consists of expenditures for food under the supplemental program for women, infants, and children; foster care; adoption assistance; and payments to nonprofit welfare institutions.
11. Consists largely of veterans' benefits, Alaska dividends, and crime-victim payments.
12. Consists of federal government social benefits to the rest of the world and includes benefits paid to individuals in the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands.

Table 3.13. Subsidies

[Billions of dollars]

	Line	2007	2008	2009	2010
Subsidies	1	**54.6**	**52.9**	**59.7**	**57.3**

National Income and Product Accounts Tables

This set of national income and product accounts (NIPAs) tables presents the most recent estimates of gross domestic product (GDP) and its components released on July 29, 2011. These estimates include the advance estimate for the second quarter of 2011 and preliminary estimates for June 2011 for the monthly series. Tables in this section also incorporate estimates from the 2011 annual revision of the NIPAs.

In addition to the regular revision of estimates for the most recent 3 years and for the first quarter of 2011, this "flexible" annual revision includes revisions to current-dollar GDP and some components back to the first quarter of 2003. When estimates for the reference year (2005) were revised, the result was revisions to the levels of the related index numbers and chained-dollar estimates for the entire historical period; revisions to the percent changes before the first quarter of 2003 were small and were affected only by rounding and interpolation.

For additional information on this year's annual revision, see the article "Annual Revision of the National Income and Product Accounts" in this issue. The complete set of NIPA estimates is posted on BEA's Web site at www.bea.gov.

Some tables from the annual revision will be published in future issues of the Survey of Current Business. Tables 3.15–3.17 and 7.15 are scheduled for publication in the September 2011 issue. Tables 3.18B and 3.20–3.23 are scheduled for the October 2011 issue, and tables 2.9 and 7.20 will be published in the November 2011 issue. Table 3.19 will be published soon after the release of data by the Census Bureau.

Complete historical estimates for many important NIPA series are presented in "GDP and Other Major NIPA Series, 1929–2011:II" in this issue.

Summary Tables

A. Summary National Income and Product Accounts, 2010 38

1. Domestic Product and Income

1.1.1. Percent Change From Preceding Period in Real Gross Domestic Product 40
1.1.2. Contributions to Percent Change in Real Gross Domestic Product 40
1.1.3. Real Gross Domestic Product, Quantity Indexes 41
1.1.4. Price Indexes for Gross Domestic Product 41
1.1.5. Gross Domestic Product 42
1.1.6. Real Gross Domestic Product, Chained Dollars 42
1.1.7. Percent Change From Preceding Period in Prices for Gross Domestic Product 43
1.1.8. Contributions to Percent Change in the Gross Domestic Product Price Index 43
1.1.9. Implicit Price Deflators for Gross Domestic Product 44
1.1.10. Percentage Shares of Gross Domestic Product 44
1.1.11. Real Gross Domestic Product: Percent Change From Quarter One Year Ago 45
1.2.1. Percent Change From Preceding Period in Real Gross Domestic Product by Major Type of Product 46
1.2.2. Contributions to Percent Change in Real Gross Domestic Product by Major Type of Product 46
1.2.3. Real Gross Domestic Product by Major Type of Product, Quantity Indexes 47
1.2.4. Price Indexes for Gross Domestic Product by Major Type of Product 47
1.2.5. Gross Domestic Product by Major Type of Product 48
1.2.6. Real Gross Domestic Product by Major Type of Product, Chained Dollars 48
1.3.1. Percent Change From Preceding Period in Real Gross Value Added by Sector 49
1.3.3. Real Gross Value Added by Sector, Quantity Indexes 49
1.3.4. Price Indexes for Gross Value Added by Sector 49
1.3.5. Gross Value Added by Sector 50
1.3.6. Real Gross Value Added by Sector, Chained Dollars 50
1.4.1. Percent Change From Preceding Period in Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers 50
1.4.3. Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers, Quantity Indexes 51

1.4.4. Price Indexes for Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers 51
1.4.5. Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers 51
1.4.6. Relation of Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers, Chained Dollars 51
1.5.1. Percent Change From Preceding Period in Real Gross Domestic Product, Expanded Detail 52
1.5.2. Contributions to Percent Change in Real Gross Domestic Product, Expanded Detail 53
1.5.3. Real Gross Domestic Product, Expanded Detail, Quantity Indexes 54
1.5.4. Price Indexes for Gross Domestic Product, Expanded Detail 55
1.5.5. Gross Domestic Product, Expanded Detail 56
1.5.6. Real Gross Domestic Product, Expanded Detail, Chained Dollars 57
1.6.4. Price Indexes for Gross Domestic Purchases 58
1.6.7. Percent Change From Preceding Period in Prices for Gross Domestic Purchases 59
1.6.8. Contributions to Percent Change in the Gross Domestic Purchases Price Index 60
1.7.1. Percent Change From Preceding Period in Real Gross Domestic Product, Real Gross National Product, and Real Net National Product 61
1.7.3. Real Gross Domestic Product, Real Gross National Product, and Real Net National Product, Quantity Indexes 61
1.7.4. Price Indexes for Gross Domestic Product, Gross National Product, and Net National Product 61
1.7.5. Relation of Gross Domestic Product, Gross National Product, Net National Product, National Income, and Personal Income 62
1.7.6. Relation of Real Gross Domestic Product, Real Gross National Product, and Real Net National Product, Chained Dollars 63
1.8.3. Command-Basis Real Gross Domestic Product and Gross National Product, Quantity Indexes 63
1.8.6. Command-Basis Real Gross Domestic Product and Gross National Product, Chained Dollars 64
1.9.3. Real Net Value Added by Sector, Quantity Indexes 65
1.9.4. Price Indexes for Net Value Added by Sector 65
1.9.5. Net Value Added by Sector 65
1.9.6. Real Net Value Added by Sector, Chained Dollars 65
1.10. Gross Domestic Income by Type of Income 66
1.11. Percentage Shares of Gross Domestic Income 66
1.12. National Income by Type of Income 67
1.13. National Income by Sector, Legal Form of Organization, and Type of Income 68
1.14. Gross Value Added of Domestic Corporate Business in Current Dollars and Gross Value Added of Nonfinancial Domestic Corporate Business in Current and Chained Dollars 69
1.15. Price, Costs, and Profit Per Unit of Real Gross Value Added of Nonfinancial Domestic Corporate Business 70
1.16. Sources and Uses of Private Enterprise Income 70

2. Personal Income and Outlays

2.1. Personal Income and Its Disposition 71
2.2B. Wage and Salary Disbursements by Industry 72
2.3.1. Percent Change From Preceding Period in Real Personal Consumption Expenditures by Major Type of Product 72
2.3.2. Contributions to Percent Change in Real Personal Consumption Expenditures by Major Type of Product 73
2.3.3. Real Personal Consumption Expenditures by Major Type of Product, Quantity Indexes 74
2.3.4. Price Indexes for Personal Consumption Expenditures by Major Type of Product 75
2.3.5. Personal Consumption Expenditures by Major Type of Product 76
2.3.6. Real Personal Consumption Expenditures by Major Type of Product, Chained Dollars 77
2.3.7. Percent Change from Preceding Period in Prices for Personal Consumption Expenditures by Major Type of Product 78
2.4.3. Real Personal Consumption Expenditures by Type of Product, Quantity Indexes 79
2.4.4. Price Indexes for Personal Consumption Expenditures by Type of Product 80

2.4.5. Personal Consumption Expenditures by Type of Product 81
2.4.6. Real Personal Consumption Expenditures by Type of Product, Chained Dollars 82
2.5.3. Real Personal Consumption Expenditures by Function, Quantity Indexes 83
2.5.4. Price Indexes for Personal Consumption Expenditures by Function 84
2.5.5. Personal Consumption Expenditures by Function 85
2.5.6. Real Personal Consumption Expenditures by Function, Chained Dollars 86
2.6. Personal Income and Its Disposition, Monthly 87
2.7B. Wage and Salary Disbursements by Industry, Monthly 92
2.8.1. Percent Change From Preceding Period in Real Personal Consumption Expenditures by Major Type of Product, Monthly 93
2.8.3. Real Personal Consumption Expenditures by Major Type of Product, Monthly, Quantity Indexes 94
2.8.4. Price Indexes for Personal Consumption Expenditures by Major Type of Product, Monthly 95
2.8.5. Personal Consumption Expenditures by Major Type of Product, Monthly 96
2.8.6. Real Personal Consumption Expenditures by Major Type of Product, Monthly, Chained Dollars 97
2.8.7. Percent Change from Preceding Period in Prices for Personal Consumption Expenditures by Major Type of Product, Monthly 98
2.9. Personal Income and Its Disposition by Households and by Nonprofit Institutions Serving Households ..... *

3. Government Current Receipts and Expenditures

3.1. Government Current Receipts and Expenditures 99
3.2. Federal Government Current Receipts and Expenditures 100
3.3. State and Local Government Current Receipts and Expenditures 101
3.4. Personal Current Tax Receipts 102
3.5. Taxes on Production and Imports 102
3.6. Contributions for Government Social Insurance 102
3.7. Government Current Transfer Receipts 103
3.8. Current Surplus of Government Enterprises 103
3.9.1. Percent Change From Preceding Period in Real Government Consumption Expenditures and Gross Investment 103
3.9.2. Contributions to Percent Change in Real Government Consumption Expenditures and Gross Investment 104
3.9.3. Real Government Consumption Expenditures and Gross Investment, Quantity Indexes 104
3.9.4. Price Indexes for Government Consumption Expenditures and Gross Investment 105
3.9.5. Government Consumption Expenditures and Gross Investment 105
3.9.6. Real Government Consumption Expenditures and Gross Investment, Chained Dollars 106
3.10.1. Percent Change From Preceding Period in Real Government Consumption Expenditures and General Government Gross Output 107
3.10.3. Real Government Consumption Expenditures and General Government Gross Output, Quantity Indexes 108
3.10.4. Price Indexes for Government Consumption Expenditures and General Government Gross Output 109
3.10.5. Government Consumption Expenditures and General Government Gross Output 110
3.10.6. Real Government Consumption Expenditures and General Government Gross Output, Chained Dollars 111
3.11.1. Percent Change From Preceding Period in Real National Defense Consumption Expenditures and Gross Investment by Type 112
3.11.3. Real National Defense Consumption Expenditures and Gross Investment by Type, Quantity Indexes 113
3.11.4. Price Indexes for National Defense Consumption Expenditures and Gross Investment by Type 114
3.11.5. National Defense Consumption Expenditures and Gross Investment by Type 115
3.11.6. Real National Defense Consumption Expenditures and Gross Investment by Type, Chained Dollars 116
3.12. Government Social Benefits 117
3.13. Subsidies 117

* This table is scheduled to be published in an upcoming issue. Please see the introduction.

3.14. Government Social Insurance Funds Current Receipts and Expenditures 117
3.15.1. Percent Change From Preceding Period in Real Government Consumption Expenditures and Gross Investment by Function ..... *
3.15.2. Contributions to Percent Change From Preceding Period in Real Government Consumption Expenditures and Gross Investment by Function ..... *
3.15.3. Real Government Consumption Expenditures and Gross Investment by Function, Quantity Indexes ..... *
3.15.4. Price Indexes for Government Consumption Expenditures and Gross Investment by Function ..... *
3.15.5. Government Consumption Expenditures and Gross Investment by Function ..... *
3.15.6. Real Government Consumption Expenditures and Gross Investment by Function, Chained Dollars ..... *
3.16. Government Current Expenditures by Function ..... *
3.17. Selected Government Current and Capital Expenditures by Function ..... *
3.18B. Relation of Federal Government Current Receipts and Expenditures in the National Income and Product Accounts to the Budget, Fiscal Years and Quarters ..... *
3.19. Relation of State and Local Government Current Receipts and Expenditures in the National Income and Product Accounts to Bureau of Census *Government Finances* Data, Fiscal Years ..... *
3.20. State Government Current Receipts and Expenditures ..... *
3.21. Local Government Current Receipts and Expenditures ..... *
3.22. Federal Government Current Receipts and Expenditures, Not Seasonally Adjusted ..... *
3.23. State and Local Government Current Receipts and Expenditures, Not Seasonally Adjusted ..... *

4. Foreign Transactions

4.1. Foreign Transactions in the National Income and Product Accounts 118
4.2.1. Percent Change From Preceding Period in Real Exports and in Real Imports of Goods and Services by Type of Product 119
4.2.2. Contributions to Percent Change in Real Exports and in Real Imports of Goods and Services by Type of Product 120
4.2.3. Real Exports and Imports of Goods and Services by Type of Product, Quantity Indexes 121
4.2.4. Price Indexes for Exports and Imports of Goods and Services by Type of Product 122
4.2.5. Exports and Imports of Goods and Services by Type of Product 123
4.2.6. Real Exports and Imports of Goods and Services by Type of Product, Chained Dollars 124
4.3B. Relation of Foreign Transactions in the National Income and Product Accounts to the Corresponding Items in the International Transactions Accounts 125

5. Saving and Investment

5.1. Saving and Investment by Sector 126
5.2.3. Real Gross and Net Domestic Investment by Major Type, Quantity Indexes 127
5.2.5. Gross and Net Domestic Investment by Major Type 127
5.2.6. Real Gross and Net Domestic Investment by Major Type, Chained Dollars 128
5.3.1. Percent Change From Preceding Period in Real Private Fixed Investment by Type 129
5.3.2. Contributions to Percent Change in Real Private Fixed Investment by Type 130
5.3.3. Real Private Fixed Investment by Type, Quantity Indexes 131
5.3.4. Price Indexes for Private Fixed Investment by Type 132
5.3.5. Private Fixed Investment by Type 133
5.3.6. Real Private Fixed Investment by Type, Chained Dollars 134
5.4.1 Percent Change From Preceding Period in Real Private Fixed Investment in Structures by Type 135
5.4.2 Contributions to Percent Change in Real Private Fixed Investment in Structures by Type 135
5.4.3 Real Private Fixed Investment in Structures by Type, Quantity Indexes 136
5.4.4 Price Indexes for Private Fixed Investment in Structures by Type 136

* This table is scheduled to be published in an upcoming issue. Please see the introduction.

5.4.5 Private Fixed Investment in Structures by Type 137
5.4.6 Real Private Fixed Investment in Structures by Type, Chained Dollars 137
5.5.1. Percent Change From Preceding Period in Real Private Fixed Investment in Equipment and Software by Type 138
5.5.2. Contributions to Percent Change in Real Private Fixed Investment in Equipment and Software by Type 138
5.5.3. Real Private Fixed Investment in Equipment and Software by Type, Quantity Indexes 138
5.5.4. Price Indexes for Private Fixed Investment in Equipment and Software by Type 138
5.5.5. Private Fixed Investment in Equipment and Software by Type 139
5.5.6. Real Private Fixed Investment in Equipment and Software by Type, Chained Dollars 139
5.6.5B Change in Private Inventories by Industry 140
5.6.6B Change in Real Private Inventories by Industry, Chained Dollars 140
5.7.5B Private Inventories and Domestic Final Sales by Industry 141
5.7.6B Real Private Inventories and Real Domestic Final Sales by Industry, Chained Dollars 142
5.7.9B Implicit Price Deflators for Private Inventories by Industry 142
5.8.3B Real Gross Government Fixed Investment by Type, Quantity Indexes 143
5.8.4B Price Indexes for Gross Government Fixed Investment by Type 143
5.8.5B Gross Government Fixed Investment by Type 144
5.8.6B Real Gross Government Fixed Investment by Type, Chained Dollars 144
5.9. Changes in Net Stock of Produced Assets (Fixed Assets and Inventories) 145
5.10. Capital Transfers Paid and Received, by Sector and by Type 146

6. Income and Employment by Industry

6.1D. National Income Without Capital Consumption Adjustment by Industry 147
6.2D. Compensation of Employees by Industry 148
6.3D. Wage and Salary Accruals by Industry 149
6.4D. Full-Time and Part-Time Employees by Industry 150
6.5D. Full-Time Equivalent Employees by Industry 151
6.6D. Wage and Salary Accruals Per Full-Time Equivalent Employee by Industry 152
6.7D. Self-Employed Persons by Industry 153
6.8D. Persons Engaged in Production by Industry 154
6.9D. Hours Worked by Full-Time and Part-Time Employees by Industry 155
6.10D. Employer Contributions for Government Social Insurance by Industry 155
6.11D. Employer Contributions for Employee Pension and Insurance Funds by Industry and by Type 156
6.12D. Nonfarm Proprietors' Income by Industry 156
6.13D. Noncorporate Capital Consumption Allowances by Industry 156
6.14D. Inventory Valuation Adjustment to Nonfarm Incomes by Legal Form of Organization and by Industry 157
6.15D. Net Interest by Industry 157
6.16D. Corporate Profits by Industry 157
6.17D. Corporate Profits Before Tax by Industry 158
6.18D. Taxes on Corporate Income by Industry 159
6.19D. Corporate Profits After Tax by Industry 160
6.20D. Net Corporate Dividend Payments by Industry 161
6.21D. Undistributed Corporate Profits by Industry 162
6.22D. Corporate Capital Consumption Allowances by Industry 163

7. Supplemental Tables

7.1. Selected Per Capita Product and Income Series in Current and Chained Dollars 164

Table A. Summary National Income and Product Accounts, 2010

[Billions of dollars]

Account 1. Domestic Income and Product Account

Line		
1	Compensation of employees, paid	7,980.6
2	Wage and salary accruals	6,417.5
3	Disbursements (3–12 plus 5–11)	6,417.5
4	Wage accruals less disbursements (4–9 plus 6–13)	0.0
5	Supplements to wages and salaries (3–14)	1,563.1
6	Taxes on production and imports (4–16)	1,054.0
7	*Less:* Subsidies (4–8)	57.3
8	Net operating surplus	3,673.5
9	Private enterprises (2–19)	3,689.2
10	Current surplus of government enterprises (4–26)	–15.7
11	Consumption of fixed capital (6–15)	1,874.9
12	**Gross domestic income**	**14,525.7**
13	Statistical discrepancy (6–21)	0.8
14	**GROSS DOMESTIC PRODUCT**	**14,526.5**

Line		
15	Personal consumption expenditures (3–3)	10,245.5
16	Goods	3,387.0
17	Durable goods	1,085.5
18	Nondurable goods	2,301.5
19	Services	6,858.5
20	Gross private domestic investment	1,795.1
21	Fixed investment (6–2)	1,728.2
22	Nonresidential	1,390.1
23	Structures	374.4
24	Equipment and software	1,015.7
25	Residential	338.1
26	Change in private inventories (6–4)	66.9
27	Net exports of goods and services	–516.9
28	Exports (5–1)	1,839.8
29	Imports (5–9)	2,356.7
30	Government consumption expenditures and gross investment (4–1 plus 6–3)	3,002.8
31	Federal	1,222.8
32	National defense	819.2
33	Nondefense	403.6
34	State and local	1,780.0
35	**GROSS DOMESTIC PRODUCT**	**14,526.5**

Account 2. Private Enterprise Income Account

Line		
1	Income payments on assets	2,366.5
2	Interest and miscellaneous payments (3–20 and 4–21)	2,178.8
3	Dividend payments to the rest of the world (5–14)	93.8
4	Reinvested earnings on foreign direct investment in the United States (5–15)	93.9
5	Business current transfer payments (net)	136.7
6	To persons (net) (3–24)	38.3
7	To government (net) (4–24)	99.0
8	To the rest of the world (net) (5–19)	–0.6
9	Proprietors' income with inventory valuation and capital consumption adjustments (3–17)	1,036.4
10	Rental income of persons with capital consumption adjustment (3–18)	350.2
11	Corporate profits with inventory valuation and capital consumption adjustments	1,800.1
12	Taxes on corporate income	411.1
13	To government (4–17)	387.4
14	To the rest of the world (5–19)	23.6
15	Profits after tax with inventory valuation and capital consumption adjustments	1,389.1
16	Net dividends (3–21 plus 4–22)	737.3
17	Undistributed corporate profits with inventory valuation and capital consumption adjustments (6–12)	651.7
18	**USES OF PRIVATE ENTERPRISE INCOME**	**5,690.0**

Line		
19	Net operating surplus, private enterprises (1–9)	3,689.2
20	Income receipts on assets	2,000.8
21	Interest (3–20)	1,431.2
22	Dividend receipts from the rest of the world (5–6)	215.9
23	Reinvested earnings on U.S. direct investment abroad (5–7)	353.8
24	**SOURCES OF PRIVATE ENTERPRISE INCOME**	**5,690.0**

Account 3. Personal Income and Outlay Account

Line		
1	Personal current taxes (4–15)	1,193.9
2	Personal outlays	10,586.9
3	Personal consumption expenditures (1–15)	10,245.5
4	Personal interest payments (3–20)	173.4
5	Personal current transfer payments	168.0
6	To government (4–25)	95.1
7	To the rest of the world (net) (5–17)	72.9
8	Personal saving (6–11)	592.8
9	**PERSONAL TAXES, OUTLAYS, AND SAVING**	**12,373.5**

Line		
10	Compensation of employees, received	7,971.4
11	Wage and salary disbursements	6,408.2

Account 7. Foreign Transactions Capital Account

Line			Line		
			2	Capital account transactions (net) (6–5)	0.7
			3	Transfer payments for catastrophic losses (net) (6–6)	0.0
			4	Other capital account transactions (6–7)	0.7
			5	Net lending or net borrowing (–), national income and product accounts (6–8)	–479.9
1	**BALANCE ON CURRENT ACCOUNT, NATIONAL INCOME AND PRODUCT ACCOUNTS (5–20)**	**–479.2**	6	**CAPITAL ACCOUNT TRANSACTIONS (NET) AND NET LENDING, NATIONAL INCOME AND PRODUCT ACCOUNTS**	**–479.2**

NOTE. Numbers in parentheses indicate accounts and items of counterentry in the accounts. For example, line 5 of account 1 is shown as "Supplements to wages and salaries (3–14)"; the counterentry is shown in account 3, line 14.

1. Domestic Product and Income

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Food excludes personal consumption expenditures for purchased meals and beverages, which are classified in food services.
2. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

NOTE. Percent changes for real estimates are calculated from corresponding quantity indexes presented in NIPA tables 1.1.3, 1.2.3, 1.4.3, and 1.7.3. Percent changes in price estimates are calculated from corresponding price indexes presented in NIPA tables 1.1.4, 1.6.4, and 2.3.4.

1. Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
3. Some components of final sales of computers include computer parts.

1. Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
3. Some components of final sales of computers include computer parts.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.
2. Equals gross domestic business value added excluding gross farm value added.
3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.
4. Equals compensation of general government employees plus general government consumption of fixed capital.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 1.5.2 and real growth rates are shown in table 1.5.1.
5. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. The residual line is the difference between the first line and the sum of the most detailed lines.

Table 1.6.4. Price Indexes for Gross Domestic Purchases

[Index numbers, 2005=100]

1. Excludes software "embedded," or bundled, in computers and other equipment.
2. Some components of final sales of computers include computer parts.
3. Food excludes personal consumption expenditures for purchased meals and beverages, which are classified in food services.
4. The percent change for this series is calculated from the implicit price deflator in NIPA table 1.6.4.

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.
2. Gross national income deflated by the implicit price deflator for gross national product.
3. Net domestic income deflated by the implicit price deflator for net domestic product.

NOTE. Except as noted in footnotes 1, 2 and 3, chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Uses gross domestic purchases price index as deflator.
2. This measure is called "real gross domestic income" in the System of National Accounts, 2008.
3. This measure is called "real gross national income" in the System of National Accounts, 2008.
4. Uses net domestic purchases price index as deflator.
5. Ratio (multiplied by 100) of price index for gross domestic product to the price index for gross domestic purchases.
6. Ratio (multiplied by 100) of the price index for exports of goods and services to the price index for imports of goods and services.
7. Ratio (multiplied by 100) of the price index for goods exports to the price index for goods imports.
8. Ratio (multiplied by 100) of the price index for goods exports to the price index for nonpetroleum goods imports.

Table 1.9.3. Real Net Value Added by Sector, Quantity Indexes

[Index numbers, 2005=100]

	Line	2007	2008	2009	2010
Net domestic product	1	**104.184**	**103.340**	**98.966**	**102.271**
Business [1]	2	**104.737**	**102.792**	**96.953**	**101.222**
Nonfarm [2]	3	104.932	102.789	96.728	101.042
Farm	4	81.636	97.900	118.409	116.627
Households and institutions	5	**103.505**	**107.246**	**106.410**	**106.689**
Households	6	105.617	111.052	109.338	108.909
Nonprofit institutions serving households [3]	7	101.058	102.870	103.031	104.103
General government [4]	8	**101.056**	**102.936**	**104.609**	**104.687**
Federal	9	99.044	102.827	109.169	113.051
State and local	10	101.849	102.978	102.832	101.426

1. Equals net domestic product excluding net value added of households and institutions and of general government.
2. Equals net domestic business value added excluding net farm value added.
3. Equals gross value added of nonprofit institutions excluding consumption of fixed capital on fixed assets owned and used by nonprofit institutions serving households.
4. Equals compensation of general government employees.

Table 1.9.4. Price Indexes for Net Value Added by Sector

[Index numbers, 2005=100]

	Line	2007	2008	2009	2010
Net domestic product	1	**106.206**	**108.588**	**110.087**	**111.642**
Business [1]	2	**105.562**	**107.397**	**108.468**	**110.137**

State and local	10	981.7	1,034.1	1,058.5	1,064.2

1. Equals net domestic product excluding net value added of households and institutions and of general government.
2. Equals net domestic business value added excluding net farm value added.
3. Equals gross value added of nonprofit institutions excluding consumption of fixed capital on fixed assets owned and used by nonprofit institutions serving households.
4. Equals compensation of general government employees.

Table 1.9.6. Real Net Value Added by Sector, Chained Dollars

[Billions of chained (2005) dollars]

	Line	2007	2008	2009	2010
Net domestic product	1	**11,545.3**	**11,451.7**	**10,967.0**	**11,333.3**
Business [1]	2	**8,999.5**	**8,832.3**	**8,330.7**	**8,697.4**
Nonfarm [2]	3	8,940.2	8,757.6	8,241.2	8,608.7
Farm	4	59.2	71.0	85.9	84.6
Households and institutions	5	**1,305.5**	**1,352.7**	**1,342.2**	**1,345.7**
Households	6	721.3	758.5	746.8	743.8
Nonprofit institutions serving households [3]	7	584.5	595.0	595.9	602.1
General government [4]	8	**1,240.8**	**1,263.8**	**1,284.4**	**1,285.3**
Federal	9	341.2	354.2	376.0	389.4
State and local	10	899.7	909.6	908.4	895.9
Residual	11	–0.8	5.8	12.8	8.8

1. Equals net domestic product excluding net value added of households and institutions and of general government.
2. Equals net domestic business value added excluding net farm value added.
3. Equals gross value added of nonprofit institutions excluding consumption of fixed capital on fixed assets owned and used by nonprofit institutions serving households.
4. Equals compensation of general government employees.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Estimates for financial corporate business and nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.
3. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100.
4. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas services.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas services.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Residual	114	–17.0	–26.0	–30.1	–60.9

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, government, and the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, government, and the rest of the world; includes membership dues and fees.

NOTES. The figures in parentheses are the line numbers of the corresponding items in table 2.5.6.

Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Net expenditures abroad by U.S. residents	131	.....	.....	.....	.....
Final consumption expenditures of nonprofit institutions serving households (NPISHs) [28]	132	**115.829**	**128.888**	**130.876**	**132.264**
Gross output of nonprofit institutions [29]	133	105.918	109.222	111.024	113.146
Less: Receipts from sales of goods and services by nonprofit institutions [30]	134	102.797	103.147	104.889	107.201

1. Consists of household purchases of goods and services from business, government, nonprofit institutions, and the rest of the world.
2. Consists of shoes and other footwear, and of repair and hire of footwear.
3. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
5. Includes clocks, lamps, lighting fixtures, and other household decorative items; also includes repair of furniture, furnishings, and floor coverings.
6. Consists of major household appliances, small electric household appliances, and repair of household appliances.
7. Consists of dishes, flatware, and non-electric cookware and tableware.
8. Consists of household supplies; domestic services; moving, storage and freight service; and other household service.
9. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
10. Consists of offices of physicians, health maintenance organization medical centers, and freestanding ambulatory surgical and emergency centers.
11. Includes podiatrists, chiropractors, mental health practitioners (except physicians), physical, occupational and speech therapists, audiologists, all other health practitioners, ambulance services, kidney dialysis centers, and blood and organ bank services.
12. Consists of nonprofit hospitals, proprietary hospitals, and government hospitals. Consists of primary sales of these hospitals for personal consumption. Expenses of nonprofit hospitals are included in the expenditures of nonprofit institutions serving households (NPISHs).
13. Includes railway transportation, taxicab services, school and employee services, limousine services, and airport bus fares.
14. Consists of tour operators' and travel agents' margins. Purchases of travel and accommodations included in tours are accounted for separately in other personal consumption expenditures categories.
15. Consists of fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services.
16. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premises.
17. Consists of transient hotels, motels, other traveler accommodations, clubs, and housing at schools.
18. Consists of operating expenses of commercial life insurance carriers and fraternal benefit life insurance. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies.
19. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles).
20. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.
21. Consists of premiums less benefits for income loss insurance.
22. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.
23. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle and other transportation insurance.
24. Consists of cosmetics and toiletries, electric appliances for personal care, hairdressing salons, and miscellaneous personal care services.
25. Consists of jewelry, watches, luggage, and similar personal items.
26. Consists of household purchases of goods and services from business, government, and nonprofit institutions providing social services and religious activities. Purchases from nonprofit establishments exclude unrelated sales, secondary sales, and sales to businesses, government, and the rest of the world, but include membership dues and fees.
27. Consists of tax preparation and other related services, employment agency services, and other personal business services.
28. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
29. Gross output is net of unrelated sales, secondary sales, and sales to business, government, and the rest of the world; excludes own-account investment (construction and software).
30. Excludes unrelated sales, secondary sales, and sales to business, government, and the rest of the world; includes membership dues and fees.

Table 2.5.4 Price Indexes for Personal Consumption Expenditures by Function

[Index numbers, 2005=100]

	Line	2007	2008	2009	2010
Personal consumption expenditures	1	**105.499**	**108.943**	**109.169**	**111.112**
Household consumption expenditures [1]	2	**105.551**	**109.072**	**109.402**	**111.440**
Food and beverages purchased for off-premises consumption	3	**105.647**	**112.066**	**113.495**	**113.853**

Final consumption expenditures of nonprofit institutions serving households (NPISHs) [28]	132	**103.546**	**104.295**	**101.149**	**100.071**
Gross output of nonprofit institutions [29]	133	106.839	109.591	111.072	113.103
Less: Receipts from sales of goods and services by nonprofit institutions [30]	134	107.976	111.484	114.809	118.068

1. Consists of household purchases of goods and services from business, government, nonprofit institutions, and the rest of the world.
2. Consists of shoes and other footwear, and of repair and hire of footwear.
3. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
5. Includes clocks, lamps, lighting fixtures, and other household decorative items; also includes repair of furniture, furnishings, and floor coverings.
6. Consists of major household appliances, small electric household appliances, and repair of household appliances.
7. Consists of dishes, flatware, and non-electric cookware and tableware.
8. Consists of household supplies; domestic services; moving, storage and freight service; and other household service.
9. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
10. Consists of offices of physicians, health maintenance organization medical centers, and freestanding ambulatory surgical and emergency centers.
11. Includes podiatrists, chiropractors, mental health practitioners (except physicians), physical, occupational and speech therapists, audiologists, all other health practitioners, ambulance services, kidney dialysis centers, and blood and organ bank services.
12. Consists of nonprofit hospitals, proprietary hospitals, and government hospitals. Consists of primary sales of these hospitals for personal consumption. Expenses of nonprofit hospitals are included in the expenditures of nonprofit institutions serving households (NPISHs).
13. Includes railway transportation, taxicab services, school and employee services, limousine services, and airport bus fares.
14. Consists of tour operators' and travel agents' margins. Purchases of travel and accommodations included in tours are accounted for separately in other personal consumption expenditures categories.
15. Consists of fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services.
16. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premises.
17. Consists of transient hotels, motels, other traveler accommodations, clubs, and housing at schools.
18. Consists of operating expenses of commercial life insurance carriers and fraternal benefit life insurance. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies.
19. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles).
20. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.
21. Consists of premiums less benefits for income loss insurance.
22. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.
23. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle and other transportation insurance.
24. Consists of cosmetics and toiletries, electric appliances for personal care, hairdressing salons, and miscellaneous personal care services.
25. Consists of jewelry, watches, luggage, and similar personal items.
26. Consists of household purchases of goods and services from business, government, and nonprofit institutions providing social services and religious activities. Purchases from nonprofit establishments exclude unrelated sales, secondary sales, and sales to businesses, government, and the rest of the world, but include membership dues and fees.
27. Consists of tax preparation and other related services, employment agency services, and other personal business services.
28. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
29. Gross output is net of unrelated sales, secondary sales, and sales to business, government, and the rest of the world; excludes own-account investment (construction and software).
30. Excludes unrelated sales, secondary sales, and sales to business, government, and the rest of the world; includes membership dues and fees.

Table 2.5.5 Personal Consumption Expenditures by Function

[Billions of dollars]

	Line	2007	2008	2009	2010
Personal consumption expenditures	1	**9,772.3**	**10,035.5**	**9,866.1**	**10,245.5**

Foreign travel by U.S. residents	129	113.9	119.8	106.1	115.4
Less: Expenditures in the United States by nonresidents	130	123.1	142.5	126.9	138.2
Net expenditures abroad by U.S. residents	131	6.1	6.5	7.8	6.5
Final consumption expenditures of nonprofit institutions serving households (NPISHs) [28]	132	**253.9**	**284.6**	**280.3**	**280.2**
Gross output of nonprofit institutions [29]	133	989.4	1,046.5	1,078.2	1,118.9
Less: Receipts from sales of goods and services by nonprofit institutions [30]	134	735.5	761.9	797.9	838.6

1. Consists of household purchases of goods and services from business, government, nonprofit institutions, and the rest of the world.
2. Consists of shoes and other footwear, and of repair and hire of footwear.
3. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
5. Includes clocks, lamps, lighting fixtures, and other household decorative items; also includes repair of furniture, furnishings, and floor coverings.
6. Consists of major household appliances, small electric household appliances, and repair of household appliances.
7. Consists of dishes, flatware, and non-electric cookware and tableware.
8. Consists of household supplies; domestic services; moving, storage and freight service; and other household service.
9. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
10. Consists of offices of physicians, health maintenance organization medical centers, and freestanding ambulatory surgical and emergency centers.
11. Includes podiatrists, chiropractors, mental health practitioners (except physicians), physical, occupational and speech therapists, audiologists, all other health practitioners, ambulance services, kidney dialysis centers, and blood and organ bank services.
12. Consists of nonprofit hospitals, proprietary hospitals, and government hospitals. Consists of primary sales of these hospitals for personal consumption. Expenses of nonprofit hospitals are included in the expenditures of nonprofit institutions serving households (NPISHs).
13. Includes railway transportation, taxicab services, school and employee services, limousine services, and airport bus fares.
14. Consists of tour operators' and travel agents' margins. Purchases of travel and accommodations included in tours are accounted for separately in other personal consumption expenditures categories.
15. Consists of fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services.
16. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premises.
17. Consists of transient hotels, motels, other traveler accommodations, clubs, and housing at schools.
18. Consists of operating expenses of commercial life insurance carriers and fraternal benefit life insurance. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies.
19. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles).
20. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.
21. Consists of premiums less benefits for income loss insurance.
22. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.
23. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle and other transportation insurance.
24. Consists of cosmetics and toiletries, electric appliances for personal care, hairdressing salons, and miscellaneous personal care services.
25. Consists of jewelry, watches, luggage, and similar personal items.
26. Consists of household purchases of goods and services from business, government, and nonprofit institutions providing social services and religious activities. Purchases from nonprofit establishments exclude unrelated sales, secondary sales, and sales to businesses, government, and the rest of the world, but include membership dues and fees.
27. Consists of tax preparation and other related services, employment agency services, and other personal business services.
28. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
29. Gross output is net of unrelated sales, secondary sales, and sales to business, government, and the rest of the world; excludes own-account investment (construction and software).
30. Excludes unrelated sales, secondary sales, and sales to business, government, and the rest of the world; includes membership dues and fees.

Table 2.5.6 Real Personal Consumption Expenditures by Function, Chained Dollars

[Billions of chained (2005) dollars]

	Line	2007	2008	2009	2010
Personal consumption expenditures	1	**9,262.9**	**9,211.7**	**9,037.5**	**9,220.9**
Household consumption expenditures [1]	2	**9,017.8**	**8,939.9**	**8,762.0**	**8,942.3**

Gross output of nonprofit institutions [30]	133	926.0	954.9	970.7	989.2
Less: Receipts from sales of goods and services by nonprofit institutions [31]	134	681.1	683.4	695.0	710.3
Residual	135	–16.7	–26.2	–31.2	–61.2

1. Consists of household purchases of goods and services from business, government, nonprofit institutions, and the rest of the world.
2. Consists of shoes and other footwear, and of repair and hire of footwear.
3. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
5. Includes clocks, lamps, lighting fixtures, and other household decorative items; also includes repair of furniture, furnishings, and floor coverings.
6. Consists of major household appliances, small electric household appliances, and repair of household appliances.
7. Consists of dishes, flatware, and non-electric cookware and tableware.
8. Consists of household supplies; domestic services; moving, storage and freight service; and other household service.
9. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
10. Consists of offices of physicians, health maintenance organization medical centers, and freestanding ambulatory surgical and emergency centers.
11. Includes podiatrists, chiropractors, mental health practitioners (except physicians), physical, occupational and speech therapists, audiologists, all other health practitioners, ambulance services, kidney dialysis centers, and blood and organ bank services.
12. Consists of nonprofit hospitals, proprietary hospitals, and government hospitals. Consists of primary sales of these hospitals for personal consumption. Expenses of nonprofit hospitals are included in the expenditures of nonprofit institutions serving households (NPISHs).
13. Includes railway transportation, taxicab services, school and employee services, limousine services, and airport bus fares.
14. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series.
15. Consists of tour operators' and travel agents' margins. Purchases of travel and accommodations included in tours are accounted for separately in other personal consumption expenditures categories.
16. Consists of fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services.
17. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premises.
18. Consists of transient hotels, motels, other traveler accommodations, clubs, and housing at schools.
19. Consists of operating expenses of commercial life insurance carriers and fraternal benefit life insurance. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies.
20. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles).
21. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.
22. Consists of premiums less benefits for income loss insurance.
23. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.
24. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle and other transportation insurance.
25. Consists of cosmetics and toiletries, electric appliances for personal care, hairdressing salons, and miscellaneous personal care services.
26. Consists of jewelry, watches, luggage, and similar personal items.
27. Consists of household purchases of goods and services from business, government, and nonprofit institutions providing social services and religious activities. Purchases from nonprofit establishments exclude unrelated sales, secondary sales, and sales to businesses, government, and the rest of the world, but include membership dues and fees.
28. Consists of tax preparation and other related services, employment agency services, and other personal business services.
29. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
30. Gross output is net of unrelated sales, secondary sales, and sales to business, government, and the rest of the world; excludes own-account investment (construction and software).
31. Excludes unrelated sales, secondary sales, and sales to business, government, and the rest of the world; includes membership dues and fees.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.
2. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.
3. Consists of nonmortgage interest paid by households.
4. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.
5. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of the estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
2. Consists of gasoline and other energy goods and of electricity and gas services.
3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
2. Consists of gasoline and other energy goods and of electricity and gas services.
3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
2. Consists of gasoline and other energy goods and of electricity and gas services.
3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
2. Consists of gasoline and other energy goods and of electricity and gas services.
3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Table 3.10.3. Real Government Consumption Expenditures and General Government Gross Output, Quantity Indexes

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Table 3.10.4. Price Indexes for Government Consumption Expenditures and General Government Gross Output

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Table 3.10.5. Government Consumption Expenditures and General Government Gross Output

[Billions of dollars]

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Table 3.10.6. Real Government Consumption Expenditures and General Government Gross Output, Chained Dollars

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

To the rest of the world [12]	43	**13.3**	**15.5**	**16.1**	**16.6**

1. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.
2. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.
3. Consists of payments for medical services for dependents of active duty military personnel at nonmilitary facilities.
4. Consists of mustering out pay, terminal leave pay, and adjusted compensation benefits.
5. Prior to October 2008, benefits for the Supplemental Nutrition Assistance Program were called Food Stamp benefits.
6. Refundable tax credits represent the outlays that are distributed to an individual when the amount of federal refundable tax credits exceeds the individual's federal income tax liabilities. Refundable tax credits include the federal earned income tax credit, the child tax credit, the health coverage tax credit, and, beginning in 2009, the Making Work Pay tax credit, the American opportunity tax credit, and the government retiree tax credit, as well as credits for alternative minimum tax payments made in prior years.
7. Consists largely of payments to nonprofit institutions, aid to students, and payments for medical services for retired military personnel and their dependents at nonmilitary facilities.
8. Consists of general medical assistance and state child health care programs.
9. Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.
10. Consists of expenditures for food under the supplemental program for women, infants, and children; foster care; adoption assistance; and payments to nonprofit welfare institutions.
11. Consists largely of veterans' benefits, Alaska dividends, and crime-victim payments.
12. Consists of federal government social benefits to the rest of the world and includes benefits paid to individuals in the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands.

Table 3.13. Subsidies

[Billions of dollars]

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. Consists of capital transfers and the acquisition and disposal of nonproduced nonfinancial assets. Prior to 1982, reflects only capital grants paid to the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

Table 4.2.4. Price Indexes for Exports and Imports of Goods and Services by Type of Product

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

Table 4.2.5. Exports and Imports of Goods and Services by Type of Product

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.

2. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 4.2.2 and real growth rates are shown in table 4.2.1.

3. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For exports and for imports, the residual line is the difference between the aggregate line and the sum of the most detailed lines.

1. Exports and imports of gold in the NIPAs differ from those in the ITAs. ITA gold exports (line 2) and imports (line 19) are excluded from the NIPAs; imports of gold in the NIPAs (line 21) is the excess of the value of gold in gross domestic purchases over the value of U.S. production of gold.

2. Consists of statistical revisions to the ITAs that have not yet been incorporated into the NIPAs and statistical revisions to the NIPAs that have not yet been incorporated into the ITAs. From 1986 through 1991, the NIPAs include estimates of insurance premium supplements that are not accounted for in the ITAs until 1992.

3. Consists of transactions between the United States and its territories, Puerto Rico, and the Northern Mariana Islands. The treatment of U.S. territories, Puerto Rico, and the Northern Mariana Islands in the NIPAs differs from that in the ITAs. In the NIPAs, they are included in the rest of the world; in the ITAs, they are treated as part of the United States.

4. Beginning with 1988, the ITAs classify certain military grants as services that the NIPAs do not. In the NIPAs these transactions are excluded from exports and included in transfer payments from government.

5. In the ITAs, income transactions between parents and affiliates are recorded on a net basis. In ITA exports, U.S. parents' receipts from foreign affiliates for interest are net of such payments by U.S. parents to foreign affiliates. In ITA imports, U.S. affiliates" payments to foreign parents for interest are net of such receipts by U.S. affiliates from foreign parents. In the NIPAs, these transactions are recorded on a gross basis. The amount of the adjustment is identical in income payments and in income receipts and, thus, does not affect NIPA net income receipts or balance on current account.

6. Consists of capital transfers and the acquisition and disposal of nonproduced nonfinancial assets.

ITAs International transactions accounts

1. Consists of capital transfers and the acquisition and disposal of nonproduced nonfinancial assets. Prior to 1982, reflects only capital grants paid to the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands.
2. Consists of damages to fixed assets.

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; change in inventories is included in government consumption expenditures.

NOTE. Chain-type quantity indexes for net investment are computed from chained (2005) dollar estimates of net investment by scaling the chained-dollar estimates to 100 in the reference year (2005). Chained (2005) dollar estimates of net investment appear in table 5.2.6.

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; change in inventories is included in government consumption expenditures.

NOTE. Most chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. Chained (2005) dollar estimates of net investment are calculated by subtracting consumption of fixed capital from gross investment.

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. Excludes software "embedded," or bundled, in computers and other equipment.
3. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
4. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
5. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
6. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1.
3. Excludes software "embedded," or bundled, in computers and other equipment.
4. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
5. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
6. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
7. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Bus or truck garages are included in transportation.
3. Consists primarily of railroads.
4. Includes water supply, sewage and waste disposal, public safety, highway and street, and conservation and development.
5. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

Table 5.4.6. Real Private Fixed Investment in Structures by Type, Chained Dollars

[Billions of chained (2005) dollars]

	Line	2007	2008	2009	2010
Private fixed investment in structures	1	**1,020.7**	**919.3**	**718.8**	**640.2**

Addenda:					
Private fixed investment in new structures [5]	46	938.9	853.5	660.1	586.8
Nonresidential structures	47	437.6	465.3	366.8	309.3
Residential structures	48	494.0	372.2	279.7	268.3

1. Consists of office buildings, except those constructed at manufacturing sites and those constructed by power utilities for their own use. Includes all financial buildings.
2. Includes buildings and structures used by the retail, wholesale and selected service industries. Consists of auto dealerships, garages, service stations, drug stores, restaurants, mobile structures, and other structures used for commercial purposes. Bus or truck garages are included in transportation.
3. Consists primarily of railroads.
4. Includes water supply, sewage and waste disposal, public safety, highway and street, and conservation and development.
5. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Table 5.5.1. Percent Change From Preceding Period in Real Private Fixed Investment in Equipment and Software by Type

Residential equipment	36	**10.0**	**9.7**	**8.8**	**9.5**
Residual	37	–3.1	–5.5	–11.2	–31.1

1. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.5.2 and real growth rates are shown in table 5.5.1.
2. Excludes software "embedded," or bundled, in computers and other equipment.
3. Includes net purchases of used vehicles; additional detail is available in table 7.2.6B.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. This series is derived from the Census Bureau series "current cost inventories."
2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.
NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).
Chained (2005) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and imputed rental of owner-occupied nonfarm housing. It includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.
2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and imputed rental of owner-occupied nonfarm housing. It includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2005) dollar inventory series are calculated to ensure that the chained (2005) dollar change in inventories for 2005 equals the current-dollar change in inventories for 2005 and that the average of the 2004 and 2005 end-of-year chain-weighted and fixed-weighted inventories are equal.

1. Consists of general government and government enterprise expenditures for fixed assets.
2. Structures and software include compensation of government employees engaged in new own-account investment and related expenditures for goods and services.
3. Consists of Department of Defense new structures, except family housing.
4. Consists of lodging, religious, communication, sewage and waste disposal, water supply structures, and manufacturing.
5. Consists of lodging, communication, and manufacturing.

1. Consists of general government and government enterprise expenditures for fixed assets.
2. Structures and software include compensation of government employees engaged in new own-account investment and related expenditures for goods and services.
3. Consists of Department of Defense new structures, except family housing.
4. Consists of lodging, religious, communication, sewage and waste disposal, water supply structures, and manufacturing.
5. Consists of lodging, communication, and manufacturing.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Private inventories [1]	52	2,077.5	2,024.3	1,883.6	2,084.5
Addenda:					
Intersectoral auto valuation adjustment [11]	53	6.3	5.0	5.9	1.7
Brokers' commissions on sale of nonresidential used structures and dealers' margins on used equipment	54	22.3	21.8	19.1	19.9
Electric plants put in place less electric plants put in use [12]	55	–5.7	–4.1	–4.5	–4.1
Private	56	–3.8	–4.4	–4.7	–4.3
Government	57	–1.9	0.2	0.2	0.2
Abandoned electric plants [13]	58	0.0	0.0	0.0	0.0
Sale of equipment scrap, excluding autos [14]	59	–8.5	–11.2	–6.7	–11.0
Other [15]	60	3.0	0.0	0.1	0.8

1. Estimates of government inventories are not available.
2. Private fixed investment shown in table 5.2.5, line 7.
3. Gross government investment shown in table 5.2.5, line 23.
4. Consists of intersectoral auto valuation adjustment (line 53); brokers' commissions on sale of nonresidential used structures and dealers' margins on used equipment (line 54); private electric plants put in place less electric plants put in use (line 56); sale of equipment scrap, excluding autos (line 59); and other (line 60).
5. Consists of government electric plants put in place less electric plants put in use (line 57).
6. Change in private inventories shown in table 1.1.5, line 13. Inventory estimates are not adjusted for disaster losses, theft, obsolescence, or infestation.
7. Consists of disaster losses. Structures and equipment destroyed are valued at current cost.
8. Consists of disaster and war losses. Structures and equipment destroyed are valued at current cost.
9. Neutral holding gains are the gains derived from holding an asset if the price of an asset changed in the same proportion as the general price level. The chain-type price index for gross domestic purchases is used as a measure for the general price level.
10. Equals lines 1+6-15–18+27-28+37.
11. Used autos are valued at acquisition prices less depreciation in the estimates of the stocks of private fixed assets and consumer durable goods; net purchases of used autos by business from consumers are valued at wholesale prices in gross fixed investment.
12. This adjustment reflects a timing difference between fixed investment and the stock of produced assets. In investment, the value of structures and equipment for electric plants is recorded on a put-in-place basis; in the stocks, the investment is recorded when the plants are put in use.
13. Consists of the value of abandoned nuclear power plants that were never put in use. The investment in these plants is included in gross fixed investment, but does not enter the opening or closing balances—it is included in the adjustments to gross fixed investment shown in line 15.
14. Sale of equipment scrap, excluding autos shown in table 5.5.5, line 35.
15. Consists primarily of statistical revisions to the NIPAs that have not been incorporated into the fixed assets accounts.

1. Beginning with 2009, includes payments to the voluntary employee beneficiary association (VEBA) of the United Automobile, Aerospace and Agricultural Implement Workers of America union (UAW).
2. Beginning with the second quarter of 2010, includes payments from British Petroleum (BP) to state and local governments for the construction of offshore structures to alleviate the impact of the BP Deepwater Horizon oil spill in the Gulf of Mexico.
3. Consists of federal government investment grants for highways, transit, air and water transportation, and water treatment plants.
4. Consists of the implied subsidy cost of government acquisition of assets such as shares of preferred stock or warrants from private business.
5. Consists of maritime construction subsidies and, beginning with 2009, the homebuyer tax credit provision of the American Recovery and Reinvestment Act of 2009.
6. Beginning with October 2002, includes payments to the Uniformed Services Retiree Health Care Fund to amortize the unfunded liability.
7. Consists of forgiveness of debts owed by foreign governments to the U.S. government, and the December 1999 transfer to the Republic of Panama of the U.S. government's assets in the Panama Canal Commission. Includes capital grants paid to the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands, and the implied subsidy cost of government acquisition of preferred stock and warrants from banks in Puerto Rico through the Troubled Asset Relief Program.

1. NAICS crop and animal production.
2. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.
3. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
4. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
5. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
6. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.
7. Includes Coast Guard.
8. Employees of Indian tribal governments are classified in state and local government.
9. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

Note. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

1. NAICS crop and animal production.
2. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.
3. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
4. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
5. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
6. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.
7. Includes Coast Guard.
8. Employees of Indian tribal governments are classified in state and local government.
9. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to average weekly hours per employee on full-time schedules.
2. NAICS crop and animal production.
3. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.
4. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
5. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
6. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
7. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.
8. Includes Coast Guard.
9. Employees of Indian tribal governments are classified in state and local government.
10. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

Rest of the world [10]	97	**–725**	**–1,100**	**–926**	**–936**

1. Equals the number of full-time equivalent employees plus the number of self-employed persons. Unpaid family workers are not included.
2. NAICS crop and animal production.
3. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.
4. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
5. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
6. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
7. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.
8. Includes Coast Guard.
9. Employees of Indian tribal governments are classified in state and local government.
10. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

Note. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

1. Consists of finance and insurance and bank and other holding companies.

2. Consists of credit intermediation and related activities; securities, commodity contracts, and other financial investments and related activities; insurance carriers and related activities; funds, trusts, and other financial vehicles; and bank and other holding companies.

3. Consists of wood products; nonmetallic mineral products; primary metals; other transportation equipment; furniture and related products; and miscellaneous manufacturing.

4. Consists of textile mills and textile product mills; apparel; leather and allied products; paper products; printing and related support activities; and plastics and rubber products.

5. Consists of agriculture, forestry, fishing, and hunting; mining; construction; real estate and rental and leasing; professional, scientific, and technical services; administrative and waste management services; educational services; health care and social assistance; arts, entertainment, and recreation; accommodation and food services; and other services, except government.

NOTE. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

Less: Payments to the rest of the world [7]	83	104,206	135,854	116,287	93,819

1. NAICS crop and animal production.
2. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
3. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
4. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
5. Consists of bank and other holding companies.
6. Consists of (1) receipts by U.S. residents of dividends from foreign corporations, plus (2) earnings distributed by unincorporated foreign affiliates to their U.S. parents.
7. Consists of (1) payments by U.S. corporations of dividends to foreign residents, plus (2) earnings distributed by unincorporated U.S. affiliates to their foreign parents.

NOTE. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

1. NAICS crop and animal production.
2. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
3. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
4. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
5. Consists of bank and other holding companies.

NOTE. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

1. Consists of used light trucks only.
2. Consists of final sales and change in private inventories of new autos assembled in the United States.
3. Consists of sales of imported new autos in personal consumption expenditures, in private fixed investment, and in gross government investment.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

1. Beginning with 1991, includes change in farm materials and supplies inventories.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Farm [1]	15	–6.1	–6.5	–6.3	–5.8
Nonfarm	16	100.5	167.7	156.1	198.1
For consistent accounting at historical cost	17	135.4	204.5	190.4	230.1
For current-cost valuation	18	–34.9	–36.8	–34.3	–32.0
Other private business [1]	19	–17.4	–17.1	–16.0	–15.6
Rental income of persons	20	–16.6	–16.2	–15.1	–14.7
Nonfarm tenant-occupied housing	21	–15.5	–15.1	–14.0	–13.7
Farm tenant-occupied housing	22	–0.2	–0.2	–0.2	–0.2
Farms owned by nonoperator landlords	23	–0.3	–0.2	–0.2	–0.2
Nonfarm nonresidential properties	24	–0.6	–0.6	–0.6	–0.5
Proprietors' income	25	–0.8	–0.9	–0.9	–0.9

1. Except for farm proprietorships and partnerships (line 15) and other private business (line 19), the capital consumption adjustment is calculated in two parts. The adjustment for consistent accounting at historical cost converts depreciation, based on the service lives and depreciation schedules employed by firms when filing their income tax returns, to consistent service lives and empirically based depreciation schedules. The adjustment for current-cost valuation converts the historical-cost series with consistent accounting to a series valued at current cost. For farm proprietorships and partnerships and for other private business, the historical-cost series is based on consistent service lives and empirically based depreciation schedules, so the adjustment reflects only a conversion to current-cost valuation.

Table 7.7. Business Current Transfer Payments by Type

[Billions of dollars]

	Line	2007	2008	2009	2010
Business current transfer payments (net)	1	**103.3**	**123.0**	**132.0**	**136.7**

Personal interest income (92+100+101) or (32+61+65)	102	1,265.1	1,382.0	1,108.9	1,003.4

1. Excludes interest paid or received by government enterprises, which is included in the government sector.
2. Consists of interest paid on the deposit liabilities of commercial and mutual savings banks, savings and loan associations, and credit unions.
3. Consists of nonmortgage interest paid by households.
4. Interest received by nonfinancial sole proprietorships and partnerships is considered interest received by persons and is included in line 32.
5. Beginning with October 2002, includes the Uniformed Services Retiree Health Care Fund.
6. Includes nonprofit institutions primarily serving households.

NOTE. In this table, imputed interest paid (line 41) is the sum of (1) premium supplements paid to property and casualty insurance carriers by households and institutions, governments, domestic business, and the rest of the world as a measure of imputed services provided to these sectors by the property and casualty insurance providers, (2) the difference between the property income received by financial intermediaries from the investment of depositors' or beneficiaries' funds and the interest paid by them to business, households and institutions, governments, and the rest of the world, and (3) the imputed services provided to these sectors in the role of borrowers of financial services; these services are included as negative amounts paid by the borrowers and received by the financial intermediaries.

Excluding imputations (218–219)	228	11,089.5	11,530.9	10,953.0	11,348.5

1. Residential dwellings owned and used by nonprofit institutions serving households are included in owner-occupied housing categories.
2. Includes financial services furnished without payment to government employee retirement plans.
3. Classified as a service in exports, and as an income payment to the rest of the world.
4. Classified as a service in exports, and as an income receipt from the rest of the world.
5. For general government employees, recorded as compensation of employees (wages and salaries) and as a sale; does not affect government consumption expenditures. Similar payments for employees of government enterprises are not included in government consumption expenditures; they are deducted in the calculation of the surplus of government enterprises.
6. Health insurance premiums paid by employers are included in the calculation of the "net health insurance" category of personal consumption expenditures (PCE); life insurance premiums paid by employers are included in the calculation of the "life insurance" category of PCE.
7. Consists of the programs for which a social insurance fund is imputed, and for which contributions are set equal to benefits paid. These payments are funded directly out of the current budget. The specific programs consist of workers' compensation, unemployment insurance, and medical services for the dependents of active duty military personnel at nonmilitary facilities. Source data are not available for the corresponding treatment for similar state and local government programs. Similar payments for employees of government enterprises are not included in government consumption expenditures; they are deducted in the calculation of the surplus of government enterprises.
8. Consists of owner-occupant purchases of new single-family dwellings, including manufactured homes, expenditures on improvements, and payments of commissions on new and existing residential dwellings, less sales of dwellings to government. The series is calculated from the investment data prepared as part of BEA's capital stock estimates. It differs from the investment data shown in table 5.4.5 because the series shown in that table reflect total purchases by private business.
9. Excludes investment by nonprofit institutions serving households in residential properties, which is included in owner-occupant investment (see footnote 1) and in sales of existing structures to governments. The series is calculated from the investment data prepared as part of BEA's capital stock estimates. It differs from the investment data shown in table 5.4.5 because the series shown in that table reflect total purchases by private business.
10. The consumption of fixed capital (CFC) of government enterprises is not included in government consumption expenditures; it is deducted in the calculation of the current surplus of government enterprises and is recorded as part of total government CFC.
11. Includes gross investment of government enterprises.

NOTE. "Imputations" are transactions recorded in the national income and product accounts that are not transactions of the market economy. In this table, the imputations shown in the "specific imputations" section are those that affect gross domestic product (GDP). In table 7.11, imputed interest paid by life insurance carriers (line 46) consists of the property incomes earned on life insurance and pension reserves. These incomes are considered to be incomes received by persons and not by the insurance carriers; this reclassification is not considered an imputation for purposes of table 7.12, because it does not affect GDP.

Equals: Consumption of fixed capital, NIPAs	24	**159.7**	**162.8**	**162.9**	**162.0**

1. Consists of intangible assets that the IRS allows to be amortized.
2. Consists of depreciation or amortization of the following items: Breeding, dairy, and work animals; motion picture films; rental videocassettes; and rental clothing.
3. Consists of depreciation of employees' motor vehicles reimbursed by business and depreciation of business motor vehicles charged to current expense.
4. Beginning with 1981, included in IRS depreciation (line 1).
5. Consists of depreciation of assets owned by Federal Reserve banks, federally sponsored credit agencies, credit unions, and nonprofit institutions serving business; depreciation of interest paid by public utilities for own-account investment prior to 1987 (beginning with 1987, included in line 1).
6. Consists of depreciation or amortization of rental videocassettes and rental clothing.

NIPAs National income and product accounts

GDP and Other Major NIPA Series, 1929–2011:II

These historical series from the national income and product accounts (NIPAs) have been updated to present revised estimates from the 2011 annual revision and the advance estimates for the second quarter of 2011.

Table 1 presents current-dollar estimates of gross domestic product (GDP) and its components. Table 2A presents estimates of real GDP and its components in chained dollars. Table 2B shows chain-type quantity indexes for real GDP and its components. Table 3 presents price indexes. Table 4 presents national income and personal income and its disposition. Table 5 presents corporate profits before and after tax, net dividends, and undistributed profits.

The estimates are available on BEA's Web site at www.bea.gov.

See the note at the end of the table.

NOTE. Chain-type estimates provide the best available method for comparing the level of a given series at two points in time. Chained-dollar estimates are obtained by multiplying the chain-type quantity index for an aggregate by its value in current dollars in the reference year (currently 2005) and dividing by 100. For an analysis of changes over time in an aggregate or in a component, the percentage changes calculated from the chained-dollar estimates and the chain-type quantity indexes are the same. Thus, chained-dollar estimates can be used to compute "real" (that is, inflation-adjusted) rates of growth. However, comparisons of two or more different chained-dollar series must be made with caution, because the prices used as weights in the chained-dollar calculations usually differ from the prices in the reference period, and the resulting chained-dollar values for detailed GDP components usually do not sum to the chained-dollar estimate of GDP or to any intermediate aggregate. A measure of the extent of such differences is provided in most chained-dollar tables by a "residual" line, which indicates the difference between GDP (or another major aggregate) and the sum of the most detailed components in the table.

It is usually best to make comparisons of aggregate series in current dollars or to use BEA's estimates of contributions to percent change. Measures of the contributions of components to the percentage change in real GDP and to the percentage change in other major aggregates are provided in NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, 5.3.2, 5.4.2, and 5.5.2. In general, the use of chained-dollar estimates to calculate component shares or component contributions may be misleading for periods away from the reference year; component shares of GDP are provided in table 1.1.10. In the November 2003 SURVEY OF CURRENT BUSINESS, the article "Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" discussed the advantages of using chain weighted indexes and the challenges of using chained dollars. To assist users in undertaking historical analysis, BEA provides supplemental tables that present estimates for selected timespans in chained 1937, 1952, 1972, and 1987 dollars (see tables 1.1.6A, 1.1.6B, 1.1.6C, and 1.1.6D).

Table 2A. Real Gross Domestic Product—Continues

[Billions of chained (2005) dollars; quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	Gross domestic product	Personal consumption expenditures	Gross private domestic investment	Exports and imports of goods and services		Government consumption expenditures and gross investment	Residual	Final sales of domestic product	Gross domestic purchases	Final sales to domestic purchasers	Gross national product	Percent change from preceding period				
				Exports	Imports							Gross domestic product	Final sales of domestic product	Gross domestic purchases	Final sales to domestic purchasers	Gross national product

Table 3. Price Indexes for Gross Domestic Product and Gross Domestic Purchases—Continues

[Index numbers, 2005=100; quarterly estimates are seasonally adjusted]

Year and quarter	Chain-type price indexes																Implicit price deflators		Percent change from preceding period for chain-type price indexes		
	Gross domestic product	Personal consumption expenditures			Private fixed investment					Exports and imports of goods and services		Government consumption expenditures and gross investment			Gross domestic purchases	Gross national product	Gross domestic product	Gross national product	Gross domestic product	Gross domestic purchases	Gross national product

Table 4. National Income and Disposition of Personal Income—Continues

[Billions of dollars; quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	National income													Disposition of personal income						
	National income	Compensation of employees			Proprietors' income with IVA and CCAdj		Rental income of persons with CCAdj	Corporate profits with IVA and CCAdj	Net interest and miscellaneous payments	Taxes on production and imports less subsidies [1]	Business current transfer payments (net)	Current surplus of government enterprises [1]	Addendum: Corporate profits after tax without IVA and CCAdj	Personal income	Less: Personal current taxes	Equals: Disposable personal income	Less: Personal outlays	Equals: Personal saving	Saving as a percentage of disposable personal income	Real disposable personal income [2]
		Total	Wage and salary accruals	Supplements to wages and salaries	Farm	Nonfarm

1. Prior to 1959, the current surplus of government enterprises is not available separately; the current surplus of government enterprises is included in taxes on production and imports less subsidies.

2. Real disposable personal income in billions of chained (2005) dollars. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

IVA Inventory valuation adjustment

CCAdj Capital consumption adjustment

Table 5. Corporate Profits, Taxes on Corporate Income, and Profits After Tax—Continues

[Billions of dollars; quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	Corporate profits before tax									Taxes on corporate income	Corporate profits after tax				Net dividends		Undistributed profits			
	National [1]				Domestic industries [2]		Rest of the world				National [1]		Domestic industries [2]				National [1]		Domestic [2]	
	Corporate profits with IVA and CCAdj	Corporate profits before tax	IVA	CCAdj	Corporate profits with IVA and CCAdj	Profits before tax	Total	Receipts from the rest of the world	Less: Payments to the rest of the world		Profits after tax with IVA and CCAdj	Profits after tax	Profits after tax with IVA and CCAdj	Profits after tax	National [1]	Domestic [2]	With IVA and CCAdj	Without IVA and CCAdj	With IVA and CCAdj	Without IVA and CCAdj

1. National profits are profits earned globally by companies with headquarters in the United States; they are a component of national income (see table 1.12).

2. Domestic profits are profits earned from operations within the United States by corporations headquartered anywhere in the world; they are a component of gross domestic income. (See table 1.10 and table 1.14.)

U.S. Affiliates of Foreign Companies

Operations in 2009

By Thomas Anderson

THE CURRENT-DOLLAR value added of majority-owned U.S. affiliates of foreign companies declined 9.1 percent in 2009, according to preliminary statistics derived from the Bureau of Economic Analysis' most recent annual survey of foreign direct investment in the United States.[1] Value added by affiliates totaled $587.9 billion in 2009, down sharply from a revised $646.6 billion in 2008. This drop was even steeper than the sharp decline in the value added of all U.S. businesses; as a result, affiliates' value added fell to 5.3 percent of U.S. private industry value added in 2009, down from 5.7 percent in 2008 (table 1 and chart 1).

Employment by majority-owned U.S. affiliates fell 6.3 percent in 2009 to 5.3 million, after increasing slightly in 2008. The substantial decline was largely due to reductions in the employment of existing affiliates, with selloffs or liquidations of affiliates playing a secondary role. Total private employment in the United States also fell in 2009, but at a slightly slower pace. As a result, the share of U.S. private industry employment accounted for by affiliates declined to 4.7 percent from 4.8 percent. This share is lower than the 4.9 percent share of employment accounted for by affiliates in 2002, but it is still higher than the 4.1 percent share in 1997, which preceded a period of substantial acquisition of U.S. firms by foreign investors in 1998–2001.

The drops in both employment and value added in 2009 were the largest since BEA started collecting annual data on the operations of U.S. affiliates of foreign companies. For value added, the largest (and only) previous drop in value added was 6.7 percent in 2001, and for employment, the largest previous percentage drop was 3.3 percent in 2003. (Changes prior to 2008 for both measures were for nonbank affiliates.) The declines in U.S. affiliate shares of U.S. private industry value added and employment partly reflect the different industry mixes of U.S. affiliates and U.S. private industry. In particular, U.S. affiliates are heavily represented in manufacturing industries, which were hit particularly hard by the 2009 downturn. In contrast, U.S. affiliates are very lightly represented in the health care industry, which grew in the midst of

p Preliminary
r Revised
n.a. Not available

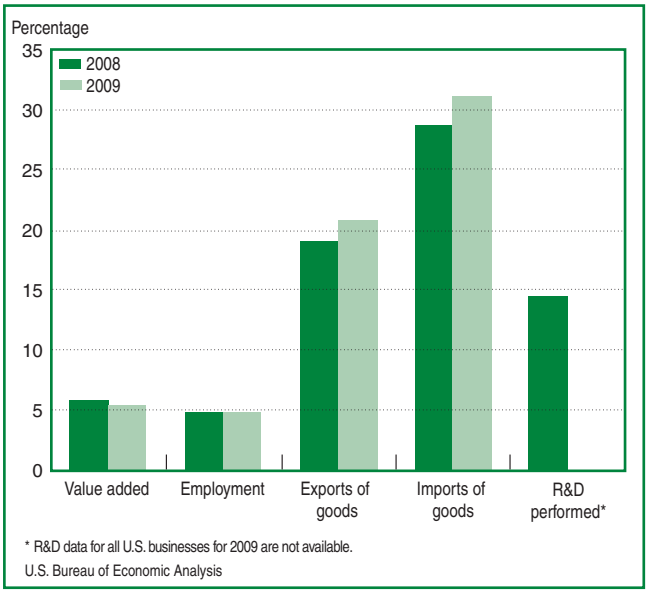
NOTES. For improved comparability with U.S.-affiliate value added, U.S. private industry value added was adjusted to exclude value added in private households, imputed rental income from owner-occupied housing, and business transfer payments.

For the latest estimates of U.S. private industry value added, see Teresa L. Gilmore, Edward T. Morgan, and Sarah B. Osborne, "Annual Industry Accounts: Advance Statistics on GDP by Industry for 2010" SURVEY OF CURRENT BUSINESS 91 (May 2011): 8–24.

For improved comparability with U.S.-affiliate employment, U.S. private industry employment was adjusted to exclude employment in private households.

For consistency with the coverage of the data on U.S. private industry employment, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate totals when the employment shares were computed.

Chart 1. Operations of Majority-Owned U.S. Affiliates as a Percentage of U.S. Private Industry Activity, 2008–2009



1. This article covers the operations of all majority-owned U.S. affiliates, including both bank and nonbank affiliates. Before the 2007 benchmark survey, the annual series on affiliate operations covered only nonbank affiliates. Statistics on value added by bank affiliates are not available for years before 2007.

reduced activity in most other sectors.[2]

The following are additional highlights of the operations of U.S. affiliates in 2009.

- The United Kingdom was the largest investing country in terms of value added, followed by Germany and Japan.
- The share of total U.S. employment by industry accounted for by affiliates was highest in mining and manufacturing.
- The share of U.S. employment by state accounted for by affiliates was highest in Delaware, followed by New Hampshire and Connecticut.
- Affiliates accounted for 21 percent of U.S. exports of goods and 31 percent of U.S. imports of goods, larger shares than in 2008.
- Research and development (R&D) performed by U.S. affiliates and the intensity of their R&D relative to their value added rose considerably.

This article examines changes in value added, employment, exports and imports of goods, and R&D activity of U.S. affiliates of foreign companies in 2009. For each of these measures, changes are examined both in the aggregate and for major investing countries. For value added, changes are also examined by industry of affiliate and by industry of the foreign owner. For employment, changes are examined by industry of affiliate and by state. Several additional measures of U.S.-affiliate operations are presented in tables at the end of the article.

2. However, that U.S. affiliate employment in "health care and social assistance" fell in 2009 despite the increase in U.S. private industry employment for this industry.

Value Added

In 2009, the total current-dollar value added of majority-owned U.S. affiliates fell 9.1 percent to $587.9 billion. The value added of U.S. private industries also fell in 2009, but at a significantly slower rate of 2.6 percent; as a result, the share of U.S. private industry value added that was accounted for by affiliates fell to 5.3 percent in 2009. The more rapid decline in value added by U.S. affiliates is partly due to the concentration of U.S. affiliates in industries such as manufacturing and mining that were disproportionately affected by the economic slowdown.

By country of ownership

In 2009, as in previous years, affiliates of the seven largest investing countries—Canada, France, Germany, the Netherlands, Switzerland, the United Kingdom, and Japan—accounted for about three-fourths of the value added by affiliates (table 2 and chart 2). The largest share—17 percent—was accounted for by British-owned affiliates; they accounted for about 1 percent of total U.S. private industry value added. British-owned affiliates have substantial operations in a wide

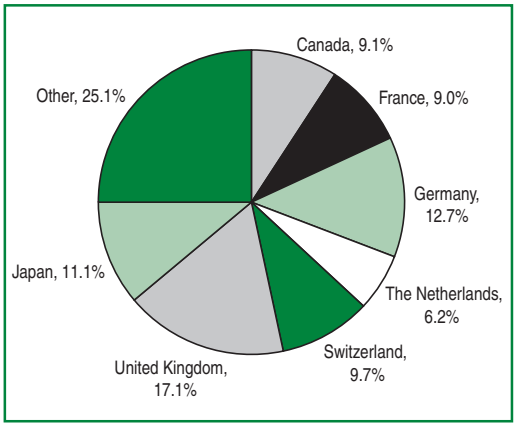
Chart 2. Value Added of U.S. Affiliates by Country of Ultimate Beneficial Owner, 2009



U.S. Bureau of Economic Analysis

variety of industries, most notably petroleum refining and chemicals manufacturing. German-owned affiliates had the second-largest share of affiliate value added and were most active in chemical and machinery manufacturing and telecommunications. Japanese-owned affiliates were most prominent in wholesale trade and motor vehicle manufacturing.

Value added by Japanese-owned affiliates fell dramatically ($19 billion), accounting for about a third of the total overall decline in affiliate value added. The decline among Japanese-owned affiliates was sharpest in motor vehicle wholesale trade as a result of declining sales. Value added by Canadian-owned affiliates also fell sharply, particularly among electrical goods wholesalers, but also among affiliates in mining, utilities, and information. Value added by British-owned affiliates and German-owned affiliates also fell. Among the seven largest investing countries, affiliate value added increased only for Switzerland.

Among other investing countries, value added by affiliates of countries in Latin America and Other Western Hemisphere decreased. Among Bermudian-owned affiliates, the decrease was sharp, but it was due mostly to the reorganization of foreign parent groups so that several U.S. affiliates that were previously owned by ultimate beneficial owners (UBOs) in Bermuda were now owned by UBOs in other countries.[3] Value added by affiliates with UBOs in the United Kingdom Islands, Caribbean also decreased. Value added by Korean-owned affiliates increased largely because of affiliates in manufacturing.

3. Many Bermudian-owned affiliates are the result of corporate inversions in which a U.S. corporation forms a corporation in a foreign country and simultaneously inverts its ownership structure so that the U.S. corporation becomes a U.S. affiliate of a foreign UBO.

By industry of UBO

In 2009, affiliates of UBOs that were individuals or private businesses accounted for 98 percent of the value added by U.S. affiliates (table 3). The remaining 2 percent of value added was accounted for by U.S. affiliates owned by governments or government-related entities, such as government pension funds. Of the affiliates owned by private entities, those owned by businesses accounted for 87 percent of total affiliate value added, and those owned by individuals accounted for 11 percent.

Table 3. Value Added of Majority-Owned U.S. Affiliates by Industry of Ultimate Beneficial Owner, 2007–2009

By industry of affiliate

In 2009, affiliates in manufacturing accounted for almost half—47 percent—of value added (table 4). Among manufacturing industries, chemicals (which includes pharmaceuticals) had the largest share of value added, followed by petroleum and coal products. Wholesale trade, which includes many affiliates that have substantial secondary operations in manufacturing, accounted for the second-largest share of value added among major industries.[4]

Value added by affiliates in manufacturing fell 7.2 percent, to $278.5 billion. In dollar terms, the decline

4. Each U.S. affiliate is classified in the industry that accounts for the largest portion of its sales; however, many large affiliates are involved in a variety of business activities. Changes in the mix of these activities may result in a change in an affiliate's industry classification.

Data Availability

This article summarizes the preliminary statistics from the 2009 Annual Survey of Foreign Direct Investment in the United States. More detailed statistics will be posted in files that can be downloaded at no charge from BEA's Web site at www.bea.gov. Revised statistics will be released next year.

Detailed statistics on U.S. affiliate operations for 1977–2008 are also available on BEA's Web site.

was largest in petroleum and coal products, partly due to the decline in crude oil prices in 2009, which resulted in reduced operations and declining income among producers. The decline was also substantial in transportation equipment due to reductions in operations by affiliates in motor vehicles, bodies and trailers, and parts, reflecting weak market conditions. Value added by affiliates in primary metals also fell (and in percentage terms it fell the most among manufacturing industries) because of declines among existing affiliates.

Outside of manufacturing, value added fell by affiliates in wholesale trade and in finance and insurance fell the most. In wholesale trade, the fall was largely in motor vehicle wholesalers that were hurt by the weak market conditions in the transportation sector. In finance and insurance, value added by affiliates in "banks and other finance" fell but value added by insurance affiliates recovered; the increase among insurance affiliates was due mainly to increased profits stemming from cost cutting and improved investment performance.

Employment

In 2009, employment by U.S. affiliates fell 6.3 percent to 5,279,700 following a slight rise in 2008. Employment by affiliates was lower than in 2007 or 2002. Employment by all U.S. businesses also fell in 2009, but at a slower rate than affiliate employment; as a result, the share of U.S. private industry employment accounted for by affiliates declined to 4.7 percent. However, as previously noted, much of the decline reflects the concentration of U.S. affiliates in industries hit hard by the weakness in the U.S. economy in 2009.

By country of ownership

In 2009, as in the previous 2 years, the largest share of affiliate employment was accounted for by British-owned affiliates, followed by Japanese- and

Acknowledgments

The 2009 Annual Survey of Foreign Direct Investment in the United States was conducted under the direction of Patricia E. Abaroa. Christopher J. Stein supervised the processing of the survey. The following staff contributed to the processing and editing of the survey: George M. Bogachevsky, Chester C. Braham, Polly Y. Cheung, Karen M. Dennison, Constance T. Deve, Jessica M. Hanson, Lonnie Hunter, Nazre Jamil, Jonathan M. Kaufman, Julie A. Lampe, Qi C. Lee, Demetria A. McCormick, Gregory L. McCormick, Makia M. Riley, Ronald L. Ross, John R. Starnes, and Daniel K. Wakjira.

Diane I. Young supervised the computer programming for data estimation, disclosure analysis, and tabulation. Computer support was provided by Neeta B. Kapoor, Fritz H. Mayhew, Sandip Mehta, Daniel W. Powell, David Rozenshtein, Gary E. Sowers, Brent L. Spithaler, Benjamin Yu, Helen Y. Zeldovich, and Mingshan Zheng.

German-owned affiliates (table 5). British-owned affiliates employed just over 900,000 workers in a wide range of industries, but particularly in manufacturing, accommodation and food service, and transportation and warehousing. Employment by Japanese-owned affiliates was concentrated in manufacturing—especially transportation equipment—and wholesale trade. Employment by German-owned affiliates was high in various manufacturing industries, including machinery and chemicals, and in information.

Employment by affiliates fell particularly sharply for Bermudian-owned affiliates, mostly because of reorganizations of foreign parent groups. Employment by British-owned affiliates also fell sharply because of reductions in employment as a result of weak economic conditions and because of partial selloffs of affiliates. Employment by German- and French-owned affiliates also fell, because of reductions by existing affiliates.

By industry

In 2009, as in previous years, the shares of U.S. private industry employment accounted for by affiliates were highest in mining (16 percent) and manufacturing (14 percent) (table 6).[5]

5. The estimates of U.S employment shares are derived from data on affiliate employment broken down by industry of sales, a basis that approximates the establishment-based disaggregation of the corresponding data for all U.S. businesses. See the box "Using Employment Data to Estimate Affiliate Shares of the U.S Economy by Industry." Because employment by industry of sales more precisely reflects the industry composition of affiliates' business activities than employment data by industry of affiliate, the industry presentation in this section is more detailed than that presented in the section on value added by industry of affiliate.

In manufacturing, the shares were highest in motor vehicles, bodies and trailers, and parts (32 percent) and in chemicals (32 percent). In motor vehicles, more than half of the affiliate employment was in parts manufacturing. In chemicals, slightly less than half of affiliate employment was in pharmaceuticals, and there was also substantial employment in basic chemicals.

Among other major industries, the shares of U.S. employment accounted for by affiliates were highest in utilities (9 percent), wholesale trade (7 percent), and information (7 percent). In utilities, electric power generation, transmission, and distribution accounted for over half of affiliate employment, and natural gas distribution accounted for much of the remainder. In wholesale trade, employment was largest in professional and commercial equipment, electrical goods, and motor vehicles. In information, publishing industries—particularly newspaper, periodical, book and database publishers—accounted for the largest share of affiliate employment.

Employment by affiliates in manufacturing fell 9.1 percent, by 168,000 workers, in 2009. However, total U.S. employment in manufacturing fell at an even faster rate. As a result, the share of U.S. manufacturing employment accounted for by affiliates rose to 14.0 percent from 13.6 percent. Affiliate employment levels fell in all manufacturing industries. The declines were particularly substantial in machinery, motor vehicles, and nonmetallic mineral products. In machinery, the decline was due both to reductions in employment by existing affiliates and to the liquidation of affiliates. In

motor vehicles, declines in employment by affiliates in motor vehicle parts manufacturing more than offset increases in affiliate employment by several motor vehicle manufacturers. In nonmetallic mineral products, the decline was due to reductions in employment of existing affiliates, especially in cement and concrete products.

Affiliate employment also fell substantially in transportation and warehousing, finance and insurance, and information. In transportation and warehousing, affiliate employment in many industries declined and the declines were due to reductions in employment of existing affiliates. In the finance and insurance industries, the decline was also due to reductions in employment of existing affiliates. In information, about half of the decline was in publishing industries, but employment also declined in motion pictures and sound recording.

Employment increased slightly in some industries, such as educational services and the residual industry "other services." In education services, the increase was due to established affiliates that made acquisitions in 2009. In other services, the increase was due to increases in repair and maintenance services.

By U.S. region and state

In 2009, as in the previous 2 years, the New England region had the highest share of employment accounted

D Suppressed to avoid disclosure of data of individual companies.
n.a. Not applicable

1. The data on U.S. employment in private industries that were used in calculating these percentages are classified by industry of establishment. They are from table 6.4D of the "National Income and Product Account (NIPA) Tables." The total for U.S. employment in private industries is equal to employment in private industries less the employment of private households. The U.S. private-industry employment totals used to calculate the affiliate shares in "all industries" in this table differ from the U.S. employment totals used to calculate affiliate shares in table 7; the latter are from BEA's Regional Economic Information System. The estimates for table 7, unlike those used for this table, exclude U.S. residents temporarily employed abroad by U.S. businesses. They may also differ from NIPA estimates used for "all industries" in this table because of different definitions and revision schedules.

2. For consistency with the coverage of the data on U.S. employment in private industries, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate employment total when the percentage shares on this line were computed. Data needed to make this adjustment are not available for individual industries.

3. For both U.S. affiliates and all U.S. businesses, includes oil and gas extraction. (See note below.)

4. This line includes employment for which U.S. affiliates did not specify an industry of sales when they filled out their survey form. Affiliates with assets, sales, or net income or loss greater than $275 million ($175 million on the 2007 benchmark survey) had to specify only their 10 largest sales categories; other affiliates had to specify no more than their 4 largest sales categories.

NOTES. A significant portion of U.S.-affiliate employment in petroleum and coal products is accounted for by integrated petroleum companies that have, in addition to their manufacturing employees, substantial numbers of employees in petroleum extraction; because these employees cannot be identified separately, they are included in petroleum and coal products manufacturing. For consistency, employees of affiliates classified in the "oil and gas extraction without refining" industry and employees of all U.S. businesses in oil and gas extraction are also included in petroleum and coal products manufacturing rather than in mining.

Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

for by affiliates (table 7). In New England, New Hampshire (7.6 percent) and Connecticut (7.1 percent) had the highest shares of employment accounted for affiliates, and most of these shares were accounted for by manufacturing affiliates. By state, Delaware had the highest share of employment accounted for by affiliates (8.5 percent).

In Delaware and Rhode Island, British-owned affiliates accounted for more than a third of affiliate employment. In Hawaii, Japanese-owned affiliates, who are active in the hospitality industry, accounted for nearly half of affiliate employment; they also accounted for about a third of affiliate employment in Kentucky and Tennessee.

Employment by affiliates fell in 46 states and rose in only 4 states and the District of Columbia. At the same time, private industry employment fell in all states and the District of Columbia. In 33 states, the shares of employment accounted for by affiliates dropped. The decreases in affiliate employment were greatest in states with the highest levels of 2008 affiliate employment. In the two states with the largest decreases, California and Texas, the fall in affiliate employment was due mostly to reductions in employment of existing affiliates. In California, the decline in employment by affiliates was particularly large in affiliates in transportation and warehousing and in wholesale trade; in Texas, the decline in employment was particularly large among affiliates in mining and transportation equipment manufacturing. Employment by affiliates in the District of Columbia increased more than in any state; the increase was due to both expansion of affiliates through acquisition and to increased employment of existing affiliates.

Trade in Goods

In 2009, U.S. affiliates accounted for 21 percent of U.S. exports of goods and 31 percent of U.S. imports of goods (table 8). These shares were higher than in 2008 despite a reduction in the dollar value of affiliates' trade, possibly indicating that affiliates' ties with their trading partners—including their parents—are more robust than those of other U.S. companies. These shares continue to be much larger than the affiliate shares of either value added or employment, reflecting both the general international orientation of foreign-owned companies and their production and distribution ties to their foreign parents.

Much of the trade in goods by affiliates—about 50 percent of exports and about 80 percent of imports—is accounted for by intrafirm transactions between the affiliates and their foreign parents or other member companies of their foreign parent groups (see the box "Key Terms"). The intrafirm trade of U.S. affiliates generally accounts for 8–10 percent of U.S. exports and for 20–25 percent of U.S. imports.

Since the early 1990s, imports by U.S. affiliates have

n.a. Not available
1. The data on employment in private industries used to calculate the shares shown in this table are from BEA's Regional Economic Information System. The totals are equal to employment in private industries less employment of private households. The U.S. employment totals used to calculate affiliate shares in this table differ from those used for tables 1, 5 and 6, which are from tables 6.4D of the "National Income and Product Accounts (NIPA) Tables." They differ from the NIPA estimates of employment because, by definition, they exclude U.S. residents temporarily employed abroad by U.S. businesses. They also may differ from the NIPA estimates because of different definitions and revision schedules.
2. For consistency with the coverage of the private-industry employment data, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate employment total when the percentage shares on this line were computed.
3. Consists of the U.S. Virgin Islands, Guam, American Samoa, and all other outlying U.S. areas.
4. Consists of employees of U.S. affiliates working abroad.
NOTE. Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F–500 to 999; G–1,000 to 2,499; H–2,500 to 4,999; I–5,000 to 9,999; J–10,000 to 24,999; K–25,000 to 49,999; L–50,000 to 99,999; M–100,000 or more.

usually been at least twice as high as their exports, and the relative trade gap in earlier years was even larger. This trade gap for affiliates is substantially more pronounced than the gap between total U.S. imports and U.S. exports. In 2009, affiliates accounted for $265 billion of the total 2009 U.S. trade gap in goods of $504 billion. The gap for affiliates was largely accounted for by wholesale trade affiliates, many of whom were established to facilitate the import of goods manufactured abroad by their foreign parents. Since the late 1980s, the imports of wholesale trade affiliates have been 2–4 times as large as their exports, and these affiliates have consistently accounted for more than two-thirds of the total import-export gap for U.S. affiliates. Most of the remaining gap was accounted for by manufacturing affiliates, some of whom have secondary activities in wholesale trade and some of whom import parts and components produced by their foreign parents.

Exports

Exports of goods by affiliates fell 10 percent to $219.7 billion in 2009. Total U.S. exports of goods fell 18 percent; as a result, the share of U.S. exports accounted for by affiliates rose to 20.8 percent, the largest share since 1994.

Table 8. U.S. Trade in Goods by Majority-Owned U.S. Affiliates, 1987–2009

p Preliminary
r Revised
NOTES. The data on U.S. exports and imports of goods used to compute the affiliate shares in this table are from the U.S. Census Bureau, and are on a Census basis. For the years 1987–2007, data on U.S. affiliate trade in goods were collected for nonbank affiliates only. Because it is likely that goods trade by bank affiliates was insignificant, the data on affiliate trade in goods for 1987–2007 are broadly comparable with the data for 2008 and 2009.

Using Employment Data to Estimate Affiliate Shares of the U.S. Economy by Industry

The data on employment are used to estimate affiliate shares of the U.S. economy by industry on the basis of the North American Industry Classification System (NAICS) because these data can be disaggregated by industry of sales, a basis that approximates the disaggregation of the data for all U.S. businesses by industry of establishment.[1] Thus, using the data on affiliate employment, the affiliate shares of the U.S. economy can be calculated at a greater level of industry detail than is possible using the value-added estimates or other data, which can only be disaggregated on the basis of industry of affiliate.[2]

In the classification by industry of sales, the data on affiliate employment and sales are distributed among all of the industries in which the affiliate reports sales. As a result, employment classified by industry of sales should approximate that classified by industry of establishment (or plant), because an affiliate that has an establishment in an industry usually also has sales in that industry. However, this is not the case if one establishment of an affiliate provides all of its output to another establishment of that affiliate. For example, if an affiliate operates both a metal mine and a metal-manufacturing plant and if the entire output of the mine is used by the manufacturing plant, all of the affiliate's sales would be in metal manufacturing, and none, in metal mining. Thus, when the affiliate's employment is distributed by industry of sales, all of it would be classified in manufacturing, even though some of the employees work in an establishment in mining.

In contrast, in the classification by industry of affiliate, all of the operations data (including the employment data) for an affiliate are assigned to that affiliate's "primary" industry. The primary industry is determined using a breakdown of the affiliate's sales by BEA's NAICS-based International Survey Industry classification to identify the industry in which the affiliate has the most sales. As a result, any affiliate operations that take place in secondary industries will be classified as operations in the primary industry.

1. The data for all U.S. businesses used to compute the affiliate shares of employment by NAICS industry are from the national income and product accounts. See table 6, footnote 1.

2. Establishment-level data from a joint project of BEA and the Census Bureau can be used to calculate affiliate shares at an even greater level of detail. For affiliate shares based on establishment data for six-digit manufacturing and five-digit nonmanufacturing NAICS industries for 2002, see *Foreign Direct Investment in the United States: Establishment Data for 2002.* Similar data on a NAICS basis are available for 1997, and data on a Standard Industrial Classification basis are available for 1987 and 1992. Data only for manufacturing industries are available for 1988–91. These data publications and SURVEY articles analyzing the data are available from www.bea.gov. Click on "Direct Investment and Multinational Companies" and then "BEA-Census Bureau Data Link Project."

More than half of the decline in exports was among affiliates in manufacturing, and affiliates in wholesale trade accounted for the remainder of the decline. In manufacturing, the decline was particularly large in petroleum and coal products and transportation equipment.

In 2009, Japanese-owned affiliates accounted for the largest share of affiliate exports, followed by German- and British-owned affiliates (table 9). About two-thirds of Japanese-owned affiliate exports was

NOTE. The eight countries of UBO presented in this table are the eight largest countries ranked by size of total trade in goods (imports plus exports).

Key Terms

The following key terms are used to describe U.S. affiliates of foreign companies and their operations.

U.S. affiliate. A U.S. business enterprise in which there is foreign direct investment—that is, in which a single foreign person owns or controls, directly or indirectly, 10 percent or more of the voting securities of an incorporated U.S. business enterprise or an equivalent interest in an unincorporated U.S. business enterprise. **Person** is broadly defined to include any individual, corporation, branch, partnership, associated group, association, estate, trust, or other organization and any government (including any corporation, institution, or other entity or instrumentality of a government). A **foreign person** is any person that resides outside the United States—that is, outside the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, and all U.S. territories and possessions.

Majority-owned U.S. affiliate. A U.S. affiliate that is owned more than 50 percent by foreign parents.

Foreign parent. The first person outside the United States in a U.S. affiliate's ownership chain that has a direct investment interest in the affiliate.

Ultimate beneficial owner (UBO). That person, proceeding up a U.S. affiliate's ownership chain, beginning with and including the foreign parent, that is not owned more than 50 percent by another person. Unlike the foreign parent, the UBO of an affiliate may be located in the United States. The UBO of each U.S. affiliate is identified to ascertain the person that ultimately owns or controls the U.S. affiliate and that therefore ultimately derives the benefits from ownership or control.

Foreign parent group. Consists of (1) the foreign parent, (2) any foreign person, proceeding up the foreign parent's ownership chain, that owns more than 50 percent of the person below it, up to and including the UBO, and (3) any foreign person, proceeding down the ownership chain(s) of each of these members, that is owned more than 50 percent by the person above it.

Value added. The contribution to U.S. gross domestic product, which is the market value of the goods and services produced by labor and property in the United States. Value added can be measured as gross output (sales or receipts and other operating income plus inventory change) minus intermediate inputs (purchased goods and services). Alternatively, it can be measured as the sum of the costs incurred (except for intermediate inputs) and the profits earned in production. The value-added estimates for U.S. affiliates were prepared by summing cost and profit data collected in the annual and benchmark surveys of foreign direct investment in the United States. The estimates are measures of gross value added rather than measures of net value added because they are calculated without the deduction for the consumption of fixed capital used in production.

The estimates of value added of U.S. affiliates are conceptually consistent with BEA's estimates of U.S. value added by industry.

accounted for by affiliates in wholesale trade, particularly affiliates in metals and minerals, and by affiliates in motor vehicle trade. Among German- and British-owned affiliates, those in manufacturing accounted for the majority of the exports.

The largest decline in exports was by Japanese-owned affiliates, largely due to declines among affiliates in transportation equipment manufacturing and farm products wholesalers. Exports of goods by French- and British-owned affiliates also fell in 2009. Among French-owned affiliates, the decline was mostly accounted for by declines among computer and electronics manufacturers and petroleum wholesalers. Among British-owned affiliates, petroleum manufacturers accounted for much of the decline.

Exports by Swiss-owned affiliates increased because of increases by computer manufacturers. Exports by Korean-owned affiliates increased slightly, particularly among electrical goods and motor vehicle wholesalers.

Imports

Imports of goods by affiliates fell 20 percent to $484.4 billion in 2009. Total U.S. imports of goods fell 26 percent; as a result, the share of U.S. goods imports accounted for by affiliates rose to 31.1 percent, the largest share since 1996.

Affiliates in manufacturing and affiliates in wholesale trade each accounted for about half of the decline in imports by affiliates. In manufacturing, much of the decline was accounted for by affiliates in petroleum and coal products, partly reflecting the impact of lower petroleum prices. In wholesale trade, affiliates in motor vehicles accounted for the largest share of the decline.

Japanese-owned affiliates accounted for, by far, the largest share of imports by U.S. affiliates (table 9). The majority of imports by Japanese-owned affiliates were by affiliates in wholesale trade, especially in motor vehicles and commercial equipment. The second-largest

Data on Foreign Direct Investment in the United States

BEA collects two broad sets of data on foreign direct investment in the United States: (1) financial and operating data of U.S. affiliates, and (2) international transactions (balance of payments) and direct investment position data. This article presents the financial and operating data. The international transactions and direct investment position data were published in the articles "The International Investment Position of the United States at Yearend 2010" "Direct Investment Positions for 2010: Country and Industry Detail", and "U.S. International Transactions: First Quarter of 2011" in the July 2011 SURVEY.

Each of these data sets focuses on a distinct aspect of foreign direct investment. The financial and operating data provide a picture of the overall activities of the U.S. affiliates, and the international transactions and direct investment position data cover foreign investors' transactions with, and positions in, both new and existing U.S. affiliates.[1]

Financial and operating data of U.S. affiliates. The data on the overall operations of U.S. affiliates are collected in BEA's annual and benchmark surveys of foreign direct investment. Benchmark surveys are BEA's most comprehensive surveys of foreign direct investment in terms of both coverage of companies and subject matter and are conducted every 5 years. The data cover U.S. affiliates' balance sheets and income statements, employment and compensation of employees, trade in goods, research and development expenditures, and employment data by state. In addition, the value added of affiliates is estimated from data reported in these surveys. The financial and operating data for affiliates are on a fiscal year basis. The data cover the entire operations of the U.S. affiliate regardless of the percentage of foreign ownership. Separate data are available for all affiliates and for affiliates that are majority owned by their foreign parent(s).

International transactions and direct investment position data. These data are collected in the quarterly surveys of foreign direct investment. The data cover a U.S. affiliate's transactions and positions with its foreign parent and with other members of its foreign parent group. As a result, these data focus on the foreign parent's share, or interest, in the affiliate rather than on the affiliate's overall size or level of operations. The major items included in the U.S. international transactions (balance of payments) accounts are direct investment financial flows, and direct investment income.

1. For a more detailed discussion of the differences between these sets of data, see Alicia M. Quijano, "A Guide to BEA Statistics on Foreign Direct Investment in the United States," SURVEY 70 (February 1990): 29–37.

share of affiliate imports was by German-owned affiliates.

In dollar terms, the largest declines in imports were by Japanese-owned affiliates, due largely to declines in imports by motor vehicle wholesalers. Imports of goods by affiliates also declined substantially among British-, Canadian-, and German-owned affiliates. Among both British- and Canadian-owned affiliates, the decline was concentrated in petroleum wholesalers and refiners; among German-owned affiliates, the decline was concentrated in affiliates in motor vehicle manufacturing and wholesaling.

Research and Development

In 2009, research and development (R&D) performed by majority-owned U.S. affiliates totaled $43.4 billion (table 10). In contrast to the sharp declines in value added, employment, and trade in goods by affiliates, affiliate R&D rose substantially (6.6 percent). Much of the rise was due to acquisitions of U.S. businesses by affiliates in pharmaceutical wholesaling or manufacturing; affiliate R&D also increased among affiliates in professional, scientific, and technical services. R&D by affiliates accounted for 14 percent of the R&D performed by all U.S. businesses in 2008, a share substantially higher than the affiliate shares of all U.S. business value added or employment.[6]

6. Data on R&D performed by all U.S. businesses are not available for 2009, so the affiliate share cannot be computed.

Affiliates of the seven largest investing countries accounted for more than 80 percent of the R&D performed by affiliates, and the distribution of affiliate R&D by country was almost unchanged from that in 2008 (table 11). Switzerland accounted for the largest share of affiliate R&D, followed by Japan and the United Kingdom. The R&D by Swiss-owned affiliates was largely in pharmaceuticals manufacturers. The

p Preliminary
r Revised
n.a. Not available
1. For the years 1997–2007, data on U.S. affiliate R&D were collected for nonbank affiliates only. Because it is unlikely that bank affiliates perform significant R&D, the data on R&D performed by affiliates in 1997–2007 are comparable with the data on R&D performed by affiliates in 2008–2009.
2. Data are from the National Science Foundation.
3. R&D intensity is equal to R&D expenditures divided by value added and is expressed as a percentage.

D Suppressed to avoid disclosure of data of individual companies.
1. R&D intensity is equal to R&D expenditures divided by value added and is expressed as a percentage.

R&D by Japanese-owned affiliates, which rose substantially because of acquisitions, was concentrated in pharmaceutical wholesale trade. The R&D by British-owned affiliates was concentrated in transportation equipment manufacturing and pharmaceutical manufacturing. R&D intensity, a measure of the propensity of affiliates to conduct R&D and defined as the R&D expenditures divided by value added, was highest among Japanese- and Swiss-owned affiliates.

In 2009, as in previous years, a majority of the R&D by affiliates was in manufacturing; affiliates in chemicals manufacturing accounted for the largest share of affiliate R&D and had the second-highest R&D intensity (23 percent). Much of the R&D in chemicals manufacturing was in pharmaceuticals and medicine. R&D by affiliates in computers and electronic products was also substantial; this industry had the highest R&D intensity (28 percent).

Revisions

This article presents preliminary statistics for U.S. affiliate operations in 2009. The statistics for employment, sales, and expenditures for property, plant, and equipment (capital expenditures) supersede the advance summary statistics for majority-owned affiliates that were released on April 18, 2011 (BEA news release 11–16). From the advance to the preliminary statistics, employment was revised up 1.5 percent, sales was revised down 1.5 percent, and capital expenditures was revised down 2.8 percent.

The final statistics for U.S. affiliate operations in 2008 are also presented. The final statistics for employment, sales, and expenditures for property, plant, and equipment for 2008 supersede the statistics for majority-owned affiliates from the April 2011 release and the preliminary statistics that were released in November 2010.[7] From the April 2011 statistics to the final statistics, employment was revised down 1.1 percent, sales was revised up 0.1 percent, and capital expenditures was revised up 0.5 percent. From the preliminary statistics to the final statistics, employment was revised up 0.8 percent, sales was revised up 2.0 percent, and capital expenditures was revised up 0.8 percent.

7. See Thomas Anderson, "U.S. Affiliates of Foreign Companies: Operations in 2008," Survey of Current Business 90 (November 2010): 45–58.

1. The European Union (27) comprises Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom.
2. OPEC is the Organization of Petroleum Exporting Countries. In 2009, its members were Algeria, Angola, Ecuador, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.

National Data

A. Selected NIPA Tables

The selected set of NIPA tables presents the most recent estimates of gross domestic product (GDP) and its components, which were released on July 29, 2011. These estimates include the advance estimates for the second quarter of 2011. The selected set presents quarterly estimates that are updated monthly. Annual estimates are presented in most of the tables

Estimates are based on the 2011 annual revision of the NIPAs. A detailed article about the revision and an extensive set of NIPA estimates will be published in the August issue of the SURVEY OF CURRENT BUSINESS. The estimates for all NIPA series for 1929 forward are on BEA's Web site at www.bea.gov.

The GDP news release is available on BEA's Web site within minutes after the release. To receive an e-mail notification of the release, go to www.bea.gov and subscribe. The "Selected NIPA Tables" are available later that day.

Residual	26	34.3	8.5	12.6	7.3	–7.9	–21.1	–14.4

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Price indexes (Chain–type):						
Gross domestic purchases	31	1.6	1.4	1.4	1.9	2.6
Gross domestic purchases excluding food and energy [1]	32	1.2	1.3	1.2	1.4	1.7
Gross domestic product	33	1.1	1.4	1.6	1.8	2.0
Gross domestic product excluding food and energy [1]	34	1.4	1.4	1.3	1.5	1.8
Personal consumption expenditures	35	2.0	1.5	1.3	1.8	2.5
Personal consumption expenditures excluding food and energy [1]	36	1.5	1.3	1.0	1.1	1.3
Market-based PCE [2]	37	1.6	1.2	1.1	1.7	2.6
Market-based PCE excluding food and energy [2]	38	1.0	1.0	0.7	0.9	1.3

1. Food excludes personal consumption expenditures for purchased meals and beverages, which are classified in food services.
2. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

NOTE. Percent changes for real estimates are calculated from corresponding quantity indexes presented in NIPA tables 1.1.3, 1.2.3, 1.4.3, and 1.7.3. Percent changes in price estimates are calculated from corresponding price indexes presented in NIPA tables 1.1.4, 1.6.4, and 2.3.4.

Residual	16	–19.7	–38.1	–32.5	–37.9	–52.9	–60.7	–57.5
Addenda:								
Motor vehicle output	17	254.5	324.2	325.3	336.8	321.1	360.7	356.4
Gross domestic product excluding motor vehicle output	18	12,432.7	12,753.8	12,723.5	12,793.8	12,884.2	12,860.3	12,906.3
Final sales of computers [3]	19	137.0	165.1	149.6	171.5	194.1	200.9	213.4
Gross domestic product excluding final sales of computers	20	12,582.9	12,953.5	12,930.7	13,002.0	13,068.7	13,077.7	13,114.8

1. Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
3. Some components of final sales of computers include computer parts.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

Table 1.3.1. Percent Change From Preceding Period in Real Gross Value Added by Sector

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Excludes software "embedded," or bundled, in computers and other equipment.

Residual	60	5.2	–39.3	–34.6	–42.0	–61.2	–74.8	–86.8

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 1.5.2 and real growth rates are shown in table 1.5.1.
5. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.
2. Gross national income deflated by the implicit price deflator for gross national product.
3. Net domestic income deflated by the implicit price deflator for net domestic product.

NOTE. Except as noted in footnotes 1, 2 and 3, chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Uses gross domestic purchases price index as deflator.
2. This measure is called "real gross domestic income" in the System of National Accounts, 2008.
3. This measure is called "real gross national income" in the System of National Accounts, 2008.
4. Uses net domestic purchases price index as deflator.
5. Ratio (multiplied by 100) of price index for gross domestic product to the price index for gross domestic purchases.
6. Ratio (multiplied by 100) of the price index for exports of goods and services to the price index for imports of goods and services.
7. Ratio (multiplied by 100) of the price index for goods exports to the price index for goods imports.
8. Ratio (multiplied by 100) of the price index for goods exports to the price index for nonpetroleum goods imports.

1. Estimates for financial corporate business and nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.
3. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100.
4. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

1. The implicit price deflator for gross value added of nonfinancial corporate business divided by 100. Estimates for nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
NOTE. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.
IVA Inventory valuation adjustment
CCAdj Capital consumption adjustment

2. Personal Income and Outlays

Market-based PCE excluding food and energy [6]	28	–1.7	2.3	3.8	2.5	5.0	3.2	0.3

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas services.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas services.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Final consumption expenditures of nonprofit institutions serving households (NPISHs) [1]	22	–3.0	–1.1	–2.3	2.6	6.0	2.0	2.1
Gross output of nonprofit institutions [2]	23	1.4	1.8	1.4	2.2	2.3	2.4	2.6
Less: Receipts from sales of goods and services by nonprofit institutions [3]	24	3.0	2.8	2.6	2.1	1.1	2.5	2.8
Addenda:								
PCE excluding food and energy [4]	25	1.6	1.4	1.3	0.8	0.7	1.6	2.1
Energy goods and services [5]	26	–19.3	10.3	–14.9	5.6	24.7	40.7	15.0
Market-based PCE [6]	27	0.3	1.5	–0.1	1.2	1.8	4.0	3.5
Market-based PCE excluding food and energy [6]	28	1.9	1.0	0.9	1.0	0.3	1.3	2.4

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Residual	26	–5.9	–9.1	–9.0	–9.2	–10.1	–9.5	–10.7

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.

2. Consists of capital transfers and the acquisition and disposal of nonproduced nonfinancial assets. Prior to 1982, reflects only capital grants paid to the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.

2. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 4.2.2 and real growth rates are shown in table 4.2.1.

3. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For exports and for imports, the residual line is the difference between the aggregate line and the sum of the most detailed lines.

5. Saving and Investment

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. Excludes software "embedded," or bundled, in computers and other equipment.
3. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
4. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
5. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
6. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. Excludes software "embedded," or bundled, in computers and other equipment.
3. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
4. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
5. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
6. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

Private fixed investment in equipment and software	26	898.5	1,028.9	1,019.7	1,053.7	1,074.3	1,096.8	1,112.0
Private fixed investment in new structures [7]	27	660.1	586.8	593.6	584.7	590.4	576.1	582.8
Nonresidential structures	28	366.8	309.3	307.1	310.3	318.1	306.2	312.1
Residential structures	29	279.7	268.3	278.1	264.8	261.9	260.5	260.7

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1.
3. Excludes software "embedded," or bundled, in computers and other equipment.
4. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
5. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
6. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
7. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Nonmerchant wholesale trade	26	–15.5	5.8	2.8	10.3	3.0	16.3	9.8

1. This series is derived from the Census Bureau series "current cost inventories."
2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2005) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Nonmerchant wholesale trade	24	59.2	62.6	66.6	74.2	76.0
Final sales of domestic business [2]	25	**787.0**	**794.1**	**812.0**	**816.5**	**823.5**
Final sales of goods and structures of domestic business [2]	26	**405.9**	**410.1**	**423.1**	**424.6**	**427.7**
Ratios of private inventories to final sales of domestic business:						
Private inventories to final sales	27	2.46	2.52	2.57	2.68	2.76
Nonfarm inventories to final sales	28	2.23	2.27	2.30	2.39	2.41
Nonfarm inventories to final sales of goods and structures	29	4.32	4.40	4.42	4.60	4.64

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and imputed rental of owner-occupied nonfarm housing. It includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Table 5.7.6B. Real Private Inventories and Real Domestic Final Sales by Industry, Chained Dollars

[Billions of chained (2005) dollars]

	Line	Seasonally adjusted quarterly totals

Nonmerchant wholesale trade	25	50.7	52.9	53.5	56.7	58.5
Final sales of domestic business [2]	26	**726.1**	**730.1**	**742.9**	**744.1**	**746.4**
Final sales of goods and structures of domestic business [2]	27	**391.5**	**393.4**	**403.7**	**404.0**	**405.3**
Ratios of private inventories to final sales of domestic business:						
Private inventories to final sales	28	2.34	2.36	2.33	2.34	2.35
Nonfarm inventories to final sales	29	2.12	2.14	2.12	2.14	2.15
Nonfarm inventories to final sales of goods and structures	30	3.94	3.98	3.91	3.94	3.97

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and imputed rental of owner-occupied nonfarm housing. It includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2005) dollar inventory series are calculated to ensure that the chained (2005) dollar change in inventories for 2005 equals the current-dollar change in inventories for 2005 and that the average of the 2004 and 2005 end-of-year chain-weighted and fixed-weighted inventories are equal.

Sales of imported new autos [3]	46	74.1	83.0	80.7	84.8	86.6	99.0	89.5

1. Consists of used light trucks only.
2. Consists of final sales and change in private inventories of new autos assembled in the United States.
3. Consists of sales of imported new autos in personal consumption expenditures, in private fixed investment, and in gross government investment.

NOTE. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

p Preliminary
r Revised
1. Reflects adjustments necessary to bring Census Bureau data in line with the concepts and definitions used by BEA to prepare international and national accounts.
2. Contains goods that cannot be separately identified.
Source: U.S. Bureau of Economic Analysis and U.S. Census Bureau.

In the July 2011 Survey of Current Business, part A of "Table 2. U.S. Trade in Goods" in "U.S. International Transactions: First Quarter of 2011" included incorrect data for line 16 (annual and quarterly data for 2010), line 18 (annual data for 1999–2009 and quarterly data for 2009), and line 21 (annual data for 1999–2010 and quarterly data for 2009 and 2010). The table containing correct data may be accessed at www.bea.gov.

p Preliminary
r Revised
(*) Transactions are less than $500,000 (+/–)
1. Details not shown separately; see totals in lines 56 and 63.
2. Details not shown separately are included in line 69.
3. Estimates of financial derivatives for Mexico are included in Latin America and Other Western Hemisphere; and for China and India, in Asia and Pacific. Estimates for the Middle East are combined with estimates for Asia and Pacific.
4. Calculated excluding financial derivatives, net (line 70).

p Preliminary
r Revised
(*) Transactions are less than $500,000 (+/–)
1. Details not shown separately; see totals in lines 56 and 63.
2. Details not shown separately are included in line 69.
3. Estimates of financial derivatives for Mexico are included in Latin America and Other Western Hemisphere; and for China and India, in Asia and Pacific. Estimates for the Middle East are combined with estimates for Asia and Pacific.
4. Calculated excluding financial derivatives, net (line 70).

p Preliminary
r Revised
1. Royalties and license fees and "other private services" by detailed type of service include both affiliated and unaffiliated transactions.
2. Includes royalties, license fees, and other fees associated with intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.
3. Includes royalties, license fees, and other fees associated with copyrights, trademarks, franchises, rights to broadcast live events, software licensing fees, and other intellectual property rights.
4. Other services receipts (exports) include mainly film and television tape rentals and expenditures of foreign residents temporarily working in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.
5. These reflect the amount of premiums explicitly charged by, or paid to, insurers and reinsurers.

p Preliminary
r Revised
* Less than $500,000 (+/-)
..... Not applicable

1. Represents gains or losses on foreign-currency-denominated assets and liabilities due to their revaluation at current exchange rates.

2. Includes changes due to year-to-year shifts in the composition of reporting panels, primarily for bank and nonbank estimates, and to the incorporation of more comprehensive survey results. Also includes capital gains and losses of direct investment affiliates and changes in positions that cannot be allocated to financial flows, price changes, or exchange-rate changes.

3. Financial flows and valuation adjustments for financial derivatives are available only on a net basis, which is shown on line 2; they are not separately available for gross positive fair values and gross negative fair values of financial derivatives. Consequently, columns (a) through (d) on lines 4, 5, 24, and 25 are not available.

4. Data are not separately available for the three types of valuation adjustments; therefore, the sum of all three types is shown in column (d).

5. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

6. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.

7. Also includes paid-in capital subscriptions to international financial institutions and outstanding amounts of miscellaneous claims that have been settled through international agreements to be payable to the U.S. government over periods in excess of 1 year. Excludes World War I debts that are not being serviced.

8. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

9. Includes foreign-currency-denominated assets obtained through temporary reciprocal currency arrangements between the Federal Reserve System and foreign central banks. These assets are included in the investment position at the dollar value established at the time they were received, reflecting the valuation of these assets in the Federal Reserve System's balance sheet. The movement of exchange rates does not affect this valuation.

10. Includes U.S. government liabilities associated with military sales contracts and U.S. government reserve-related liabilities from allocations of special drawing rights (SDRs).

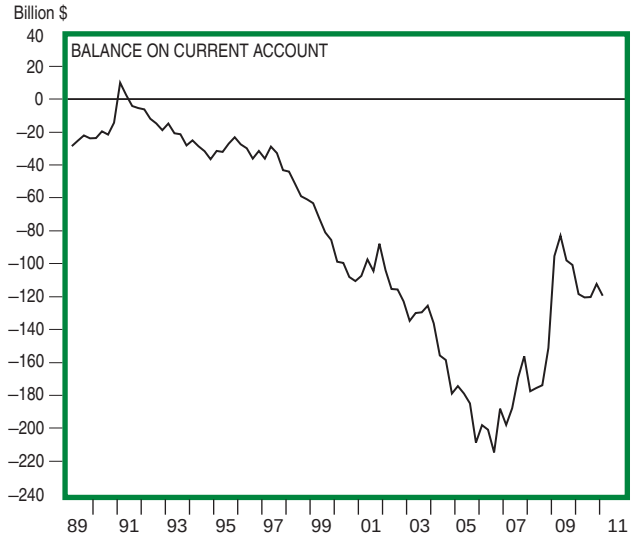
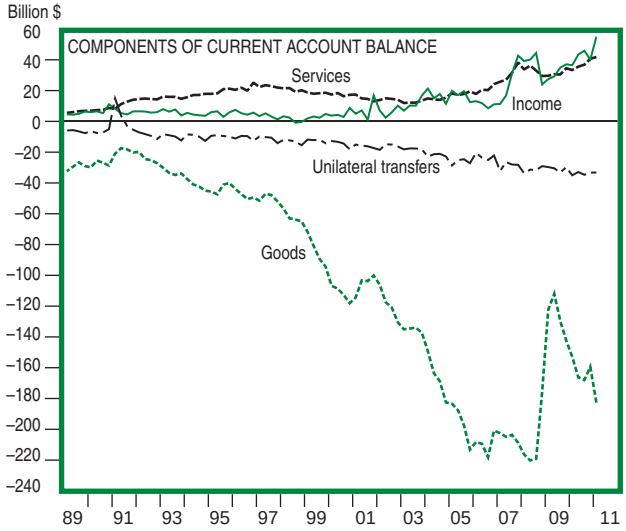
(*) Less than $500,000
D Suppressed to avoid disclosure of data of individual companies.
NOTES. The data in this table are from BEA's annual survey of the operations of U.S. affiliates of foreign companies; see "U.S. Affiliates of Foreign Companies: Operations in 2009" in the August 2011 SURVEY OF CURRENT BUSINESS.

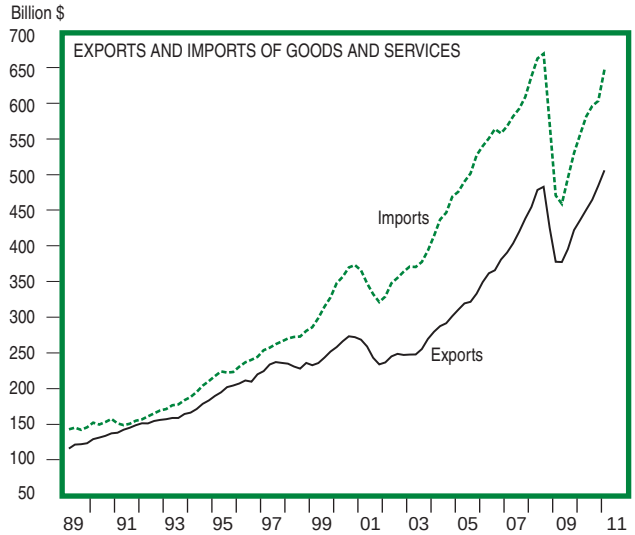
Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

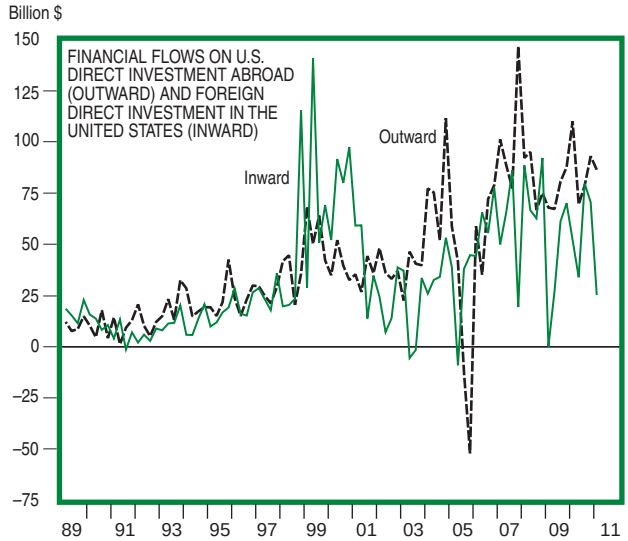
H. Charts

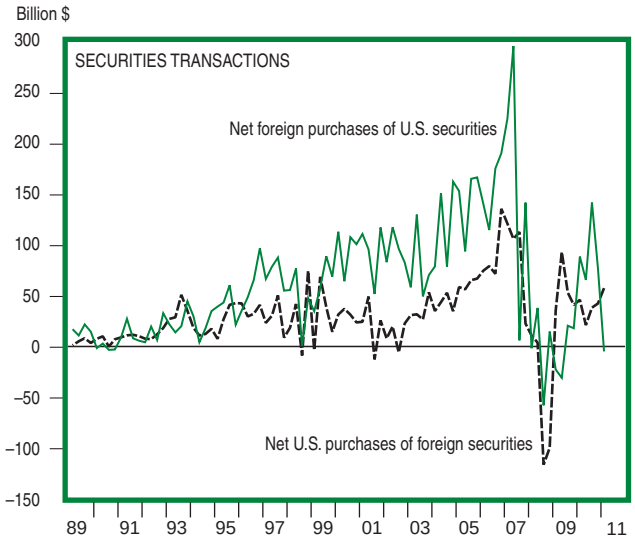
THE U.S. IN THE INTERNATIONAL ECONOMY

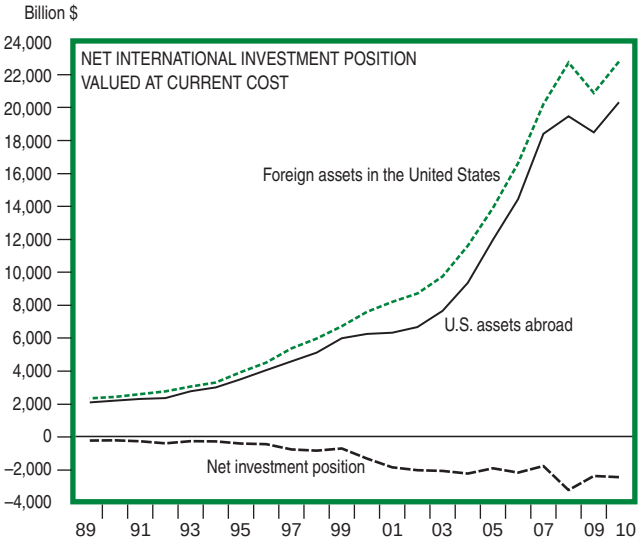












NOTE. All series except those for the international investment position are quarterly and are seasonally adjusted when adjusted data are available. The series are from tables F.2, with opposite signs in some cases, and G.1.

U.S. Bureau of Economic Analysis

Regional Data

I. State and Regional Tables

The tables in this section include the most recent estimates of state personal income and gross domestic product by state. The sources of these estimates are noted.

The quarterly and annual estimates of state personal income and the estimates of gross domestic product by state are available online at www.bea.gov. For information on state personal income, e-mail reis@bea.gov; write to the Regional Economic Information System, BE–55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202–606–5360. For information on gross domestic product by state, e-mail gdpbystate@bea.gov; write to the Regional Product Division, BE–61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202–606–5340.

p Preliminary
r Revised
1. Per capita personal income (PCPI) estimates for 2010 were calculated using the April 1, 2010 decennial census population counts that were released by the Census Bureau in December 2010 Revised estimates of PCPI for 2001-2009 are not published because intercensal state population estimates consistent with the 2000 and 2010 decennial census counts are not currently available.
2. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

p Preliminary
r Revised
1. Per capita disposable personal income (PCDPI) estimates for 2010 were calculated using the April 1, 2010 decennial census population counts that were released by the Census Bureau in December 2010. Revised estimates of PCDPI for 2001-2009 are not published because intercensal state population estimates consistent with the 2000 and 2010 decennial census counts are not currently available.
2. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 3 in the "Regional Quarterly Report" in the April 2011 SURVEY OF CURRENT BUSINESS.

Table I.4. Gross Domestic Product (GDP) by State for Industries, 2010

[Millions of dollars]

State and region	Rank of total GDP by state	Total	Natural resources and mining	Construction	Durable-goods manufacturing	Nondurable-goods manufacturing	Trade	Transportation and utilities	Information	Financial activities	Professional and business services	Education and health services	Leisure and hospitality	Other services	Government

NOTE. Totals shown for the United States differ from the national income and product account statistics of gross domestic product (GDP) because GDP by state excludes and national GDP includes the compensation of Federal civilian and military personnel stationed abroad and government consumption of fixed capital for military structures located abroad and for military equipment, except office equipment. Also, GDP by state and national GDP have different revision schedules.

Source: This table reflects the GDP by state statistics for 2010 that were released on June 7, 2011.

J. Local Area Table

Table J.1. Personal Income and Per Capita Personal Income by Metropolitan Area, 2007–2009—Continues

1. Per capita personal income was computed using Census Bureau midyear population estimates.
2. Percent change calculated from unrounded data.
3. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.
4. The metropolitan area definitions used by BEA for its personal income estimates are the county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released February 2004, March 2005, December 2006, November 2007, November 2008, and December 2009) for federal statistical purposes.

Source: Table 1 "Personal Income and Per Capita Personal Income by Metropolitan Area, 2007–2009" in the May 2011 SURVEY OF CURRENT BUSINESS.

Current-dollar GDP is a measure of the market value of goods, services, and structures that are produced in the economy in a particular period. The changes in current-dollar GDP can be decomposed into quantity and price components. Quantities, or "real" measures, and prices are expressed as index numbers with the reference year—at present, the year 2005—equal to 100.[1]

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP for 2006–2007 uses prices for 2006 and 2007 as weights, and the 2006–2007 annual percent change in the GDP price index uses quantities for 2006 and 2007 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula. These annual changes are "chained" (multiplied) together to form time series of quantity and price indexes. The percent changes in the Fisher indexes are not affected by the choice of the reference year.

BEA also publishes implicit price deflators (IPDs), which are calculated as the ratio of the current-dollar value of a component to the chained-dollar value of the component, multiplied by 100. The values of an IPD are very close to the values of the corresponding "chain-type" price index.

The measures of real GDP and its major components are also presented in dollar-denominated form, designated "chained (2005) dollar estimates." For most series, these estimates are computed by multiplying the current-dollar value in 2005 by a corresponding quantity index number and then dividing by 100. For example, if a current-dollar GDP component equaled $100 in 2005 and if real output for this component increased by 10 percent in 2006, then the chained (2005) dollar value of this component in 2006 would be $110 ($100 × 1.10). The percent changes calculated from the chained (2005) dollar estimates and from the quantity indexes are the same; any differences will be small and due to rounding.

The chained-dollar values for the detailed GDP components will not necessarily sum to the chained-dollar estimate of GDP (or to any intermediate aggregate) in a table, because the relative prices that are used as weights for any period other than the reference year differ from those of the reference year. A measure of the effect of such differences is provided by a "residual" line—the difference between the chained-dollar value of the main aggregate in the table and the sum of the most detailed components in the table. For periods close to the reference year, when the relative prices that are used as weights have usually not changed much, the residuals tend to be small, and the chained-dollar estimates can be used to approximate the contributions to growth and to aggregate the detailed estimates. For periods further from the reference year, the residuals tend to be larger, and the chained-dollar estimates are less useful for analyses of contributions to growth. In particular, for components for which relative prices are changing rapidly, the calculation of contributions based on chained-dollar estimates may be misleading even just a few years from the reference year. Thus, contributions derived from quantity indexes provide a better measure than contributions derived from chained-dollar estimates; contributions based on quantity indexes are shown in selected NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, and 5.3.2.

For quarters and months, NIPA estimates are presented at annual rates, which show the value that would be registered if the rate of activity that is measured for a quarter or for a month were maintained for a full year. Annual rates are used so that periods of different lengths—for example, quarters and years—may be more easily compared. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

For most quarterly NIPA estimates, *percent changes* in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_0}\right)^{m/n} - 1\right] \times 100$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_0 is the level of activity in the earlier period; m is the periodicity of the data (for example, 1 for annual data, 4 for quarterly data, or 12 for monthly data); and n is the number of periods between the earlier periods and the later periods (that is, $t - 0$).

Quarterly and monthly NIPA estimates are seasonally adjusted if necessary. Seasonal adjustment removes from the time series the average effects of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

1. Consists of statistical revisions to the ITAs that have not yet been incorporated into the NIPAs.
ITAs International transactions accounts
NIPAs National income and product accounts

B. Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. Most of this information is available on BEA's Web site at www.bea.gov.

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of fixed assets and consumer durable goods.

National income and product accounts (NIPAs). This series of papers documents the conceptual framework of the NIPAs and the methodologies that are used to prepare the estimates.

Concepts and Methods of the U.S. National Income and Product Accounts
- "Introductory Chapters 1–4"(2009)
- "Chapter 5: Personal Consumption Expenditures" (2009)
- "Chapter 6: Private Fixed Investment" (2010)
- "Chapter 7: Change in Private Inventories" (2010)

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (2002)

An Introduction to National Income and Product Accounts (2007)

Measuring the Economy: A Primer on GDP and the National Income and Product Accounts (2007)

The following SURVEY articles describe the 2009 comprehensive revision of the NIPAs.

"Initial Results of the 2009 Comprehensive NIPA Revision" (August 2009)

"Improved Estimates of the National Income and Product Accounts: Results of the 2009 Comprehensive Revision" (September 2009)

Preview of the 2009 Comprehensive NIPA Revision
- Changes in Definitions and Presentations (March 2009)
- New Classifications for Personal Consumption Expenditures (May 2008)
- Statistical Changes (May 2009)

"Preview of the Revised NIPA Estimates for 2002: Effects of Incorporating the 2002 Benchmark I-O Accounts and Proposed Definition and Statistical Changes" (March 2008)

In addition, see the following articles.

"Annual Revision of the National Income and Product Accounts" (August 2011 presents revisions and describes any changes in the data and the methods used to prepare the estimates.

"Updated Summary of NIPA Methodologies" (November 2010) describes the source data and methods that are used to prepare the estimates.

"Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" (November 2003) discusses the advantages of using chain-weighted indexes and the challenges of using chained dollars.

"Revisions to GDP, GDI, and Their Major Components" (July 2011) evaluates the principal NIPA estimates by examining the record of revisions to them.

"Gross Domestic Product: Revisions and Source Data" (February 2006) describes the categories of data that are used for the advance, preliminary (now called second), and final (now called third) quarterly estimates of GDP.

Fixed assets and consumer durable goods. *Fixed Assets and Consumer Durable Goods in the United States, 1925–97* (2003) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1999–2008" (November 2009) describes the improvements that were incorporated into these estimates as part of the 2009 comprehensive NIPA revision.

Satellite account. This account extends the analytical capacity of the NIPAs by focusing on the effects of a particular aspect of economic activity on GDP.

"Research and Development Satellite Account"
- For 1959–2002 (December 2006)
- For 1959–2004 (October 2007)
- For 1959–2007 (December 2010)

Mission Statement and Strategic Plan

The mission statement of the Bureau of Economic Analysis and its most recently updated strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at www.bea.gov under "About BEA."

Industry accounts

The industry accounts consist of the annual industry accounts (the input-output accounts and the gross domestic product by industry accounts), the benchmark input-output accounts, and two satellite accounts.

Annual industry accounts. "Preview of the Comprehensive Revision of the Annual Industry Accounts" (March 2010) provides the details about the upcoming comprehensive revision.

"Annual Industry Accounts" (June 2010) presents the comprehensive revision of these accounts and summarizes the source data and any changes in the methods that are used to prepare the estimates.

Benchmark input-output accounts. *Concepts and Methods of the U.S. Input-Output Accounts* (September 2006) describes the concepts and methods that underlie the preparation of these accounts.

Satellite accounts. These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

"U.S. Travel and Tourism Satellite Accounts"
For 2004–2007 (June 2008)
For 2005–2008 (June 2009)
For 2004–2009 (November 2010)
For 2007–2010 (June 2011)

International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts and international investment position accounts. "A Guide to the U.S. International Transactions Accounts and the U.S. International Investment Position Accounts" (February 2010) introduces these accounts.

The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures (1990) describes the methodologies used to prepare the estimates in the ITAs and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the international transactions accounts. The updated and improved methodology is described in a series of articles, the latest of which was published in the July 2011 SURVEY.

"Modernizing and Enhancing BEA's International Economic Accounts: A Progress Report" (May 2011) updates BEA's plans to introduce the new international statistical standards from recently updated manuals and its plans for changes that will be included in the June 2011 annual revision.

Direct investment. Updated methodologies are available in *U.S. Direct Investment Abroad: Final Results From the 2004 Benchmark Survey* (2008) and in *Foreign Direct Investment in the United States: Final Results From the 2002 Benchmark Survey* (2006).

Additional improvements are described in the following annual articles: "Direct Investment Positions: Country and Industry Detail" (July) and Operations of U.S. Multinational Companies (August 2010) and of U.S. Affiliates of Foreign Companies (August 2011).

International services. The methodology used to prepare the estimates is usually updated and improved in a series of articles, the latest of which was published in the October 2010 SURVEY.

"Selected Issues in the Measurement of U.S. International Services" (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services.

Regional accounts

The regional accounts include estimates of personal income and gross domestic product.

Personal income. Estimates of personal income are prepared for states and for local areas.

State Personal Income (2009) describes the improvements in the methodology that is used to prepare the quarterly and annual estimates. This methodology has been updated in "Regional Quarterly Report: Comprehensive Revision" (November 2009).

Local Area Personal Income (2009) describes the detailed methodology that is used to prepare the estimates for counties, metropolitan divisions and areas, micropolitan areas, and BEA economic areas and regions. This methodology has been updated in "Comprehensive Revision of Local Area Personal Income" (May 2010).

Gross domestic product. Estimates of gross domestic product (GDP) are prepared for states and metropolitan areas.

Gross Domestic Product by State (2006) describes the sources and the methods that are used to prepare the estimates.

"Gross Domestic Product by State" (December 2010) presents the results of the most recent comprehensive revision.

"Introducing New Measures of the Metropolitan Economy: Prototype Estimates of GDP by Metropolitan Area" (November 2007) describes the potential uses of the estimates.
