# the BUSINESS SITUATION

CHART 1

## Real Product: Change From Preceding Quarter

Based on Seasonally Adjusted Annual Rates

REAL GNP increased at an annual rate of one-half percent in the first quarter, after an extraordinary—7 percent—increase in the fourth quarter of 1978 (table 1). The first-quarter increase would have been about 1 percentage point larger had it not been for the unfavorable weather, which mainly affected the construction components. The deceleration in GNP was in final sales, which, in total, changed little. Personal consumption expenditures (PCE) and nonresidential fixed investment increased less than in the fourth quarter, and the other major components—residential investment, net exports, and government purchases—declined (chart 1). Although these 15-day estimates are based on incomplete source data, it is unlikely that subsequent revisions will alter the picture of an increase that falls short of that in potential GNP.<sup>1</sup>

GNP prices as measured by the fixed-weighted price index increased 9½ percent at an annual rate, 1 percentage point more than in the fourth quarter. Food and energy were the major factors in the step-up. If last October's pay

1. The first-quarter estimates are based on the following major data sources: For *personal consumption expenditures* (PCE), retail sales, and unit auto and truck sales through March; for *nonresidential fixed investment*, the same information for autos and trucks as for PCE, manufacturers' shipments of machinery and equipment for January and February, January and February construction put in place, and investment plans for the quarter; for *residential investment*, January and February construction put in place, and housing starts for January and February; for *change in business inventories*, January and February book values for manufacturing and trade, and unit auto inventories through March; for *net exports of goods and services*, January and February merchandise trade, and fragmentary information on investment income for the quarter; for *government purchases of goods and services*, Federal unified budget outlays for January and February, State and local construction put in place for January and February, and State and local employment through March; and for *GNP prices*, the Consumer Price Index for January and February, the Producer Price Index through March, and unit value indexes for exports and imports for January and February. Some of these source data are subject to revision.

raise of Federal employees, which in the national income and product accounts is treated as an increase in the price of services purchased by the Federal Government, is excluded to approximate more closely inflation in the prices of business products, the step-up is one-half percentage point larger.

The acceleration in prices offset only part of the deceleration in real GNP, and, accordingly, current-dollar GNP at an annual rate also increased less than in the fourth quarter—\$51 billion, compared with \$78½ billion. Charges against GNP other than corporate profits increased \$62 billion, compared with \$67½ billion. An estimate of first-quarter corporate profits is not available, but a residual calculation—which, of course, is subject to a considerable margin of error—indicates a decline of about \$11½ billion, compared with an estimated increase of the same size in the fourth quarter (table 2).

In periods in which corporate profits are changing rapidly, personal income usually moves very differently from GNP, making questionable the common practice of using personal income as a proxy for GNP when a direct measure of GNP is not available. The difference in movements arises because GNP includes corporate profits, whereas personal income includes only the relatively stable dividend component of corporate profits.<sup>2</sup> In the first quarter, there was a substantial difference in movement because the indicated sharp drop in corporate profits held down the increase in GNP relative to that in personal income. Another item that is included in GNP but not in personal income is

2. Table 4 of the National Income and Product Tables presents a detailed reconciliation of GNP, viewed as the sum of factor incomes and other charges against GNP, with personal income.

contributions for social insurance. Total contributions at an annual rate increased \$13½ billion in the first quarter, largely due to legislative changes, and added to the increase in GNP relative to that in personal income. The third factor that was a major source of the first-quarter difference between the changes in GNP and personal income is Government payments to farmers, which is an item included in personal income but not in GNP. These payments decreased \$2½ billion, and held down the increase in personal income relative to that in GNP.

As also can be seen from table 2, the deceleration in GNP was larger than that in personal income—\$28 billion, compared with only \$12 billion. The single largest factor was the \$23 billion swing in corporate profits indicated by the residual calculation. Government payments to farmers and contributions for social insurance were partial offsets.

*Prices.*—As noted earlier, GNP prices as measured by the fixed-weighted price index increased at an annual rate of 9½ percent, compared with 8½ percent in the fourth quarter of 1978. The GNP implicit price deflator increased less than the fixed-weighted index—8½ percent—and accelerated less—from 8 percent in the fourth quarter. In contrast to the change in the fixed-weighted index, the change in the implicit deflator reflects not only price changes but also shifts in the composition of goods and services that make up the GNP. The deflator was held down in the first quarter by a net shift in composition toward those goods and services that registered less than average price increases since the 1972 valuation period.

Table 3 shows fixed-weighted price indexes for GNP and major components. Prices of PCE accelerated sharply, from a 7 percent annual rate increase in the fourth quarter to 10½ percent in the first. The sharpest accelerations were in food and energy; the prices of other PCE also accelerated, but much less—from 6½ to 7½ percent (chart 2). In this group, prices of motor vehicles showed a sharp step-up. This step-up was traceable mainly to the December 1978 round of price increases for domestic cars and year-end increases in the prices of newly introduced models of imported cars, which were fully reflected only in the first quarter.

Food prices increased 19 percent at an annual rate, more than double the fourth-quarter rate of increase. Fresh vegetables and meat, especially beef, showed the sharpest accelerations. Unfavorable weather and labor disputes that disrupted supplies of lettuce were major factors for vegetables. For beef, strong demand coupled with lower marketings of grass-fed beef—the source of lower quality cuts such as hamburger—led to sharply higher prices. The lower marketings reflected cattlemen's rebuilding of their herds in response to a favorable ratio of prices received for beef cattle to prices paid for feed.

Energy prices increased 17 percent at an annual rate, compared with 11 percent in the fourth quarter. Gasoline and fuel oil reflected sharp increases in the price of crude oil. An OPEC decision in December raised 5 percent, effective January 1, the price of crude oil charged by its members, and a cut in Iranian

oil production beginning in late December led to further, shortage-induced increases. Prices of gasoline were affected, in addition, by a Department of Energy regulation effective March 1 that allowed U.S. refiners to "tilt" toward gasoline the increases in their crude oil and processing costs incurred since January 1. Effective April 1, OPEC set a price floor more than 9 percent above the January 1 level and authorized its members to add surcharges on their own initiative; in part these actions ratified prices already in effect.

Prices paid by government and investors combined increased less than in the fourth quarter—8 percent at an annual rate, compared with 10 percent. Prices of structures—residential and nonresidential, and private and public—increased substantially less than in the fourth quarter. The deceleration registered for Federal purchases was due to the pay raise, which had added about 8½ percentage points to the fourth-quarter rate of increase. In contrast, prices of producers' durable equipment accelerated; acceleration of motor vehicle prices was the single largest factor.

*Employment and unemployment.*—The labor force showed another large increase in the first quarter—about 950,000, compared with 770,000 in the fourth quarter. Employment increased slightly more, and unemployment and the unemployment rate declined—the latter from 5.8 to 5.7 percent (table 4). The decline was in the unemployment rate for women and teenagers; the rate for men was unchanged. The employment-population ratio—at 59.4 percent—was at an alltime high.

<b>Equals: Gross domestic product</b> .....	2,066.5	2,117.3	2,195.1	2,244.3	1,373.9	1,383.9	1,407.0	1,409.3	3.0	6.9	.7			

The largest increases in employment were in manufacturing and in trade. The manufacturing increase was concentrated in durables, continuing a pattern that has prevailed during the past year. First-quarter increases were especially strong in transportation equipment and in electrical and non-electrical machinery. Average weekly hours for the private nonfarm economy

were down 0.1 from 35.9 in the fourth quarter, despite an increase of 0.1 in manufacturing.

**Productivity and costs.**—The deceleration in real product and the continued strong increase in labor input that occurred in the first quarter are quantified in table 5 for the business economy other than farm and housing. The estimate of the resulting decline in product per hour is 4½ percent at an annual rate. This estimate is highly tentative because the first-quarter information on which it is based is incomplete, and because it is difficult to measure productivity on a quarterly basis—especially if economic activity is being disrupted by factors such as the unfavorable weather that occurred in the first quarters of this and last year. For instance, the hours estimate used in the productivity calculation is based on average weekly hours paid rather than worked. It is likely that the weather resulted in a loss in hours worked larger than the loss in hours paid, because many employers continued to pay wages even though production was curtailed. Accordingly, a measure of productivity based on hours worked would show a smaller decline than the one in table 5. A similarly poor productivity performance in the first quarter of last year was followed by better performance in subsequent quarters, but still resulted in a 1978 increase of only one-half a percentage point.

Compensation per hour was affected by an increase in the minimum wage and an increase in employer contributions for social security, as it had been in the first quarter of last year. About one-half a percentage point of the 10 percent first-quarter 1979 increase was due to the minimum wage and 1½ percentage points to social security contributions. Reflecting both the swing in productivity and the acceleration in compensation per hour, unit labor costs increased 15 percent, more than twice as much as in the preceding quarter.

#### Personal income and its disposition

Personal income at an annual rate increased about \$45 billion in the first quarter, compared with \$57½ billion in the fourth quarter of 1978 (table 6). Two-thirds of the deceleration was

1. Assumed.

2. Calculated residually, as the increase in current-dollar GNP less the increase in charges against GNP other than corporate profits with inventory valuation and capital consumption adjustments.

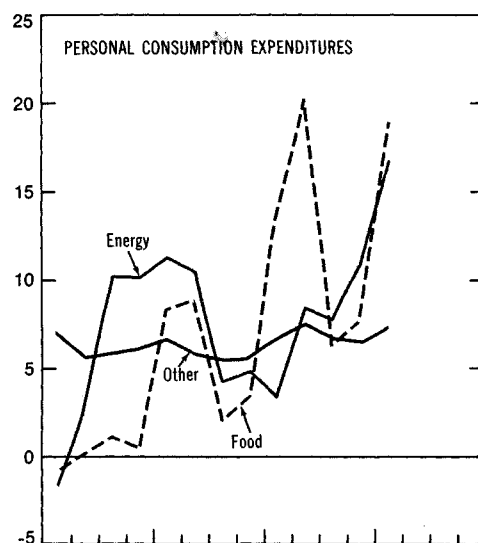

traceable to proprietors' income. Personal contributions for social insurance more than accounted for the remainder.

Wages and salaries at an annual rate increased about \$35½ billion, only a little less than in the fourth quarter. About three-fifths of the first-quarter increase was due to hourly earnings; the rest was more than accounted for by employment, as average weekly hours were down. About \$2 billion was added to hourly earnings—almost all of it in the distributive and service industries—by the increase in the minimum wage from \$2.65 to \$2.90 per hour and the expansion of coverage under the Fair Labor Standards Act, both of which became effective in January. A deceleration in government and government enterprise payrolls reflected last October's Federal pay raise, which had added \$2½ billion to the fourth-quarter increase. (These and other special factors that affected personal income in the fourth and first quarters are listed after the personal income total in table 6.)

The deceleration in proprietors' income was largely in farm income, which

CHART 2

### Fixed-Weighted Price Index: Change From Preceding Quarter

changed little after a substantial increase in the fourth quarter. Most of the deceleration was due to a swing in Federal payments to farmers. These payments at an annual rate declined \$2½ billion after increasing \$2 billion in the fourth quarter; the fourth quarter had included unusually large payments to grain farmers under the target price provisions of the Food and Agriculture Act of 1977.

Personal contributions for social insurance are deducted from wage and salary disbursements and proprietors' income to arrive at personal income. These contributions at an annual rate increased \$6½ billion, compared with \$1½ billion in the fourth quarter. The \$5 billion step-up was due to an increase in the social security tax rate from 6.05 to 6.13 percent and an increase in the taxable wage base from \$17,700 to \$22,900.

Personal taxes at an annual rate declined about \$4½ billion in the first quarter; they had increased \$12 billion in the fourth quarter of 1978 (see the accompanying tabulation). The swing was due to legislative changes. In Federal taxes, legislative changes led to a \$13 billion decline in the first quarter, about \$9½ billion of which was offset mainly by an increase in withholdings in line with the continued increase in payrolls. The principal ele-

ment in the legislative changes was a reduction in individual income taxes under the Revenue Act of 1978, which cut effective rates and increased the standard deduction and personal exemptions. (For a discussion of 1978 Federal tax legislation, see the November 1978 and February 1979 issues of the SURVEY OF CURRENT BUSINESS.) Legislative changes in California and New York reduced State and local first-quarter tax payments \$3 billion.

(Change from preceding quarter; billions of dollars, based on seasonally adjusted annual rates)

	1978:IV	1979:I
Personal tax and nontax payments.....	11.9	-4.4

State and local.....	1.8	-.8
Impact of legislation.....	.0	-2.8
Other.....	1.8	2.0

The swing in personal taxes more than offset the deceleration in personal income, and disposable personal income at annual rate increased \$49½ billion in the first quarter, about \$4 billion more than in the fourth. As noted earlier, prices paid by consumers increased substantially more than in the fourth quarter. As a result, real disposable personal income, which had increased 6 percent in the fourth quarter, increased only about 3 percent in the first. Given

the recent large shifts in quarter-to-quarter changes in disposable personal income—stemming from both personal income and personal taxes—and the sharp acceleration in inflation, it is even more difficult than usual to relate changes in PCE and personal saving to changes in income. As will be discussed below, PCE decelerated sharply in the first quarter. The saving rate increased from 4.8 percent in the fourth quarter to 5.2 percent in the first.

*Personal consumption expenditures.*—Real PCE increased only 1½ percent at an annual rate in the first quarter, much less than in the three preceding quarters (table 7). The unfavorable weather may have been a factor in the quarter's weakness, but, although it is possible to see the depressing effects of the weather on monthly retail sales, it is impossible to quantify those effects and any subsequent rebound in a reliable manner. Services were up 5½ percent—somewhat above trend. Expenditures on electricity and natural gas and on foreign travel were particularly strong. Goods declined despite substantial increases in motor vehicles and parts and in energy, where gasoline increased, although less than in the fourth quarter, and fuel oil and coal increased after a decline. Furniture and household equipment, food, clothing and shoes, and the "other" categories of both durables and nondurables de-

1. Gasoline and oil, fuel oil and coal, electricity, and gas.

declined after unusually large increases in the fourth quarter.

The strength of motor vehicles and parts was confined to new autos; purchases of trucks and used autos declined, and parts showed no change. New car sales, which include sales to business and other final users as well as to consumers, totaled 11.6 million units (seasonally adjusted annual rate) in the first quarter, up 20½ percent at an annual rate from 11.1 million in the fourth. Almost all of the increase was in sales of imported cars, which reached a record 2.3 million. Imports captured 20 percent of the market, their largest share since the 1974-75 recession. Sales of imports, which are nearly all small cars and are more fuel-efficient than most domestic cars, reflected concern over future gasoline supplies and prices. Domestic car sales were up only slightly—0.1 million—from 9.2 million in the fourth quarter. Within total domestic sales, there was a shift among size categories. Small car sales, like sales of imports, increased rapidly. They were up 0.4 million to a record 3.9 million, and increased their share to 33 percent of

total sales. Intermediate car sales fell 0.2 million to 2.8 million; their share dropped to 23½ percent. Full-sized car sales were steady at 2.8 million, and their market share slipped to 23½ percent.

#### Investment

Real nonresidential fixed investment increased much less in the first quarter than in the fourth—2½ percent at an annual rate, compared with 9½ percent—due to a decline in structures (table 8). The decline in structures largely reflected the unfavorable weather—above-average precipitation, either

rain or snow, and below-average temperatures. Expenditures for producers' durable equipment increased 8 percent, a little less than in the fourth quarter. As in PCE, an increase in autos partly offset a decline in trucks; other producers' durable equipment continued to increase.

Real residential investment declined 14 percent at an annual rate from the fourth-quarter level, which was near the high end of the \$59½-\$60½ billion (1972 dollars) range in which it had stayed since the fourth quarter of 1977. As in nonresidential structures, the decline largely reflected unfavorable weather. The impact of the weather is evident from housing starts, but the course of housing starts indicates that other factors were at work as well.

Housing starts, which had averaged 2.08 million (seasonally adjusted annual rate) in the fourth quarter of 1978, dropped to 1.68 million in January and to 1.38 million in February, then rebounded to 1.79 million in March (chart 3).<sup>3</sup> Starts were lower in February than in the fourth quarter in all regions, and only in the South was the March re-

3. The March starts are somewhat below the assumption about single-family starts used in preparing the estimate of residential investment. However, because starts in the third month of a quarter receive only a small weight in the phasing pattern used to prepare the estimate, the impact on the estimate is very small.

### Housing Starts

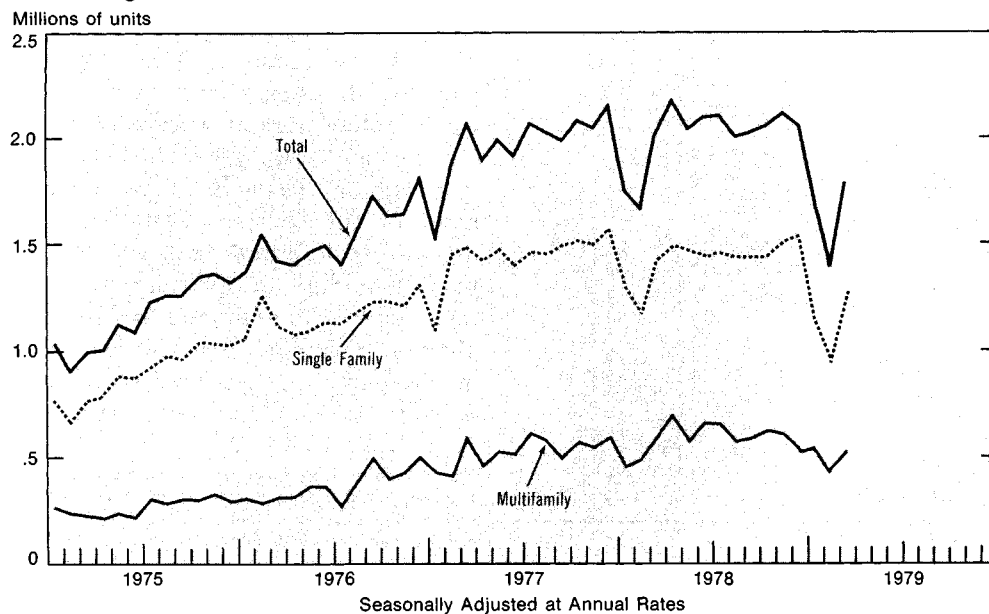

CHART 3

bound strong enough to regain the fourth-quarter level. In the Northeast and North Central regions the recovery was partial, and in the West starts remained depressed. Given the regional incidence and timing of the unfavorable weather, it is evident that weather was an important factor. The fact that the recoveries in the Northeast and North Central regions were only partial suggests that additional factors were at work. In the West, it is clear that these factors were present. Although it is difficult to compare such dissimilar situations, another indication that factors other than the weather were involved is that this year's rebound was weaker than the rebounds from the severe winter weather that occurred in 1978 and 1977.

For single-family construction, the most important factor other than the weather was financial developments.

It appears that these developments have finally begun to have a depressing effect. Outstanding mortgage commitments at thrift institutions have fallen off moderately since November. The continued rise in mortgage interest rates may have begun to impinge on demand for loans (chart 4). On the supply side, net inflows to thrifts—savings and loan associations and mutual savings banks—have shown signs of slowing. Through March, the slowing has been mainly in sources of funds other than the 6-month money market certificates (MMC's). There is evidence, however, that funds obtained from MMC's were being invested increasingly in instruments other than mortgages. As the 6-month Treasury bill rate, to which the rate on MMC's is tied, rose, thrifts felt pressure to maintain their earnings, and therefore increasingly invested their inflows from MMC's in instruments such as 90-day certificates of deposit that carried rates above those on mortgages. Also, the certificates of deposit have a maturity close to that of MMC's—an advantage to the thrifts should they be faced with a withdrawal of MMC funds.

For banks, the spread between the prime rate and the rate on mortgages provided an incentive to put inflows from MMC's into loans to business. Furthermore, usury laws continued to limit lending, although in recent months several States have removed or revised their usury laws.

For multifamily construction, chart

3 indicates that factors other than the weather are depressing construction activity: Starts have been falling off since the second quarter of 1978. Despite support from the Section 8 Housing Assistance Program, which subsidizes rents of low-income families, the construction of rental units appears to have been held down by a number of

factors: the smaller increase in rents than in operating costs; concern about the spread of rent controls; the sharp rise in interest rates on construction loans, which are usually 2 percentage points above the prime rate, and on mortgages; and the absence of the tax and inflation-hedge advantages of homeownership.

*Change in business inventories.*—Real inventory investment at an annual rate was \$12 billion, compared with \$8 billion in the fourth quarter. Inventory investment accounted for the first-quarter increase in GNP. (The first-quarter inventory estimate includes the assumption that manufacturing and trade inventory investment

in March will be substantially higher than in February.) Durables manufacturing accounted for the bulk of inventory investment in the first quarter, and for more than its step-up from the fourth. All durables manufacturing industries except primary metals registered substantial investment; most of the step-up was in motor vehicles and parts inventories, which were reduced in the fourth quarter and increased in the first. Wholesale trade more than accounted for the remainder of first-quarter investment; the rate of investment was about the same as in the fourth quarter. Retail inventories were reduced at about the moderate rate at which they had increased in the fourth

quarter. The first-quarter reduction was in nondurable inventories.

In combination with a small decline in business final sales, the first-quarter step-up in inventory investment resulted in an increase in inventory-sales ratios (chart 5). The ratio of inventories to total business final sales increased from its record low of 0.264 in the fourth quarter to 0.267, and the ratio of inventories to business final sales of goods and structures increased from 0.411 to 0.417.

The strengthening of new orders for durables manufacturing and the buildup of unfilled orders through February, the slowing of deliveries reported by purchasing agents, and the acceleration of sensitive commodity prices, as well as scattered information from industry sources, have raised concern that the ground is being laid for a boom in inventory investment. The information on inventories that is available—on manufacturing and trade inventories through February and on unit auto inventories through March—does not indicate that such a boom has begun.

#### Net exports

Real net exports at an annual rate were \$9 billion, compared with \$10 billion in the fourth quarter, as imports increased more than exports (table 9). In merchandise trade, exports were unchanged; a decline in agricultural exports, largely due to reduced grain exports, was offset by an increase in nonagricultural exports. Imports were up, largely reflecting an increase in non-petroleum imports. In petroleum, an increase in imports early in the quarter, the result of purchases made in anticipation of the January OPEC price increase, more than offset a decline in imports from Iran late in the quarter.

#### Government

Real Federal purchases changed little in the first quarter after a 9 percent annual rate increase in the fourth that had reflected a swing in Commodity Credit Corporation purchases (table 10). A 4½ percent decline in State and local government purchases was attributable to structures. Much of it was due to the unfavorable weather.

CHART 4

### Selected Interest Rates

*NIPA Federal sector.*—Table 11 is in current dollars and rounds out the information on Federal receipts and expenditures. Federal expenditures at an annual rate increased only \$3½ billion, compared with \$19½ billion in the fourth quarter of 1978. In addition to a deceleration in purchases, grants-in-aid and subsidies less the current surplus of government enterprises declined after increases in the fourth quarter. In subsidies, the major factor was the swing in payments to farmers referred to earlier. Among receipts, the swing in personal taxes and the acceleration of contributions for social insurance were explained in the section on personal income. Corporate inventory profits at an annual rate increased sharply in the first quarter—from \$28½ billion to \$40½ billion. This increase about offset the sharp drop in residually calculated corporate profits with inventory valuation and capital consumption adjustments. Accordingly, book profits, on which corporate profits taxes are levied, changed little in the first quarter. Given this calculation, corporate profits taxes at an annual rate declined about \$6 billion—the decline reflecting the provisions of the Revenue Act of 1978. On a national income and product accounts basis, the Federal deficit was roughly the same as in the fourth quarter.

Tables showing the key source data and projections used by BEA in preparing the preliminary (15-day) national income and product estimates will no longer be published in the SURVEY. These tables are available on request from the National Income and Wealth Division of BEA.

CHART 5  
Constant-Dollar Business Inventories, Final Sales and Final Sales of Goods and Structures, and Inventory-Sales Ratios

Note: End-of-quarter inventories, seasonally adjusted; final sales seasonally adjusted at annual rates. Blue lines represent ratios of inventory stocks to final sales.

# Gross Product by Industry, 1978

THE slowing of real growth in GNP from a 4.9 percent annual rate in 1977 to 4.0 percent in 1978 reflected smaller increases in 1978 than in 1977 in most of the large industries and a decline in agriculture, forestry, and fisheries after an increase in 1977 (table 1).

Prices as measured by the implicit price deflator accelerated from 5.9 percent in 1977 to 7.4 percent in 1978. Virtually all industries had larger increases in 1978; agriculture, forestry, and fisheries showed the sharpest acceleration.

The estimates for 1978 are preliminary. Revised estimates for that year and also for 1976 and 1977 will appear in tables 6.1 (current dollars), 6.2 (constant dollars), and 7.15 (implicit price deflators) of the July 1979 SURVEY OF CURRENT BUSINESS.

1. The industry classification is on an establishment basis and is based on the 1972 Standard Industrial Classification.

2. Equals GNP in constant dollars measured as the sum of final products less GNP in constant dollars measured as the sum of gross product by industry.

*Updated Input-Output Table of the U.S. Economy: 1972 (Derived from the 1967 Input-Output Table)* is now available as BEA Staff Paper No. 32. The tables in this study are 85-industry updates of the 1967 benchmark input-output tables. They differ from the 1972 benchmark input-output tables published elsewhere in this and the February 1979 issues of the SURVEY OF CURRENT BUSINESS. Single copies of the 1972 update are available from BEA's Interindustry Economics Division (BE-51). Additional copies may be secured from the National Technical Information Service, 5285 Port Royal Road, Springfield, Va. 22161. The price is \$5.25 for paper copy and \$3.00 for microfiche. Ask for BEA-SP 79-032.

<sup>1</sup> Preliminary.

1. Equals GNP in constant dollars measured as the sum of final products less GNP in constant dollars measured as the sum of gross product by industry. The quarterly estimates are obtained by interpolating the annual estimates with the statistical discrepancy deflated by the implicit price deflator for gross domestic business product.

NOTE.—Table 6: The industry classification within the business sector is on an establishment basis and is based on the 1972 Standard Industrial Classification.

Footnotes for tables 2 and 3.

1. Equals GNP in constant dollars measured as the sum of final products less GNP in constant dollars measured as the sum of gross product by industry. The quarterly estimates are obtained by interpolating the annual estimates with the statistical discrepancy deflated by the implicit price deflator for gross domestic business product.

NOTE.—Table 2: "Final sales" is classified as durable or nondurable by type of product. "Change in business inventories" is classified as follows: For manufacturing, by the type of product produced by the establishment holding the inventory; for trade, by the type of product sold by the establishment holding the inventory; for construction, durable; and for other industries, nondurable.

Table 3: The industry classification within the business sector is on an establishment basis and is based on the 1972 Standard Industrial Classification.

2. Held constant at level of previous quarter.

<sup>p</sup> Preliminary.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories shown in this table is not the current-dollar change in business inventories (CBI) components of GNP. The former is the difference between two inventory stocks, each valued at end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at annual rates.

3. Equals ratio of nonfarm inventories to final sales of business. These sales include a small amount of final sales by farms.

NOTE.—Table 16: Inventories are classified as durable or nondurable as follows: For manufacturing, by the type of product produced by the establishment holding the inventory; for trade, by the type of product sold by the establishment holding the inventory; for construction, durable; and for other nonfarm industries, nondurable. The industry classification is based on the 1972 Standard Industrial Classification.

Table 17: The industry classification of compensation of employees, proprietors' income, and rental income is on an establishment basis; the industry classification of corporate profits and net interest is on a company basis. The industry classification of these items is based on the 1972 Standard Industrial Classification.

† Preliminary.  
1. Consists of final sales and change in business inventories of new autos produced in the United States.  
2. Consists of personal consumption expenditures, producers' durable equipment, and government purchases.

NOTE.—Table 21: "Final sales" is classified as durable or nondurable by type of product. "Change in business inventories" is classified as follows: For manufacturing, by the type of product produced by the establishment holding the inventory; for trade, by the type of product sold by the establishment holding the inventory; for construction, durable; and for other industries, nondurable.

Tables 22 and 23: The industry classification within the business sector is on an establishment basis and is based on the 1972 Standard Industrial Classification.

79.4.7

# State Differences in Nonfarm Personal Income Growth in the Current Business Cycle

THE pattern of State differences in nonfarm personal income growth in the current business cycle is a continuation of a trend: Most of the States with a large growth advantage (that is, an increase in nonfarm personal income that exceeded the national average by more than 10 percent) in the current business cycle grew at above-national-average rates since 1950, and most of the States with a large growth disadvantage (that is, an increase in nonfarm personal income that fell short of the national average by more than 10 percent) in the current business cycle grew at below-national-average rates since 1950.<sup>1</sup> The timespan under review extends from the fourth quarter of 1973—the national cyclical peak—to the fourth quarter of 1978—the most recent quarter for which State income estimates are available. It may be divided into a recession phase, dating to the national cyclical trough in the first quarter of 1975, and an expansion phase, dating from that trough. From the recession to the expansion, State differences in rates of nonfarm income growth narrowed, as they have in every national business cycle since 1950.<sup>2</sup> In the current business cycle, however, the narrowing was less than had occurred in previous business cycles, mainly because of an increase in the growth disadvantage in most of the Mideast States.

Chart 8 highlights the pattern of State differences in rates of nonfarm income growth in the current business cycle.<sup>3</sup> From the fourth quarter of 1973

to the fourth quarter of 1978, New Hampshire and 22 southern and western States—including all of the States in the Southwest, Rocky Mountain, and Far West BEA regions and one-half of the States in the Southeast region—had a large growth advantage. Conversely, the District of Columbia and nine northern States—including all of the States in the Mideast region—had a large growth disadvantage.

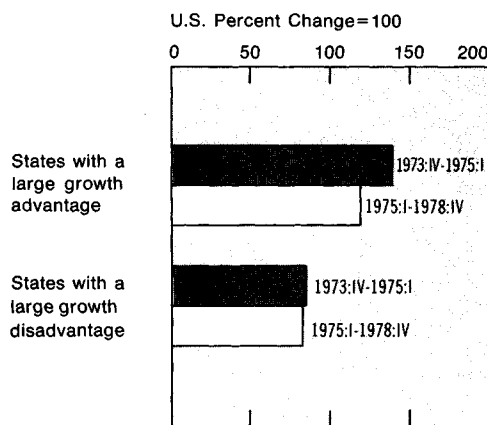

All but three of the States with a large growth advantage over the whole timespan had a growth advantage in both phases of the current business cycle, and each of the States with a large growth disadvantage over the whole timespan had a growth disadvantage in both phases. However, as noted above, from the recession to the expansion, State differences in rates of growth narrowed: On average, in the States with a large growth advantage, the advantage declined substantially—from 39 to 19 percent—and in the States with a large growth disadvantage, the

disadvantage increased only slightly—from 15 to 17 percent (chart 7). The amount by which the percent change in nonfarm income in the States with a large growth advantage exceeded that of the States with a large growth disadvantage declined from 63 to 43 percent.

*States with a large growth advantage.*—In 16 of the 23 States with a large growth advantage over the whole timespan, the growth advantage declined from the recession to the expansion (table 1). Nonfarm income was strong in these States in the recession, mainly because recession-sensitive industries, such as durables manufacturing and textiles, accounted for relatively small shares of total nonfarm income in these States. Relative to the national average, the increase in both manufacturing and construction payrolls was smaller in the expansion than in the recession in each of the 16 States except Kentucky and Arkansas. In addition, relative to the national average, the increase in private service-type payrolls was smaller in the expansion in most of the States. This industrial pattern was partly offset by an increase relative to the national average in mining payrolls that was larger in the expansion in most of the 16 States.

In the seven remaining States—Wyoming, Nevada, Oregon, Arizona, Colorado, New Hampshire, and Mississippi—the growth advantage increased from the recession to the expansion. The increase was especially large in New Hampshire, Nevada, and Arizona, where the recreation industry recovered from especially low levels in the recession. Relative to the national average, the increases in mining, private service-type, and State and local government payrolls were larger in the expansion

CHART 8  
Percent Change in Nonfarm Income in Recession and Expansion

2. See "Sensitivity of State and Regional Income to National Business Cycles," SURVEY, April 1973.  
3. The focus on nonfarm personal income avoids the distorting effects on the State income growth pattern of changes in farm income, which in 1978:IV was still well below the unusually high 1973:IV level.

than in the recession in most of the seven States. Construction payrolls declined in the recession, and they increased at rates above the national average in the expansion in Nevada, Arizona, Colorado, and New Hampshire.

*States with a large growth disadvantage.*—In the nine States (and the District of Columbia) with a large growth disadvantage over the whole timespan, the patterns of change from the recession to the expansion were less uniform. In five of the States—Illinois and the Mideast States of New York, New Jersey, Maryland, and Pennsylvania—the growth disadvantage increased from the recession to the expansion. The in-

crease was especially large in New York and Pennsylvania. In the expansion, each major industry shown in table 1 except Federal Government increased at least 35 percent less rapidly than nationally in New York, and each major industry increased at least 12 percent less rapidly than nationally in Pennsylvania. Reflecting increases relative to the national average that were smaller in the expansion than in the recession, private service-type payrolls contributed to the increase in the growth disadvantage in each of the five States except New Jersey. Manufacturing payrolls contributed to the increase in the growth disadvantage in most of the States.

In the four remaining States—Delaware and the New England States of Connecticut, Rhode Island, and Massachusetts—and in the District of Columbia, the growth disadvantage declined from the recession to the expansion. Reflecting increases relative to the national average that were larger in the expansion than in the recession, construction payrolls contributed to the reduction in the growth disadvantage in each of the States, and State and local government payrolls contributed in each of the States except Rhode Island. In the District of Columbia, both State and local government and Federal Government payrolls contributed.

# County and Metropolitan Area Personal Income

THIS article presents estimates of personal income for 1977 and revised estimates for earlier years for the Nation's Standard Metropolitan Statistical Areas (SMSA's), counties, and county equivalents.<sup>1</sup> Total and per capita income for 268 SMSA's for 1969, 1975, 1976, and 1977, are shown in Table 1.<sup>2</sup> Total and per capita personal income for the 3,141 counties and county equivalents for 1969, 1976, and 1977, are shown in Table 2.<sup>3</sup>

Personal income by type of payment and labor and proprietors' income by major industry group, as shown in Table A, are available for SMSA's and for counties for 1969-77. This information can be obtained for one or more counties or SMSA's from the Regional Economic Information System of the Regional Economic Measurement Division, Bureau of Economic Analysis.<sup>4</sup>

A nine volume set, *Local Area Personal Income, 1972-77*, will be available by mid-year. Each of the eight regional volumes (volumes 2-9) will contain detailed personal income estimates for the States, SMSA's, and counties of a single region plus related analytical tables, charts, and maps and a summary methodology. A national volume (volume 1) will contain personal income

estimates for the United States and all the regions, States, SMSA's, and BEA economic areas. It will also include a detailed description of the sources and methods used in estimating local area personal income, as well as analytic tables, charts, and maps.

### *Definition of total and per capita personal income*

Personal income is the current income received by residents of an area from all sources. It is measured before deduction of income and other personal taxes, but after deduction of personal contributions for social security, government retirement, and other social insurance programs. It consists of wage and salary disbursements (covering all employee earnings, including executive salaries, bonuses, commissions, payments in kind, incentive payments, and tips), various types of supplementary

earnings termed "other labor income," proprietors' income, rental income of persons, dividends, personal interest income, and government and business transfer payments.

The definitions underlying the local area estimates are, for the most part, the same as those underlying the personal income estimates in the national income and product accounts. The major difference is in the treatment of U.S. citizens temporarily working on assignment abroad. The national estimates include not only Federal personnel—civilian and military—stationed abroad, but also—since the 1976 benchmark revisions—U.S. residents employed by private U.S. firms on temporary foreign assignment. The State and local area estimates include only persons working and/or residing in the 50 States and the District of Columbia.

### Acknowledgments

The personal income estimates were prepared under the direction of Edwin J. Coleman, Chief of the Regional Economic Measurement Division. He was assisted by Jeanne S. Goodman, Staff Methodologist. Tables were prepared by Eunice P. James and Kathy A. Albetski of the Regional Economic Information System Branch. Secretarial support was provided by C. Dale Lyons.

Estimates of private nonfarm wages and salaries and other labor income were prepared under the supervision of Elizabeth H. Queen, Chief of the Private Wage and Income Branch. She was assisted principally by: David J. Albright, Carl J. Carlson, Sharon C. Carnevale, Carol E. Evans, Kevin O'Brien, Michael G. Pilot, William E. Reid, Jr., and Victor Sahadachny.

Estimates of farm income, government wages and salaries, government other labor income, proprietors' income, property income, transfer payments, and contributions for social insurance were prepared under the supervision of Kenneth P. Berkman, Chief of the Government, Proprietary, and Investment Income Branch. He was assisted principally by: Vivian G. Conklin, Q. Francis Dallavalle, Gary V. Kennedy, Katherine R. Levit, and Jeanne O'Neill.

Residence adjustments, disclosure-avoidance, and final preparation of the local area personal income accounts were performed under the supervision of David W. Cartwright, Chief of the Regional Economic Information System Branch. He was assisted principally by Wallace K. Bailey and Paul M. Levit.

1. These estimates supersede those presented in the June 1978 SURVEY OF CURRENT BUSINESS.

2. Included for the first time are the two newly designated SMSA's: Janesville-Beloit (Rock County), Wisconsin and Rapid City (Meade and Pennington Counties), South Dakota.

3. Included for the first time are the three most recently established independent cities of Virginia: Manassas, Manassas Park, and Poquoson.

4. Estimates on a revised basis for selected earlier years will be available at the end of 1979; requests for such information should be deferred until after June 1979. There is a charge of one dollar for each State, SMSA, or county table. However, charges will not exceed: \$50 for a complete set of tables for a single State, \$250 for a complete set of SMSA tables, and \$1,000 for an entire set of State and county tables for the United States.

Per capita income is computed by dividing the residence-adjusted total personal income by midyear population estimates. Population data for July for each year were provided by the Bureau of the Census; the college student population, however, is measured as of April 1.

The per capita figures should be used with caution for several reasons. In many instances, an unusually high (or low) per capita income is the temporary result of unusual conditions, such as a

bumper crop, a major construction project (e.g., a defense facility, nuclear plant, or dam), or a catastrophe (e.g., a tornado or drought). In some cases, a high per capita income is not representative of the standard of living in an area. For example, a construction project may attract a large number of high-paid workers who are included in the population but who send a substantial portion of their wages to dependents living in other areas. Conversely, a county with a large institutional

population (e.g., residents of a college correctional institution, or domiciliary medical facility) may show an unusually low per capita income, which is not necessarily indicative of the economic well-being of the noninstitutional population. Moreover, population is measured at midyear whereas income is measured as a flow over the year. Therefore, a significant change in population during the year can cause a distortion in the per capita figures, particularly if the change occurs around midyear.

Table A.—Example of Available Data for Local Areas

1 Estimates based on 1967 SIC.

2 Estimates based on 1972 SIC.

3 Consists of wage and salary disbursements, other labor income, and proprietors' income. Primary source for private non-farm wages: ES-202 Covered Wages—Florida Division of Administration.

4 Includes the capital consumption adjustment for nonfarm proprietors.

5 Includes wages and salaries of U.S. residents working for international organizations.

6 Includes the capital consumption adjustment for rental income of persons.

1. Detail may not add to higher levels because of rounding.  
 2. The personal income level shown for the United States differs from that in the national accounts because it omits

Table 2.—Total Personal Income and Per Capita Personal Income by County for Selected Years<sup>1</sup>

# U.S. National Income and Product Accounts: Preliminary Revised Estimates, 1972

THE dollar-values tables for the 1972 input-output study are shown elsewhere in this issue of the SURVEY OF CURRENT BUSINESS. The associated revised estimates of the national income and product accounts (NIPA's) for 1972 are presented in summary form and compared with the presently published estimates in table A. The preparation of those revisions, which are preliminary, is the first step in the preparation of the next benchmark revision of the NIPA's. Additional revisions will be

made as work on the benchmark proceeds, but it is expected that they will be small. In addition, definitional changes may be introduced.

The principal new source data and estimating procedures that have been incorporated into the revised estimates for 1972 are described below.

## GNP

*Personal consumption expenditures.*—The revision to goods results mainly from the incorporation of the commod-

ity-flow procedure based on shipments of manufactured goods from the 1972 Census of Manufactures and on retail trade margins from the 1972 Annual Retail Trade Survey. The present estimates, for the most part, are extrapolations from the 1967 input-output study by retail store sales. In nondurable goods, upward revisions to food, clothing, and drugs more than offset downward revisions to semidurable household furnishings, fuel oil and coal, and cleaning and polishing preparations.

1. Numbers in parentheses indicate accounts and items of counterentry in the accounts.

The upward revision to services results from the incorporation of a wide variety of source information, such as the 1972 Census of Selected Services and 1972 Census of Transportation. The largest upward revisions are in barber-shops and beauty parlors, taxicab and airline transportation, and recreation.

*Fixed investment.*—The upward revision to producers' durable equipment results from the incorporation of the commodity-flow procedure based primarily on shipments of manufactured goods from the 1972 Census of Manufactures. The present estimates are based primarily on an abbreviated version of the commodity-flow procedure using shipments data from the Annual Survey of Manufactures, and on expenditures reported to BEA in the Quarterly Plant and Equipment Survey. Also, a new procedure for estimating capitalized expenditures for tools and dies is introduced. The upward revision to residential structures results primarily from the incorporation of the latest Census Bureau estimate of the value of residential construction put-in-place.

*Change in business inventories.*—The upward revision results primarily from the incorporation of a revised estimate of wholesale trade inventories (book value) from the 1972 Census of Business.

#### **Charges against GNP**

*Compensation of employees.*—The upward revision to wages and salaries is mainly in the "educational services" industry, which covers private education. Wages and salaries paid by privately owned institutions of higher education are estimated by multiplying their total operating expenses, which are collected annually, by the estimated ratio of wages and salaries to operating expenses, based on periodic survey material. The most recent Department of Health, Education, and Welfare survey indicates that the ratio presently used should be raised.

The upward revision to supplements to wages and salaries is due to additional information from the Social Security Administration on employer contributions for temporary disability insurance.

*Proprietors' income with inventory valuation and capital consumption adjustments.*—The upward revision is mainly due to the incorporation of the results of the 1973 Taxpayer Compliance Measurement Program, the latest Internal Revenue Service (IRS) audit program. Elimination from proprietors' income of interest received was a partial offset. This interest is included in personal interest income and should not have been counted as proprietors' income.

*Rental income of persons with capital consumption adjustment.*—Most of the downward revision reflects a revision in rental income from business and industrial property, which is based on IRS corporate tax-return tabulations. Work on the input-output estimate indicated that on their income tax returns corporate lessors of railroad cars are reporting the rents they receive as "business receipts" rather than as rent. Because rental income of persons from business and industrial property is estimated as the difference between rents paid by business and rents received by business, this misclassification resulted in the inclusion of income from this source in rental income of persons as well as in corporate profits; in the revised estimates it is eliminated from rental income of persons.

*Corporate profits with inventory valuation and capital consumption adjustments.*—Most of the upward revision results from a new BEA estimate of the amount of income from abroad that U.S. corporations include in their corporate income tax returns. To obtain the NIPA estimate of domestic profits before tax, the estimated tax return measure of foreign income is deducted from IRS tabulations of total corporate

income. The estimate of tax-return foreign income is revised to exclude that part of rent, royalty, and service income that is reported for purposes of claiming the foreign tax credit but that, according to a recent study by BEA, is not income from abroad for NIPA purposes. In its effect on domestic profits, this change was partly offset by an upward revision in the IRS tabulations of foreign income reported for tax credit purposes. Also, profits are revised upward as the result of the introduction of new IRS data on the audits of corporate tax returns.

*Net interest.*—Most of the upward revision in net interest results from the incorporation of a new procedure for estimating the amount of interest receipts of corporate "business and personal credit institutions," for which IRS tax return tabulations are the source. Previously it had been determined that business receipts reported to IRS by these firms included a large amount of interest. Accordingly, all business receipts reported by these firms were treated as interest receipts. The revision results from a recent BEA study of reporting practices in this industry. This study revealed that by 1972, most of the business receipts were not interest receipts. Thus, interest received by business is reduced, and net interest is revised upward.

#### **Other NIPA components**

Interest paid by consumers to business—a component of the personal income and outlay account—is revised upward. This revision results from the incorporation of additional information from the Federal Deposit Insurance Corporation and Securities and Exchange Commission on interest paid by consumers for purchases of securities. All other revisions shown in the remaining accounts (accounts 2-5) result from the revisions to the national income and product account.

# Dollar-Value Tables for the 1972 Input-Output Study

THE dollar-value tables shown on the following pages supplement the tables that were presented in percentage terms in the article, "Input-Output Structure of the U.S. Economy, 1972," in the February 1979 issue of the SURVEY OF CURRENT BUSINESS. The dollar-value tables are:

- Table 1.—The Use of Commodities by Industries, 1972
- Table 2.—The Make of Commodities by Industries, 1972
- Table A.—Input-Output Commodity Composition of Final Demand, in Producers' and Purchasers' Prices, 1972
- Table B.—Input-Output Commodity Composition of Personal Consumption Expenditures, in Producers' and Purchasers' Prices, 1972
- Table C.—Input-Output Commodity Composition of Producers' Durable Equipment Expenditures, in Producers' and Purchasers' Prices, 1972
- Table D.—Comparable Imports in Foreign Port Value and Domestic Port Value, 1972

The direct and total requirements tables in the February article (tables 3, 4, and 5) are unchanged.

The dollar values are being presented now that the reconciliation of the GNP derived as part of the input-output (I-O) study with the GNP derived in terms of incomes as part of the national income and products accounts (NIPA's) has been completed. (I-O and NIPA's are conceptually and statistically integrated; the basic relationships were explained in the February article.) The summary NIPA's for 1972 on the reconciled basis are shown in the article, "U.S. National Income and Product Accounts: Preliminary Revised Estimates, 1972," in this issue of the SURVEY. As explained in that article, the associated NIPA time series will not be available this year.

Appendix I provides the industry classification of the 1972 I-O tables, showing the 85-industry/commodity (two-digit) level of detail applicable to the tables shown in this article, the 496-industry/commodity (six-digit) level applicable to the most disaggregated I-O tables prepared for 1972, and an

intermediate 365-industry/commodity (four-digit) level.<sup>1</sup>

### Use and make tables

The use table (table 1) shows, across the row, the dollar value of the use by each industry and of the sales to final users—persons, investors, foreigners, and government—of the output of the commodity named at the beginning of the row. Down the columns, the table shows the dollar value of the inputs of commodities—raw materials, semifinished products, and services—and the value added—the sum of compensation of employees, profit-type income, net interest, capital consumption allowances, and indirect business taxes—generated in production in the industry named at the head of the column. The row total (output) is total commodity output (no matter which industries con-

1. The publication of the 496-industry/commodity tables (tables 1 through 5) will be announced in a later issue of the SURVEY OF CURRENT BUSINESS. Computer tapes will be available at the 85, 365, and 496 levels of classification about June 1. The tape costs are \$200, \$350, \$350, respectively. Single reels of tape covering only the total requirements tables at the 365 or 496 levels will cost \$200. Tapes can be ordered from the U.S. Department of Commerce, Bureau of Economic Analysis, Budget Office (BE-15), Tower Building, Washington, D.C. 20230. Make checks payable to the U.S. Department of Commerce/BEA.

## ERRATA

Several misprints appeared in tables 3 and 4 of the article, "The Input-Output Structure of the U.S. Economy, 1972," in the February 1979 SURVEY OF CURRENT BUSINESS.

*Ind. No. 64.—Miscellaneous manufacturing:* published, 39; correct, 39 (excl. 39996).

tributed to that output) and the column total (input) is industry output. The two totals are rarely equal.

The make table (table 2) shows, across the row, the dollar value of each commodity produced by the industry named at the beginning of the row. Down the columns, the table shows the dollar value of the total output of

the commodity named at the head of the column and the amount of that commodity produced in each industry. The row total is industry output and the column total is commodity output. The row totals of table 2 equal the column totals of table 1; the column totals of table 2 equal the row totals of table 1.

The February article showed the percentage distribution of the make table's column totals, that is, each industry's market share in the production of each commodity. With the dollar values shown in this article, it is possible to calculate the percentage distribution of the row totals, that is, the proportions of each industry's production

Table A.—Input-Output Commodity Composition of

(Millions)

\*Less than \$500,000 in absolute value.

1. Purchasers' values for personal consumption expenditures include \$2 million in insurance charges (on imported commodities). Imports are excluded from the list of final demand categories because the entries are identical with those in column 95 of table 1; there is no difference between producers' and purchasers' values.

NOTE.—Table A excludes commodities for which the value of sales in producers' and purchasers' values are equal because there are no trade margins or transportation costs on these sales.

represented by the various commodities. For example, row 27 of this table shows that the chemicals and selected chemical products industry (I-O 27) produced \$24.0 billion of all commodities in 1972, including, in addition to its primary product (\$22.3 billion), \$0.9 billion of plastics and synthetic materials (column 28), \$0.4 billion of

drugs, cleaning and toilet preparations (column 29, and \$0.4 billion of 22 other commodities.

**Supplementary data**

Final demand for goods and services (commodities) in the NIPA's is expressed at purchasers' prices rather than producers' prices, and in com-

modity categories that differ from those used in I-O. Before I-O tables 4 and 5 can be used to measure the requirements for commodities or on industries of changes in the level and composition of GNP, the commodities that make up GNP (or components thereof) must be stated in the prices of the year to which the I-O tables refer, in the I-O commodity categories, and at producers' prices—in I-O terminology, a bill of goods must be formulated. The total trade margin on all commodities in the bill of goods is separately specified as a requirement from trade; similarly, the transportation cost involved in the delivery of all commodities in the bill of goods is separately specified as a requirement from transportation.

If the final demand to be analyzed is available in the aggregate only, the estimates in table 1 that show the commodity composition of each category of final demand in 1972 may be used to distribute by commodity the value of each of the categories of final demand. Some of the supplementary data that facilitate formulation of bills of goods are presented in tables A, B, C, and D.

Table A shows the I-O commodity sales to each category of final demand, in producers' and purchasers' prices, and the trade margins and transportation costs included in purchasers' prices. This table may be used if the final demand to be analyzed is given in purchasers' prices and in the classification of the I-O table.

Table B shows the I-O commodity composition of 1972 expenditures for each of the 86 components into which personal consumption expenditures (PCE) is classified in the NIPA's (table 2.6)<sup>2,3</sup> For each PCE component, the table shows the breakdown of expenditures by I-O commodity in producers' prices, and the transportation costs and trade margins that are added to arrive at the PCE component value, which is in purchasers' prices.

Table C shows the I-O commodity composition of 1972 expenditures for each of the 24 types into which pro-

\*Less than \$500,000

analyzed are in foreign port value and in the I-O classification.

It should be noted that the dollar values of transportation and insurance (I-0's 65 and 70) in table D differ from those in column 95 of table 1. The entry (in millions of dollars) for transportation in table 1 (-1,153) equals the column total for transportation in

table D (2,653) less the row value for I-0 65 in table D (3,806). The column total for transportation in table D consists of the cost of transportation of imported goods by foreign and domestic carriers, whereas the row entry for I-0 65 consists of such costs by foreign carriers plus costs for transporting U.S. residents and their personal goods on

foreign carriers. Similarly, the insurance value in table 1 (-165) equals the column total for insurance in table D (96) less the row value for I-0 70 in table D (261). The entry for trade in table 1 is positive and equal to the column total for duty in table D (2,993). Total imports (-76,199, in column 95 of table 1) are equal to the negative of total foreign port value (-60,356, in the first column of table D), plus total noncomparable imports (-15,843, in row 80, column 95 of table 1).

## APPENDIX I.—Industry Classification of the 1972 Input-Output Tables<sup>1</sup>

The titles in bold face represent the groupings of industries used for the summary version of the 1972 tables.

Industry number and title	Related Census-SIC codes (1972 edition)	Industry number and title	Related Census-SIC codes (1972 edition)
<b>AGRICULTURE, FORESTRY, AND FISHERIES</b>			
<b>1 Livestock and livestock products</b>			
1.0100 Dairy farm products.....	0241, pt. 0191, pt. 0259, pt. 0291	11.0106 New hotels and motels.....	pt. 15-17
1.0200 Poultry and eggs.....	025 (excl. 0254 and pt. 0259), pt. 0191, pt. 0219, pt. 0291	11.0107 New dormitories.....	pt. 15, pt. 17
1.0301 Meat animals.....	021 (excl. pt. 0219), pt. 0191, pt. 0259, pt. 0291	11.0201 New industrial buildings.....	pt. 15-17

2.0702 Greenhouse and nursery products.....	pt. 018, pt. 0191, pt. 0219, pt. 0259, pt. 0291	11.0306 New water supply facilities.....	pt. 16, pt. 17
<b>3 Forestry and fishery products</b>			
3.0000 Forestry and fishery products.....	081-4, 091, 097	11.0307 New sewer system facilities.....	pt. 16, pt. 17
<b>4 Agricultural, forestry, and fishery services</b>			
4.0000 Agricultural, forestry, and fishery services.....	0254, 07 (excl. 074), 085, 092	11.0308 New local transit facilities.....	pt. 16, pt. 17
<b>MINING</b>			
<b>5 Iron and ferroalloy ores mining</b>			
5.0000 Iron and ferroalloy ores mining.....	101, 106	11.0400 New highways and streets.....	pt. 16, pt. 17
<b>6 Nonferrous metal ores mining</b>			
6.0100 Copper ore mining.....	102	11.0501 New farm housing units and additions and alterations.....	pt. 15, pt. 17
6.0200 Nonferrous metal ores mining, except copper.....	103-5, pt. 108, 109	11.0502 New farm service facilities.....	pt. 15, pt. 17
<b>7 Coal mining</b>			
7.0000 Coal mining.....	1111, pt. 1112, 1211, pt. 1213	11.0503 New petroleum and natural gas well drilling.....	pt. 138
<b>8 Crude petroleum and natural gas</b>			
8.0000 Crude petroleum and natural gas.....	131, 132, pt. 138	11.0504 New petroleum, natural gas, and solid mineral exploration.....	pt. 108, pt. 1112, pt. 1213, pt. 138, pt. 148
<b>9 Stone and clay mining and quarrying</b>			
9.0000 Stone and clay mining and quarrying.....	141-5, pt. 148, 149	11.0505 New military facilities.....	pt. 15-17
<b>10 Chemical and fertilizer mineral mining</b>			
10.0000 Chemical and fertilizer mineral mining.....	147	11.0506 New conservation and development facilities.....	pt. 15-17
<b>CONSTRUCTION</b>			
<b>11 New construction</b>			
11.0101 New residential 1-unit structures, nonfarm.....	pt. 15, pt. 17	11.0507 Other new nonbuilding facilities.....	pt. 15-17
11.0102 New residential 2-4 unit structures, nonfarm.....	pt. 15, pt. 17	11.0508 New access structures for solid mineral development.....	pt. 108, pt. 1112, pt. 1213, pt. 148
11.0103 New residential garden apartments.....	pt. 15-17	<b>12 Maintenance and repair construction</b>	
11.0104 New residential high-rise apartments.....	pt. 15-17	12.0100 Maintenance and repair, residential.....	pt. 15, pt. 17
11.0105 New residential additions and alterations, nonfarm.....	pt. 15, pt. 17	12.0201 Maintenance and repair of other nonfarm buildings.....	pt. 15, pt. 17
		12.0202 Maintenance and repair of farm residential buildings.....	pt. 15, pt. 17
		12.0203 Maintenance and repair of farm service facilities.....	pt. 15, pt. 17
		12.0204 Maintenance and repair of telephone and telegraph facilities.....	pt. 16, pt. 17
		12.0205 Maintenance and repair of railroads.....	pt. 16, pt. 17
		12.0206 Maintenance and repair of electric utility facilities.....	pt. 16, pt. 17
		12.0207 Maintenance and repair of gas utility facilities.....	pt. 16, pt. 17
		12.0208 Maintenance and repair of petroleum pipelines.....	pt. 16, pt. 17
		12.0209 Maintenance and repair of water supply facilities.....	pt. 16, pt. 17
		12.0210 Maintenance and repair of sewer facilities.....	pt. 16, pt. 17
		12.0211 Maintenance and repair of local transit facilities.....	pt. 16, pt. 17
		12.0212 Maintenance and repair of military facilities.....	pt. 15-17
		12.0213 Maintenance and repair of conservation and development facilities.....	pt. 15-17
		12.0214 Maintenance and repair of highways and streets.....	pt. 16, pt. 17
		12.0215 Maintenance and repair of petroleum and natural gas wells.....	pt. 138
		12.0216 Maintenance and repair of other nonbuilding facilities.....	pt. 15-17
		<b>MANUFACTURING</b>	
		<b>13 Ordnance and accessories</b>	
		13.0100 Complete guided missiles.....	3761
		13.0200 Ammunition, except for small arms, n.e.c.....	3483

18.0101 Women's hosiery, except socks	2251	28.0200 Synthetic rubber	2822
18.0102 Hosiery, n.e.c.	2252	28.0300 Cellulosic man-made fibers	2823
18.0201 Knit outerwear mills	2253	28.0400 Organic fibers, noncellulosic	2824
18.0202 Knit underwear mills	2254	<b>29 Drugs, cleaning and toilet preparations</b>	
18.0203 Knitting mills, n.e.c.	2259	29.0100 Drugs	283
18.0300 Knit fabric mills	2257-8	29.0201 Soap and other detergents	2841
18.0400 Apparel made from purchased materials	231-8, 39996	29.0202 Polishes and sanitation goods	2842
<b>19 Miscellaneous fabricated textile products</b>		29.0203 Surface active agents	2843
19.0100 Curtains and draperies	2391	29.0300 Toilet preparations	2844
19.0200 Housefurnishings, n.e.c.	2392	<b>30 Paints and allied products</b>	
19.0301 Textile bags	2393	30.0000 Paints and allied products	285
19.0302 Canvas products	2394	<b>31 Petroleum refining and related industries</b>	
19.0303 Pleating and stitching	2395	31.0100 Petroleum refining and miscellaneous products of petroleum and coal	291, 299
19.0304 Automotive and apparel trimmings	2396	31.0200 Paving mixtures and blocks	2951
19.0305 Schiffli machine embroideries	2397	31.0300 Asphalt felts and coatings	2952
19.0306 Fabricated textile products, n.e.c.	2399	<b>32 Rubber and miscellaneous plastics products</b>	
<b>20 Lumber and wood products, except containers</b>		32.0100 Tires and inner tubes	301
20.0100 Logging camps and logging contractors	2411	32.0200 Rubber and plastics footwear	302
20.0200 Sawmills and planing mills, general	2421	32.0301 Reclaimed rubber	303
20.0300 Hardwood dimension and flooring mills	2426	32.0302 Fabricated rubber products, n.e.c.	306
20.0400 Special product sawmills, n.e.c.	2429	32.0400 Miscellaneous plastics products	307
20.0501 Millwork	2431	32.0500 Rubber and plastics hose and belting	304
20.0502 Wood kitchen cabinets	2434	<b>33 Leather tanning and finishing</b>	
20.0600 Veneer and plywood	2435-6	33.0001 Leather tanning and finishing	311
20.0701 Structural wood members, n.e.c.	2439	<b>34 Footwear and other leather products</b>	
20.0702 Prefabricated wood buildings	2452	34.0100 Footwear cut stock	313
20.0800 Wood preserving	2491	34.0201 Shoes, except rubber	3143-4, 3149
20.0901 Wood pallets and skids	2448	34.0202 House slippers	3142
20.0902 Particleboard	2492	34.0301 Leather gloves and mittens	315
20.0903 Wood products, n.e.c.	2499	34.0302 Luggage	316
<b>21 Wood containers</b>		34.0303 Women's handbags and purses	3171
21.0000 Wood containers	2441, 2449	34.0304 Personal leather goods	3172
<b>22 Household furniture</b>		34.0305 Leather goods, n.e.c.	319
22.0101 Wood household furniture	2511	<b>35 Glass and glass products</b>	
22.0102 Household furniture, n.e.c.	2519	35.0100 Glass and glass products, except containers	321, 3229, 323
22.0103 Wood TV and radio cabinets	2517	35.0200 Glass containers	3221
22.0200 Upholstered household furniture	2512	<b>36 Stone and clay products</b>	
22.0300 Metal household furniture	2514	36.0100 Cement, hydraulic	324
22.0400 Mattresses and bedsprings	2515	36.0200 Brick and structural clay tile	3251
<b>23 Other furniture and fixtures</b>		36.0300 Ceramic wall and floor tile	3253
23.0100 Wood office furniture	2521	36.0400 Clay refractories	3255
23.0200 Metal office furniture	2522	36.0500 Structural clay products, n.e.c.	3259
23.0300 Public building furniture	2531	36.0600 Vitreous plumbing fixtures	3261
23.0400 Wood partitions and fixtures	2541	36.0701 Vitreous china food utensils	3262
23.0500 Metal partitions and fixtures	2542	36.0702 Fine earthenware food utensils	3263
23.0600 Blinds, shades, and drapery hardware	2591	36.0800 Porcelain electrical supplies	3264
23.0700 Furniture and fixtures, n.e.c.	2599	36.0900 Pottery products, n.e.c.	3269
<b>24 Paper and allied products, except containers and boxes</b>		36.1000 Concrete block and brick	3271
24.0100 Pulp mills	261	36.1100 Concrete products, n.e.c.	3272
24.0200 Paper mills, except building paper	262	36.1200 Ready-mixed concrete	3273
24.0300 Paperboard mills	263	36.1300 Lime	3274
24.0400 Envelopes	2642	36.1400 Gypsum products	3275
24.0500 Sanitary paper products	2647	36.1500 Cut stone and stone products	328
24.0602 Building paper and board mills	266	36.1600 Abrasive products	3291
24.0701 Paper coating and glazing	2641	36.1700 Asbestos products	3292
24.0702 Bags, except textile	2643	36.1800 Gaskets, packing and sealing devices	3293
24.0703 Die-cut paper and board	2645	36.1900 Minerals, ground or treated	3295
24.0704 Pressed and molded pulp goods	2646	36.2000 Mineral wool	3296
24.0705 Stationery products	2648	36.2100 Nonclay refractories	3297
24.0706 Converted paper products, n.e.c.	2649	36.2200 Nonmetallic mineral products, n.e.c.	3299
<b>25 Paperboard containers and boxes</b>		<b>37 Primary iron and steel manufacturing</b>	
25.0000 Paperboard containers and boxes	265	37.0101 Blast furnaces and steel mills	3312
		37.0102 Electrometallurgical products	3313

<b>73 Business services</b>		98.0000 State and local government purchases, education	
73.0100 Miscellaneous business services	732-9 (excl. 7396), 7692, 7694, pt. 7699	<b>99 State and local government purchases, other</b>	
73.0200 Advertising	731	99.1000 State and local government purchases, health, welfare, and sanitation	
73.0300 Miscellaneous professional services	81, 89 (excl. 8922)	99.2000 State and local government purchases, safety	
<b>74 Eating and drinking places</b>		99.3000 State and local government purchases, other general government	
74.0000 Eating and drinking places	58, pt. 70	<b>OTHER SYMBOLS</b>	
<b>75 Automobile repair and services</b>		<b>Outputs</b>	
75.0000 Automobile repair and services	75	T.I.U. Total intermediate use	
<b>76 Amusements</b>		T.F.D. Total final demand	
76.0100 Motion pictures	78	T.C.O. Total commodity output	
76.0200 Amusement and recreation services	79	<b>Inputs</b>	
<b>77 Health, educational, and social services and nonprofit organizations</b>		T.I.I. Total intermediate inputs	
77.0100 Doctors and dentists	801-3, 8041	V.A. Value added	
77.0200 Hospitals	806	T.I.O. Total industry output	
77.0300 Other medical and health services	074, 8049, 805, 807-9		

1. The industry classification is usually identical with that for the commodity which is the primary product of the industry. However, for some industries the primary product, or a component thereof, is the same as the primary product of another industry. In such cases, commodity output is included with the industry most definitively associated with the commodity, usually the largest producer.

2. Excluding government enterprises.

3. In the 1972 SIC, government enterprise activities are generally classified with the similar private activity. In I-O, activities of enterprises are classified in groups 78 and 79 and the corresponding SIC's are shown except for 78.0400 and 79.0300, each of which includes a number of SIC's and several activities for which no comparable SIC exists.

Table 1.—The Use of Commodities

[Millions of dollars]

Commodity number	For the distribution of output of a commodity, read the row for that commodity. For the composition of inputs to an industry, read the column for that industry.	Livestock and livestock products	Other agricultural products	Forestry and fishery products	Agricultural, forestry, and fishery services	Iron and ferroalloy ores mining	Nonferrous metal ores mining	Coal mining	Crude petroleum and natural gas	Stone and clay mining and quarrying	Chemical and fertilizer mineral mining	New construction	Maintenance and repair construction	Ordnance and accessories	Food and kindred products

# CURRENT BUSINESS STATISTICS

**T**HE STATISTICS here update series published in the 1975 edition of BUSINESS STATISTICS, biennial statistical supplement to the SURVEY OF CURRENT BUSINESS. That volume (available from the Superintendent of Documents for \$6.80) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1971 through 1974 for major quarterly series), annually, 1947-74; for selected series, monthly or quarterly, 1947-74 (where available). Series added or significantly revised after the 1975 BUSINESS STATISTICS went to press are indicated by an asterisk (\*) and a dagger (†), respectively. Unless otherwise noted, revised monthly data for periods not shown herein corresponding to revised annual data are available upon request.

The sources of the data are given in the 1975 edition of BUSINESS STATISTICS; they appear in the main descriptive note for each series, and are also listed alphabetically on pages 187-88. Statistics originating in Government agencies are not copyrighted and may be reprinted freely. Data from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1976	1977	1978	1976				1977				1978				1979

<sup>1</sup> Revised. <sup>2</sup> Preliminary. <sup>3</sup> Index as of Apr. 1, 1979; Building, 259.3; construction, 268.8. <sup>4</sup> Effective Dec. 1978, data are no longer available; annual total represents Jan.-Nov. 1978. <sup>5</sup> Includes data for items not shown separately. <sup>6</sup> Data include guaranteed direct loans sold. <sup>7</sup> Home mortgage rates (conventional 1st mortgages) are under money and interest rates on p. S-18. <sup>8</sup> Source: Media Records, Inc. 64-City Newspaper Advertising Trend Chart. <sup>9</sup> Monthly revisions back to Jan. 1974 will be shown later.

<sup>10</sup> Beginning Nov. 1977 SURVEY, data revised to reflect new sample design, benchmarking to the 1967 and 1972 Censuses, conversion of the classifications to the 1972 SIC, addition of farm assemblers and bulk petroleum establishments, and revision and updating of seasonal factors. Revisions back to Jan. 1967, as well as a summary of the changes, appear in the report, Monthly Wholesale Trade: January 1967-August 1977 (Revised) available from the Census Bureau, Washington, D.C. 20533. The revisions back to 1967 also appear on p. 34ff of the May 1978 SURVEY. <sup>11</sup> Effective March 1979 SURVEY, seasonally adjusted data for wholesale trade have been revised back to Jan. 1978.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978												1979

† Revised 1 See note "†" on p. S-12; revised data for periods prior to May 1977 are not available. ‡ As of July 1.  
 † See note "†" on p. S-12. ‡ Includes data for items not shown separately.  
 † Revisions back to Oct. 1973 appear in "Population Estimates and Projections: Estimates of the Population of the United States and Components of Change—1930-75," P-25, No. 632 (July 1976), Bureau of the Census.

‡ Effective with the Feb. 1977 SURVEY, the labor force series reflect new seasonal factors. Data have been revised back to 1972; comparable monthly figures for 1972-75 appear in EMPLOYMENT AND EARNINGS (Feb. 1977), U.S. Department of Labor, Bureau of Labor Statistics.  
 © Effective March 1979 SURVEY, the civilian labor force series, seasonally adjusted, reflect revisions back to Jan. 1978; comparable data for earlier periods will be shown later.

† Revised. ‡ Preliminary. † Average for year. ‡ Daily average. ‡ Data no longer available.  
<sup>⊙</sup> Adjusted to exclude interbank loans. † For bond yields, see p. S-21. † Beginning Jan. 1959, monthly data have been revised to reflect new seasonal factors and adjustment to benchmarks for the latest call date (Dec. 31, 1975). Revisions are available from the Federal Reserve Board, Washington, D.C. 20551. † Beginning Jan. 1979 SURVEY, the consumer credit group has been completely restructured. Comparable data prior to Nov. 1977 are available from the Federal Reserve Board, Washington, D.C. 20551. † Beginning Jan. 1973, data have been revised; revisions for Jan. 1973-April 1975 will be shown later. † Includes data for items not shown separately.

## NOTES FOR P.S-17:

⊕ Data beginning Dec. 1978 reflect a reduction in number of banks reporting (from 317 to 171) and changes in consolidation basis as well as content of several asset and liability items. Comparable data for earlier periods will be available later.  
<sup>‡</sup> Beginning Dec. 1978, data are for all investment account securities; not comparable with those shown for earlier periods.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

† Revised. ‡ Preliminary. § Data are for fiscal year ending Sept. 30 of respective year and include revisions not distributed to the months. Data for 1976 and earlier years are for fiscal year ending June 30 of respective year. ¶ Reported annual total; revisions not distributed to the months. § Jan. 1978 data should read \$34,068 thous. ¶ Includes data for items not shown separately.

† Data have been revised back to 1946 (see table 3.2 in the Jan. 1976 and July 1978 SURVEYS for earlier data). § Or increase in earmarked gold (-). ¶ Valued at \$38 per fine ounce from Jan. 1972-Sept. 1973; at \$42.22 thereafter. ¶ Corrected.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978												1979

\* Revised. † Preliminary. ‡ Before extraordinary and prior period items. § Annual total; quarterly revisions not available. ¶ Beginning Jan. 1978, data are for total unlinked passenger trips; revenue passenger data no longer available. ♂ Includes data not shown separately. ♀ Applies to passengers, baggage, cargo, and mail carried. § Passenger-miles as a percent of available seat-miles in revenue service reflects proportion of seating capacity actually sold and utilized. ♂ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service. \* New Series. Source: ICC (no comparable data prior to 1972).

♂ Indexes are comparable for the identical quarter of each year (and from year to year). Δ Effective 1976, defined as those with annual revenues of \$50 million or more; restated 1977 data reflect changes. ♂ Natl. Railroad Pass. Corp. (Amtrak) operations (not included in AAR data above), 1975 and 1976 (mil. \$): Oper. revenues, 235; 287; net loss, 353; 469 (ICC). \* Domestic trunk operations only (domestic trunks average about 90% of total domestic operations). † See note 1 for p. S-22. ‡ Effective Mar. 1977 SURVEY, revised back to 1957 to new trading day and seas. adj. factors.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

\* Revised. <sup>⊘</sup> Preliminary. <sup>†</sup> Annual total; monthly revisions are not available. <sup>‡</sup> For month shown. <sup>§</sup> Reported annual total; see note 6 for this page. <sup>⊕</sup> Because of an overall revision to the export commodity classification system effective Jan. 1, 1978, data may not be strictly comparable with those for earlier periods. <sup>⊖</sup> Less than 500 short tons. <sup>⊗</sup> Data are being withheld to avoid disclosing figures from individual companies. <sup>⊘</sup> See "⊕" note, this page. <sup>⊙</sup> Excludes data for byproduct (other than coke oven); withheld to avoid disclosure of figures from individual companies. <sup>⊚</sup> Represents solutions containing ammonia and ammonium nitrate/urea solutions; not comparable with data prior to Aug. 1978. <sup>⊛</sup> Beginning Jan. 1979, data include chemically-treated fertilizer and sodium nitrate containing over 16.3% nitrogen by weight; not strictly comparable with data shown for earlier periods. <sup>⊜</sup> See "Δ" note, p. S-24. <sup>⊝</sup> Average daily rent per occupied room, not scheduled rates. <sup>⊞</sup> Includes data not shown separately. <sup>⊟</sup> Beginning Jan. 1977, data exclude potassium magnesium sulfate; not strictly comparable with those shown for earlier periods. <sup>⊠</sup> Effective 1976, data are compiled by U.S. Dept. of Transportation from INS records and refer to air travel; travel by sea is omitted (for 1973-75, average annual arrivals and departures by sea are as follows—units and order as above: 814; 784; 159; 129). <sup>⊡</sup> Effective Jan. 1976, data include visits to Voyageurs National Park (no count of visits for earlier periods is available); data for Mar.-July 1976 are restated to delete visits to Platt National Park which was reclassified as a national recreation area, and beginning Jan. 1979, data include visits to two additional parks. <sup>⊢</sup> Includes data for Western Union Int. Cable & Wireless. <sup>⊣</sup> Monthly revisions back to 1971 are available upon request.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

\* Revised. † Preliminary. ‡ Average for July-Dec.; beginning July 1977, prices represent Midwest and Los Angeles and are not comparable with those for earlier periods. § Average for 5 mos. (Aug.-Dec.). ¶ See "Δ" note, this page. †† Reflects revisions not distributed to the months. ‡‡ Beginning Aug. 1978, prices are estimated; not strictly comparable with those for earlier periods. Annual average for 1978 represents Aug.-Dec. ††† Because of an overall revision to the export commodity classification system effective Jan. 1, 1978, data may not be strictly comparable with those for earlier periods. †††† Beginning Jan. 1978, data are for both raw and refined sugar and are not comparable with those for earlier periods. ††††† Beginning Jan. 1978, data are no longer available; see note 7, this page. †††††† Beginning July 1978, data no longer available. Annual average for 1978 represents Jan.-June. ††††††† Cases of 30 dozen. †††††††† Bags of 132.276 lb. ††††††††† Monthly data reflect cumulative revisions for prior periods. †††††††††† Producers' and warehouse stocks. ††††††††††† Factory and warehouse stocks. †††††††††††† Monthly revisions back to 1974 are available. ††††††††††††† Effective April 1977 SURVEY, data beginning Feb. 1976 are restated to exclude cooler pork; comparable earlier data will be shown later. †††††††††††††† Revised series. Beginning May 1977 SURVEY, data represent total commercial slaughter (excluding rendered pork fat and lard), whereas the price for calves (p. S-28), represents a different market. Comparable data prior to Mar. 1976 will be shown later.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978												1979

<sup>1</sup> Revised. <sup>2</sup> Preliminary. <sup>3</sup> Annual data; monthly revisions are not available.  
<sup>4</sup> Effective with Feb. 1977, composite reflects substitution of Los Angeles for San Francisco; effective July 1977, it reflects addition of Detroit and Houston. Avg. for 1977 is for July-Dec.  
<sup>5</sup> Less than 500 short tons. <sup>6</sup> Average for 11 months; price not available for Nov.  
<sup>7</sup> Totals include data for types of lumber not shown separately. <sup>8</sup> Effective Aug. 1976

SURVEY, scrap excludes imports of rerolling rails and pig iron excludes sponge iron imports previously included. <sup>9</sup> Effective with 1974 annual and Jan. 1975 figures, data reflect expanded sample and exclusion of direct-reduced (prereduced) iron, previously included in scrap series.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

\* Revised. <sup>2</sup> Preliminary. <sup>1</sup> Annual data; monthly or quarterly revisions are not available. <sup>2</sup> For month shown. <sup>3</sup> Avg. for 11 months; Feb. price not available.  
 ⊕ New series. Source: American Iron and Steel Institute. The production rate of capability utilization is based on tonnage capability to produce raw steel for a full order book based on the current availability of raw materials, fuels and supplies, and of the industry's

coke, iron, steelmaking, rolling and finishing facilities. Data prior to 1975 are not available.  
 ⊕ Beginning Jan. 1976, data are not comparable with those for earlier periods since oil & gas supply houses and pipelines, which were formerly shown in "Service centers and distributors" and "Construction, incl. maintenance," respectively, are now included in "Other."

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

Revised. 1 Annual data; monthly revisions are not available. 2 Less than 50 tons. 3 See "ABMS" note for this page. 4 For month shown. 5 See "(D)" note, this page. 6 Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap. 7 All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment. 8 Revised Dec. 31 stocks for 1970-73 (thous. sh. tons); 124.2; 48.6; 30.1, 25.9. Producers' stocks elsewhere, end of Mar. 1979, 11,778 metric tons. 9 New series effective with data for Jan. 1976. Source: Metals Week. MW Composite monthly

price (Straits quality, delivered) is based on average of daily prices at two markets (Penang, Malaysia—settlement, and LME 3-month—High grade), and includes fixed charges plus dealer's and consumer's 70-day financing costs; no comparable earlier prices are available. † Effective with the Apr. 1977 SURVEY, data are expressed in metric tons (to convert U.S. long tons to metric tons, multiply by factor, 1.01605). ‡ Beginning with Jan. 1979 data, units are expressed in metric tons; earlier data are shown in short tons (to convert sh. tons to metric tons, multiply by factor 0.907185).

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

† Revised. † Less than 50 thousand barrels. ‡ Reflects revisions not available by months. § Beginning Jan. 1979, price includes taxes formerly excluded. ¶ Effective Jan. 1978, data for exports of aviation gasoline are no longer reported separately. \* Comparable export data for Jan. 1978 amounted to 870,000 sh. tons. † Includes data not shown

‡ Includes nonmarketable catalyst coke. § Includes small amounts of "other hydrocarbons and hydrogen refinery input," not shown separately. ¶ Monthly revisions back to 1973 for bituminous coal, back to 1977 for coke, back to 1974 for petroleum and products and for 1977 for wholesale price indexes will be shown later. \* Corrected.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978 <sup>†</sup>	1978										1979

† Revised. ‡ Preliminary.

<sup>1</sup> Reported annual total; revisions not allocated to the months. <sup>2</sup> Less than 50 thousand barrels. <sup>3</sup> Beginning with January 1975, data for soda (formerly combined with semichemical) is now combined with sulphate; not comparable with data for earlier periods.

<sup>4</sup> Data exclude small amounts of pulp because reporting would disclose the operations of individual firms.

<sup>†</sup> Monthly revisions back to 1974 for imports and back to 1977 for other refined petroleum products are available upon request. <sup>‡</sup> Includes data for items not shown separately.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978										1979

<sup>1</sup> Revised. <sup>2</sup> Beginning Jan. 1977, producers' stocks are included; comparable data for earlier periods will be shown later. <sup>3</sup> Beginning Jan. 1977, data cover passenger car and truck and bus tires; motorcycle tires and tires for mobile homes are excluded. <sup>4</sup> Beginning Jan. 1977, data no longer available. <sup>5</sup> Reported total; revisions not distributed to the months.

<sup>6</sup> As reported by publishers accounting for about 75 percent of total newsprint consumption. <sup>7</sup> Monthly data are averages for the 4-week period ending on Saturday nearest the end of the month; annual data are as of Dec. 31. <sup>8</sup> Corrected.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1977	1978	1978												1979

<sup>1</sup> Revised. <sup>2</sup> Preliminary. <sup>3</sup> Annual total includes revisions not distributed by months. <sup>4</sup> Production, not factory sales. <sup>5</sup> Excludes 2 States. <sup>6</sup> Excludes 1 State. <sup>7</sup> Excludes 3 States. <sup>8</sup> Beginning 1978, data may not be strictly comparable with those for earlier years because of the revised export schedule. <sup>9</sup> Excludes 4 States. <sup>10</sup> Annual figures, "Apparel 1975," MA-23A(75)-I. Survey expanded and classification changed; not comparable with data prior to 1974. See also note "Q," p. S-39. <sup>11</sup> Total includes backlog for nonrelated products and services and basic research. <sup>12</sup> Seas. adj. data (1971-74) in the Mar. 1976 Survey, p. 5, do not reflect end-digit revisions to imports and total sales introduced in the Feb. 1977 Survey. <sup>13</sup> Domestics include U.S.-type cars produced in the United States and Canada; imports cover foreign-type cars and captive imports, and exclude domestics produced in Canada. <sup>14</sup> Courtesy of R. L. Polk & Co.; republication prohibited. <sup>15</sup> Excludes railroad-owned private refrigerator cars and private line cars. <sup>16</sup> New series. Source: Motor Vehicle Manufacturers Assn. of the U.S. (seas. adjustment by BEA). Reporting firms do not represent the entire industry. Motor coaches are not covered. Sales include imports of U.S. manufacturers only (all other imports are not covered). Units refer to complete vehicles and to chassis sold separately. Gross vehicle weight refers to the weight of the vehicle with full load. Seasonally adjusted monthly data back to 1971 are available. <sup>17</sup> Excludes leisure-type; not strictly comparable with 1974. <sup>18</sup> Corrected.

# INDEX TO CURRENT BUSINESS STATISTICS, Pages S1-S40

## SECTIONS

### General:

Business indicators	1-7
Commodity prices	8, 9
Construction and real estate	10, 11
Domestic trade	11-13
Labor force, employment, and earnings	13-17
Finance	17-22
Foreign trade of the United States	22-24
Transportation and communication	24, 25

### Industry:

Chemicals and allied products	25, 26
Electric power and gas	26
Food and kindred products; tobacco	27-30
Leather and products	30
Lumber and products	31
Metals and manufactures	31-34
Petroleum, coal, and products	34-36
Pulp, paper, and paper products	36, 37
Rubber and rubber products	37
Stone, clay, and glass products	38
Textile products	38-40
Transportation equipment	40

## INDIVIDUAL SERIES

Advertising	11, 16
Aerospace vehicles	40
Agricultural loans	17
Air carrier operations	24
Air conditioners (room)	34
Aircraft and parts	7, 40
Alcohol, denatured and ethyl	26
Alcoholic beverages	11, 27
Aluminum	33
Apparel	1, 4, 8, 9, 11-16, 40
Asphalt	35, 36
Automobiles, etc.	1, 4-6, 8, 9, 11, 12, 20, 23, 24, 40
Banking	17, 18
Barley	27
Battery shipments	34
Beef and veal	28
Beverages	9, 11, 22, 23, 27
Blast furnaces, steel mills	5-7
Bonds, issued, prices, sales, yields	20, 21
Brass and bronze	33
Brick	38
Building and construction materials	4, 6, 7, 11, 31, 38
Building costs	10, 11
Building permits	10
Business incorporations (new), failures	7
Business sales and inventories	5
Butter	27
Cattle and calves	28
Cement and concrete products	9, 11, 38
Cereal and bakery products	9
Chain-store sales, firms with 11 or more stores	13
Cheese	27
Chemicals	4, 6, 9, 14-16, 20, 23, 25, 26
Cigarettes and cigars	30
Clay products	9, 38
Coal	4, 9, 23, 34, 35
Cocoa	23, 29
Coffee	23, 29
Coke	35
Combustion, atmosphere, heating equipment	34
Communication	2, 20, 25
Confectionery, sales	29
Construction:	
Contracts	10
Costs	10, 11
Employment, unemployment, hours, earnings	13-16
Fixed investment, structures	1
