

Business Situation

Final Estimates for the Second Quarter of 2002

ACCORDING to the “final” estimates of the national income and product accounts (NIPAs), real GDP increased 1.3 percent in the second quarter of 2002, 0.2 percentage point more than in last month’s preliminary estimates (table 1 and chart 1).¹ (Over the past 20 years, the average revision, without regard to the sign, from the preliminary estimate to the final estimate was 0.3 percentage point.) Real final sales of domestic product was also revised up 0.2 percentage point, from -0.3 percent in the preliminary estimate to -0.1 percent in the final. The source data underlying these and other revisions to the NIPAs are discussed in the section “Revisions.”

The picture of the economy shown in the final estimates for the second quarter is similar to that shown in

1. Quarterly estimates in the NIPAs are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between these published estimates. Percent changes are calculated from unrounded data and annualized. “Real” estimates are in chained (1996) dollars, and price indexes are chain-type measures.

This article was prepared by Daniel Larkins and Frederick von Batchelder.

the preliminary estimates. In both, GDP growth in the second quarter was much lower than the 5.0-percent growth in the first quarter, and in both, the deceleration was mainly accounted for by slowdowns in inventory investment, consumer spending, and government spending.² In addition, imports (which are subtracted in the calculation of GDP) accelerated sharply.

According to the final estimates,

- A swing from inventory liquidation to inventory accumulation contributed 1.31 percentage points to GDP growth in the second quarter; in the first quarter

2. In this article, “inventory investment” is shorthand for “change in private inventories,” “consumer spending” is shorthand for the NIPA series “personal consumption expenditures,” and “government spending” is shorthand for “government consumption expenditures and gross investment.”

Note.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates usually are not additive. Chained (1996) dollar levels and residuals, which measure the extent of nonadditivity in each table, are shown in NIPA tables 1.2, 1.4, and 1.6. Percent changes are calculated from unrounded data. Percent changes in major aggregates are shown in NIPA table S.1. (See “Selected NIPA Tables,” which begin on page D-2 in this issue.)

ter, a sharp cut in the pace of liquidation had contributed 2.60 percentage points to growth (table 2).

Nondefense	-0.11	0.26	0.01	0.16
State and local	-0.28	1.05	0.56	-0.21

NOTE. More detailed contributions to percent change in real gross domestic product are shown in NIPA table 8.2. Contributions to percent change in major components of real gross domestic product are shown in tables 8.3 through 8.6.

- Consumer spending contributed 1.22 percentage points to second-quarter growth after contributing 2.22 percentage points to first-quarter growth. Consumer purchases of durable goods turned up, and purchases of services increased almost as much as in the first quarter, but purchases of nondurable goods were flat after a sharp first-quarter increase.
- Government spending contributed 0.27 percentage point to growth after contributing 1.04 percentage points. Federal Government spending increased about as much as in the first quarter, but State and local government spending turned down.

The preliminary and final estimates also agree on the following important points:

- Inventory stocks increased after substantial liquidation in each of the preceding five quarters.
- The production of structures turned down, and the production of goods slowed. In contrast, the production of services increased a little more than in the first quarter.
- Imports increased about twice as much as exports.
- The personal saving rate, which is measured as personal saving as a percentage of current-dollar disposable personal income, increased (to 4.0 percent in the final estimate).
- Real final sales of computers turned up. Real motor vehicle output increased less than in the first quarter.

Revisions

Real exports contributed 0.17 percentage point to the 0.2 percentage point revision to GDP, as exports of services were revised up. Imports, which are subtracted in the calculation of GDP, were revised down and contributed 0.08 percentage point. The effect of these revisions was partly offset by a downward revision to inventory investment, which contributed -0.09 percentage point.

The revision to exports mainly reflected the incorporation (on a "best-change" basis) of revised data on trade in services from BEA's international transactions accounts (table 3).³ The revision to imports mainly reflected revised Census Bureau data on imports of goods for June. The revision to inventory investment mainly reflected revised Census Bureau data on manufacturing inventories for June.

The price index for gross domestic purchases increased 2.3 percent, 0.1 percentage point more than the preliminary estimate. The revision was mainly in the price of financial services purchased by consumers; it reflected the incorporation of revised producer price indexes from the Bureau of Labor Statistics and newly available data from the Federal Deposit Insurance Corporation and the Federal Reserve Board.

Real disposable personal income (DPI) increased 3.6 percent in the second quarter, 0.1 percentage point less than the preliminary estimate. An upward revision to the implicit price deflator for personal consumption expenditures, which is used to deflate DPI, more than offset an upward revision to current-dollar DPI.

The release of the final estimate for the second quarter marked the implementation of the new revision schedule that was announced in the GDP news release on June 27. According to this schedule, the final estimates for a quarter now include revised estimates of wages and salaries for the preceding quarter that incorporate the Bureau of Labor Statistics' latest tabulations from the State unemployment insurance program. As

a result, more reliable information is available to data users in a more timely manner, and revisions to wages and salaries in the annual NIPA revision will be reduced.

The revised estimate of wage and salary disbursements in the first quarter shows an increase of \$26.4 billion (in current dollars), \$7.4 billion less than previously estimated. Disbursements for the second quarter are currently estimated to have increased \$39.2 billion.

Gross domestic purchases price index.....	2.2	2.3	0.1
GDP price index.....	1.1	1.2	0.1

NOTE: The final estimates for the second quarter of 2002 incorporate the following revised or additional major source data that were not available when the preliminary estimates were prepared.

Personal consumption expenditures: Revised retail sales for June, bank services data for the first quarter, and brokerage services data for the quarter.

Nonresidential fixed investment: Revised construction put-in-place for May and June.

Residential fixed investment: Revised construction put-in-place for May and June.

Change in private inventories: Revised manufacturers' and trade inventories for June.

Exports and imports of goods and services: Revised data on exports and imports of goods and services for the first quarter and new data for the second.

Government consumption expenditures and gross investment: Revised State and local construction put-in-place for May and June.

Wages and salaries: Revised private wages and salaries for the first quarter, and revised employment, average hourly earnings, and average weekly hours for June.

GDP prices: Revised export and import prices for April through June, revised unit-value index for petroleum imports for June, and revised prices of single-family houses under construction for the quarter.

3. Incorporating the source data on a best-change basis provides accurate measures of the change in the estimates for all periods, but results in levels of the estimates that are not fully consistent with the source data. In general, BEA incorporates source data on best-change basis in order to preserve accurate estimates of growth and consistent time series. (For more information, see the box "Incorporating Source Data on the Basis of Best Change," in Eugene P. Seskin and David F. Sullivan, "Annual Revision of the National Income and Product Accounts," SURVEY OF CURRENT BUSINESS 80 (August 2000): 16.)

Gross National Product

Real gross national product (GNP) increased 0.4 percent in the second quarter, 0.9 percentage point less than real GDP (table 4).⁴ GNP increased less than GDP because income receipts from the rest of the world increased less than income payments to the rest of the world. The increases in receipts and payments were more than accounted for by increases in profits.

“Command-basis” GNP—which measures the purchasing power of goods and services produced by the U.S. economy—decreased 0.4 percent (chart 2). The contrast between the decrease in this measure and the increase in GNP reflects a deterioration in the terms of

trade.⁵

The national saving rate, which is measured as gross saving as a percentage of GNP, was unchanged at 15.5 percent. It had decreased in the six preceding quarters from a peak of 18.5 percent in the third quarter of 2000.

5. In the estimates of command-basis GNP, the current-dollar value of the sum of exports of goods and services and income receipts is deflated by the implicit price deflator (IPD) for the sum of imports of goods and services and income payments.

The terms of trade is a measure of the relationship between the prices that are received by U.S. producers for exports of goods and services and the prices that are paid by U.S. purchasers for imports of goods and services. It is measured by the following ratio, with the decimal point shifted two places to the right: In the numerator, the IPD for the sum of exports of goods and services and of income receipts; in the denominator, the IPD for the sum of imports of goods and services and of income payments.

Changes in the terms of trade reflect the interaction of several factors, including movements in exchange rates, changes in the composition of the traded goods and services, and changes in producers' profit margins. For example, if the U.S. dollar depreciates against a foreign currency, a foreign manufacturer may choose to absorb this cost by reducing the profit margin on the product it sells to the United States, or it may choose to raise the price of the product and risk a loss in market share.

4. GNP is a measure of goods and services produced by labor and property supplied by U.S. residents. It is equal to GDP plus income receipts from the rest of the world less income payments to the rest of the world.

1. Exports of goods and services and income receipts deflated by the implicit price deflator for imports of goods and services and income payments.

2. Ratio of the implicit price deflator for exports of goods and services and income receipts to the corresponding implicit price deflator for imports divided by 100.

NOTE: See note to table 1 for an explanation of chained (1996) dollar series. Levels of these series are shown in NIPA tables 1.10 and 1.11.

CHART 2

Real Gross National Product

Note. Percent change at annual rate from preceding quarter; based on seasonally adjusted estimates.

U.S. Bureau of Economic Analysis

fixed investment, an indicator of the share of the current level of investment that could be financed by internally generated funds, slipped from 86.9 percent to 86.6 percent. (During the expansion of the 1990s, the ratio averaged 82.2 percent.)

Profits with inventory valuation adjustment (IVA). The current-production measure of profits is not available at the detailed industry level, because estimates of the capital consumption adjustment (CCAdj) do not exist at this level. (CCAdj is only available for total financial and total nonfinancial industries.) Consequently, industry profits are best measured by profits with IVA.

For nonfinancial industries, the increase in profits with IVA was dominated by manufacturing; much smaller increases were posted by retail and wholesale trade and by the transportation and public utility group (chart 3). Within manufacturing, increases were widespread; the largest were posted by motor vehicles,

electronic equipment, and “other nondurable goods.”¹⁰ An increase in petroleum profits was modest but noteworthy because it came after five consecutive decreases.

Profits before tax and related measures. Profits before tax (PBT) increased \$18.5 billion. This increase in PBT differs from the decrease in profits from current production because PBT is based on inventory and depreciation practices used in tax accounting, whereas the current-production measure is based on depreciation of fixed assets and inventory withdrawals valued at current cost. In the second quarter, most of the difference between the change in PBT and the change in the current-production measure was accounted for by a drop in the capital consumption adjustment.

10. “Other nondurable-goods” manufacturing includes the tobacco, textile, apparel, paper, printing, rubber, and leather industries.

CHART 3

**Corporate Profits with Inventory Valuation Adjustment:
Change from 2002:I to 2002:II**

1. Also includes communications and public utilities.
 2. “Other” nonfinancial corporations includes the agriculture, mining, construction, and services industries, along with some activities included in the “finance, insurance, and real estate” group.
 Note.—Based on seasonally adjusted estimates.

Real Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade, 1998:IV–2002:II

The real inventories, sales, and inventory-sales ratios have been revised beginning with 1999 to incorporate the results of the recent annual revision of the national income and product accounts (NIPAs).¹ Tables 1, 2, and 3 show quarterly and monthly estimates of real inventories, sales, and inventory-sales ratios, respectively. Table 4 shows real manufacturing inventories by stage of fabrication. Real estimates are in chained (1996) dollars.

Data availability

Estimates for 1967:I to 1997:IV on the basis of the Standard Industrial Classification system and estimates

1. See Eugene P. Seskin and Stephanie H. McCulla, "Annual Revision of the National Income and Product Accounts: Annual Estimates, 1999–2001, and Quarterly Estimates, 1999:I–2002:I," SURVEY OF CURRENT BUSINESS 82 (August 2002): 7–34.

beginning with 1997:IV on the basis of the North American Industry Classification System are available as downloadable files on BEA's Web site at <www.bea.gov>; click on "GDP and related data" and look under "Supplementary estimates, historical underlying detail," and click on "Change in private inventories."

The most recent estimates are also available by subscription from BEA: On diskette as part of the NIPA monthly update (product number NDS-0171, price \$204.00) and as separate monthly printouts (product number NLS-0166, price \$108.00). To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

^a Preliminary.
NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

^P Preliminary.

Chained (1996) dollar sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Note: Estimates in this table are based on the North American Industry Classification System (NAICS).

Customer Service Report for Fiscal Year 2002

In fiscal year 2002, the Bureau of Economic Analysis (BEA) conducted a new Customer Satisfaction Survey. The survey will be conducted annually. The results of this survey will be used to assess how well we meet your needs and how we can improve. Based on a five-point scale, with five equaling very satisfied and one equaling very dissatisfied with our customer service, you told us we earned a score of 4.3.

Over the past year, BEA worked to better identify its customer base and customer needs. We increased our outreach efforts by increasing our participation in professional conferences in order to receive valuable feedback. We recognize that continuous customer feedback is essential to better service and have established an electronic mailbox for your comments <customerservice@bea.gov>. We also established electronic customer mailboxes for the national and industry programs on BEA's Web site so that users can send their questions directly to BEA program experts.

This report highlights the year's accomplishments in customer service, undertaken pursuant to BEA's Strategic Plan.¹

Web site developments

During fiscal year 2002, BEA conducted a Web site redesign. Several immediate improvements were implemented: Delivering more basic data in downloadable form, including enhancing BEA contact information; expanding the availability of the back issues SURVEY OF CURRENT BUSINESS; and improving the layout of the homepage. A comprehensive A-Z index and a site search engine will be added later in calendar year 2002. A comprehensive site analysis and redesign project that will emphasize customer usability and accessibility in designing a new user interface and overall data presentation is being undertaken. In addition, the Web-related comments received on the 2002 BEA Customer Satisfaction Survey will be incorporated.

BEA implemented interactive Web pages that contain current and historical data from the balance of payments accounts and the industry accounts in easy to use formats. BEA also strengthened its Web site reliability by

1. See "BEA's Strategic Plan for 2001-2005," SURVEY OF CURRENT BUSINESS 82 (May 2002): 8-32.

This report was prepared by Verna Learnard.

adding backup capabilities to help ensure uninterrupted customer access to critical data.

National accounts

- Web site dissemination of the gross domestic product (GDP) news release, the associated technical note, the "Selected" NIPA Tables (PRN files and spreadsheets), and the section-508 compliant tables now occurs within a minute of the 8:30 a.m. release time. Previously, these data were posted on a flow basis between 8:35 a.m. and 10:00 a.m. on the day of the release.
- Web site dissemination of the "computer purchases" table, the fixed-weighted price index table, and the three-decimal place tables has been accelerated by several hours on the day of the GDP release.
- Web site dissemination of the "underlying detail" file now occurs within seconds of the personal income release. The "key source data" table, which comes out with the "advance" estimates only, is posted almost immediately after the underlying detail table, a day earlier than one year ago.

Industry accounts

- In December 2001, BEA released the 1998 annual input-output (I-O) accounts, the third in a series of annual I-O accounts that provide more recent data than those in the benchmark I-O accounts, which are released on a 5-year cycle.
- In a June 2002 SURVEY article, BEA published a progress report on its research to develop estimates of GDP by industry on an accelerated schedule. As part of the research results, BEA provided illustrative estimates for 2001 of current GDP by industry for broad industry groups. These estimates provided a first look at the effects on industries of last year's economic slowdown and the events of September 11th.

International accounts

- BEA published the preliminary results of the 1999 benchmark survey of U.S. direct investment abroad. The estimates were presented on the North American Industry Classification System (NAICS) basis for the first time.
- BEA staff worked with the Federal Reserve Board, the Federal Reserve Bank of New York, and the U.S. Department of Treasury to more comprehensively

cover short-term financial instruments. New survey forms were designed to enable BEA to resume coverage of cash on deposit with brokers, including that in margin accounts. In order to provide users with more timely and accurate data, BEA developed a preliminary plan for instituting quarterly surveys of the largest and most volatile types of traded services and for making related changes to existing benchmark and annual surveys.

- BEA staff worked with the Federal Reserve Board, the Federal Reserve Bank of New York, and the U.S. Department of Treasury to design new annual surveys of portfolio investment assets and liabilities. Annual liabilities surveys are being conducted beginning with data for 2001, and annual asset surveys are expected to be conducted beginning with data for 2003. The benchmark survey of selected services transactions was redesigned in order to cover important new categories of services, including those associated with the annual survey of selected services transactions. In response to suggestions from industry representatives, BEA developed new questions on services provided to foreign medical patients.
- BEA reduced respondent burden and improved processing efficiencies for the international accounts surveys by extending the electronic reporting options to six additional surveys.

Regional accounts

- BEA produced and released the State personal income estimates on a NAICS basis for the first time for 2001. BEA developed test estimates of pension distributions by State and an alternative set of estimates of retirement payment distributions by State.
- BEA established an interactive HELP file on its Web

site that guides customers through definitions and methodology for the gross state product estimates. The vintage of BEA's regional multiplier estimates were improved by incorporating, for the first time, BEA's annual national input-output accounts (for 1998) and the latest county-level data on wages (for 2000).

- BEA developed a prototype system to produce a new Web-based interactive, dynamic mapping capability for analyzing the gross state product estimates. This system will become available to users soon.

Internal improvements

BEA's employees are the most essential element of our service to customers. In order to attract and retain a highly qualified workforce, BEA conducted an internal organizational assessment survey. Based on the results, efforts in the coming year will focus on workforce development, communications, and quality of work life. Improvements in these areas will have a direct impact on our ability to innovate and improve BEA's statistics.

Access to BEA staff

BEA specialists are available during regular business hours. You can access the names and telephone numbers of BEA subject specialists on the Bureau's Web site at <www.bea.gov/bea/beatel.htm>, or you can e-mail BEA at <webmaster@bea.gov>. For a hard copy of "BEA's Contacts for Users" or other customer assistance, contact

Annual NIPA Revision Newly Available Tables

The publication of national income and product accounts (NIPA) tables 3.15–3.20 and 9.1–9.6 below and of the “Updated Summary NIPA Methodologies” elsewhere in this issue marks the completion of this year’s annual NIPA revision. The article “Annual Revision of the National Income and Product Accounts” and most of the NIPA tables were published in the August 2002 SURVEY OF CURRENT BUSINESS. NIPA

tables 5.16 and 8.28 and the report “Fixed Assets and Consumer Durable Goods for 1925–2001” were published in the September SURVEY.

The estimates for the full set of NIPA tables (for most tables, beginning with 1929 for annual estimates and with 1946 for quarterly estimates) are available interactively on BEA’s Web site at <www.bea.gov>. Later this year, the NIPA estimates will be available on a CD-ROM.

1. Equals Federal Government current expenditures less grants-in-aid to State and local governments plus State and local government current expenditures. Federal grants-in-aid to State and local governments by function are shown in table 3.17.

2. Includes dividends received by government shown separately in tables 3.1 and 8.19 for total government and in table 3.3 for State and local government.

3. Equals unallocable State and local government expenditures, less "wage accruals less disbursements" shown in table 3.1; includes Federal revenue sharing grants to State and local governments beginning with 1972 and ending with 1987.

4. Consists of State and local government publicly owned liquor store systems, government-administered lotteries and parimutuels, and other commercial activities.

5. Consists of social insurance funds, including old age and survivors insurance (social security) and railroad retirement. Excludes government employee retirement plans.

6. Consists primarily of Federal revenue sharing grants to State and local governments beginning with 1972 and ending with 1987, less "wage accruals less disbursements" shown in table 3.2.

7. Equals unallocable State and local government expenditures less "wage accruals less disbursements" shown in table 3.3.

1. Equals consumption expenditures, transfer payments, net interest paid, less dividends received by government, subsidies less current surplus of government enterprises, less "wage accruals less disbursements"; for Federal Government, also includes grants-in-aid to State and local governments. Government, Federal Government, and State and local government current expenditures are shown separately in tables 3.1, 3.2, and 3.3.

2. Federal grants-in-aid to State and local governments are included in Federal current expenditures; because the grants are transactions between levels of government, they are eliminated in the consolidation of the government sector.

3. Consists of publicly owned liquor store systems, government-administered lotteries and parimutuels, and other commercial activities.

4. No State and local government capital transfers have been identified.

5. Consists of forgiveness of debts owed by foreign governments to the U.S. Government.

6. Consists of Federal Government investment grants to State and local governments.

7. Consists of maritime construction subsidies paid to business by the Federal Government.

1. Consists largely of contributions for social insurance by residents of U.S. territories and Puerto Rico.
 2. These transactions are included in the NIPA personal sector.
 3. Consists of estate and gift taxes.
 4. Consists largely of U.S. Treasury receipts from sales of foreign currencies to Government agencies.
 5. Taxes received from the rest of the world are included in receipts in the budget and netted against expenditures (transfer payments) in the NIPAs.
 6. Includes proprietary receipts that are netted against outlays in the budget and classified as receipts in the NIPAs. Also includes some transactions that are not reflected in the budget data but are added to both receipts and expenditures in the NIPAs.
 7. Consists largely of transfer payments, subsidies, and grants-in-aid to residents of U.S. territories and Puerto Rico.
 8. Consists of transactions (not included in the budget totals) that record all cash flows arising from post-1991 direct loan obligations and loan guarantee commitments. Many of these flows are for new loans or loan repayments; consequently, related entries are included in line 32.
 9. Consists largely of agencies or accounts such as the Postal Service and the Federal Financing Bank that were not included in the budget in some time periods.
 10. Net investment is gross investment less consumption of fixed capital for government enterprises and general government.
 11. Consists of investment grants to State and local governments and maritime construction subsidies. Does not include the forgiveness of debts owed by foreign governments to the U.S. Government; this forgiveness is classified as a capital transfer paid by the United States and is excluded from both budget outlays and NIPA current expenditures.
 12. Consists of net sales of land other than the Outer Continental Shelf and, beginning with 1995, includes the auction of the radio spectrum.
 13. Consists largely of net expenditures of foreign currencies.
 Note: Through 1976, fiscal year estimates reflect a July 1-June 30 Federal fiscal year. Beginning with 1977, fiscal year estimates reflect an October 1-September 30 Federal fiscal year. NIPA quarterly and fiscal year estimates in this table are consistent with the not seasonally adjusted estimates in table 9.3.

Net interest paid	12	.4	.4	.4	.3
Subsidies	13	12.4	21.5	22.9	20.7

1. Consists largely of foreign currency transactions.

1. Contributions received, interest received, and dividends received are included in the NIPA personal sector. Capital gains net of losses are excluded from the NIPAs.

2. Consists of employer and employee contributions, except employer contributions to their own employee retirement plans.

3. Prior to 1968, dividends received is included in interest received (line 5).

4. Prior to 1985, capital gains (net of losses) of State and local employee retirement plans is included in line 11.

5. Unemployment insurance is recorded as a Federal program in the NIPAs.

6. Consists of estate and gift taxes and Federal investment grants.

7. In the NIPAs, final expenditure components of GDP are recorded net of sales or receipts; all current-account sales by general government are therefore deducted in the calculation of NIPA current expenditures. However, most sales by general government are included in Census total revenue; a reconciliation item for these sales is therefore required for both receipts and expenditures. The amount of the reconciliation item is less than the sales shown in table 3.9 because Census total revenue does not include medical vendor payments made by State and local governments to public institutions (classified as an intragovernmental transaction by Census) or the administrative expenses of State and local employee retirement plans (treated in the NIPAs as sales by government to the personal sector).

8. Differences that arise from restating the Census Bureau data to a year ending June 30 are included in timing. Census Bureau measures of State and local government revenue and expenditures (lines 1 and 23) primarily represent a fiscal year ending June 30, but some governments use other fiscal years. The NIPA measures shown in this table are for the fiscal year ending June 30, and are consistent with the not seasonally adjusted estimates in table 9.4.

9. These transactions are included in the NIPA personal sector.

10. Net investment is gross investment less consumption of fixed capital for government enterprises and general government.

Updated Summary NIPA Methodologies

This report presents summary descriptions of the principal source data and methods used to prepare the current-dollar estimates of gross domestic product (GDP) and the estimates of real GDP.¹ These descriptions have been updated to reflect the methodological improvements that were introduced in the annual revision of the national income and product accounts (NIPA's) that was released in July 2002.²

Current-dollar estimates

Table 1 lists the components of current-dollar GDP starting with the components on the product side and then proceeding to those on the income side (see page 22). The subcomponents, with their dollar values for 2001, are grouped according to the methodology used to prepare them.

The column for the annual estimates covers the revision cycle for those estimates and notes the major differences in methodology as the estimates move through the three annual revisions to a benchmark revision.³ For example, for "most durable and nondurable goods" in personal consumption expenditures (the first item on the product side), the table indicates one methodology for benchmark years and another for all other years.

The column for the quarterly estimates covers only the advance estimate for the current quarter—that is, the estimate prepared about a month after the end of the quarter. That estimate, rather than the preliminary or final quarterly estimate, is described because more attention focuses on the "first look" at the quarter. In addition, the column lists only the source data and methods; it does not indicate how many months of source data are available or whether the data are subject to revision by the source agency. Information on the key monthly source data appears each month in the "Business Situation" in the SURVEY OF CURRENT BUSINESS. Additional information on the monthly source data used for the advance estimate is available on BEA's Web site <www.bea.gov>.

The source data listed consist of a variety of economic measures, such as sales or receipts, wages and salaries, unit sales, housing stock, insurance premiums, expenses, interest rates, mortgage debt, and tax collections. For

most components, the source data are "value data"; that is, they encompass both the quantity and price dimensions that are required for current-dollar estimates. In these cases, the methodology indicated in table 1 covers only the adjustment of the value data to derive estimates consistent with NIPA definitions and coverage.

For those estimates not derived from value data, the table indicates the combination of data with separate quantity and price dimensions that is used to derive the required value estimate and the major adjustments needed to derive estimates consistent with NIPA definitions and coverage. On the product side, a "physical quantity times price" method is used for several components. For example, the estimate for new autos is calculated as unit sales times expenditure per auto (the average list price with options, adjusted for transportation charges, sales tax, dealer discounts, and rebates). On the income side, an "employment times earnings times hours" method and variations of a "stock of assets/liabilities times an effective interest rate" method are used for several components.

Some of the source data shown in table 1 for the annual estimates are used as indicators to interpolate and extrapolate the levels established by source data that are more comprehensive, and all of the source data shown for the advance quarterly estimates are used to extrapolate the level of the preceding quarter. In addition, extrapolation and interpolation may be based on trends, as is the case when "judgmental trend" is listed in the table.⁴

Estimating methods. Table 1 refers to four methods—commodity flow, retail control, perpetual inventory, and fiscal year analysis—that are used by BEA for estimating specific components.

The commodity-flow method is used to obtain the value of final users' purchases of goods and services (that is, commodities) for BEA's benchmark input-output accounts. These values serve as the benchmark for the NIPA estimates of personal consumption expenditures (PCE), of equipment and software, and of the commodity detail for State and local government consumption expenditures and gross investment.⁵ This method is also used for equipment and software in nonbenchmark years, but it is implemented in an abbreviated form. An even more abbreviated commodity-flow method is used

1. BEA has prepared a series of papers that provide detailed descriptions of NIPA concepts and methodologies and that are subject to periodic improvements, which are typically introduced as part of annual and comprehensive revisions; these improvements are described in the articles in the SURVEY OF CURRENT BUSINESS that cover these revisions. For more information, see appendix B at the back of this issue.

2. Eugene P. Seskin and Stephanie H. McCulla, "Annual Revision of the National Income and Product Accounts," SURVEY 82 (August 2002): 7–34.

3. For additional details on the release schedule for the NIPA estimates, go to BEA's Web site at <www.bea.gov>, click on "Methodologies," and under "National programs," see "A Guide to the NIPA's."

4. For a few components, the final quarterly estimates are based on newly available source data that replace judgmental trends.

5. For additional information on the commodity-flow method, see U.S. Bureau of Economic Analysis, *Personal Consumption Expenditures*, Methodology Paper No. 6 (Washington, DC: U.S. Government Printing Office, 1990): 31–34 and *GNP: An Overview of Source Data and Estimating Methods*, Methodology Paper No. 4 (Washington, DC: GPO, 1987): 16–17.

for current quarterly estimates of equipment and software.

The retail-control method is used to estimate more than a third of the value of PCE for periods other than benchmark years. This method provides the indicator series used in extrapolating and interpolating the total of “most durable and nondurable goods” and the “control” total to which the PCE categories and residential equipment included in this group must sum. These PCE categories consist of all goods except autos and trucks, food furnished to employees, food and fuel produced and consumed on farms, standard clothing issued to military personnel, school lunches, and net foreign remittances.⁶

The perpetual-inventory method is used to derive estimates of fixed capital stock, which in turn form the basis for the estimates of consumption of fixed capital. This method is based on investment flows and a geometric depreciation formula; it is used instead of direct measurement of the capital stock because direct measurement is seldom statistically feasible on a comprehensive basis.⁷

The fiscal year analysis method provides the framework for the annual and quarterly estimates of Federal Government consumption expenditures and gross investment. The estimates of expenditures are prepared by program—that is, by activity for a group of line items or for an individual line item in the *Budget of the U.S. Government*. For most programs, the fiscal year analysis begins by adjusting budget outlays for coverage and for netting and grossing differences between these outlays and NIPA expenditures. The expenditures total (as adjusted) for a program is then classified by type of NIPA expenditure—for example, transfer payments and interest paid—with nondefense consumption expenditures and gross investment determined residually. When a fiscal year analysis is completed, the detailed array of NIPA expenditures by program and by type of expenditure serves as a set of control totals for the quarterly estimates.⁸

International transactions accounts (ITA's). The source data for the foreign transactions reflected in most NIPA components—such as net exports of goods and services and rest-of-the-world corporate profits—are from the ITA's, which are also prepared by BEA.⁹ As noted

6. For additional information, see *Personal Consumption Expenditures*, 41–54; and *GNP: An Overview*, 17.

7. For additional information on the perpetual-inventory method, see U.S. Bureau of Economic Analysis, *Fixed Reproducible Tangible Wealth in the United States, 1925–94* (Washington, DC: GPO, August 1999): M–3–M–36; and *GNP: An Overview*, 17–18.

8. For additional information and an example of the fiscal year analysis method, see U.S. Bureau of Economic Analysis, *Government Transactions*, Methodology Paper No. 5 (Washington, DC: GPO, 1988): 19–20.

9. See U.S. Bureau of Economic Analysis, *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (Washington, DC: GPO, 1990). The methodologies described in this publication are subject to periodic improvements, which are typically introduced as part of the annual revision of the ITA's; these improvements are described in the SURVEY articles that cover the annual ITA revisions, most recently in Christopher L. Bach, “Annual Revision of the U.S. International Transactions Accounts, 1993–2001,” SURVEY 82 (July 2002): 33–40.

in table 1, for some NIPA components, the ITA estimates are adjusted to conform to NIPA concepts and definitions.¹⁰ Annual estimates of these adjustments and their definitions are shown in NIPA table 4.5B, which was published in the August 2002 SURVEY on page 70; summary quarterly estimates are shown in “Reconciliation Tables” in appendix A of the SURVEY.

Other information. In preparing the annual estimates of several of the income-side components, BEA adjusts the source data for various coverage and conceptual differences. For each subcomponent listed below, an annual NIPA table reconciles the value published by the source agency with the NIPA value published by BEA and identifies the BEA adjustments. The following is a list of the subcomponents and their corresponding reconciliation tables, which were published in the August 2002 SURVEY, beginning on page 120: Consumption of fixed capital, table 8.22; nonfarm proprietors' income, table 8.23; farm proprietors' income, table 8.24; corporate profits, table 8.25; net interest, table 8.26; and wages and salaries, table 8.27.

Real estimates

Table 2 shows which one of three methods—deflation, quantity extrapolation, and direct base-year valuation—is used to prepare the quantity index for each detailed product-side component of real GDP and identifies the source data with which the method is implemented.¹¹ Deflation is used for most of the detailed components. In deflation, the quantity index is obtained by dividing the current-dollar index by an appropriate price index that has the base year—currently 1996—equal to 100 and then by multiplying the result by 100.

The quantity-extrapolation and direct base-year-valuation methods are similar: Both use explicit quantity data. In quantity extrapolation, quantity indexes are obtained by using a quantity indicator to extrapolate from the base-year value of 100 in both directions. In direct base-year valuation, quantity indexes are obtained by multiplying the base-year price by actual quantity data for the index period and then expressing the result as an index with the base year equal to 100.

The subcomponents in table 2 are the same as those shown in table 1, but the detail differs to highlight the alternative methodologies used for calculating the real estimates (see page 34).¹²

10. These adjustments are described in U.S. Bureau of Economic Analysis, *Foreign Transactions*, Methodology Paper No. 3 (Washington, DC: GPO, 1987): 15–25.

11. For additional information on the calculation of real GDP, go to BEA's Web site at <www.bea.gov>, click on “Methodologies,” and under “National programs,” see “A Guide to the NIPA's.”

12. For the real estimates, the distinction between annual and quarterly methodologies is far less important than it is for the current-dollar estimates. For the relatively few cases in which the annual and quarterly source data differ, the major differences are noted in the entry.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Personal consumption expenditures (\$6,987.0 billion)		
Durable and nondurable goods (\$2,877.2 billion) ¹		
Most durable and nondurable goods except those listed below (\$2,401.3 billion) ²	Benchmark years. Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data. Other years. Retail-control method, using retail sales from Census Bureau annual survey of retail trade or, for most recent year, monthly survey of retail trade.	Same as the annual estimates for other years.
New autos (\$105.9 billion)	Benchmark years. Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data. Other years. Physical quantity purchased times average retail price: Unit sales, information to allocate sales among consumers and other purchasers, and average list price with options, all from trade sources. Transportation charges, dealer discounts, and rebates from monthly survey of auto sales prices from the Bureau of Labor Statistics (BLS). Sales tax rate from Census Bureau annual survey of retail trade.	Same as the annual estimates for other years.
Net purchases of used autos (\$60.6 billion)	Benchmark years. For net transactions, residual based on net sales by other sectors. For dealers' margin, retail sales from Census Bureau quinquennial census and margin rate from Census Bureau annual survey of retail trade. Other years except the most recent year. For net transactions, change in consumer stock of autos from trade sources. For dealers' margin, for franchised dealers, unit sales and sales price from trade sources, times margin rate for independent dealers from Census Bureau annual survey of retail trade; for independent dealers, margin from Census Bureau annual survey of retail trade.	For net transactions, residual based on net sales by other sectors. For dealers' margin, judgmental trend.
New trucks (\$121.8 billion)	Benchmark years. Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data. Other years except the most recent year. Abbreviated commodity-flow method, starting with manufacturers' shipments from Census Bureau annual survey and including an adjustment for exports and imports from Census Bureau foreign trade data. Most recent year. Physical quantity purchased times average retail price: Unit sales, information to allocate sales among consumers and other purchasers, and average list price, all from trade sources.	Same as the annual estimate for the most recent year.
Gasoline and oil (\$162.1 billion) ²	Benchmark years. Physical quantity purchased times average retail price: Gallons consumed from the Department of Transportation; information to allocate that total among consumers and other purchasers from Federal agencies and trade sources; average retail price from Census Bureau quinquennial census. Other years except the most recent year. Same as benchmark years except that the average retail price is from the Energy Information Administration (EIA).	Same as the annual estimate for the most recent year.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
<p>Food furnished to employees (including military)(\$9.7 billion)</p> <p>Expenditures abroad by U.S. residents (\$3.6 billion) less personal remittances in kind to nonresidents (\$2.2 billion)</p>	<p>Most recent year. Physical quantity purchased times average retail price: Gallons consumed and average price from EIA.</p> <p>Benchmark years. For commercial employees, number of employees of relevant industries from BLS tabulations times BEA estimate of per capita expenditures for food; for military personnel, outlays from the <i>Budget of the United States</i> prepared by the Office of Management and Budget (OMB).</p> <p>Other years. Same as benchmark years except per capita expenditures for food based on BLS consumer price index (CPI) for food.</p> <p>Estimated as part of the international transactions accounts; see entry for exports and imports of services under net exports of goods and services.</p>	<p>For commercial employees, same as annual estimates for other years; for military personnel, judgmental trend.</p> <p>Judgmental trend.</p>
Services (\$4,109.9 billion)		
<p>Nonfarm dwellings: Space rent for owner-occupied dwellings and rent for tenant-occupied dwellings (\$968.1 billion)</p>	<p>Benchmark years. Based on data on housing stock and average annual rent from Census Bureau decennial census of housing and survey of residential finance, adjusted for utilities included in rent.</p> <p>Other years. Based on data on housing stock and average annual rent from Census Bureau biennial housing survey or on the number of housing units from Census Bureau monthly current population survey and BLS CPI for rent</p>	<p>For housing stock, judgmental trend; for average rent, BLS CPI for rent.</p>
<p>Rental value of farm dwellings (\$8.0 billion)</p>	<p>Benchmark years. Based on data on housing stock and average annual rent from Census Bureau decennial census of housing and survey of residential finance.</p> <p>Other years. Based on data on current cost of farm housing stock from BEA capital stock series.</p>	<p>Judgmental trend.</p>
<p>Motor vehicle repair, rental and other services; other repair services; other purchased intercity transportation; legal and funeral services; barber shops, beauty parlors, and health clubs; nursing homes; laundries; employment agency fees; accounting and tax return preparation services; recreation (except cable TV, parimutuel net receipts, lotteries, and computer online services), hotels and motels; commercial business, trade, and correspondence schools; educational services not elsewhere classified; research organizations and foundations (\$686.3 billion)</p>	<p>Benchmark years. Receipts and expenses from Census Bureau quinquennial census adjusted for receipts from business and governments.</p> <p>Other years. For educational services not elsewhere classified and foundations, BLS annual tabulations of wages and salaries of employees covered by State unemployment insurance; for others in this group, receipts and expenses from Census Bureau service annual survey.</p>	<p>For nursing homes, research organizations and foundations, employment agency fees, and clubs and fraternal organizations, wages and salaries derived from BLS monthly employment times earnings times hours; for commercial business, trade, and correspondence schools, and for education services not elsewhere classified, employment times BLS CPI for technical and business school tuition and fees; for legitimate theaters and motion pictures, receipts from trade sources; for radio and TV repair, number of TV's based on stock and sales from trade source times BLS CPI for video and audio; for hotels and motels, rooms rented times average price per room from trade source; for casino gambling, receipts from State agencies; for others in this group, judgmental trend.</p>

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Services [Continued]		
Physicians, dentists, and other professional medical services (\$487.7 billion)	Benchmark years. For nonprofit professional services, expenses, and for others in this group, receipts, adjusted for government consumption, all from Census quinquennial census. Other years. Receipts and expenses, adjusted for government consumptions from Census Bureau service annual survey.	For physicians and dentists, judgmental trend; for other professional medical services, wages and salaries derived from BLS monthly employment times earnings times hours.
Private nursery schools, elementary and secondary schools, day care, welfare activities, political organizations, foundations, and trade unions and professional associations (\$201.6 billion)	Benchmark years. For elementary and secondary schools, expenses from the Department of Education; for nursery schools and day care, expenditures from BLS consumer expenditure survey; for others in this group, receipts and expenses from Census Bureau quinquennial census. Other years except the most recent year. For nursery schools and day care, same as for benchmark years; for welfare activities, receipts and expenses from Census Bureau service annual survey; for others in this group, BLS annual tabulations of wages and salaries of employees covered by State unemployment insurance. Most recent year. For nursery schools and day care, judgmental trend; for welfare activities, same as for other years; for others in this group, BLS annual tabulations of wages and salaries of employees covered by State unemployment insurance.	For political organizations and foundations, judgmental trend; for elementary and secondary schools employment times BLS CPI for all items; for others in this group, wages and salaries derived from BLS monthly employment times earnings times hours.
Financial services furnished without payment by banks, credit agencies, and investment companies ³ (\$259.5 billion)	See the entry "Banks, credit agencies, and investment companies" under net interest.	Judgmental trend.
Brokerage charges and investment counseling, bank service charges, intercity transportation except other and private higher education (\$227.3 billion)	All years except the most recent year. For private higher education, expenses, and for others in this group, receipts from annual reports of government administrative agencies. Most recent year. For brokerage charges, bank service charges, and intercity transportation, receipts from annual reports of government administrative agencies; for investment counseling, receipts from Census Bureau service annual survey; for private higher education, enrollment from the Department of Education times price index for higher education from trade source.	For stock brokerage charges, stock exchange transactions from trade sources; for income from sales of investment company securities, sales of open-end investment company shares from trade source; for imputed commissions on debt securities, dealer transactions in U.S. government and agency securities from the Federal Reserve Bank of New York; for commodities commissions, futures contracts from trade source; for investment counseling, wages and salaries derived from BLS monthly employment times earnings times hours; other brokerage charges and investment counseling and for bank services charges, judgmental trend; for intercity transportation, receipts from trade sources; for private higher education, employment times BLS CPI for all items.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Domestic service (\$14.6 billion)	Benchmark years. For cleaning services, receipts from Census Bureau quinquennial census; for other domestic services, number of workers times weekly hours times earnings from BLS. Other years. Number of workers times weekly hours times earnings from BLS.	Judgmental trend.
Public education and hospitals, water and other sanitary services, and lotteries (\$203.4 billion)	All years except the most recent year. For lotteries, net receipts from Census Bureau quinquennial census and annual surveys of State and local governments, adjusted to a calendar year basis from a fiscal year basis; for others in this group, receipts from the same sources. Most recent year. Judgmental trend.	Judgmental trend.
Insurance, private hospitals, religious activities, cable TV electricity, natural gas, telephone, and local transport (\$945.0 billion)	Benchmark years. For life insurance, expenses from trade sources; for medical hand hospitalization insurance, premiums and benefits from the Center for Medicare and Medicaid Services; for other insurance, premiums and benefits from trade sources; for private hospitals, receipts and expenses from the Census Bureau quinquennial census; for cable TV and telephone, receipts from the Census Bureau quinquennial census; for religious activities, expenses based on contributions and membership from trade sources; for electricity and gas, receipts from the EIA; for local transport, receipts from trade source.	For life insurance, hospital, and religious activities, wages and salaries derived from BLS monthly employment times earnings time hours; for cable TV, number of cable TV and direct broadcast satellite subscribers from trade source; for electricity and gas, projected quantities based on degree-day data from the National Oceanic and Atmospheric Administration times prices based on BLS CPI's for electricity and gas; for cellular telephone, number of subscribers from trade source times BLS CPI for cellular telephone service; for others in this group, judgmental trend.
Foreign travel by U.S. residents (\$76.3 billion) less expenditures in the United States by nonresidents (\$90.6 billion)	Estimated as part of the international transactions accounts; see entry for exports and imports of services under net exports of goods and services.	Same as the annual estimates.
Other services: Motor vehicle leasing; parimutuel net receipts; other housing except hotels and motels; tolls; other household operations except repairs and insurance; travel and entertainment card fees; stenographic and reproduction services; money orders and classified advertising; and computer online service (\$122.6 billion)	Various source data.	For motor vehicle leasing, number of leased vehicles based on registrations and terms from trade source, and lease payments based on new vehicle prices, BEA depreciation schedules, and Federal Reserve Board interest rates on new motor vehicle loans; for others in this group, judgmental trend.
Fixed investment (\$1,646.3 billion)		
Nonresidential structures (\$324.5 billion) ⁴		
Utilities		
Telecommunication (\$18.4 billion)	Value put in place from Census Bureau monthly construction survey.	Same as annual.
Other (\$36.6 billion)	Expenditures from Federal regulatory agencies and trade sources.	Judgmental trend.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Nonresidential structures [Continued]		
Mining exploration, shafts, and wells (\$42.7 billion)	<p>Benchmark years. Expenditures from Census Bureau quinquennial census.</p> <p>All years except the most recent year. For petroleum and natural gas, physical quantity times average price: Footage drilled and cost per foot from trade sources; for other mining, expenditures from Census Bureau annual capital expenditure survey.</p> <p>Most recent year. For petroleum and natural gas, physical quantity times average price: Footage drilled and cost per foot from trade sources extrapolated by BLS producer price index for oil and gas well drilling.</p>	For petroleum and natural gas, same as annual estimates for the most recent year; for mining, judgmental trend.
Industrial buildings (\$25.6 billion)	<p>Benchmark years except 1992. Value put in place from Census Bureau monthly construction survey and improvements from Department of Energy (DOE) commercial buildings energy consumption survey. For 1992, tabulations from Census Bureau annual capital expenditure survey, adjusted for undercoverage.</p> <p>Other years. Value put in place from Census Bureau monthly construction survey.</p>	Same as the annual estimates for other years.
Other nonfarm buildings and structures (\$191.4 billion)	<p>Benchmark years. Value put in place from Census Bureau monthly construction survey and improvements from DOE commercial buildings energy consumption survey.</p> <p>Other years. Value put in place from Census Bureau monthly construction survey.</p>	Same as the annual estimates for other years
Farm buildings (\$6.1 billion)	Expenditures for new construction from the U.S. Department of Agriculture (USDA) surveys.	Value put in place from Census Bureau monthly construction survey.
Nonresidential equipment and software (\$877.1 billion)		
Equipment, except autos (\$662.6 billion)	<p>Benchmark years. Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data.</p> <p>Other years. Abbreviated commodity-flow method, starting with the Census Bureau's annual manufacturers' shipments or, for the most recent year (except for aircraft and trucks), monthly survey of manufactures and including the adjustment for exports and imports. For aircraft, manufacturers' shipments from Census Bureau current industrial report, adjusted for exports and imports. For trucks, domestic and North American imports, physical quantity purchased times average retail price: Unit sales, information to allocate sales among business and other purchasers, and average list price, all from trade sources; for truck trailers, shipments from Census Bureau current industrial report.</p>	For trucks, see the entry for new trucks under personal consumption expenditures; for others in this group, same as the annual estimates for other years but with less detail.
New and used autos (\$34.1 billion)	For new autos, see the entry for new autos under personal consumption expenditures; for used autos, change-in-business stock of autos at least 1-year old from trade source.	For new autos, same as the annual estimates; for used autos, judgmental trend.
Software (\$180.4 billion)	<p>Benchmark years. For purchased software, commodity-flow method, starting with industry receipts data from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data; for own-account software, production costs based on BLS employment data and on Census Bureau quinquennial census.</p> <p>Other years. For purchased software, commodity-flow method, starting with industry receipts data from Census Bureau service annual survey and including the adjustment for exports and imports; for own-account software, production costs based on BLS employment data or, for the most recent 2 years, private fixed investment in computers and peripheral equipment.</p>	For purchased software, receipts from company reports to the Securities and Exchange Commission and retail sales of business software from trade sources; for own-account software, same as the annual estimates for the most recent 2 years.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Residential investment (\$444.8 billion) ⁵		
Permanent-site new single-family housing units (\$232.1 billion)	Value put in place based on phased housing starts and average construction cost from Census Bureau monthly construction survey.	Same as the annual estimates.
Permanent-site new multifamily housing units (\$30.7 billion)	Value put in place from Census Bureau monthly construction survey.	Same as the annual estimates.
Manufactured homes (\$8.8 billion)	Benchmark years. See the entry "Equipment, except autos" under nonresidential equipment and software. Other years. Physical quantity shipped times price: Shipments from trade source and average retail price from Census Bureau monthly survey.	Same as the annual estimates for other years.
Improvements (\$104.6 billion)	Expenditures by owner-occupants from BLS quarterly consumer expenditure survey and by landlords from Census Bureau quarterly survey of landlords.	Judgmental trend.
Brokers' commissions (\$60.0 billion)	Physical quantity times price times BEA estimate of average commission rate: Number of single-family houses sold and mean sales price from Census Bureau monthly construction survey and trade source.	Same as the annual estimates.
Equipment (\$9.3 billion)	See the entry "Most durable and nondurable goods" under personal consumption expenditures.	Same as the annual estimates.
Change in private inventories (-\$60.3 billion)		
Manufacturing and trade (-\$72.2 billion)	Benchmark years. Inventories from Census Bureau quinquennial censuses revalued to current replacement cost, with information on the proportions of inventories reported using different accounting methods, on the commodity composition of goods held in inventory, and on the turnover period, all from the quinquennial censuses and annual surveys, combined with prices, largely based on BLS producer price indexes. (The difference between the Census Bureau change in inventories and the BEA change in private inventories is the inventory valuation adjustment (IVA).) Other years except the most recent year. Inventories from Census Bureau annual surveys, revalued as described above. Most recent year. For retail auto dealers, quantities times average prices from trade sources; for all others, inventories from the Census Bureau monthly surveys, revalued as described above.	Same as the annual estimate for the most recent year.
Construction, mining, utilities, and other nonfarm industries (\$10.3 billion)	Benchmark years. Mining and construction inventories from Census Bureau quinquennial censuses revalued to current replacement cost the same as for manufacturing and trade. Other years except the most recent year. Internal Revenue Service (IRS) tabulations of business tax returns, revalued as described above. Most recent year. Census Bureau quarterly survey of mining corporations, monthly physical quantities from the EIA combined with BLS producer price indexes for electric utilities, and for all others, judgmental trend, revalued as described above (except when noted as physical quantity times price).	For electric utilities, same as the annual estimate for the most recent year; for all others, judgmental trend.
Farm (\$1.6 billion)	Changes in physical quantities times current prices from USDA surveys	For crops, BEA quarterly allocation of USDA annual projections of crop output and cash receipts; for livestock, USDA quarterly data.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Net exports of goods and services (−\$348.9 billion)		
Exports and imports of goods, net (−\$433.7 billion)	Estimated as part of the international transactions accounts: Export and import documents compiled monthly by the Census Bureau with adjustments by BEA for coverage and valuation to convert the data to a balance-of-payments basis. Adjusted for the balance-of-payments coverage of U.S. territories and Puerto Rico with data from the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and the Census Bureau, and coverage of gold transactions adjusted with data from the U.S. Geological Survey and trade sources.	For territorial adjustment and coverage of gold, judgmental trend; for all other years, same as the annual estimates.
Exports and imports of services, net (\$84.8 billion)	Estimated as part of the international transactions accounts: For government transactions, reports by Federal agencies on their purchases and sales abroad; for most others in this group (including travel, passenger fares, other transportation, and royalties and license fees), BEA quarterly or annual surveys (supplemented with data from other sources). Adjusted for the balance-of-payments coverage of U.S. territories and Puerto Rico (see the above entry); adjusted to include financial services furnished without payment, see the entry for banks, credit agencies, and investment companies under imputed net interest, and adjusted for NIPA treatment of military grants.	For territorial adjustment, judgmental trend; for all other years, same as the annual estimates.
Government consumption expenditures and gross investment (\$1,858.0 billion)		
Federal Government (\$628.1 billion)		
National defense except consumption of general government fixed capital (\$336.4 billion)	Within a control total established by fiscal year analysis: For compensation, military wages from OMB's <i>Budget of the United States</i> , civilian wages and benefits from Office of Personnel Management (OPM), and other labor income for Federal employee retirement plans from outlays from the <i>Monthly Treasury Statement</i> ; for other than compensation by type, based mainly on data from Department of Defense (DOD) reports; for software, see the entry for software under nonresidential equipment and software.	For components of compensation, military employment from DOD and civilian employment from BLS; for other than compensation, same as annual; for software, see the entry for software under nonresidential equipment and software.
National defense consumption of general government fixed capital (\$63.5 billion)	Perpetual-inventory calculations at current cost, based on gross investment and on investment prices.	Same as the annual estimates.
Nondefense except consumption of general government fixed capital (\$199.5 million)	Within a control total established by fiscal year analysis: For Commodity Credit Corporation inventory change, book values of acquisitions and physical quantities of dispositions from agency reports times average market prices from the USDA; for compensation, civilian wages and benefits from OPM and other labor income for Federal employee retirement plans from outlays from the <i>Monthly Treasury Statement</i> ; for petroleum sales (Naval Petroleum Reserve), distribution and price data from the DOE; for research and development, obligations from the National Science Foundation and disbursements from the National Aeronautics and Space Administration; for construction, value put in place from Census Bureau monthly construction survey; for software, see the entry for software under nonresidential equipment and software; for all others, outlays from the <i>Monthly Treasury Statement</i> . For financial services furnished without payment, see the entry for banks, credit agencies, and investment companies under imputed net interest.	For components of compensation, employment from BLS; for software, see software under nonresidential equipment and software; for other than compensation and software, same as the annual estimates.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (Gross domestic product of \$10,082.2 billion for 2001)		
Nondefense consumption of general government fixed capital (\$28.7 billion)	Perpetual-inventory calculations at current cost, based on gross investment and on investment prices.	Same as the annual estimates.
State and local government (\$1,229.9 billion)		
Consumption expenditures and gross investment except those items listed below (\$226.9 billion)	All years except the 3 most recent years. Total expenditures from Census Bureau quinquennial census and annual surveys of State and local governments, selectively replaced with source data that are more appropriate for the NIPA's and adjusted as follows: For coverage; for netting and grossing differences to a calendar year basis from a fiscal year basis; for other timing differences; to exclude interest, subsidies, net expenditures of government enterprises, and transfer payments; and to exclude compensation, software, and structures. The 3 most recent years. Judgmental trend.	Judgmental trend.
Compensation of general government employees, except own-account investment (\$700.4 billion)	For wages and salaries, BLS annual tabulations of wages and salaries of employees covered by State unemployment insurance (UI); for employer contributions for social insurance, tabulations from the Social Security Administration and other agencies administering social insurance programs; for other labor income, trade sources, Centers for Medicare and Medicaid Services; Census Bureau annual surveys of State and local government retirement funds, adjusted to a calendar year basis and Census Bureau annual surveys of State and local governments, adjusted to a calendar year basis.	For wages and salaries, derived from BLS monthly employment times earnings from BLS employment cost index; for other compensation, judgmental trend.
Consumption of general government fixed capital (\$95.4 billion)	Perpetual-inventory calculations at current cost, based on gross investment and on investment prices.	Same as the annual estimates.
Structures (\$177.6 billion)	Value of construction put in place from Census Bureau monthly construction survey.	Same as the annual estimates.
Software (\$16.0 billion)	See the entry for software under nonresidential equipment and software.	Same as the annual estimates.
Brokerage charges and financial services furnished without payment (\$13.6 billion)	See the entries for brokerage charges and for financial services furnished without payment under personal consumption expenditures for services.	Same as the annual estimates.
Income side (Gross national income of \$10,221.4 billion for 2001)		
Compensation of employees (\$5,874.9 billion) ⁶		
Wage and salary accruals (\$4,950.6 billion)		
Private industries (\$4,145.9 billion)	For most industries, BLS annual tabulations of wages and salaries of employees covered by State UI; for others, wages from a variety of sources (such as the USDA for farms and the Railroad Retirement Board for railroad transportation), adjusted for understatement of income on tax returns and for coverage differences.	For most industries, wages and salaries derived from BLS monthly employment times earnings times hours; for others, judgmental trend.
Federal Government (\$197.4 billion)	For civilians, wages from the Office of Personnel Management; for military personnel, wages from OMB's <i>Budget of the United States</i> .	For civilians, employment from BLS and judgmental trend; for military personnel, DOD employment and judgmental trend.
State and local governments (\$613.5 billion)	BLS annual tabulations of wages and salaries of employees covered by State UI.	Derived from BLS monthly employment times earnings from BLS employment cost index.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Income side (Gross national income of \$10,221.4 billion for 2001)		
Compensation of employees [Continued]		
Employer contributions for social insurance (\$353.9 billion)	Tabulations from the Social Security Administration and other agencies that administer social insurance programs.	For Federal programs, BEA-derived wages and salaries of employees covered by the programs; for State and local government programs judgmental trend.
Other labor income (\$570.4 billion)		
Group health insurance (\$327.4 billion)	All years except the 3 most recent years. Total contributions from the Centers for Medicare and Medicaid Services less employee contributions from BLS consumer expenditure survey. The 3rd most recent year. Employer costs for health insurance from Department of Health and Human Services survey The 2 years after the most recent year. BLS employer costs for employee health insurance and wages and salaries from annual tabulations of employees covered by State UI.	Judgmental trend
Government employee retirement plans (\$110.9 billion)	All years except the most recent year. For Federal plans, outlays from the <i>Monthly Treasury Statement</i> ; for State and local government plans, Census Bureau annual surveys of State and local government retirement funds, adjusted to a calendar year basis. Most recent year. For Federal plans, same as the estimates for all years; for State and local government plans, Census Bureau annual surveys of State retirement funds, adjusted to a calendar year basis.	For Federal plans, same as the annual estimate for the most recent year; for State and local government plans, judgmental trend
Private pension and profit-sharing funds (\$75.9 billion)	All years except the 3 most recent years. Tabulations from the Department of Labor. The 3 most recent years. Employer costs for employee compensation from BLS or IRS tabulations of business tax returns.	Judgmental trend.
Workers' compensation (\$39.2 billion)	All years except the most recent year. Employer contributions from trade sources. The most recent year. Judgmental trend.	Judgmental trend.
Group life insurance (\$12.3 billion)	All years except the most recent year. Group premiums and estimates of employer share from trade sources. The most recent year. Judgmental trend.	Judgmental trend.
Proprietors' income with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj) (\$727.9 billion)		
Farm proprietors' income with IVA (\$26.7 billion)	USDA data on net income derived from gross income (cash receipts from marketing, inventory change, government payments, other cash income, and nonmonetary income) less production expenses, adjusted to exclude corporate income based on USDA quinquennial census and annual survey data.	For crops, BEA quarterly allocation of USDA annual projections of crop output; for livestock, USDA quarterly projections of cash receipts and inventories; for both crops and livestock, quarterly allocation of USDA annual projections of government subsidy payments and production expenses.
Farm proprietors' income CCAdj (-\$7.7billion)	See the entry "Less: Capital consumption adjustment" under consumption of fixed capital.	
Nonfarm proprietors' income (\$621.6 billion)	All years except the most recent year. Income from IRS tabulations of business tax returns, adjusted for understatement of income on tax returns and for conceptual differences Most recent year. For construction, trade, and services, indicators of activity (such as value of housing put in place); for most others, judgmental trend.	Same as the annual estimates for the most recent year.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Income side (Gross national income of \$10,221.4 billion for 2001)		
Nonfarm proprietors' income IVA (\$0.9 billion)	See the entry for inventory valuation adjustment under corporate profits.	
Nonfarm proprietors' income CCAAdj (\$86.3 billion)	See the entry "Less: Capital consumption adjustment" under consumption of fixed capital.	
Rental income of persons (\$137.9 billion)		
Owner-occupied nonfarm housing (\$139.6 billion)	Benchmark years. Derived as space rent (see entry for nonfarm dwellings under services in personal consumption expenditures) less related expenses, including property insurance from trade source; mortgage interest and property taxes from Census Bureau decennial survey of residential finance. Other years. Same as benchmark years except that mortgage interest is based on mortgage debt from the Federal Reserve Board times a BEA interest rate and property taxes are from Census Bureau annual surveys of State and local tax collections	For owner-occupied space rent, same the annual estimates; for depreciation, interest closing costs, real estate dealers' commissions, and taxes, based on NIPA estimates of those components; for other expenses, judgmental trend.
Tenant-occupied nonfarm housing (\$45.4 billion)	Same as owner-occupied nonfarm housing, adjusted to cover only rental income accruing to persons not primarily engaged in the real estate business from Census Bureau decennial survey of residential finance.	Same as the annual estimate.
Farms owned by nonoperator landlords (\$6.8 billion)	Prepared with farm proprietors' income; see the entry for farm proprietors' income with IVA under proprietors' income.	Judgmental trend.
Nonfarm nonresidential properties (\$0.9 billion)	Benchmark years. Nonfarm nonresidential fixed assets from BEA capital stock series times a rate of return on capital based on IRS tabulations of business tax returns. Other years. BEA capital stock series and judgmental trend.	Judgmental trend.
Royalties (\$11.7 billion)	All years except the most recent year. IRS tabulations of royalties reported on individual income tax returns. Most recent year. Judgmental trend.	Judgmental trend.
Capital consumption adjustment (-\$66.5 billion)	See entry for "Less: Capital consumption adjustment" under consumption of fixed capital.	
Corporate profits with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAAdj) (\$731.6 billion)		
Domestic profits before tax (\$519.4 billion)	All years except the most recent year. Receipts less deductions from IRS tabulations of business tax returns, adjusted for understatement of income on tax returns and for conceptual differences. Most recent year. Profits from Census Bureau quarterly survey of corporate profits, regulatory agency reports, and compilations of publicly available corporate financial statements.	For some industries in transportation and in finance, judgmental trend; for others, same as the annual estimate for the most recent year. (Released with the preliminary estimates of GDP for the first, second, and third quarters and the final estimate for the fourth quarter.)
Rest-of-the-world profits before tax (\$150.8 billion)	Estimated as part of the international transactions accounts. For direct investment income, BEA surveys; for portfolio income, Treasury Department surveys. Adjusted for NIPA coverage of U.S. territories and Puerto Rico; see the entry for exports and imports of goods under net exports of goods and services.	Same as the annual estimates. (Released on same schedule as domestic profits before tax.)
Inventory valuation adjustment (IVA) (\$5.0 billion)	The IVA on the income side (for corporations and for nonfarm sole proprietorships and partnerships) differs from the IVA on the product side (see the entry "Change in private inventories") because the source data reflect different proportions of inventories reported on the basis of different accounting methods (such as last-in, first-out (LIFO)). The income-side IVA is based on the product-side IVA, adjusted by the relationship between non-LIFO inventories from IRS tabulations of business tax returns and non-LIFO inventories from the Census Bureau.	Same as the annual estimates.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Income side (Gross national income of \$10,221.4 billion for 2001)		
Corporate profits with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj) [Continued]		
Capital consumption adjustment (CCAdj) (\$56.5 billion)	See the entry "Less: Capital consumption adjustment" under consumption of fixed capital.	
Net interest (\$649.8 billion)		
Domestic monetary interest, net (\$282.3 billion)	<p>All years except the most recent year. For farm interest paid, USDA surveys; for residential mortgage interest paid, Census Bureau decennial survey of residential finance and mortgage debt from the Federal Reserve Board times a BEA interest rate; for most other interest paid and received by business, IRS tabulations of business tax returns, adjusted for misreporting on tax returns and for conceptual differences.</p> <p>Most recent year. For farm and mortgage interest paid, same as the estimates for other years; for other interest, interest receipts and payments from regulatory agencies (such as the Federal Deposit Insurance Corporation) and from trade sources or by applying BEA interest rates to interest-bearing assets or liabilities from Federal Reserve Board flow-of-funds accounts.</p>	Derived by combining estimates of (1) interest received by persons, (2) government interest paid and received, and (3) interest paid by persons. For (1), judgmental trend; for (2), <i>Monthly Treasury Statement</i> for Federal and judgmental trend for State and local; for (3), consumer debt from the Federal Reserve Board times BEA estimates of interest rates.
Rest-of-the-world monetary interest, net (-\$104.4 billion)	Estimated as part of the international transactions accounts: For direct investment income, BEA surveys; for portfolio income, Treasury Department surveys. Adjusted for NIPA coverage of U.S. territories and Puerto Rico; see the entry for exports and imports of goods under net exports of goods and services.	Same as the annual estimates.
Imputed interest		
Banks, credit agencies, and investment companies (\$270.6 billion)	Property income earned on investment of deposits less monetary interest paid to depositors (and for mutual depositories, profits from IRS tabulations of business tax returns) from annual reports of regulatory agencies and the Federal Reserve Board. Imputed interest (financial services furnished without payment) is allocated to persons, government, and to the rest of the world on the basis of deposit liabilities from the same sources.	Judgmental trend.
Life insurance carriers (\$201.3 billion)	Property income earned and profits from IRS tabulations of business tax returns, trade sources, and the Federal Reserve Board.	Judgmental trend.
Business transfer payments (\$42.5 billion)	<p>All years except the most recent year. Payments to persons for charitable contributions, IRS tabulations of business tax returns; for other components (such as liability payments for personal injury), information from government agency reports and trade sources; payments to the rest of the world, estimated as part of the international transactions accounts.</p> <p>Most recent year. Payments to persons for charitable contributions and for other components, judgmental trend.</p>	Judgmental trend.
Indirect business tax and nontax liability (\$774.8 billion)		
Federal Government (\$110.3 billion)	For excise taxes, collections from the Bureau of Alcohol, Tobacco, and Firearms and the IRS; for customs duties, receipts from the <i>Monthly Treasury Statement</i> ; and for nontaxes (such as fines), receipts from OMB's <i>Budget of the United States</i> .	For most excise taxes, derived from indicators of activity (such as gasoline production for gasoline tax); customs duties, same as the annual estimates; for others, judgmental trend.
State and local governments (\$664.4 billion)	Receipts from Census Bureau quinquennial census and annual surveys, adjusted to a calendar year basis from a fiscal year basis.	Judgmental trend.

Table 1. Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

Component	Annual estimates: Source data and methods used to determine level for benchmark and other years or used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Income side (Gross national income of \$10,221.4 billion for 2001)		
Subsidies less current surplus of government enterprises (\$47.3 billion)		
Federal Government (\$50.3 billion)	For subsidies, payments by the Commodity Credit Corporation (CCC) from agency reports and, for most other agencies, outlays from the <i>Monthly Treasury Statement</i> ; for current surplus, mainly reports of various agencies, such as the Postal Service, and consumption of fixed capital (CFC) estimates derived with perpetual-inventory calculations at current cost, based on gross investment and on investment prices.	For subsidies, CCC reports and judgmental trend; for current surplus, judgmental trend and CFC estimates derived the same as the annual estimates.
State and local governments (-\$3.1 billion)	For subsidies, limited to railroad and electric power, Census Bureau annual surveys of expenditures adjusted to a calendar year basis from a fiscal year basis and California administrative records. For current surplus: For current operating receipts, mainly revenue data from Census Bureau annual surveys of State and local governments, adjusted to a calendar year from a fiscal year basis; for current operating expenditures, see the entries "Consumption expenditures and gross investment" and "Consumption of general government fixed capital" under State and local government.	Judgmental trend and California administrative records.
Consumption of fixed capital (\$1,329.3 billion)		
Government (\$222.4 billion)		
General government (\$187.7 billion)	Perpetual-inventory calculations at current cost, based on gross investment and on investment prices.	Same as the annual estimates.
Government enterprise (\$34.8 billion)	Perpetual-inventory calculations at current cost, based on gross investment and on investment prices.	Same as the annual estimates.
Private (\$1,106.8 billion)		
Capital consumption allowances (\$1,168.4 billion)	All years except the most recent year. For depreciation of corporations and of nonfarm sole proprietorships and partnerships, IRS tabulations of business tax returns, adjusted for conceptual differences; for other depreciation (including for noncorporate farms, nonprofit institutions, and owner-occupied housing), perpetual-inventory calculations based on investment at acquisition cost; for accidental damage to fixed capital, losses reported to insurance companies and government agencies.	Same as the annual estimates.
Less: Capital consumption adjustment (\$61.6 billion)	Most recent year. For depreciation of corporations and nonfarm sole proprietorships and partnerships, BEA estimates of tax-return-based depreciation; for other depreciation and accidental damage to fixed capital, same as above. For corporations and nonfarm sole proprietorships and partnerships, the difference between tax-return-based calculations and perpetual-inventory calculations; for others (including noncorporate farms, nonprofit institutions and owner-occupied houses), the difference between perpetual-inventory calculations at historical cost and at current cost.	Judgmental trend.

NIPA National income and product account

1. Personal consumption expenditures (PCE) for durable and nondurable goods includes \$14.0 billion for food produced and consumed on farms, standard clothing issued to military personnel, and used trucks.

2. The Census Bureau data for retail sales include sales of gasoline service stations. The estimates of PCE for gasoline and oil are derived from the sources listed and are deducted from the retail-control totals to derive estimates of most durable and nondurable goods.

3. This line item is also referred to as "services furnished without payment by financial inter-

mediaries except life insurance carriers."

4. Nonresidential structures includes \$3.7 billion for brokers' commissions on sales of structures and net purchases of used structures.

5. Residential investment includes -\$0.7 billion for other structures (dormitories, fraternity and sorority houses, and nurses' homes) and net purchases of used structures.

6. Compensation of employees includes -\$6.2 billion for net wage and salary accruals for the rest of the world and \$4.8 billion for supplemental unemployment, directors' fees, and judicial fees in other labor income.

Table 2. Methodology Used in Preparing Estimates of Real GDP

Component	Deflation, using price based on		Using quantity for extrapolation or direct valuation	
	CPI or PPI	Other index		
Personal consumption expenditures				
Durable and nondurable goods				
Most durable and nondurable goods except those listed below	CPI		Direct valuation. For used autos, in two parts: (1) Margin, unit sales from trade sources with dealers' margins from Census Bureau and trade sources; (2) net transactions, net change in unit stock of autos held by consumers by year of original sale, valued by depreciated original value in base-year dollars.	
New autos	PPI for military clothing			
Net purchases of used autos	CPI			
		
New trucks	CPI			
Gasoline and oil	CPI			
Food furnished to employees (including military)	CPI			
Expenditures abroad by U.S. residents less personal remittances in kind to nonresidents	Foreign CPI's ¹		
Services				
Nonfarm dwellings: Space rent for owner-occupied dwellings and rent for tenant-occupied dwellings	CPI			Extrapolation. BEA value of farm housing stock derived from USDA data on capital expenditures, depreciation, and farm dwelling construction costs.
Rental value of farm dwellings		
Motor vehicle repair, rental and other services; other repair services; other purchased intercity transportation; legal and funeral services; barber shops, beauty parlors, and health clubs; nursing homes; laundries; employment agency fees; accounting and tax return preparation services; recreation (except cable TV, parimutuel net receipts, lotteries, and computer online services), hotels and motels; commercial business, trade, and correspondence schools; educational services not elsewhere classified; research organizations and foundations	CPI PPI, for private for-profit nursing homes and employment agency fees	Composite index of input prices from the Centers for Medicare and Medicaid Services, for private nonprofit nursing homes; for clubs and fraternal organizations and for nonprofit research and foundation expenses, BEA composite indexes of input prices.		
Physicians, dentists, and other professional medical services	CPI PPI, for physicians, home health care, and medical laboratories			

Table 2. Methodology Used in Preparing Estimates of Real GDP

Component	Deflation, using price based on		Using quantity for extrapolation or direct valuation
	CPI or PPI	Other index	
Private nursery schools, elementary and secondary schools, day care, welfare activities, political organizations, foundations, and trade unions and professional associations	BEA composite indexes of input prices.	
Financial services furnished without payment by banks, credit agencies, and investment companies ²	BEA composite index of input prices, for investment companies' "total deductions."	Extrapolation. For banks, BLS index of total output (less BEA real bank service charges); for credit agencies, paid employee hours of relevant financial institutions; for investment companies' "implicit charges," BEA orders derived from volume data from trade sources.
Brokerage charges and investment counseling, bank service charges, intercity transportation except other and private higher education	CPI PPI, for stock brokerage charges	BEA index based on revenue per passenger mile from DOT and trade source and CPI for airline fares, for airline transportation; for private higher education, BEA composite index of input prices.	Extrapolation. For mutual fund sales charges, value of new sales deflated by CPI.
Domestic service	CPI		
Public education and hospitals, water and other sanitary services, and lotteries	CPI PPI, for public hospitals		
Insurance, private hospitals, religious activities, cable TV electricity, natural gas, telephone, and local transport	CPI PPI, private for-profit hospitals	BEA composite indexes of input prices, for life insurance and religious activities; for private nonprofit hospitals, composite index of input prices from the Centers for Medicare and Medicaid Services.	Extrapolation. For auto insurance, premiums deflated by CPI; for medical care and hospitalization insurance, benefits deflated by CPI; for workers' compensation, premiums deflated by PPI.
Foreign travel by U.S. residents less expenditures in the United States by nonresidents	CPI, for expenditures in the United States	BEA composite index of foreign CPI's, ¹ for foreign travel; for air fares paid to foreign carriers, BLS import price index; for air fares paid to U.S. carriers, BLS international price index.	
Other services: Motor vehicle leasing; parimutuel net receipts; other housing except hotels and motels; tolls; other household operations except repairs and insurance; travel and entertainment card fees; stenographic and reproduction services; money orders and classified advertising; and computer online service	CPI	Extrapolation. For parimutuel net receipts, gross winnings deflated by CPI.

Fixed investment

Nonresidential structures

Utilities

PPI, for gas and petroleum pipelines

Cost index from trade source, for telecommunications; for railroads, BEA price index; for other components, cost indexes from trade sources and government agencies.

Mining exploration, shafts, and wells

PPI, for casing, oil and gas well drilling, oil and gas field services, and geophysical exploration

Implicit price deflator for nonfarm residential buildings, for mines.

Extrapolation. For drilling, footage by geographic area from trade source.

Table 2. Methodology Used in Preparing Estimates of Real GDP

Component	Deflation, using price based on		Using quantity for extrapolation or direct valuation
	CPI or PPI	Other index	
Nonresidential structures [Continued]			
Nonfarm buildings and structures	BEA index based on cost index from trade source and on Census Bureau price deflator for single-family houses under construction, for buildings; for structures, cost indexes from government agencies.	
Farm buildings	Implicit price deflator, for nonfarm nonresidential buildings.	
Nonresidential equipment and software			
Equipment, except autos	PPI, for most domestic components and for imported transportation equipment	BLS import price indexes, for imported components except transportation equipment.	
New and used autos	CPI, for new autos	Direct valuation. For used autos, see the entry "Net purchases of used autos" under durable and nondurable goods.
Telephone and telegraph installation	BEA cost index	
Telephone switching equipment	BEA price index	
Telephone and telegraph apparatus	BEA price index	
Software	PPI, for repackaged software	BEA cost index, BLS employment cost index, and PPI, for own-account and custom software.	
Residential investment			
Permanent-site new single-family housing units	Census Bureau price deflator for single-family houses under construction.	
Permanent-site new single-family housing units	BEA price index	
Manufactured homes	PPI		
Improvements	BEA composite index of input prices, for major replacements; for additions and alterations, BEA index based on Census Bureau price deflator for single-family houses under construction and BEA index for major replacements.	
Brokers' commissions	PPI		
Equipment	CPI		
Change in private inventories			
Nonfarm			
Purchased goods of all industries	PPI	Composite price from the Energy Information Administration (EIA), for crude petroleum; BLS import price indexes, for imported goods purchased by trade industries.	Direct valuation. Quantities and prices of stocks of coal, petroleum, and natural gas for utilities from the EIA.
Work-in-process and finished goods of manufacturing	PPI	BEA indexes of unit labor cost	
Farm	USDA average market prices	

Table 2. Methodology Used in Preparing Estimates of Real GDP

Component	Deflation, using price based on		Using quantity for extrapolation or direct valuation
	CPI or PPI	Other index	
Net exports of goods and services³			
Exports and imports of goods ³	PPI, for gold; semiconductor exports, selected transportation equipment; selected agricultural foods, feeds, and beverages and selected imports of refined petroleum	BLS export and import price indexes; for electric energy exports and imports and for petroleum imports, unit-value indexes based on Census Bureau values and quantities.	
Exports and imports of services ³	CPI, for travel receipts, medical receipts, and nonresident students' expenditures PPI, for selected other transportation	Selected deflators, for military transfers and defense expenditures; see "National defense, Except consumption of general government fixed capital" below. BLS export and import price indexes, for passenger fares; BEA composite index of foreign CPI's, ¹ for travel payments for miscellaneous services and U.S. students' expenditures abroad; BLS export and import price indexes, for selected other transportation; and for royalties and fees and for other private services, BEA price indexes, CPI, PPI, and implicit price deflator for final sales to domestic purchasers.	Extrapolation. For exports of financial services furnished without payment. ² BLS index of total bank output (less BEA real bank service charges).
Government consumption expenditures and gross investment			
Federal Government			
National defense except consumption of general government fixed capital	PPI, for selected goods and services CPI and PPI, for utilities and communications	BEA indexes based on DOD prices paid, for some goods and services and for most military structures; for some services, BLS employment cost indexes; for nonmilitary structures, cost indexes from trade sources and government agencies; for own-account software, BEA index derived from nondefense compensation; for custom software, BEA index derived from nondefense compensation price index and PPI.	Extrapolation. For military compensation, full-time equivalent employment by rank and length of service; for civilian compensation, full-time equivalent employment by grade, adjusted for change from base year in hours worked. Direct valuation. For some goods and services and a few military structures, quantities and prices from DOD reports; for electricity and natural gas, quantities from the DOE.
National defense consumption of general government fixed capital	Direct valuation. Perpetual-inventory calculations based on gross investment.

Table 2. Methodology Used in Preparing Estimates of Real GDP

Component	Deflation, using price based on		Using quantity for extrapolation or direct valuation
	CPI or PPI	Other index	
Government consumption expenditures and gross investment [Continued]			
Nondefense except consumption of general government fixed capital	PPI, for most goods and selected services CPI, for rent, utilities, and communications	Cost indexes from trade sources and government agencies, for structures; for some services, BLS employment cost indexes; for own-account software, BEA index derived from nondefense compensation; for custom software, BEA index derived from nondefense compensation price index and PPI.	Extrapolation. For compensation, full-time equivalent employment by grade and adjusted for change from base year in hours worked; for financial services furnished without payment, ¹ BLS index of total bank output (less BEA real bank service charges). Direct valuation. For net purchases of agricultural commodities by the CCC, quantities by crop from agency reports and USDA prices; for selected petroleum transactions, DOE quantities and prices.
Nondefense consumption of general government fixed capital	Direct valuation. Perpetual-inventory calculations based on gross investment.
State and local government			
Consumption expenditures and gross investment except those items listed below	CPI for services PPI for electricity, hospitals, most professional services, and goods	BEA indexes based on Federal nondefense prices paid, for transportation, books, and postal services; for elementary and secondary education, welfare and libraries, BEA composite indexes of input prices; for maintenance and repair services, BEA composite price index for State and local construction.	
Compensation of general government employees, except own-account investment	Extrapolation. For employees in education, full-time equivalent employment by education and experience, adjusted for change from base year in hours worked; for other employees, full-time equivalent employment adjusted for the change from base year
Consumption of general government fixed capital	Direct valuation. Perpetual-inventory calculations based on gross investment.
Structures	Cost indexes from trade sources and government agencies.	
Software	See the entry for software under non-residential equipment and software.	
Brokerage charges and financial services furnished without payment	Extrapolation. See the entries for brokerage charges and for financial services under personal consumption expenditures for services.

BLS Bureau of Labor Statistics
CPI Consumer price index
DOE Department of Energy
DOT Department of Transportation
PPI Producer price index
USDA U.S. Department of Agriculture

1. The foreign CPI's have been adjusted for differences in exchange rates.
2. Also referred to as "services furnished without payment by financial intermediaries, except life insurance carriers."

3. Real net receipts of income from the rest of the world—the difference between real GDP and real gross national product—is prepared using the implicit price deflator for final sales to domestic purchasers; imputed interest paid to nonresidents is extrapolated by the BLS index of total bank output (less BEA real bank service charges).

U.S. International Transactions, Second Quarter 2002

By Patricia E. Abaroa and Elena L. Nguyen

THE U.S. current-account deficit—the combined balances on trade in goods and services, income, and unilateral current transfers—increased to \$130.0 billion in the second quarter of 2002 from \$112.5 billion (revised) in the first quarter (table A).¹ The increase was mostly attributable to an increase in the deficit on goods, as a surge in goods imports more than offset a rebound in goods exports. An increase in the deficit on income, as income payments rose more than income receipts, also contributed to the increase in the current-account deficit. In contrast, the surplus on services increased, as services receipts increased more than services payments, and net outflows for unilateral current transfers decreased.

In the financial account, net recorded financial inflows—net acquisitions by foreign residents of assets in the United States less net acquisitions by U.S. residents of assets abroad—were \$80.4 billion in the second quarter, compared with \$87.6 billion (revised) in the first. Financial outflows for U.S.-owned assets abroad

1. Quarterly estimates of U.S. current- and financial-account components are seasonally adjusted when series demonstrate statistically significant patterns. The accompanying tables present both adjusted and unadjusted estimates.

increased more than financial inflows for foreign-owned assets in the United States.

The statistical discrepancy—errors and omissions in recorded transactions—was a positive \$49.4 billion in the second quarter, following a positive \$24.7 billion in the first.

The following are highlights for the second quarter of 2002:

- Goods imports surged as a result of strong gains in all major commodities. Goods exports turned up after decreasing for six consecutive quarters.
- Direct investment income payments more than doubled, and direct investment income receipts also increased.
- Net foreign purchases of U.S. securities other than U.S. Treasury securities increased strongly as a result of record net foreign purchases of U.S. corporate and agency bonds.
- Net financial inflows for foreign direct investment in the United States decreased to the lowest level in more than 10 years. The decrease reflected a shift to net intercompany debt outflows and a slowdown in net equity capital inflows.

^r Revised.
^p Preliminary.

U.S. dollar in exchange markets

In the second quarter, the U.S. dollar depreciated 4 percent on a nominal, trade-weighted quarterly average basis against the group of seven major currencies that are widely traded in international markets (table B, chart 1). From the end of the first quarter to the end of the second quarter, the dollar depreciated sharply, falling 12 percent against the euro and 10 percent against the Japanese yen.

After reaching a more than 16-year high against the group of major currencies in the first quarter, the dollar depreciated in the second quarter. Economic releases indicated that U.S. economic activity was expanding more modestly in the second quarter than in the previous two quarters. U.S. financial markets were also adversely affected by growing concerns over corporate profitability and governance. Although economic activity abroad was also weak, there were signs of recoveries in major markets in Europe, Asia, and Canada.

The dollar fell to a 28-month low against the euro near the end of the second quarter. The euro benefitted from changes in interest-rate differentials in favor of owning euro-denominated assets. In addition, concerns about inflationary influences in the euro area eased, and business sentiment surveys showed signs of a possible recovery in manufacturing, despite continued weakness in Germany.

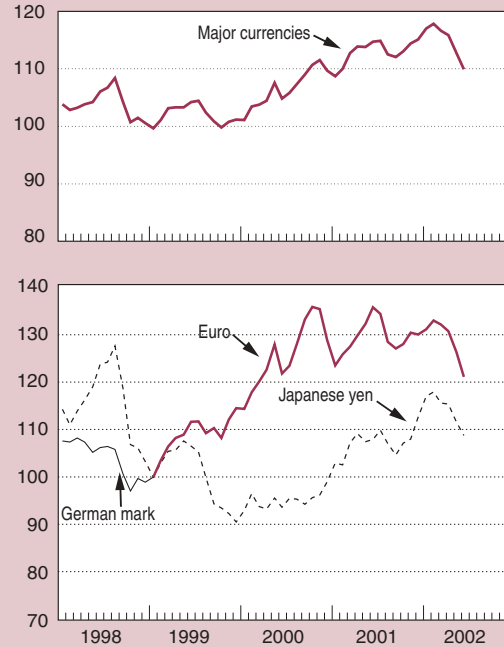

The yen appreciated against the dollar, as rising exports and gains in Japanese stock market prices gave investors hope for a modest improvement in Japan's economic conditions. Japanese monetary authorities attempted to stem the yen's rise by selling yen in foreign exchange markets on seven separate occasions.

In contrast, the U.S. dollar appreciated sharply against the currencies of several major Latin American countries that were experiencing substantial economic and financial difficulties. From the end of the first

1. For more information on the nominal and real indexes of the foreign exchange value of the U.S. dollar, see *Federal Reserve Bulletin*, vol. 84 (October 1998): 811-18.

2. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of U.S. trading partners, including the currencies of the euro-area countries, Australia, Canada, Japan, Sweden, Switzerland, United Kingdom, Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

3. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that circulate widely outside the country of issue, including the currencies of the euro-area countries, Australia, Canada, Japan, Sweden, Switzerland, and the United Kingdom. The weight for each currency is its broad-index weight divided by the sum of the broad-index

weights for all of the currencies included in the major currency index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

4. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that do not circulate widely outside the country of issue, including the currencies of Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. The weight for each currency is its broad-index weight divided by the sum of the broad-index weights for all of the currencies included in the other important trading partners index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

5. Data: Federal Reserve Board. Monthly and quarterly average rates. Indexes prepared by BEA.
6. The euro area includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain.

quarter to the end of the second quarter, the dollar appreciated 27 percent against the Argentine peso, 22 percent against the Brazilian real, and 10 percent against the Mexican peso. The Argentine peso has lost over 60 percent of its value since it was allowed to float early this year after the Government's default on its international debt. The Brazilian real depreciated in the second quarter amid mounting concern about the country's economic and financial situation and the servicing of its large foreign debt.

Current Account

Goods and services

The deficit on goods and services increased to \$110.6 billion in the second quarter from \$95.5 billion in the first. A large increase in the deficit on goods more than offset a small increase in the surplus on services.

Goods

The deficit on goods increased to \$122.6 billion in the second quarter from \$106.4 billion in the first. The deficit had also increased in the first quarter after decreases throughout 2001. In the second quarter, imports surged an unprecedented amount, and exports increased strongly; in contrast, imports and exports had decreased substantially in 2001 (chart 2).

Exports. Goods exports increased \$8.0 billion, or 5 percent, to \$172.7 billion in the second quarter, follow-

Revisions to the Estimates for the First Quarter of 2002

The international transactions accounts estimates for the first quarter of 2002 are revised from the preliminary estimates that were published in the July 2002 SURVEY OF CURRENT BUSINESS. The current-account deficit for the first quarter was virtually unrevised at \$112.5 billion. The goods deficit was unrevised at \$106.4 billion, the services surplus was revised to \$10.9 billion from \$11.6 billion, the deficit on income was revised to \$0.9 billion from \$1.8 billion, and unilateral current transfers were revised to net outflows of \$16.0 billion from net outflows of \$15.9 billion. Net recorded financial inflows were revised to \$87.6 billion from \$99.4 billion.

ing six quarters of decline. In percentage terms, the increase was the largest in over 7 years. Real exports increased 4 percent, and export prices increased 1 percent (table C).²

Exports were spurred by an acceleration in economic activity in some foreign countries. The largest increases in exports were to Canada, where economic growth has been strong; to Asia, where recovery is underway partly due to the revival of the technology sector; and to Mexico, where signs of a rebound in economic activity recently emerged.

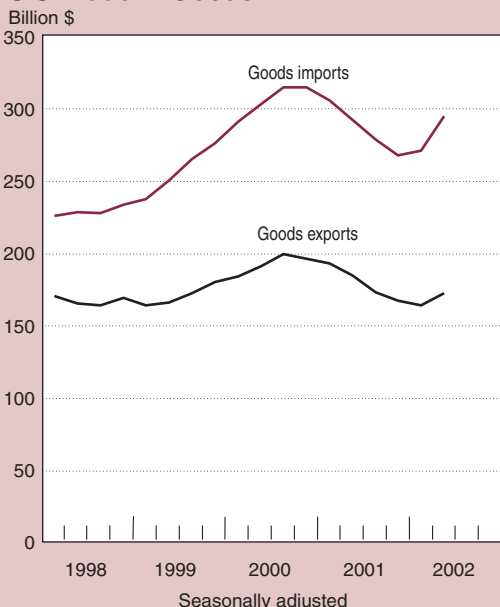

Exports of most major end-use commodities increased in value. Industrial supplies and materials increased \$3.0 billion, or 8 percent, to \$39.9 billion, following five quarters of decline. Chemicals accounted for over one-third of the total increase; exports to all geographical areas, particularly to Asia, rose strongly. Metals and nonmetallic products increased substantially, largely as a result of a 24-percent rise in nonferrous metals. Exports of every other category of nonagricultural commodities also increased.

Capital goods increased \$2.5 billion, or 3 percent, to \$73.6 billion, following six quarters of decrease. The second-quarter increase was mostly due to a surge in exports to Asia. Semiconductors increased \$1.1 billion, of which 80 percent was to Asia. Several other commodity categories increased, including electric generating machinery, machine tools, and "other" industrial, agricultural, and service machinery. In contrast, computers, peripherals, and parts decreased for the seventh consecutive quarter (although only slightly), and telecommunications equipment also continued to fall.

Automotive vehicles, engines, and parts increased

CHART 2

U.S. Trade in Goods

U.S. Bureau of Economic Analysis

2. Quantity (real) estimates are calculated using a chain-type Fisher formula with annual weights for all years and quarterly weights for all quarters. Real estimates are expressed as chained (1996) dollars. Price indexes (1996=100) are also calculated using a chain-type Fisher formula.

\$1.7 billion, or 9 percent, to \$20.1 billion. The increase was the largest in both dollar and percentage terms since 1998. About two-thirds of the dollar increase was in engines and in other parts and accessories. Exports to Canada accounted for about 40 percent of the total increase, and exports to Mexico, about 30 percent.

Consumer goods increased \$0.5 billion, or 3 percent, to \$21.1 billion, following a yearlong decline.

Imports. Goods imports increased \$24.2 billion, or 9 percent, to \$295.3 billion in the second quarter, following a modest increase in the first quarter and substantial decreases in 2001. The second-quarter increase was a record in dollar terms and the largest in over 22 years in percentage terms. Nonpetroleum imports accounted for two-thirds of the increase, as all major commodity groups showed gains. Real imports increased 6 percent, and import prices increased 3 percent (table C).

Imports increased strongly, though the recovery in U.S. economic activity in the last three quarters has been uneven. Imports of consumer goods accelerated, though domestic consumer expenditures slowed for the second consecutive quarter. Imports of automotive products rose sharply, reflecting the high level of domestic expenditures for motor vehicles in the first half of the year, partly in response to sales incentives. Imports of capital goods stepped up, reflecting a rebound in domestic business investment in the first half of the year.

Consumer goods increased \$5.5 billion, or 8 percent, to a record \$76.8 billion. China accounted for over 60 percent of the increase. Manufactured durable goods rose \$3.4 billion, of which over one-third was accounted for by household and kitchen appliances.

Manufactured nondurable goods increased \$1.7 billion.

Automotive vehicles, engines, and parts increased \$4.2 billion, or 9 percent, to \$51.8 billion. Over 60 percent of the increase was accounted for by a sharp increase in passenger cars, particularly from Germany but also from Canada, Mexico, and the United Kingdom. Most of the rest of the increase was accounted for by parts and accessories.

Capital goods increased \$2.9 billion, or 4 percent, marking the second consecutive quarterly increase after five quarters of decline. The second-quarter increase was mostly accounted for by a strong rise in imports from Asia. High-technology products accounted for over half of the increase in capital goods, and "other" industrial, agricultural, and service industry machinery accounted for most of the rest. Among high-technology products, telecommunications equipment increased \$0.7 billion, semiconductors increased \$0.6 billion, and computers and parts increased \$0.2 billion. All three categories had begun to strengthen in the first quarter after decreasing for several quarters.

Nonpetroleum industrial supplies and materials increased \$2.9 billion, or 8 percent, to \$41.6 billion in the second quarter, following little change in the first quarter and substantial declines in 2001. The second-quarter increases were widespread by commodity category. Chemicals increased \$1.0 billion, reflecting increased purchases from Canada, Hungary, and Western Europe (mostly Germany). Natural gas, nonmonetary gold, and other precious metals also contributed to the second-quarter increase.

Petroleum imports surged to \$27.2 billion, an increase of \$8.0 billion, or 42 percent, following six quar-

^r Revised.

^p Preliminary.

¹ Because chain indexes use weights of more than one period, the corresponding chained dollar estimates are usually not additive.

Note. The chained-dollar estimates are revised to incorporate the results of the recent annual revision of the national income and product accounts.

ters of decline. The increase, a record in dollar terms and a near-record in percentage terms, was due to sharply higher prices and an increase in volume. Petroleum prices jumped to \$24.03 per barrel from \$18.40 per barrel in the first quarter, and the average number of barrels imported daily increased to 12.38 million from 11.44 million (chart 3). Most of the increase in value was accounted for by non-OPEC members, mainly Canada, Mexico, and the United Kingdom.

Balances by area. By area, the goods deficit with Western Europe increased \$7.2 billion as a result of an increase in imports and a decrease in exports. The deficit with China increased \$4.5 billion, as a substantial jump in imports more than offset an increase in exports. The deficit with Latin America rose \$2.1 billion.

Services

The surplus on services increased \$1.1 billion, to \$12.0 billion, in the second quarter. Receipts increased \$2.5 billion, to \$71.1 billion, and payments increased \$1.4 billion, to \$59.0 billion.

After rebounding strongly in the first quarter, travel receipts and payments increased only modestly in the second quarter and were still well below year-earlier levels. In the second quarter, receipts increased \$0.2 billion, to \$17.2 billion, and payments increased \$0.1 billion, to \$14.7 billion.

“Other” transportation receipts increased \$0.2 billion, to \$7.0 billion. After falling throughout 2001, receipts rebounded in the first half of 2002, largely as a result of increases in goods exports and imports that raised the demand for port and freight services. In the second quarter, air port services rose as a result of in-

creases in the price of jet fuel and in import and export volume. An increase in freight services reflected increases in air, truck, and ocean freight services. “Other” transportation payments increased \$0.9 billion, to \$9.7 billion, the first quarterly increase since the third quarter of 2000. The rebound was largely attributable to increases in ocean freight and in air port services.

“Other” private service receipts increased \$1.4 billion, to \$28.8 billion. Affiliated services accounted for \$0.9 billion of the increase, reflecting higher receipts of both U.S. parents and U.S. affiliates of foreign parents. “Other” private service payments increased \$0.4 billion, to \$19.5 billion. Unaffiliated services more than accounted for the increase, rising \$0.7 billion. Most of the increase was due to a rise in insurance premium payments.

Income

The deficit on income increased \$5.3 billion, to a record \$6.3 billion in the second quarter. The balance on income has been volatile, especially since early 2001, and has been subject to significant revisions as new and updated source data have become available. In the first quarter of 2002, the balance on income shifted to a deficit, and in the second quarter, the deficit widened. Income receipts increased \$2.5 billion, to \$60.6 billion, in the second quarter, largely because of a rise in direct investment receipts. Income payments increased \$7.9 billion, to \$66.9 billion, mostly because of a strong increase in direct investment payments.

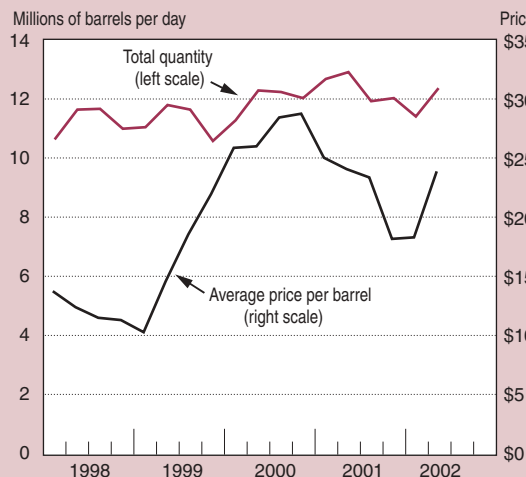

Receipts of income on U.S. direct investment abroad increased \$2.5 billion, to \$31.1 billion (chart 4). After falling throughout 2001, direct investment receipts recovered in the first half of 2002 but remained well below the levels in 2000. The second-quarter increase was attributable to a rise in earnings that was widespread among major industries. Geographically, the largest earnings increases were from foreign affiliates in Western Europe, Asia, and Canada. Increases in Latin America were due to decreased losses in Argentina.

Payments of income on foreign direct investment in United States rose \$6.9 billion, to \$13.5 billion. After declining sharply from mid-2000 to the end of 2001, direct investment payments recovered strongly in the first half of 2002 as many U.S. affiliates made profits after posting losses over several quarters. In the second quarter, earnings increased \$6.6 billion. Earnings in manufacturing and in “other” industries increased the most; all subindustries within those categories posted increases. Earnings in the petroleum industry also increased, largely as a result of a rise in petroleum prices.

“Other” private receipts increased \$0.2 billion, to \$28.2 billion, after declining sharply for five quarters.

CHART 3

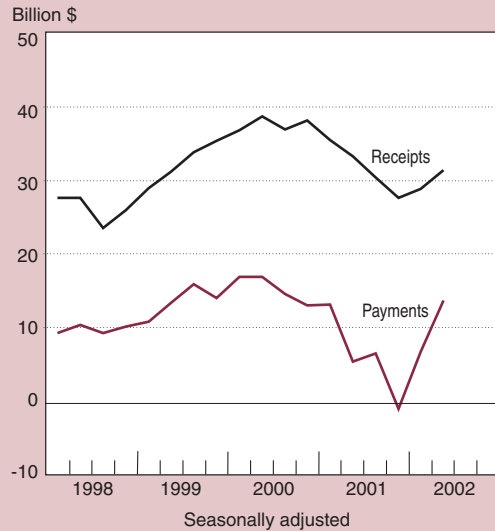

U.S. Petroleum Imports, Quantity and Price

U.S. Bureau of Economic Analysis

CHART 4

Direct Investment Income

U.S. Bureau of Economic Analysis

The second-quarter increase was due to higher outstanding holdings and balances. The largest increases were in dividends on U.S. holdings of foreign stocks and in interest on U.S. bank claims. These increases were partly offset by a decrease in interest receipts on U.S. holdings of foreign bonds.

After falling sharply for five quarters, "other" private payments increased \$0.8 billion, to \$32.5 billion, in the second quarter. The second-quarter increase was mostly due to higher outstanding holdings and balances. Increases in interest on nonbank liabilities and in dividends on foreign holdings of U.S. stocks more than offset a decline in interest payments on foreign holdings of U.S. corporate bonds.

Unilateral current transfers

Unilateral current transfers were net outflows of \$13.1 billion in the second quarter, down from net outflows of \$16.0 billion in the first. The decrease was more than accounted for by a decline in U.S. Government grants.

Capital Account

Capital account transactions were net inflows of \$0.2 billion in the second quarter, virtually unchanged from the first.

Financial Account

Net recorded financial inflows—net acquisitions by foreign residents of assets in the United States less net acquisitions by U.S. residents of assets abroad—were \$80.4 billion in the second quarter, compared with \$87.6 billion (revised) in the first. Financial outflows for U.S.-owned assets abroad increased more than financial inflows for foreign-owned assets in the United States.

U.S.-owned assets abroad

Net U.S.-owned assets abroad increased \$140.8 billion in the second quarter, following an increase of \$25.9 billion in the first. U.S. claims on foreigners reported by U.S. banks and nonbanking concerns shifted to substantial net outflows, and transactions in foreign securities shifted to net U.S. purchases from net U.S. sales.

U.S. official reserve assets. U.S. official reserve assets increased \$1.8 billion in the second quarter, in contrast to a decrease of \$0.4 billion in the first (table D). Most of the second-quarter increase was accounted for by a \$1.6 billion increase in the U.S. reserve position in the International Monetary Fund (IMF), reflecting dollar lending by the IMF to Brazil and Turkey.

Claims reported by banks and by nonbanks. U.S. claims on foreigners reported by U.S. banks increased \$72.7 billion in the second quarter, in contrast to a decrease of \$0.7 billion in the first (chart 5). The second-quarter increase reflected a sharp increase in banks' own lending overseas and an upswing in banks' domestic customers' claims.

Banks' own claims payable in dollars increased \$52.6 billion in the second quarter, following a \$5.1 billion increase in the first. The second-quarter increase was largely accounted for by a sharp increase in interbank lending, particularly by foreign-owned banks in the United States to their own offices abroad, mostly in Western Europe. The increase in claims re-

^r Revised.^p Preliminary.¹ Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.² Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning January 1993 and Gabon beginning January 1995.

flected a rebound in the international syndicated loan market and may also have reflected bank lending to support increased foreign acquisitions of U.S. securities. Claims were also boosted by banks' extension of credit to borrowers who were unable to access the commercial paper and securities markets because of investors' heightened risk aversion. Securities brokers' and dealers' claims increased strongly, partly in the form of resale agreements with offshore investment funds in the Caribbean.

Banks' domestic customers' claims payable in dollars increased \$13.7 billion, in contrast to a decrease of \$9.4 billion in the first quarter. The second-quarter increase was more than accounted for by large increases in banks' customers' holdings of foreign commercial paper and of other negotiable instruments.

Nonbanking concerns' claims increased \$27.0 billion in the second quarter, following virtually no change in the first. The increase was mostly in the form of deposits at Caribbean banking centers.

Foreign securities. Transactions in foreign securi-

ties shifted to net U.S. purchases of \$10.0 billion in the second quarter from net U.S. sales of \$2.0 billion in the first. A shift to net U.S. purchases of foreign stocks more than offset an increase in net U.S. sales of foreign bonds.

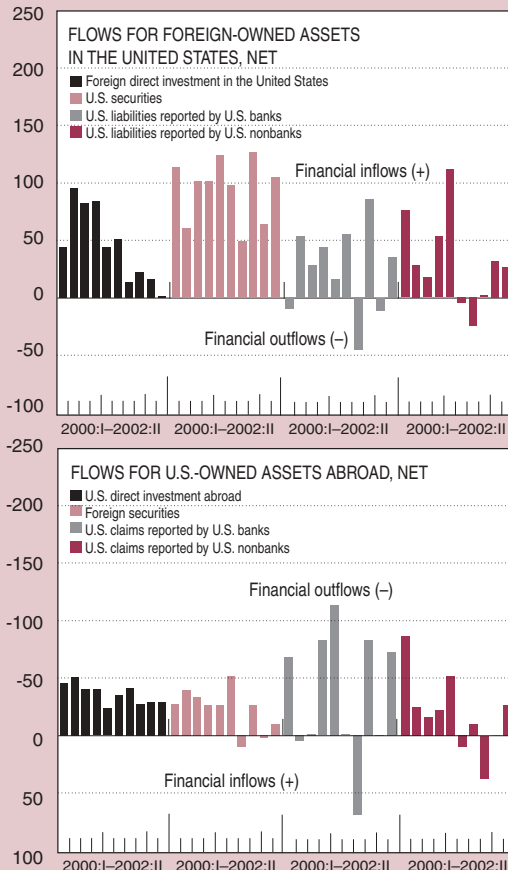

Transactions in foreign stocks shifted to net U.S. purchases of \$20.2 billion from net U.S. sales of \$1.5 billion. (There were no large merger-related exchanges of stocks in the second quarter, compared with \$1.8 billion of these exchanges in the first.) Transactions with several countries and areas shifted to net U.S. purchases from net sales, although major world stock markets continued to be pressured by ongoing troubles in the telecommunication, media, and technology sectors and by weak global economic activity (chart 6). In local currency terms, foreign stock prices decreased an average of 12 percent. European stock prices fell sharply because of disappointing corporate earnings and weak economic activity in Europe. The Japanese market fared somewhat better, but prices still declined, partly in response to concerns that the yen's appreciation might hurt Japanese exports. Emerging-market stock prices were negatively affected by political and economic problems in Latin America and by a general rise in risk aversion.

Net U.S. sales of foreign bonds increased to \$10.2 billion in the second quarter from \$0.6 billion in the first. Despite a decline in borrowing costs, new foreign issues in the United States fell to a 2-year low, as inves-

U.S. Bureau of Economic Analysis

tors' heightened risk aversion limited issuance to only the highest rated borrowers. Net U.S. sales of outstanding foreign bonds increased to \$7.1 billion from \$1.9 billion, partly reflecting sales of issues denominated in foreign currency.

Direct investment. Financial outflows for U.S. direct investment abroad were \$29.4 billion in the second quarter, nearly unchanged from \$29.3 billion in the first. Net equity capital outflows decreased to \$6.1 billion from \$9.5 billion, reflecting the absence of large U.S. acquisitions of foreign companies. In contrast, net intercompany debt outflows increased to \$5.5 billion from \$2.0 billion. Reinvested earnings were nearly unchanged at \$17.7 billion.

Foreign-owned assets in the United States

Net foreign-owned assets in the United States increased \$221.2 billion in the second quarter, following an increase of \$113.5 billion in the first. U.S. liabilities to foreigners reported by U.S. banks increased after a first-quarter decrease, and net foreign purchases of U.S. securities increased substantially.

Foreign official assets. Foreign official assets in the United States increased \$47.1 billion in the second quarter, following an increase of \$7.6 billion in the first. Assets of industrial countries increased \$21.0 billion, partly as a result of official interventions in the foreign-exchange market in an effort to limit the appreciation of the Japanese yen. Assets of non-OPEC developing countries increased \$25.1 billion, and assets of OPEC members increased \$1.0 billion.

Liabilities reported by banks and by nonbanks. U.S. liabilities to foreigners reported by U.S. banks, excluding U.S. Treasury securities, increased \$34.9 billion in the second quarter, in contrast to a decrease of \$11.1 billion in the first. The second-quarter increase was due to a resurgence in interbank borrowing, an acceleration in borrowing by securities brokers and dealers, and an increase in banks' custody liabilities.

Banks' own liabilities payable in dollars increased \$19.6 billion in the second quarter, in contrast to a decrease of \$8.3 billion in the first. The second-quarter increase was partly in the form of repurchase agreements, which banks and securities brokers and dealers may have used to finance an expansion of their holdings of U.S. securities. The increase in liabilities also helped to finance the pickup in international lending by U.S. banks.

Banks' custody liabilities payable in dollars increased \$6.5 billion in the second quarter, in contrast to a decrease of \$4.2 billion in the first. Most of the increase was in negotiable and readily transferable instruments.

Nonbanking concerns' liabilities increased \$26.0 billion, following an increase of \$32.3 billion. The second-quarter increase was largely accounted for by an increase in nonbank borrowing.

U.S. Treasury securities. Transactions in U.S. Treasury securities except those for official assets shifted to net foreign purchases of \$1.4 billion in the second quarter from net foreign sales of \$7.3 billion in the first. U.S. Treasury bond prices advanced 3 percent, reflecting lackluster economic reports, weakened investor confidence, and heightened risk aversion. Net foreign purchases of U.S. Treasury securities in June, when uncertainty in U.S. financial markets was high, more than offset net foreign sales in April and May. Net purchases from Japan and Caribbean offshore investment funds were largely offset by net sales from Western Europe.

Other U.S. securities. Net foreign purchases of U.S. securities other than Treasury securities were \$103.8 billion in the second quarter, up from \$71.1 billion in the first. Net foreign purchases of U.S. bonds increased to a record level, while net foreign purchases of U.S. stocks decreased to the lowest level in more than 3 years.

Net foreign purchases of U.S. corporate and other bonds doubled to a record \$92.3 billion. Weakness in the U.S. stock market and historically low yields on U.S. Treasury securities prompted some foreign investors to shift funds into the high-quality U.S. corporate and agency bond markets, where yields were higher and levels of risk were acceptable. Investment-grade bonds outperformed noninvestment-grade bonds by a large margin, reflecting deteriorating credit quality and rising liquidity risks in the corporate bond sector. Several prominent companies had already been downgraded to noninvestment-grade status, and many others were on the verge of being downgraded. Prices of U.S. agency bonds and investment-grade corporate bonds increased 3 percent and 1 percent, respectively, whereas prices of noninvestment-grade bonds decreased 9 percent.

Net foreign purchases of U.S. agency bonds increased to a record \$32.4 billion from \$2.7 billion. The increase coincided with a general rise in demand for agency bonds, which resulted in a further narrowing of the spread between agency bonds and Treasury bonds. Over the past few years, agency bonds have grown in importance as viable alternatives to U.S. Treasury bonds because of their similar quality and liquidity. New U.S. corporate bond issues sold abroad increased to \$23.2 billion from \$21.2 billion, reflecting foreign investors' strong demand for quality U.S. issues and U.S. corporate borrowers' continued attraction to the

low cost of long-term debt. Net foreign purchases of other outstanding U.S. corporate bonds increased to \$36.8 billion from \$22.2 billion.

Net foreign purchases of U.S. stocks decreased to \$11.4 billion from \$25.0 billion. (There were no large merger-related exchanges of stocks in the second quarter, compared with \$6.6 billion of these exchanges in the first.) U.S. stock prices fell sharply, partly as a result of indications that U.S. economic activity was expanding more modestly than previously expected and of a decline in investors' confidence about the quality of U.S. corporate earnings. In the first half of the quarter, heightened political tensions in the Middle East weakened investor confidence, contributing to a sharp

sell-off in the U.S. stock market. Later, the market tumbled because of a series of earnings restatement announcements and of renewed concerns over corporate accounting and governance issues that partly arose from the bankruptcy of a prominent U.S. telecommunications company. From the end of the first quarter to the end of the second quarter, the S&P 500 index dropped 14 percent; the DJIA, 11 percent; and the NASDAQ, 21 percent.

The decrease in net foreign purchases of U.S. stocks was more than accounted for by a shift to net sales by Western Europe from net purchases. It was the first quarter in 7 years that Western Europe had net sales of U.S. stocks. In contrast, net purchases by Japan increased substantially.

U.S. currency flows. Net U.S. currency shipments to foreigners were \$7.2 billion in the second quarter, up from \$4.5 billion in the first. Shipments to Argentina increased as the value of the peso continued to decline because of the country's financial and economic problems.

Direct investment. Net financial inflows for foreign direct investment in the United States were \$1.0 billion in the second quarter, down from \$16.2 billion in the first. The sharp decrease was more than accounted for by a shift in intercompany debt to record net outflows of \$12.7 billion from net inflows of \$10.6 billion. Net equity capital inflows decreased from \$11.0 billion to \$8.6 billion, the lowest level since the second quarter of 1995. The decrease in net equity capital inflows reflected the continued weakness in cross-border merger and acquisition activity. In contrast, reinvested earnings shifted to a positive \$5.1 billion from a negative \$5.3 billion.

Tables 1–10 follow.

Data Availability

Interactive access to the estimates that are presented in tables 1–10a of the U.S. international transactions accounts is available on BEA's Web site at <www.bea.gov>. You may view the most recent quarterly estimates (annual estimates for table 10a) for an entire table with a single mouse click, or you may select the period, frequency, and line items that you wish to view. The estimates are available as an HTML table or as comma-separated values that can be downloaded and imported into a spreadsheet or database.

The current and historical estimates in tables 1–10a are also available as compressed files on BEA's Web site; click on "Catalog of Products," and look under "International Accounts Products," "Balance of Payments."

The estimates are also available on diskettes. For more information, call BEA's Order Desk at 1–800–704–0415 (outside the United States, call 202–606–9666).

Footnotes to U.S. International Transactions Tables 1–10

General notes for all tables: ^p Preliminary, ^r Revised, ^d Less than \$500,000 (+/-)^d Suppressed to avoid disclosure of data of individual companies.

Table 1:
1. Credits, +; Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

Debits, -; Imports of goods and services and income payments; unilateral current transfers to foreigners; capital account transactions payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2.

3. Includes some goods: Mainly military equipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. At the present time, all U.S. Treasury-owned gold is held in the United States.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

13. Conceptually, line 76 is equal to "net foreign investment" in the national income and product accounts (NIPAs). However, the foreign transactions account in the NIPAs (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 in appendix A in this issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPA tables in the August issue of the SURVEY.

Additional footnotes for historical data in July issues of the SURVEY:

14. For 1974, includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions," June 1974 SURVEY, p. 27.

15. For 1978–83, includes foreign currency-denominated notes sold to private residents abroad.

16. Break in series. See Technical Notes in the June 1989–90, 1992–95, and July 1996–2001 issues of the SURVEY.

Table 2:
1. Exports, Census basis, represent transactions values, f.a.s. U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 SURVEY), except for 1974–81, when they represent transactions values, f.a.s. foreign port of exportation (see July issues of the SURVEY for historical data).

From 1983 forward, both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" and "revised statistical" monthly data supplied by the Census Bureau (see Technical Notes in the December 1985 SURVEY).

Seasonally adjusted data reflect the application of seasonal factors developed jointly by Census and BEA. The seasonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see technical notes in the June 1980 SURVEY, in the June 1988 SURVEY, and in the June 1991 SURVEY). Prior to 1983, annual data are as published by the Census Bureau, except that for 1975–80 published Census data are adjusted to include trade between the U.S. Virgin Islands and foreign countries.

2. Adjustments in lines A5 and A13, B12, B48, and B84 reflect the Census Bureau's reconciliation of discrepancies between the goods statistics published by the United States and the counterpart statistics published in Canada. These adjustments are distributed to the affected end-use categories in section C. Beginning in 1986, estimates for undocumented exports to Canada, the largest item in the U.S.-Canadian reconciliation, are included in Census basis data shown in line A1.

3. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from Customs declarations. The exports are included in tables 1 and 10, line 5 (transfers under U.S. military agency sales contracts); the imports are included in tables 1 and 10, line 22 (direct defense expenditures).

4. Addition of electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and alterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area. Also includes deduction of exports to the Panama Canal Zone before October 1, 1979, and for 1975–82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see July issues of the SURVEY for historical data).

5. Coverage adjustments for special situations in which shipments were omitted from Census data; the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair; and the adjustment of software imports to market value. Also includes addition of understatement of inland freight in f.a.s. values of U.S. imports of goods from Canada in 1974–81; deduction of imports from the Panama Canal Zone before October 1, 1979; and for 1975–82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see July issues of the SURVEY for historical data).

6. For 1988–89, correction for the understatement of crude petroleum imports from Canada.

7. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 3 and 20. Trade with international organizations includes purchases of nonmonetary gold from the International Monetary Fund, transfers of tin to the International Tin Council (ITC), and sales of satellites to Intelsat. The memoranda are defined as follows: *Industrial countries:* Western Europe, Canada, Japan, Australia, New Zealand, and South Africa; *Members of OPEC:* Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, and Gabon (Excludes Ecuador beginning in January 1993 and Gabon beginning in January 1995.); *Other countries:* Eastern Europe, Latin America and Other Western Hemisphere, and other countries in Asia and Africa, less OPEC. Before 1984, complete geographic area detail was not available for some balance of payments adjustments. Therefore, the detail shown does not always sum to the values shown for the area aggregates. For all years, "Asia" and "Africa" exclude certain Pacific Islands and unidentified countries included in "Other countries in Asia and Africa."

8. Includes the former German Democratic Republic (East Germany) beginning in fourth quarter of 1990. In earlier periods, the German Democratic Republic was included in Eastern Europe.

9. Beginning in 1986, New Zealand and South Africa are included in "Other countries in Asia and Africa," with New Zealand included as part of "Asia" and South Africa as part of "Africa."

10. The "Euro area," which formed in January 1999, includes Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, and from January 2001, Greece.

Table 3:
1. Includes royalties, license fees, and other fees associated with the use of intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.
2. Includes royalties, license fees, and other fees associated with the use of copyrights, trademarks, franchises, rights to broadcast live events, software licensing fees, and other intangible property rights.
3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States and film and television tape rentals. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.

Table 4:
1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93–199, section 4, and subsequently authorized (for many recipients) under similar legislation—are included in line A4. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A4 items, part of these military expenditures is applied in lines A43 and A46 to reduce short-term assets previously recorded in lines A41 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A4 expenditures finances future deliveries under military sales contracts for the recipient countries and is applied directly to lines A42 and C9. A third part of line A4, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A37. A fourth part of line A4, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A48.

2. Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are not included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.

3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency.

4. Line A38 includes foreign currency collected as interest and line A43 includes foreign currency collected as principal, as recorded in lines A16 and A17, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry for the part of line C10 that was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

Table 5:
1. Beginning with 1991, payments and receipts of interest related to interest rate and foreign currency swaps between affiliates and parents are netted and are shown as either net payments or net receipts. Receipts and payments of other types of interest are shown on a gross basis.

2. Petroleum includes, and manufacturing and "other" industries exclude, the exploration, development, and production of crude oil and gas, and the transportation, refining, and marketing of petroleum products, exclusive of petrochemicals. "Other" industries includes wholesale trade; banking; finance (except banking), insurance, and real estate; services; and other industries—agriculture, forestry, and fishing; mining construction; transportation, communication, and public utilities; and retail trade.

3. Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany debt, and other equity contributions.

4. Sales (total and partial), liquidations, returns of capital contributions, and other dispositions of equity holdings.

Table 6:
1. Primarily provincial, regional, and municipal.
2. Largely transactions by International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).

3. Estimate for scheduled redemptions and identifiable early redemptions. Includes estimates based on Canadian statistics for redemptions of Canadian issues held in the United States. Unidentified and nonscheduled retirements appear in line A30.

Table 7:
1. Estimates of transactions other than those with U.S. banks' Caribbean branches and with financial intermediaries (F.I.s) are not available. Preliminary estimates of transactions with F.I.s, by area, are commingled in "other" to avoid disclosure of individual companies' area data.

2. Deposits (line A5) include other financial claims (line A7) for some countries due to the commingling of these categories in foreign source data.

3. Primarily mortgages, loans, and bills and notes drawn on foreigners.

4. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

5. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

6. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning in January 1993.

Table 8:
1. Includes central governments and their agencies and corporations; state, provincial, and local governments and their agencies and corporations; and international and regional organizations.

2. U.S.-owned banks are mainly U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companies. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States. Brokers and dealers are identified separately beginning with the first quarter of 1997; prior to 1997, they are commingled with U.S.-owned banks' accounts.

3. Commercial paper issued in the U.S. market by foreign incorporated entities; excludes commercial paper issued through foreign direct investment affiliates in the United States.

4. Negotiable and readily transferable instruments other than commercial paper, payable in dollars; consists largely of negotiable certificates of deposit.

5. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

6. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

7. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning in January 1993.

8. Includes Eastern Europe and international and regional organizations.

9. Estimates first available for the second quarter of 2001.

Table 9:
1. Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities and are separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.

2. Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other than deposits.

3. Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.

4. Mainly International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (IDB), and the Trust Fund of the International Monetary Fund.

5. U.S.-owned banks are mainly U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companies. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States. Brokers and dealers are identified separately beginning with the first quarter of 1997; prior to 1997, they are commingled with U.S.-owned banks' accounts.

6. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

7. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

8. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning in January 1993.

9. Includes Eastern Europe and international and regional organizations.

10. Estimates first available for the second quarter of 2001.

Table 10: For footnotes 1–13, see table 1.

14. The "European Union" includes the "European Union (6)," United Kingdom (6), Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

15. The "European Union (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; before 1996, small transactions in business services that are not reported by country; and net U.S. currency flows, for which geographic source data are not available.

17. Details are not shown separately; see totals in lines 56 and 63.

18. Details not shown separately are included in line 69.

U.S. International Services

Cross-Border Trade in 2001 and Sales Through Affiliates in 2000

By Maria Borga and Michael Mann

IN 2001, U.S. exports of private services exceeded U.S. imports of private services; U.S. exports were \$266.2 billion, and U.S. imports were \$192.3 billion (table A). U.S. sales of services sold through majority-owned affiliates of multinational companies exceeded

U.S. purchases in 2000—the most recent year for which data are available. Sales of services abroad through foreign affiliates of U.S. companies were \$392.8 billion, and sales of services in the United States through U.S. affiliates of foreign companies were \$346.7 billion.

Table A. Sales of Services to Foreign and U.S. Markets Through Cross-Border Trade and Through Affiliates

	Through cross-border trade ¹		Through nonbank majority-owned affiliates	
	U.S. exports (receipts)	U.S. imports (payments)	Sales to foreign persons by foreign affiliates of U.S. companies ²	Sales to U.S. persons by U.S. affiliates of foreign companies

n.a. Not available.

1. The estimates for 1998–2000 are revised from those published in last year's article in this series. See Christopher L. Bach, "Annual Revision of the U.S. International Accounts, 1993–2001," *SURVEY OF CURRENT BUSINESS* 82 (July 2002): 33–40.

2. The figures shown in this column for 1986–88 have been adjusted, for the purposes of this article, to be consistent with those for 1989 forward, which reflect definitional and methodological improvements made in the 1989 Benchmark Survey of U.S. Direct Investment Abroad. The primary improvement was that investment income of affiliates in finance and insurance was excluded from sales of services. The adjustment was made by assuming that investment income of finance and insurance affiliates in 1986–88 accounted for the same share of sales of services plus investment income as in 1989.

3. Beginning in 1997, sales by U.S. affiliates were classified as goods or services based on industry codes derived from the North American Industry Classification System; the estimates for prior years were based on codes derived from the 1987 Standard Industrial Classification System. This change resulted in a redefinition of sales of services by affiliates, which resulted in a net shift of sales from goods to services. See the box "Changes in the Definition and Classification of Sales of Services by U.S. Affiliates" in the October 1999 Survey, page 61, available at www.bea.gov.

4. Beginning in 1999, sales by foreign affiliates were classified as goods or services based on industry codes derived from the North American Industry Classification System; the estimates for prior years were based on codes derived from the 1987 Standard Industrial Classification System. This change resulted in a redefinition of sales of services by affiliates, which resulted in a net shift of sales from goods to services. See the box "Changes in the Definition and Classification of Sales of Services by Foreign Affiliates" in the November 2001 Survey, page 58, available at www.bea.gov.

U.S. exports of private services fell 4 percent in 2001 after increasing 8 percent in 2000. U.S. imports fell 5 percent after increasing 17 percent. These were the first decreases in exports and imports of private services after decades of growth. In dollar terms, exports decreased more than imports; as a result, the U.S. surplus on trade in private services decreased, to \$73.9 billion in 2001 from \$75.4 billion in 2000. (In trade in goods, however, imports decreased more than exports; as a result, the U.S. deficit on trade in goods fell, to \$427.2 billion from \$452.4 billion.)

The fall in services exports reflected the slowing economic growth in many major U.S. trading partners and the terrorist attacks of September 11th. Exports held steady in the first half of 2001 and then fell sharply in the second half of the year, especially after September 11th. Travel services were particularly hard hit, as foreigners sharply reduced travel to the United States in the wake of the attacks.

Much of the fall in services imports was attributable to slow economic growth in the United States and to the terrorist attacks. The decrease in imports, like that in exports, was concentrated in the second half of the year. Imports of both travel services and insurance services dropped because of the attacks. The drop in insurance services resulted from large losses recovered from foreign reinsurers; imports of insurance services are measured as premiums paid less losses recovered.

In 2000, sales of services by foreign affiliates of U.S. companies grew 11 percent, and those by U.S. affiliates of foreign companies grew 18 percent. Economic conditions in 2000, unlike those in 2001, were characterized by strong economic growth in the United States and in many of the countries that are important markets for foreign affiliates of U.S. multinational compa-

Michael Mann prepared the section on cross-border trade. Maria Borga prepared the section on sales through affiliates.

nies. In addition, a continued boom in cross-border merger and acquisition activity boosted the growth in sales of services by both foreign and U.S. affiliates by adding a substantial number of affiliates to the direct investment universe; moreover, much of the acquisition activity occurred in industries with substantial sales of services, including utilities, insurance, finance, and computer services. However, the effect of the cross-border mergers on sales through foreign affiliates was mixed because several large affiliates were sold off to foreign firms and so their sales were no longer included in sales of services abroad by foreign affiliates of U.S. companies.

This article presents detailed preliminary estimates of U.S. cross-border exports and imports of private services in 2001 and revised estimates for 1998–2000, and it presents preliminary estimates of U.S. sales of services through, and purchases of services from, nonbank majority-owned affiliates of multinational companies in 2000 and revised estimates for 1999. Cross-border exports and imports are transactions between

U.S. residents and foreign residents; they represent international trade in the conventional sense and are recorded, in summary form, in the U.S. international transactions accounts.¹ Sales of services through nonbank majority-owned affiliates of multinational companies represent services sold in international markets through the channel of direct investment (see the box “Channels of Delivery of Services Sold in International Markets”).² The estimates are drawn from larger data sets on affiliate operations that are presented in annual articles on the operations of U.S. multinational com-

1. In the quarterly articles on the U.S. international transactions, table 1 presents cross-border exports of private services in lines 6–10 and cross-border imports in lines 23–27; table 3 provides additional detail.

2. These data cover *all* the sales of services by nonbank majority-owned affiliates, irrespective of the percentage of foreign ownership. The data are limited to nonbank affiliates because bank affiliates are not required to report sales of services data to BEA. The data exclude minority-owned affiliates because data on sales of services by foreign affiliates are collected only for affiliates that are majority-owned by U.S. direct investors. Excluding minority-owned affiliates may be preferable because the direct investor may own as little as 10 percent of a minority-owned affiliate and thus have less interest than local investors in the affiliate’s sales.

Channels of Delivery of Services Sold in International Markets Cross-Border Trade and Sales Through Affiliates

Services are sold in international markets through two distinct channels. In the first channel, the residents of one country sell services to the residents of another country. These transactions—cross-border trade—include both trade within multinational companies (intrafirm trade) and trade between unaffiliated parties.¹ They are recorded in the international transactions accounts of both countries—as exports of services by the seller’s country and as imports by the buyer’s country.

The second channel of delivery is sales through foreign affiliates of multinational companies, which from the U.S. viewpoint, are sales to foreigners by foreign affiliates of U.S. companies and U.S. purchases from other countries’ U.S. affiliates. These sales are not considered U.S. international transactions, because under the residency principle of balance-of-payments accounting, affiliates of multinational companies are regarded as residents of the countries where they are located rather than of the countries of their owners. Thus, sales abroad by foreign affiliates are transactions between foreign residents, and sales in the United States by U.S. affiliates are transactions between U.S. residents. (However, the direct investors’ shares of the profits earned on these sales are recorded as

U.S. international transactions.)

The two channels of delivery typically differ in their effects on an economy. For example, U.S. cross-border exports usually have a greater effect on the U.S. economy than the equivalent sales through foreign affiliates, because most, or all, of the income generated by the production generally accrues to U.S.-supplied labor and capital. In contrast, for sales through foreign affiliates, only the U.S. parent company’s share in profits accrues to the United States (and is recorded as a U.S. international transaction); the other income generated by production—including compensation of employees—typically accrues to foreigners.

Some services can be delivered equally well through either channel, but the channel of delivery is often largely predetermined by the nature of the service. For example, many travel services are inherently delivered through the cross-border channel; in contrast, many business, professional, and technical services are mainly delivered through the affiliate channel because of the need for close, continuing contact between the service providers and their customers.

To obtain a complete picture of the services transactions of affiliates, it would be necessary to examine not only their sales of services, as in this article, but also their purchases of services, both in their countries of location and elsewhere. However, the only available data on their purchases of services are those for transactions between parents and affiliates, which are discussed in the section on cross-border trade.

1. The term “cross-border trade” differs from the term “cross-border mode of supply” that is used in the General Agreement on Trade in Services to refer to the provision of a service by a resident of one country to a resident of another country in which neither the producer nor the consumer goes to the country of the other (for example, a consultant sending a report electronically or by mail).

panies and of U.S. affiliates of foreign companies.³

In 2000, services delivered through nonbank major-ity-owned affiliates again exceeded those delivered through cross-border trade (chart 1). Because of differences in measurement and coverage, comparisons between these two channels of delivery cannot be precise, but the substantial differences in 2000 clearly indicate that delivery through affiliates was the larger channel for both U.S. sales and U.S. purchases of pri-

vate services.⁴

The use of each channel of delivery for 2000 is shown for major geographic areas in chart 2 and for

3. See Raymond J. Mataloni, Jr., "Operations of U.S. Multinational Companies: Preliminary Results from the 1999 Benchmark Survey," *SURVEY OF CURRENT BUSINESS* 82 (March 2002): 24–54, and William J. Zeile, "U.S. Affiliates of Foreign Companies: Operations in 2000," *SURVEY* 82 (August 2002): 149–166.

4. An example of a difference in measurement is that cross-border exports and imports of insurance services are measured as premiums minus claims, while sales of services by affiliates in insurance largely reflect premium income with no deductions for claims; this difference tends to exaggerate the relative importance of sales through affiliates. An example of a difference in coverage is that the estimates of cross-border exports and imports include services provided by banks, while those of sales through affiliates cover only nonbank affiliates. BEA has begun implementing changes to the measurement and coverage of selected services to improve the comparability of the two series. (See Obie G. Whichard and Maria Borga, "Selected Issues in the Measurement of U.S. International Services," *SURVEY* 82 (June 2002): 36–56.)

selected countries in chart 3. For specific types of services, however, the relative importance of the two channels is difficult to gauge because of the differences in measurement and coverage and because of differences in the basis of classification. Available data on cross-border trade are generally classified by type of service, whereas the data on sales of services through affiliates are classified by primary industry of the affiliate.

U.S. Cross-Border Trade in 2001

In 2001, U.S. exports of private services (receipts) decreased 4 percent, to \$266.2 billion, following an 8-percent increase in 2000. U.S. imports of private services (payments) decreased 5 percent, to \$192.3 billion, following a 17-percent increase in 2000. The

	Percent change from prior year			
	Exports		Imports	
	2000	2001	2000	2001
Private services	8	-4	17	-5
Travel	10	-11	10	-7
Passenger fares	5	-13	14	-8
Other transportation	12	-6	22	-7
Royalties and license fees	7	-2	28	2
Other private services	7	3	19	-1

decreases in exports and imports of private services were primarily attributable to decelerating economic growth and the effects of the attacks of September 11th (see the box “Effects of the Terrorist Attacks of September 11th on Cross-Border Trade in Services” on page 73).

Changes in the foreign-currency value of the dollar may also have affected U.S. cross-border services trade, but the effect cannot be precisely measured because it cannot be clearly distinguished from those of other variables that affected U.S. trade flows. The dollar appreciated steadily against the currencies of most of the major trading partners throughout 2000 and in the first half of 2001, and it remained at a high level in the second half of 2001. For the year, the dollar appreciated 3 percent against the euro, 13 percent against the yen, 4 percent against the Canadian dollar, and 5 percent against the pound.⁵

After decades of steady growth, the falloff in services exports in 2001 was an extraordinary development. All the major categories of services except “other private services,” which was bolstered by sharp increases in affiliated receipts, fell. The steepest fall was in travel services, as foreigners sharply curtailed their visits to the United States.

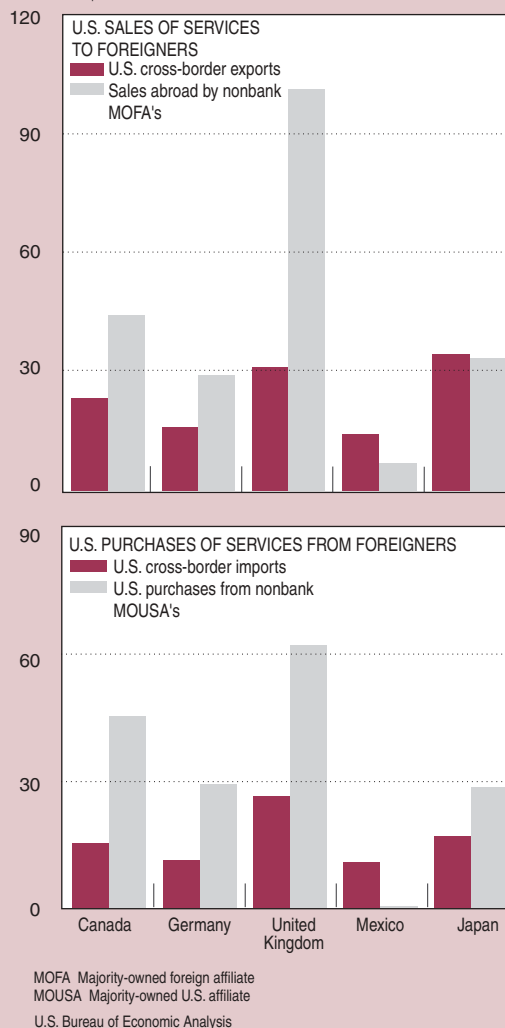

The falloff in exports was concentrated in the sec-

CHART 3

U.S. Sales and Purchases of Services by Major Country in 2000

Billion \$

ond half of 2001. In the first half of the year, exports remained virtually unchanged from their average level during 2000; in the second half, they fell 8 percent from the same period in 2000, as the effects of the September 11th attacks compounded the effects of weak economic activity abroad.

The drop in imports of private services in 2001 represented a dramatic turnaround from the 17-percent increase in 2000, the fastest growth in more than 20 years.⁶ The turnaround was partly due to a sharp slow-

6. The increase from 1983–84 was larger than that in 1999–2000. However, the 1983–84 increase was largely attributable to a break in the series that resulted from BEA's introduction of an improved method for measuring travel services.

down in U.S. economic growth, from 3.8 percent in 2000 to 0.3 percent in 2001, but the September 11th attacks also contributed significantly. In addition, special factors that contributed to the increase in 2000 were absent in 2001; in particular, imports in 2000 were boosted by a recovery in insurance services. The drop in imports was more than accounted for by decreases in travel-related services (expenditures by U.S. residents abroad and their payments to foreign airlines for international travel) and in insurance services.

The drop in imports was also concentrated in the second half of 2001. In the first half of the year, imports increased 8 percent from the same period in 2000; in the second half, they decreased 17 percent from the same period in 2000.

Europe and Asia and Pacific together accounted for more than two-thirds of total U.S. cross-border exports and imports of private services in 2001 (chart 4). Three countries—the United Kingdom, Japan, and Canada—accounted for nearly a third of both total U.S. exports and total U.S. imports of services (table B).

Of total cross-border trade in services, trade within multinational companies accounted for \$62.3 billion, or 23 percent, of exports of private services and for \$41.5 billion, or 22 percent, of imports of private services. Table C provides updated estimates of cross-border trade in services, by type, between U.S. parents and

their foreign affiliates and between U.S. affiliates and

CHART 4

U.S. Cross-Border Services Transactions: Share by Area in 2001

Types of Cross-Border Services: Coverage and Definitions

The estimates of cross-border transactions cover both affiliated and unaffiliated transactions between U.S. residents and foreign residents. Affiliated transactions consist of intrafirm trade within multinational companies—specifically, the trade between U.S. parent companies and their foreign affiliates and between U.S. affiliates and their foreign parent groups. Unaffiliated transactions are with foreigners that neither own, nor are owned by, the U.S. party to the transaction.

Cross-border trade in private services is classified into the same five, broad categories that are used in the U.S. international transactions accounts—travel, passenger fares, “other transportation,” royalties and license fees, and “other private services.”

Travel. The travel accounts cover purchases of goods and services by U.S. persons traveling abroad and by foreign travelers in the United States for business or personal reasons. These goods and services include food, lodging, recreation, gifts, entertainment, and other items incidental to a foreign visit. Expenditures for local transportation in the country of travel are also covered. U.S. travel transactions with both Canada and Mexico include border transactions, such as day trips for shopping and sightseeing.

A “traveler” is a person who stays less than a year in a country and is not a resident of that country. Students’ educational expenditures and living expenses and medical patients’ expenditures are included in “other private services.”

Passenger fares. The passenger fare accounts cover fares paid by residents of one country to airline and vessel operators (carriers) that reside in another country. Receipts consist of fares received by U.S. air carriers from foreign residents for travel between the United States and foreign countries and between two foreign points and by U.S. vessel operators for travel on U.S. cruise vessels. Payments consist of fares paid by U.S. residents to foreign air carriers for travel between the United States and foreign countries and to foreign vessel operators for travel on foreign cruise vessels.

“Other transportation.” The “other transportation” accounts cover U.S. international transactions arising from the transportation of goods by ocean, air, land (truck and rail), pipeline, and inland waterway carriers to and from the United States, and between two foreign points. The accounts cover freight charges for transporting exports and imports and operating expenses that transportation companies incur in U.S. and foreign ports. Freight charges cover the receipts of U.S. carriers for transporting U.S. goods exports and for transporting goods between two foreign points and the payments to foreign carriers for transporting U.S. goods imports (freight insurance on exports and imports is covered in the “other private services” accounts).

Port services receipts consist of the value of the goods and services purchased by foreign carriers in U.S. ports. Port services payments consist of the value of goods and services purchased by U.S. carriers in foreign ports.

Royalties and license fees. The royalties and license fees

accounts cover transactions with nonresidents that involve patented and unpatented techniques, processes, formulas, and other intangible proprietary rights used in the production of goods; transactions involving trademarks, copyrights, franchises, broadcast rights, and other intangible rights; and the rights to distribute, use, and reproduce general-use computer software.

“Other private services.” These accounts consist of other affiliated and unaffiliated services. The unaffiliated services consist of six major categories: Education; financial services; insurance; telecommunications; business, professional, and technical services; and “other unaffiliated services.”

Education receipts consist of expenditures for tuition and living expenses by foreign students enrolled in U.S. colleges and universities. Payments consist of tuition and living expenses of U.S. students for study abroad.

Financial services cover a variety of services that include funds management, credit card services, explicit fees and commissions on transactions in securities, fees on credit-related activities, and other miscellaneous financial services. Implicit fees paid and received on bond trading are also covered.

Insurance consists of premiums earned and paid for primary insurance and for reinsurance; losses paid by U.S. insurers and losses recovered from foreign insurers are netted against the premiums. Primary insurance mainly consists of life insurance and property and casualty insurance. Each type of primary insurance may be reinsured; reinsurance is the ceding of a portion of a premium to another insurer who then assumes a corresponding portion of the risk.

Telecommunications consists of receipts and payments between U.S. and foreign communications companies for the transmission of messages between the United States and other countries; channel leasing; telex, telegram, and other jointly provided basic services; value-added services, such as electronic mail, video conferencing, and online access services (including Internet backbone services, router services, and broadband access services); and telecommunications support services.

Business, professional, and technical services cover a wide variety of services, such as legal services, accounting services, and advertising services (see the list in table 1).

“Other unaffiliated services” receipts consist mainly of expenditures (other than employee compensation) by foreign governments in the United States for services such as maintaining their embassies and consulates; non-compensation-related expenditures by international organizations—such as the United Nations, the International Monetary Fund, and the World Bank—that are headquartered in the United States; expenditures of foreign residents employed temporarily in the United States; and receipts from unaffiliated foreigners for the display, reproduction, or distribution of U.S. motion picture and television films and tapes. Payments consist primarily of payments by U.S. film distributors to unaffiliated foreign residents for the display, reproduction, or distribution of motion picture and television films and tapes.

their foreign parent groups for 1997–2001.⁷ The estimates are grouped into three major categories—transportation, royalties and license fees, and “other private services”—that correspond to the major services categories in table 1 of which they are a part.⁸

Additional information about the five broad categories of cross-border trade in private services in the U.S. international transactions accounts—travel, passenger fares, other transportation, royalties and license fees, and other private services—follows (for detailed esti-

7. The foreign parent group is defined as (1) the foreign parent, (2) any foreign person, proceeding up the foreign parent’s ownership chain, that owns more than 50 percent of the person below it, up to and including the ultimate beneficial owner, and (3) any foreign person, proceeding down the ownership chain(s) of each of these members, that is owned more than 50 percent by the person above it.

8. Intrafirm trade is not applicable to travel or to passenger fares, the two major private services categories not shown in table C. In addition, certain other services are uniformly recorded as unaffiliated services transactions, even if they are between affiliated parties (see table C, footnote 3).

mates, see the tables at the end of the article).

Travel

Travel receipts decreased 11 percent in 2001, to \$73.1 billion, following a 10-percent increase in 2000. The turnaround was primarily attributable to weakening economic conditions abroad and the effects of the attacks of September 11th. Receipts may also have been dampened by the strong value of the U.S. dollar. Travel activity, which had been flat during the first 8 months of 2001, fell precipitously in the aftermath of the attacks. Although travel steadily recovered during the fourth quarter, receipts at yearend were still well below pre-September 11th levels. For the year, travel receipts from overseas countries (countries other than Canada and Mexico) decreased 12 percent; the number of foreign visitors from overseas decreased 14 percent, and their average expenditures increased 2 percent.

Effects of the Terrorist Attacks of September 11th on Cross-Border Trade in Services

The estimates of exports and imports of services in 2001 include the effects of the September 11th terrorist attacks. The effects of the attacks are embedded in the data collected on BEA surveys and in other source data, so they cannot be separately identified. However, BEA analyzed the accounts for general movements that could be attributed to the September 11th attacks and found such movements in trade in travel, air transportation, financial services, and insurance.

Decreases in travel were mostly attributable to a sharp drop in the number of international travelers after September 11th. Immediately after the attacks, the U.S. air transport system was shut down, and then it was reopened with only limited service and far fewer travelers. In addition, land travel between the United States and Canada and Mexico slowed sharply for a short period, largely as a result of tightened U.S. border restrictions and general concerns about traveling. By the end of 2001, overseas travel by U.S. and foreign residents picked up, but it did not recover to pre-September 11th levels. Large decreases in passenger fare exports and imports were also attributable to the sharp drop in the number of international travelers; by the end of the year, fares had not returned to pre-September-11th levels. The effects of the attacks on travel and passenger fares are largely captured in the monthly source data from the U.S. Immigration and Naturalization Service on the number of foreign visitors to the United States and the number of U.S. travelers abroad. BEA’s estimates of travel to and from Canada and Mexico are based on estimates prepared by statistical agencies in these countries.

Decreases in port services reflected the drop in international air travel after September 11th that reduced foreign air carriers’ expenditures in U.S. airports and U.S. air carriers’ expenditures in foreign airports through the end of

the year. In contrast, the air freight industry was little affected, even though flights to and from the United States were suspended for a short period, because the backlog of freight was rapidly eliminated. The effects of the attacks on air port services are largely captured in data that BEA collects from the airlines on quarterly surveys.

Decreases in financial services were the result of temporary declines in underwriting and brokerage services. Foreign stocks and bonds issued in the United States and U.S. stocks and bonds issued overseas decreased sharply in the aftermath of the attacks, but they recovered quickly; these short-term effects are reflected in the monthly source data from the Federal Reserve Bank of New York.

Decreases in insurance services imports were largely attributable to a sharp increase in losses recovered from foreign reinsurers. (Imports of insurance services are calculated as premiums paid less losses recovered.) As a result of the September 11th attacks, nearly \$12 billion in losses were recovered from reinsurance companies abroad, primarily from reinsurers in Germany, the United Kingdom, Bermuda, Switzerland, and France. These losses were recorded on an accrual basis at the time the insured event—the terrorist attacks—occurred. The source data on insurance losses recovered are collected on an annual BEA survey that provides only total losses for the year, not the losses recovered by cause or event. Therefore, BEA estimated the losses attributable to the attacks and recorded these losses in September; the allocation was based on reports from numerous foreign and domestic insurance companies and trade associations. Reinsurance premiums had been increasing before September 11th, and in the new risk environment, they accelerated.

Among the countries with the largest decreases in travel to the United States, Argentina, Japan, and Germany had especially weak economies in 2001. Receipts from Mexico, however, increased 3 percent in 2001, though its economy faltered. Nearly two-thirds of the travel receipts from Mexico represent visits in the border area, which are typically day trips; this type of travel strongly depends on the availability of goods and on the value of the peso relative to the U.S. dollar. In 2001, the peso appreciated slightly against the U.S. dollar, so U.S. goods continued to be attractive to Mexican consumers. Moreover, border travel was less affected by the terrorist attacks than was travel to the interior of the United States, which typically involves air travel.

Travel payments decreased 7 percent in 2001, to \$60.1 billion, following a 10-percent increase in 2000. Travel payments overseas decreased 9 percent. The number of U.S. travelers overseas decreased 7 percent, and their average expenditures decreased 2 percent.

U.S. travel overseas was strong during the first 5 months of the year, but it weakened in June, July, and August. The strength in the early part of the year may have reflected the lagged effects of the U.S. economic growth in 2000 and the favorable purchasing power of the U.S. dollar in several popular countries of destination. Like travel receipts, travel payments plummeted in the aftermath of September 11th. Although travel steadily recovered during the fourth quarter, payments at yearend were still well below pre-September 11th levels.

Travel payments to almost all overseas countries decreased, but travel payments to both Canada and Mexico increased slightly in 2001. Overland travel, a significant portion of travel to these countries, was less affected by the attacks than air travel, which is the primary transport mode to overseas destinations. U.S. travel to Canada was also spurred by the 4-percent appreciation of the U.S. dollar against the Canadian dollar. The increase in payments to Mexico was attributable to a 2-percent increase in travel to the interior of the country. Payments by U.S. travelers to the Mexican border area were virtually unchanged.

Passenger fares

Passenger fare receipts decreased 13 percent in 2001, to \$18.0 billion, following a 5-percent increase in 2000. The sharp decrease was caused by the same factors that affected travel and by a continued increase in the share of foreigners traveling on foreign airlines rather than on U.S. airlines. Lower airfares put in place after September 11th failed to lure back enough travelers to prevent the fall in revenue.

Passenger fare payments decreased 8 percent, to \$22.4 billion, following a 14-percent increase. The decrease was almost entirely accounted for by a falloff in payments for travel to Europe. The share of U.S. residents traveling on foreign airlines rather than on U.S. airlines was little changed, even after September 11th.

Other transportation

Receipts for "other transportation" services decreased 6 percent in 2001, to \$28.3 billion, following a 12-percent increase in 2000. The increase in 2000, the largest in more than 10 years, resulted from increases in freight receipts that reflected strong economic growth in many of the countries that are important destinations for U.S. goods exports and from increases in port services receipts that reflected strong economic growth in the United States. Higher revenues from bunker and jet fuel sales also contributed to the increase.

In 2001, freight receipts decreased as the slowdown in worldwide economic growth reduced the volume of goods transported by U.S.-operated ocean carriers. Ocean freight rates decreased, reflecting weak demand for goods, especially bulk items such as coal, iron ore, and grain. Air freight receipts also decreased, reflecting U.S. air carriers' lower revenues for transporting goods from the United States and between foreign points and a decrease in the surcharge that had been imposed in 2000 to help offset higher fuel prices. "Other freight" receipts decreased slightly. This decrease was more than accounted for by a falloff in receipts from Canada, which include receipts of U.S. firms for transporting goods by truck, rail, and pipeline.

Port services also decreased in 2001, mainly because of a falloff in the number of foreign visitors to the United States. This falloff, which was especially large following September 11th, reduced expenditures by foreign air carriers in U.S. airports for items such as aircraft handling and terminal expenses and for fuel. In addition, jet and bunker fuel prices fell sharply.

Transactions between affiliated parties accounted for \$0.2 billion, or less than 1 percent, of total U.S. receipts for "other transportation" services in 2001 (table C). Most of these receipts resulted from transactions between U.S. parent companies and their foreign affiliates.

Payments for "other transportation" services decreased 7 percent in 2001, to \$38.8 billion, following a 22-percent increase in 2000. The decrease is largely the result of slow economic growth in the United States, which reduced the demand for imports and thus lowered freight volumes and rates. The decrease in freight payments was widespread among geographic areas and

countries. The effects of the September 11th attacks also contributed to the decrease by reducing the number of U.S. air travelers abroad, which caused a sharp falloff in U.S. air carriers' expenditures in foreign ports.

Ocean freight payments fell, as decreases in payments to foreign-operated liner and tramp vessels more than offset a small increase in payments to operators of tanker vessels. Liner and tramp freight rates dropped sharply because of weak demand for goods and excess capacity in the shipping market. The increase in payments to tanker operators was largely due to the high volume of petroleum imports during the first half of the year, when tanker rates were at near-record highs. Air freight payments decreased, largely reflecting the decreased volume of imports transported

by foreign air carriers. "Other freight" payments decreased, as payments to Canadian carriers for transporting goods by truck in the United States fell.

Port services payments abroad also decreased, primarily reflecting a decrease in U.S. carriers' payments in foreign airports. Three factors contributed to this decrease: The falloff in the number of U.S. air travelers, decreases in the volume of both exports and imports of goods, and lower prices for jet fuel.

Transactions between affiliated parties accounted for \$0.1 billion, or less than 1 percent, of total U.S. payments for "other transportation" services in 2001. Most of these payments resulted from transactions between U.S. parent companies and their foreign affiliates.

2001	25.9	([*])	11.0	14.9	1.8	0.3	1.2	0.9	([*])	0.9	9.8

* Less than \$50 million.

1. Included under "other transportation" in table 1.

2. Equal to "affiliated royalties and license fees" in table 1.

3. Equal to "affiliated other private services" in table 1. Intrafirm trade in other private services excludes payments related to basic telecommunications services because they represent the distribution of revenues collected from unaffiliated customers. It also excludes intrafirm trade in insurance services, except primary

insurance (and the related recovery of losses) by U.S. companies from affiliated foreigners.

4. Prior to 2001, management and consulting services were included in "other" services. Beginning in 2001, data on management and consulting services were collected as a separate type of service.

5. Prior to 2001, research and development and testing services were included in "other" services. Beginning in 2001, data on research and development and testing services were collected as a separate type of service.

Royalties and license fees

Receipts of royalties and license fees decreased 2 percent in 2001, to \$38.7 billion, following a 7-percent increase in 2000. Affiliated royalty and license fee receipts decreased 4 percent, following a 1-percent increase; the decrease in 2001 was more than accounted for by U.S. parents' receipts from their foreign affiliates in the manufacturing industry, especially those in Europe. Unaffiliated royalty and license fee receipts were virtually unchanged.

Unaffiliated receipts from the rights to use and distribute software, the largest category of royalty and license fee receipts, reached nearly \$5 billion in 2001. Additional receipts from software licensing agreements stemmed from transactions through affiliated (intrafirm) channels, but the value of these receipts cannot be separately identified (for more information, see the box "Delivery of Computer Services to Foreign Markets").

Unaffiliated royalties and license fees receipts may have been dampened in recent years by the transfer of intellectual property (such as patents, trademarks, and copyrights) to foreign affiliates. Under this practice, the affiliate rather than the U.S. parent company collects the royalties and license fees on sales of the products associated with the intellectual property, and the portion of the total amount received that is transferred

by the affiliate to the parent, either as royalties and license fees or as income, is recorded in the international accounts as affiliated transactions rather than as unaffiliated royalties and license fees.⁹ A variety of considerations motivates these transactions. For example, the intellectual property may be transferred to affiliates in countries with low taxes in order to reduce overall taxes, or it may be transferred in order to facilitate its adaptation to local markets; for example, computer software sometimes must be adapted to the local language and to the locally available hardware and operating systems.

Payments of royalties and license fees increased 2 percent in 2001, to \$16.4 billion, following a 28-percent increase in 2000. These payments have more than tripled since 1993 and have been the fastest growing major category of services imports during this period. In 2001, an increase in payments by U.S. affiliates to their foreign parents more than offset a decrease in un-

9. The form and volume in which the royalty revenues of the foreign affiliate flow back to the U.S. parent company depend on the contractual arrangements governing the transfer. If the flows are in the form of royalties or license fees, it is recorded in affiliated royalties and license fees receipts. If they are in the form of income, it is recorded in direct investment income receipts. In both cases, the flows are still in the current account. Thus, these transfers may have reduced U.S. receipts of unaffiliated royalties and license fees, but the reduction may be offset by other receipts recorded elsewhere in the current account. In addition, these transfers may lead to increased sales through foreign affiliates.

Delivery of Computer Services to Foreign Markets

For computer-related services, as well as for many other types of services, the means of delivery may be further divided within the two major channels of cross-border trade and sales through affiliates. As a result, the total value of these services is scattered across several categories in the tables for cross-border trade and for sales by affiliates.

Cross-border exports to unaffiliated foreigners of "computer and data processing services" and "data base and other information services" are shown in table 1 under "business, professional, and technical services."¹ Computer-related services that are delivered to foreign markets through cross-border software-licensing agreements are shown under "Royalties and license fees."²

1. For detailed estimates of the exports of these services to numerous countries and areas, see table 7.

2. Receipts and payments for general use software that is packaged and physically shipped to or from the United States are included in trade in goods. The value of software that is preinstalled on computer equipment and peripherals is captured in the value of this hardware and thus also included in trade in goods.

Exports through agreements with unaffiliated foreigners are shown in table 4 in the column "general use software." Exports through agreements with affiliated foreigners (intrafirm trade) are included in affiliated royalty and license fee transactions in table 1, but their value cannot be separately identified. Intrafirm exports of computer and information services, which consists of computer and data processing services and of data base and other information services, are shown in table C.

Sales of computer-related services through foreign affiliates exceeded cross-border exports of these services in 2000, the most recent year for which comparable data are available, reflecting the advantages of a local presence when delivering these services to foreign customers (table 9). The available data on sales through affiliates are classified by primary industry of the affiliate rather than by type of service; thus, computer-related services may be sold not only through foreign-affiliates in the computer services industry but also by affiliates in several other industries, particularly machinery manufacturing and wholesale trade.

affiliated payments. The increase in payments by U.S. affiliates partly reflected the robust activity of affiliates in the motor-vehicle wholesaling and motor-vehicle manufacturing industries. The decrease in unaffiliated transactions was attributable to the absence of two special factors that had increased payments in 2000. First, a jump in payments for the broadcasting and recording of live events reflected payments to the International Olympic Committee for broadcast rights to the Summer Olympic Games; second, a jump in payments for the use of trademarks was largely due to a surge in payments for the rights to sell children's toys in the United States (table 4.3). Excluding these two factors, unaffiliated transactions would have been little changed in 2001.

Other private services

Receipts for "other private services" increased 3 percent in 2001, to \$108.1 billion, following a 7-percent increase in 2000. Increases in services delivered to foreign markets through affiliated channels, in business, professional, and technical services, and in education more than offset decreases in insurance services and in financial services. Telecommunications receipts were little changed.

Payments for "other private services" decreased 1 percent in 2001, to \$54.6 billion, following a 19-percent increase in 2000. Decreases in insurance, in telecommunications, and in financial services more than offset increases in services delivered to U.S. markets through affiliated channels, in business, professional, and technical services, and in education.

Unaffiliated transactions. Unaffiliated cross-border trade in "other private services" consists of five principal categories—education; financial services; insurance; telecommunications; and business, professional, and technical services. (For detailed estimates, see the tables at the end of the article.)

Receipts for education increased 11 percent in 2001, to \$11.5 billion, following an 8-percent increase in 2000. The number of foreign students studying in the United States increased 6.4 percent, the largest percentage increase since 1980, to nearly 550,000. More than half were undergraduate students, and more than half were from Asian countries. The number of students from nearly every area of the world increased. Education payments increased 16 percent in 2001, to \$2.4 billion, following a 14-percent increase in 2000. Educational institutions in the United Kingdom remained the most popular destination for U.S. students studying abroad, accounting for more than 20 percent

of the number of students.

Financial services receipts decreased 7 percent, to \$15.2 billion, in 2001, following a 22-percent increase in 2000. These receipts, which had more than doubled since 1996, reversed direction in 2001 as foreign activity in U.S. financial markets slowed. The decrease was primarily attributable to a reduction in financial advisory and custody services due to a falloff in mergers and acquisitions. Underwriting services decreased because foreigners sharply reduced their issuances of stocks in the United States; new issuances of foreign bonds also fell. Financial management services also decreased. These decreases were partly offset by an increase in brokerage commissions, as foreigners traded heavily in outstanding U.S. bonds. Financial services payments decreased 10 percent to \$4.0 billion in 2001, following a 31-percent increase in 2000. The 2001 decrease was largely attributable to a slowdown in new issues of U.S. stocks and bonds abroad. Financial advisory and custody services and financial management services also decreased.

Insurance services receipts fell to a mere \$18 million in 2001, after more than doubling to \$2.1 billion in 2000.¹⁰ Because net insurance services are calculated as premiums paid less losses recovered, they may swing sharply from year to year, even when the underlying gross flows change relatively little. In 2001, a sizable increase in claims paid to foreigners, mainly in the United Kingdom, raised claims to a level that offset virtually all of the premiums received by U.S. insurance companies from foreigners.¹¹ Total U.S. premiums received increased slightly, largely because lost business in Japan offset widespread increases in premiums received from most other countries, as new business was underwritten and premium rates increased. Insurance services payments fell by nearly half in 2001, to \$4.9 billion, after more than tripling in 2000, as a surge in losses recovered more than offset a nearly 50-

10. Insurance services, though listed under unaffiliated services, consist of both affiliated and unaffiliated transactions. Receipts are calculated as premiums received from foreigners for primary insurance and reinsurance less claims paid by U.S. insurers. Payments are calculated as premiums paid to foreigners for primary insurance and reinsurance less losses recovered from foreign insurers.

11. The large increase in claims paid to the United Kingdom may be related to the terrorist attacks. Reinsurance arrangements often have multiple tiers, especially where large risks are concerned, and some insurance placed with companies located in the United Kingdom—a major international insurance center—typically would have been, in turn, reinsured with other companies, including some located in the United States. Settlement of attack-related claims therefore could have resulted in U.S. claim payments to foreign insurers, even though most of the funds paid would ultimately be rerouted through primary insurers to policy holders located in the United States.

percent increase in premiums paid. The surge was largely attributable to the recording in the third quarter of large nonrecurring losses recovered from foreign reinsurance companies as a result of the September 11th attacks. (Losses recovered are recorded in the accounts on an accrual basis at the time the insured event occurs.) The increase in premiums paid, which accelerated following the attacks, reflected both higher rates and an increase in the amount of insurance ceded to foreign reinsurance companies. Foreign companies set higher rates in an effort to recoup past losses and to ensure that they maintained a sound financial position based on their reassessment of the risk environment.

Receipts for telecommunications services were virtually unchanged in 2001 at \$4.8 billion, following a 5-percent increase in 2000; payments decreased 21 percent to \$4.3 billion, following a 17-percent decrease. Calling rates continued to decline, offsetting an increase in the volume of calls. Sharp reductions in calling rates in recent years and the availability of alternative means of communications, such as e-mail,

have resulted in lower levels of both receipts and payments for basic telecommunications services, but payments for basic services have fallen much more sharply than receipts since 1996 (see the box “The 2001 Benchmark Survey of Selected Services Transactions”). Moreover, the share of telecommunications services that is attributable to basic telecommunications services has decreased greatly since 1996, as transactions associated with privately leased channel services, value-added services (such as video-conferencing and broadband access services), and support services have surged.

Business, professional, and technical services receipts increased 6 percent, to \$25.7 billion in 2001, following a 12-percent decrease in 2000; payments increased 16 percent, to \$10.0 billion, following a 6-percent increase. The increases in receipts and payments in 2001 were spread among all major geographic areas and among most types of services. Receipts for construction, engineering, architectural, and mining services increased as increases in construc-

Data Sources

The estimates in this article are primarily based on data from the surveys conducted by the Bureau of Economic Analysis (BEA). However, the estimates for some services are based on data from a variety of other sources, including the U.S. Customs Service, surveys conducted by other Federal Government agencies, private sources, and partner countries.

BEA conducts 11 surveys of cross-border trade with unaffiliated foreigners—that is, with foreigners that neither own nor are owned by the U.S. party to the transaction. These surveys cover six broad categories of services: (1) Selected services (mainly miscellaneous business, professional, and technical services), (2) construction, engineering, architectural, and mining services, (3) insurance, (4) financial services, (5) royalties and license fees, and (6) transportation. Each of these categories is covered by a separate survey or by a group of surveys.

More detailed information on these surveys is available in *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis*. The *Guide* presents general information about the classification, definition, and release schedules of all the surveys, and it provides details on the items covered on each survey, the frequency of the surveys, the numbers of respondents, and the methods used to prepare the estimates. The *Guide* is available on BEA's Web site at <www.bea.gov>, or by writing to the International Investment Division, BE-50, Bureau of Economic Analysis, Washington, DC 20230, or by e-mail at <internation-

alaccounts@bea.gov>. For further information, call 202-606-9853.

The data on intrafirm trade in services and on sales by majority-owned affiliates are collected in BEA's surveys of U.S. direct investment abroad and of foreign direct investment in the United States. For the methodologies for these surveys, see *U.S. Direct Investment Abroad: 1994 Benchmark Survey, Final Results* (Washington, DC: U.S. Government Printing Office, 1998) and *Foreign Direct Investment in the United States: Final Results From the 1997 Benchmark Survey* (Washington, DC: U.S. Government Printing Office, 2001).

For additional information on the methodology that is used to prepare the estimates of both affiliated and unaffiliated cross-border trade, see *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (Washington DC: U.S. Government Printing Office, 1990). For changes in the methodology that have been made since 1990, see the section “Technical Notes” in the quarterly articles on the U.S. international transactions in the June 1990 and 1991 issues of the SURVEY OF CURRENT BUSINESS, the section “Revised Estimates for 1976-91” in the June 1992 issue, and the annual articles on the revised estimates of U.S. international transactions in the June 1993-95 issues and in the July 1996-2002 issues.

These methodologies and the SURVEY articles for July 1996-2002 are also available on BEA's Web site.

tion services and engineering and architectural services offset a decrease in mining services.¹² Receipts for each of these services may fluctuate sharply from year to year because they are typically based on a small num-

12. BEA is publishing separate estimates of construction services, of engineering, architectural, and other technical services, and of mining services for the first time (see table 1). This detail is based on data that BEA collects on its surveys.

ber of high-value projects. Receipts for operational leasing services, which largely consist of the leasing of transportation equipment without crew, decreased after years of steady increases. Receipts for “computer and data processing services” also decreased, reflecting general weakness in foreign economies, which had a pronounced effect on the U.S. high-tech industry; about half the value of the transactions associated with

The 2001 Benchmark Survey of Selected Services Transactions

The estimates of business, professional, and technical services were revised to incorporate the preliminary results of BEA’s 2001 Benchmark Survey of Selected Services Transactions with Unaffiliated Foreign Persons. The benchmark survey collects more detailed data than the annual surveys, which collect information on more than two dozen types of business, professional, and technical services. For example, the benchmark survey collects additional information on telecommunications, computer and data processing services, and database and other information services. In addition, it covers several smaller services that the annual survey does not cover in order to reduce respondent burden; these services are agricultural services, mailing reproduction and commercial art, employment agency and temporary help services, and management of health care facilities (see the accompanying table, which also provides comparable detail from the 1996 benchmark survey).

The benchmark survey was redesigned for 2001 to clarify that transactions conducted over the Internet were to be reported. The survey was also updated to cover services that have become increasingly important in today’s global market. For example, telecommunications “value-added services” now includes a specific reference to broadband access services, and “other business, professional, and technical services” now includes auction services and waste treatment services.

On the benchmark survey, only those U.S. individuals, companies, and other organizations whose sales or purchases of any type of covered service exceeded \$1 million were required to file a report. However, those who claimed exemption from reporting were required to report their total sales and purchases and to note the primary type of service associated with these transactions; in addition, some exempt entities voluntarily reported information on their transactions.

Estimates for business, professional, and technical services transactions that fall below the exemption levels for reporting on the benchmark and on the annual surveys are included in the accounts each year. The amounts, though small, eliminate a source of understatement in the universe estimates. Based on the reports filed in

claiming exemption and on the voluntary reports, \$237 million was added to receipts and \$197 million was added to payments in 2001. For transactions that were not reported by country, the data were allocated on the basis of the country composition of the transactions that were reported by country.

these services are related to systems analysis, design, engineering and custom programming.

Affiliated transactions. “Other private services” delivered to foreign markets through affiliated channels (intrafirm receipts) increased 11 percent, to \$36.2 billion, in 2001, following a 14-percent increase in 2000. The increase was generally widespread across industries and largely resulted from an increase in U.S. affiliates’ receipts from their foreign parents. Intrafirm payments increased 9 percent, to \$28.4 billion, following a 12-percent increase. Almost all of the increase in 2001 was attributable to payments by U.S. affiliates to foreign parents.

In 2001, the estimates of cross-border trade in “other private services” between affiliated parties by type of service were expanded to include two types of services that had previously been included in the “other” category: Research and development and testing services and management and consulting services (table C). These services were added because a significant portion of the services in the “other” category consisted of allocated expenses, such as charges for research and development or management services, that are apportioned among the various divisions or parts of an enterprise. Research and development and testing services accounted for 12 percent of “other private services” receipts and for 4 percent of “other private services” payments; management and consulting services accounted for 5 percent of receipts and for 6 percent of payments. However, in 2001, the “other” category continued to account for most of “other private services” receipts;¹³ the next largest category was research and development and testing services, followed by film and television tape rentals and financial services. Most of the “other private services” payments were accounted for by the “other” category, followed by financial services and by management and consulting services.

Sales Through Affiliates in 2000

In 2000, the latest year for which data are available, worldwide sales (the combined sales to foreign and U.S. persons) of services by U.S. multinational companies through their nonbank, majority-owned foreign

13. The “other” category includes allocated expenses—except those for research and development services and management services—and professional and technical services, such as public relations, advertising, legal services, and communication services except basic telecommunications services.

affiliates were \$411.5 billion, up 10 percent from 1999. Worldwide sales of services by foreign multinational companies through their nonbank, majority-owned U.S. affiliates were \$373.7 billion, up 18 percent (table D).¹⁴

Sales by affiliates—of both goods and services—are predominantly local transactions. In 2000, 86 percent of worldwide sales of services by foreign affiliates of U.S. companies were local sales, that is, transactions with parties located in the same country as the affiliate; the corresponding share for goods was 63 percent. Services’ larger share reflects the importance of proximity to the customer in the delivery of services. Partly reflecting the large U.S. market, local sales accounted for 93 percent of sales of services by U.S. affiliates of foreign companies and for an estimated 90 percent of sales of goods.¹⁵

14. In this section, sales of services are defined as sales that are typically associated with selected industry groups, which are listed in the note to table D.

15. Because the data on sales of goods by U.S. affiliates are not disaggregated by destination, the local and foreign shares have been estimated from the data on exports of goods shipped by affiliates. In 2000, these exports represented 10 percent of total sales of goods by these affiliates.

Table D. Sales of Services by U.S. MNC’s Through Their Nonbank MOFA’s and by Foreign MNC’s Through Their Nonbank MOUSA’s, 1999–2000
[Millions of dollars]

	1999	2000
Sales through MOFA’s		
Total	372,852	411,511
To affiliated persons	38,435	39,332
To unaffiliated persons	334,417	372,179
To U.S. persons	19,646	18,726
To U.S. parents	14,779	14,047
To unaffiliated U.S. persons	4,867	4,679
To foreign persons	353,206	392,785
To other foreign affiliates	23,656	25,285
To unaffiliated foreign persons	329,550	367,500
Local sales	320,686	355,273
To other foreign affiliates	9,790	11,351
To unaffiliated foreigners	310,896	343,922
Sales to other countries	32,520	37,512
To other foreign affiliates	13,866	13,934
To unaffiliated foreigners	18,654	23,578
Sales through MOUSA’s		
Total	316,939	373,732
To U.S. persons	293,485	346,669
To foreign persons	23,454	27,063
To the foreign parent group	10,259	10,289
To foreign affiliates	1,173	771
To other foreigners	12,021	16,003

NOTE: Depository institutions are excluded because data are not available.

In this table, sales of services through affiliates are those typical of establishments in the following industries derived from the North American Industry Classification System: Utilities; transportation and warehousing; information; finance and insurance; real estate and rental and leasing; professional, scientific, and technical services; management of companies and enterprises; administrative and support, waste management, and remediation services; educational services; health care and social assistance; arts, entertainment, and recreation; accommodation and food services; support activities for agriculture and forestry; support activities for oil and gas operations; support activities for mining; and other services.

MNC Multinational company
MOFA Majority-owned foreign affiliate
MOUSA Majority-owned U.S. affiliate

Sales of services to foreign persons by nonbank foreign affiliates (that is, their local sales plus their sales to other foreign countries) and sales of services to U.S. persons by nonbank U.S. affiliates (that is, their local sales) both represent services delivered to international markets through the channel of direct investment. These sales are presented by country of foreign affiliate or by country of the U.S. affiliates' ultimate beneficial owner (UBO) for 1993–2000 in table 8.¹⁶ Tables 9.1 and 9.2 present sales by primary industry of the foreign affiliate cross-classified by country in 1999 and 2000. Tables 10.1 and 10.2 present sales by primary industry of the U.S. affiliate cross-classified by country of UBO in 1999 and 2000.

Foreign affiliates' sales to foreign persons

In 2000, sales of services to foreign customers by nonbank, majority-owned foreign affiliates of U.S. companies were \$392.8 billion. By area, affiliates in Europe accounted for 52 percent of the total sales. Within Europe, almost half of the sales were accounted for by affiliates in the United Kingdom; affiliates in Germany had the second highest sales, followed by those in France and in the Netherlands. Affiliates in Canada accounted for 11 percent of sales to foreign persons, and affiliates in Japan accounted for 8 percent.¹⁷

16. The UBO of a U.S. affiliate is that person (in the broad legal sense, including a company), proceeding up the affiliate's ownership chain beginning with the foreign parent, that is not owned more than 50 percent by another person. The UBO ultimately owns or controls the affiliate and derives the benefits associated with ownership or control. Unlike the foreign parent, the UBO of a U.S. affiliate may be located in the United States.

By industry sector, sales were largest in "finance (except depository institutions) and insurance," in professional, scientific, and technical services, and in information. In finance and insurance, affiliates in insurance accounted for the majority of sales. In professional, scientific, and technical services, the largest sales were by affiliates in computer systems design and related services, followed by affiliates in architectural, engineering, and related services and in management, scientific, and technical consulting.¹⁸ In information, the largest sales were by affiliates in broadcasting and telecommunications (primarily telecommunications), followed by affiliates in information services and data processing services and in publishing industries.

Sales of services abroad by foreign affiliates increased 11 percent in 2000. Sales were spurred by strong economic growth in many of the important host countries for foreign affiliates, which not only boosted sales through existing affiliates but also created attractive opportunities for U.S. multinationals to acquire or establish new affiliates abroad. Indeed, much of the increase resulted from sales by newly ac-

17. Beginning with the estimates for 1999, BEA no longer uses the "international" category in tabulating foreign direct investment. This change is being made to comply with international guidelines for the compilation of international transactions and direct investment statistics set forth by the International Monetary Fund's *Balance of Payments Manual*, 5th ed. For details, see footnote 4 to table 8.

18. Computer-related services are also likely to have been sold by affiliates classified in other industries, especially those in computers and electronic products manufacturing and in wholesale trade of professional and commercial equipment and supplies. See the box "Delivery of Computer Services to Foreign Markets" on page 76.

Acknowledgments

The estimates of cross-border trade were prepared by the following staff members of the Balance of Payments Division and the International Investment Division.

Travel and passenger fares: Joan E. Bolyard and Laura L. Brokenbaugh

Other transportation—Patricia G. Watts and Edward F. Dozier

Royalties and license fees and other private services, affiliated—Gregory G. Fouch (for transactions of U.S. affiliates) and Mark W. New (for transactions of U.S. parents)

Royalties and license fees and other private services, unaffiliated—Christopher J. Emond, Shirley J. Davis, Rafael I. Font, Pamela Aiken, Damon C. Battaglia, Annette Boyd, Faith M. Brannam, Hope R. Jones, Eddie L. Key,

Christine L. Hagerty, Steven J. Muno, John A. Sondheimer, Robert A. Becker, and Mary-Frances Styczynski

The estimates of sales of services through majority-owned affiliates were prepared by staff members of the International Investment Division.

The information in tables 1, 2, 3, and 5 was consolidated by John A. Sondheimer, assisted by Robert A. Becker. Computer programming for data estimation and the generation of the other tables was provided by Marie Colosimo, Carole J. Henry, Neeta B. Kapoor, Fritz H. Mayhew, Xia Ouyang, and Diane I. Young.

The box "Effects of the Terrorist Attacks of September 11th on Cross-Border Trade in Services" and the estimates of these effects on the insurance accounts were prepared by Erin Engasser.

quired firms as part of the boom in cross-border mergers and acquisitions.¹⁹ Many of the newly acquired firms were in industries and markets that offered investment opportunities and the potential for strong growth, including utilities that were acquired because of privatization programs in many countries and insurance, particularly life insurance in the Asia and Pacific region. The boom in cross-border mergers and acquisitions had a mixed impact on the sales of services through foreign affiliates because it also resulted in the loss of sales by affiliates that were acquired by foreign firms. However, the loss of these sales was more than offset by the increase in sales from newly acquired firms.

By country, the largest increase in sales was accounted for by affiliates in Canada, followed by affiliates in the United Kingdom and in Japan. In Canada, affiliates in wholesale trade and in utilities largely accounted for the increase. Sales in secondary activities, such as transportation, accounted for the increase in sales by affiliates in wholesale trade.²⁰ The increase in sales by affiliates in utilities was largely attributable to newly acquired natural gas distributors. In the United Kingdom, most of the increase in sales was accounted for by affiliates in utilities, mainly as a result of sales by newly acquired utility companies but also due to growth in sales by energy traders. In Europe excluding the United Kingdom, the growth in sales of services was curtailed by the exit of several large affiliates in waste management, travel services, and employment services from the affiliate universe as a result of foreign acquisitions of the foreign operations of the U.S. parent or of a restructuring following the foreign acquisition of the entire U.S. multinational company. In Japan, affiliates in life insurance and in computer systems design and related services accounted for most of

the increase. Affiliates in life insurance increased their sales by capturing market share from financially troubled Japanese life insurance companies and in some cases, by acquiring insolvent Japanese life insurers. Affiliates in computer systems design and related services increased their sales partly because Japanese firms expanded their outsourcing of information technology services.

By industry sector, the largest increases were in “finance (except depository institutions) and insurance,” in utilities, and in professional, scientific, and technical services. Most of the increase in finance and insurance was accounted for by affiliates in insurance, especially life insurance affiliates in the Asia and Pacific region. In utilities, most of the increase reflected sales by newly acquired firms in Canada and the United Kingdom. In professional, scientific, and technical services, most of the increase was accounted for by affiliates in computer systems design and related services, almost all of which were in the Asia and Pacific region.

U.S. affiliates' sales in the United States

In 2000, sales of services to U.S. customers by nonbank majority-owned U.S. affiliates of foreign companies were \$346.7 billion. By area of the affiliates' ultimate beneficial owner (UBO), Europe accounted for the largest share of total sales (67 percent), followed by Canada (15 percent), Asia and Pacific (12 percent), and Latin America and Other Western Hemisphere (4 percent). By country of the affiliates' UBO, the United Kingdom accounted for the largest share of sales, followed by Canada, Germany, and the Netherlands.

By industry sector, the largest sales were in “finance (except depository institutions) and insurance,” followed by information and by manufacturing. Insurance accounted for most of the sales in finance and insurance. In information, the largest sales were in publishing, followed by broadcasting and telecommu-

19. For additional information, see Maria Borga and Raymond J. Mataloni, Jr., “Direct Investment Positions for 2000: Country and Industry Detail,” SURVEY 81 (July 2001): 16–29.

20. Wholesale trade provides distributive services for the sale of goods to retailers, intermediate users, and final users (except persons), and the value of the distributive services is embedded in the final value of goods they sell. When the data collection system for sales of services through affiliates was established, BEA chose to treat sales in wholesale trade as sales of goods because most of the value of the sale is attributable to the goods being sold and not to the distributive services. Consequently, wholesalers are actually more important suppliers of services than the data suggest. (The treatment of distributive services supplied by the retail trade industry is comparable with that of wholesale trade.) For a discussion of the measurement of distributive services in both cross-border trade and sales through affiliates, see Whichard and Borga, “Selected Issues in the Measurement of U.S. International Services.”

Data Availability

The estimates of cross-border trade for 1986–2001 and of sales through majority-owned affiliates for 1989–2000 are available as files that can be downloaded from BEA's Web site. To access these files, go to <www.bea.gov>, click on “Balance of payments and related data,” and look under “Goods and services.”

nications (primarily telecommunications). In manufacturing, the largest sales were in two industries that can have significant secondary activities in services: Transportation equipment (generally related to auto leasing and financing) and computers and electronic products (generally computer services).

U.S. affiliates' sales of services in the United States increased 18 percent in 2000. Strong U.S. economic growth fueled the boom in cross-border mergers and acquisitions and contributed to the growth in sales of services by existing U.S. affiliates. The increase primarily reflected net additions to the affiliate universe as a result of a record volume of new direct investments by foreign multinational companies.²¹ Acquisition activity was particularly strong in the services industries, such as finance, advertising, management services, insurance, and telecommunications. There were also new investments in affiliates classified in computers and electronic products manufacturing; these affiliates can have significant sales of computer services.

More than four-fifths of the increase in affiliates' sales of services was accounted for by affiliates with UBO's in Europe. Within Europe, the largest increases were by German, French, and Swiss affiliates. For Germany, the largest increases were in two manufacturing sectors—transportation equipment manufacturing and electrical equipment, appliances, and components manufacturing—followed by finance. In transportation equipment manufacturing, the increase reflected

an increase in auto leasing and financing by existing affiliates. In electrical equipment, appliances, and components manufacturing, the increase was due to sales by firms in computer systems design and related services that were newly acquired by existing manufacturing affiliates.²² The increase in finance reflected sales by newly acquired affiliates. For France, the increase largely reflected sales by newly acquired affiliates in advertising and related services and in management, scientific, and technical consulting. For Switzerland, the increase largely reflected sales by newly acquired affiliates in finance and in employment services. Outside of Europe, the largest increase in sales was by affiliates with UBO's in Canada. The increase was more than accounted for by utilities, reflecting both sales by newly acquired affiliates and growth in sales by existing affiliates.

By industry sector, the largest increase was by affiliates in finance and insurance, followed by affiliates in manufacturing and in professional, scientific, and technical services. In finance and insurance, the increase was mainly accounted for by the newly acquired affiliates in finance. The growth in sales by affiliates in manufacturing was primarily in electrical equipment, appliance, and component manufacturing and in transportation equipment manufacturing, mainly by affiliates with UBO's in Germany. In professional, scientific, and technical services, most of the growth was accounted for by affiliates in advertising and related services.

21. According to data from BEA's survey of new foreign direct investment, outlays to acquire or establish U.S. businesses were \$335.6 billion in 2000; see Thomas W. Anderson, "Foreign Direct Investment in the United States: New Investment in 2001," *SURVEY* 82 (June 2002): 28–35. These data cover only transactions involving U.S. businesses newly acquired or established by foreign direct investors. For additional information about foreign direct investment in the United States, including transactions involving both new and existing U.S. affiliates, see Borga and Mataloni, "Direct Investment Positions in 2000," and Zeile, "Operations in 2000."

22. On the reports used by BEA to collect the data, the sales of a newly acquired firm are consolidated with those of the existing affiliate, and the total sales are then recorded in the industry that accounts for the largest share of sales in the consolidated business. For these affiliates, the sales were included in electrical, appliance, and components manufacturing because that remained the industry with the largest share of sales for the consolidated business.

1. Prior to 1990, this line includes data only for the Federal Republic of Germany. Beginning in 1990, this line also includes the former German Democratic Republic.

2. The European Union comprises Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, United Kingdom, Austria, Finland, and Sweden. The last three countries joined the Union on January 1, 1995. The estimates prior to 1995 do not reflect the addition of these three countries.

3. Eastern Europe comprises Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Poland, Romania, Russia, Slovakia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan.

NOTE: The full country and area detail shown in the stub is available only since 1992.

* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

1. Receipts for construction, engineering, architectural, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. In 1998, total net receipts of \$3,884 million were derived as gross operating revenues of \$8,954 million less merchandise exports of \$1,702 million and foreign expenses of \$3,368 million. The components of the total are as follows: Construction services—net receipts of \$793 million were derived as gross operating revenues of \$3,541 million less merchandise exports of \$988 million and foreign expenses of \$1,760 million. Engineering, architectural, and other technical services—net receipts of \$2,541 million were derived as gross operating revenues of \$4,094 million less merchandise exports of \$548 million and foreign expenses of \$1,005 million. Mining services—net

receipts of \$550 million were derived as gross operating revenues of \$1,318 million less merchandise exports of \$166 million and foreign expenses of \$602 million. Payments for construction, engineering, architectural, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise imports and wages and other expenses, and no estimates are made because they are believed to be small.

2. Consists of accounting, auditing, and bookkeeping services, medical services, miscellaneous disbursements, operational leasing, sports and performing arts, training services, and other business, professional, technical services (see footnote 1 table 1).

3. See table 2, footnote 2.

4. See table 2, footnote 3.

* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

1. Receipts for construction, engineering, architectural, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. In 1999, total net receipts of \$5,834 million were derived as gross operating revenues of \$8,785 million less merchandise exports of \$613 million and foreign expenses of \$2,338 million. The components of the total are as follows: Construction services—net receipts of \$2,643 million were derived as gross operating revenues of \$4,151 million less merchandise exports of \$356 million and foreign expenses of \$1,152 million. Engineering, architectural, and other technical services—net receipts of \$2,620 million were derived as gross operating revenues of

\$3,601 million less merchandise exports of \$255 million and foreign expenses of \$725 million. Mining services—net receipts of \$571 million were derived as gross operating revenues of \$1,034 million less merchandise exports of \$2 million and foreign expenses of \$460 million. Payments for construction, engineering, architectural, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise imports and wages and other expenses, and no estimates are made because they are believed to be small.

2. See table 7.1, footnote 2.

3. See table 2, footnote 2.

* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

1. Receipts for construction, engineering, architectural, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. In 2000, total net receipts of \$2,275 million were derived as gross operating revenues of \$5,984 million less merchandise exports of \$866 million and foreign expenses of \$2,843 million. The components of the total are as follows: Construction services—net receipts of \$680 million were derived as gross operating revenues of \$2,541 million less merchandise exports of \$707 million and foreign expenses of \$1,154 million. Engineering, architectural, and other technical services—net receipts of \$1,309 million were derived as gross operating revenues of

\$2,490 million less merchandise exports of \$158 million and foreign expenses of \$1,023 million. Mining services—net receipts of \$286 million were derived as gross operating revenues of \$953 million less merchandise exports of \$1 million and foreign expenses of \$666 million. Payments for construction, engineering, architectural, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise imports and wages and other expenses, and no estimates are made because they are believed to be small.

* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

1. Receipts for construction, engineering, architectural, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. In 2001, total net receipts of \$2.623 billion were derived as gross operating revenues of \$6.063 billion less merchandise exports of \$720 million and foreign expenses of \$2.720 million. The components of the total are as follows: Construction services—net receipts of \$823 million were derived as gross operating revenues of \$2.641 million less merchandise exports of \$564 million and foreign expenses of \$1.255 million. Engineering, architectural, and other technical services—net receipts of \$1.573 million were derived as gross operating revenues of

\$2.985 million less merchandise exports of \$155 million and foreign expenses of \$1.257 million. Mining services—net receipts of \$228 million were derived as gross operating revenues of \$437 million less merchandise exports of less than \$1 million and foreign expenses of \$208 million. Payments for construction, engineering, architectural, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise imports and wages and other expenses, and no estimates are made because they are believed to be small.

2. See table 7.1, footnote 2.

3. See table 2, footnote 2.

4. See table 2, footnote 3.

D Suppressed to avoid disclosure of data of individual companies.

¹ For MOFA's, "country" is the country of the affiliate; for MOUSA's, it is the country of the affiliate's ultimate beneficial owner.² See table A, footnote 4.³ See table A, footnote 3.⁴ Foreign affiliates classified in "international" are those that have operations in more than one country and that are engaged in petroleum shipping, other water transportation, or operating movable oil- and gas-drilling equipment. Beginning with the estimates for 1999, BEA is no longer using the "international" category in tabulations of direct investment estimates. This change is being made to comply with international guidelines for the compilation of international transactionsand direct investment statistics set forth by the International Monetary Fund's *Balance of Payments Manual*, 5th ed. In accordance with the guidelines, affiliates formerly classified in "international" have been reclassified in the country of operator of the ship or equipment. In most cases the country of the operator is the same as the country of incorporation. In the few cases where the country of incorporation is the United States, the affiliates have been defined out of BEA's direct investment estimates.⁵ Contains data for U.S. affiliates that have a foreign parent but whose ultimate beneficial owner is a U.S. person.⁶ See table 2, footnote 2.⁷ See table 2, footnote 3.

MNC Multinational company

MOFA Majority-owned foreign affiliate

1. Because sales resulting from construction activities are recorded as sales of goods rather than as sales of services, the sales of services through MOFA's in construction represent sales in secondary, nonconstruction, industries. In 1999, sales of goods to foreign residents by MOFA's classified in construction were \$14.0 billion.

MNC Multinational company

MOFA Majority-owned foreign affiliate

1. Because sales resulting from construction activities are recorded as sales of goods rather than as sales of services, the sales of services through MOFA's in construction represent sales in secondary, nonconstruction, industries. In 2000, sales of goods to foreign residents by MOFA's classified in construction were \$10.5 billion.

MNC Multinational company

MOUSA Majority-owned U.S. affiliate

UBO Ultimate beneficial owner

1. Because sales resulting from construction activities are recorded as sales of goods rather than as sales of services, the sales of services through MOUSA's in construction represent sales in secondary, non-construction industries. In 1999, sales of goods to U.S. residents by MOUSA's classified in construction were estimated to be \$24.7 billion. These sales of goods were estimated by subtracting exports of goods from the total sales of goods.

* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

MNC Multinational company

MOUSA Majority-owned U.S. affiliate

UBO Ultimate beneficial owner

1. Because sales resulting from construction activities are recorded as sales of goods rather than as sales of services, the sales of services through MOUSA's classified in construction represent sales in secondary, nonconstruction industries. In 2000, sales of goods to U.S. residents by MOUSA's in construction were estimated to be \$25.1 billion. These sales of goods were estimated by subtracting exports of goods from the total sales of goods.

State Personal Income

Revised Estimates for 1999–2001

By Jeffrey L. Newman

THE Bureau of Economic Analysis (BEA) has released revised estimates of State personal income for 1999–2001. These estimates incorporate the results of the recent annual revision of the national income and product accounts (NIPAs) and newly available State source data that are more complete, more detailed, and otherwise more appropriate than those that were previously available.¹

In general, the revisions to personal income were relatively small. For the Nation, personal income for 2001 was revised up 0.7 percent. By State, the largest revisions were to personal income in Vermont, up 2.2 percent, and in Wyoming, up 2.1 percent.

For 2001, the small upward revision to U.S. personal income based on the sum of the estimates for all States differs markedly from the substantial downward revision to the NIPA estimate of personal income in the recent annual revision. The difference primarily reflects the timing of the incorporation of the Bureau of Labor

1. See Eugene P. Seskin and Stephanie H. McCulla, "Annual Revision of the National Income and Product Accounts: Annual Estimates, 1999–2001 and Quarterly Estimates, 1999:I–2002:I," SURVEY OF CURRENT BUSINESS 82 (August 2002): 7–34.

For a detailed description of the sources and methods used to prepare the estimates of State personal income, see U.S. Bureau of Economic Analysis, *State Personal Income, 1929–97* (Washington, DC: U.S. Government Printing Office, May 1999), or go to BEA's Web site at <www.bea.gov>, select methodologies, regional programs, and State Personal Income, 1929–97.

Personal Income in the NIPA's and State Personal Income

The main differences between the national income and product accounts (NIPA) estimates of personal income and the State estimates of personal income stem from the treatment of the income of U.S. residents who are working abroad and the treatment of the income of foreign residents who are working in the United States. The national total of the State estimates of personal income consists of only the income earned by persons who live within the United States, including foreign residents working in the United States.

The measure of personal income in the NIPAs is broader. It includes the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents on foreign assignment for less than a year, and it includes

the investment income that is received by Federal retirement plans of Federal workers stationed abroad. Earnings of foreign residents are included only if they live and work in the United States for a year or more.

The annual estimates of personal income in the NIPAs also differ from the national totals of State personal income because of differences in the timing of the availability of source data. For example, the national total of the State estimates of farm proprietors' income for 2001 was \$1.2 billion greater than the NIPA estimate of farm proprietors' income because the State estimates include more recent data from the U.S. Department of Agriculture than were available when the NIPA estimate was prepared.

Relation of National and State Estimates of Personal Income

[Billions of dollars]

	1999	2000	2001
Personal income, NIPAs	7,786.5	8,406.6	8,685.3
Less adjustments for:			
Coverage differences	8.0	7.9	7.9
Federal workers abroad	14.7	15.1	16.0
Wage and salary disbursements	9.8	10.0	10.6
Other labor income	4.4	4.6	4.9
Dividends, interest, and rent ¹	1.0	1.0	1.1
Less: Personal contributions for social insurance	0.5	0.5	0.6
Rest-of-the-world ²	-6.7	-7.2	-8.1
Use of more current source data	-1.0	-0.1	-0.9
Wage and salary disbursements	0.1	0.2	0.3
Farm proprietors' income	-1.1	-0.3	-1.2
Equals: State personal income	7,779.5	8,398.8	8,678.3

1. Consists of the investment income received by Federal retirement plans that is attributed to Federal workers stationed abroad.

2. Consists of the wages and salaries received by U.S. residents working temporarily (less than a year) abroad and foreign residents working temporarily in the United States.

NIPA National income and product accounts

Statistics (BLS) tabulations of wages and salaries for 2001. The preliminary annual estimates of State personal income that were published in the May SURVEY OF CURRENT BUSINESS, and that are updated by the revisions presented here, had already incorporated the BLS tabulations for three quarters of 2001 (see the box “Note on the Estimates of State Personal Income” in Duke Tran, “State Per Capita Personal Income and State Personal Income, 2001,” SURVEY 82 (May 2002): 36–37). These tabulations were incorporated into the NIPA estimates as part of the recent annual revision.²

The revised estimates of personal income and per capita personal income by State for 2001 demonstrate the widespread weakness of the State economies last year. For the Nation, growth in personal income was revised down 0.4 percentage point, to 3.3 percent, from the preliminary estimate that was published in the May SURVEY.

The weakness in State personal income was partly accounted for by slowdowns in both traditional and

high-tech manufacturing and in services.³ The weakness was concentrated mainly in the Great Lakes States and the Pacific Coast States (chart A).

This article introduces a change in industry classification for the State-level earnings and employment estimates produced by BEA. The 2001 estimates presented here are based on new industry classifications derived from the 2002 version of the North American Industry Classification System (NAICS) (see the box “New Industry Classifications” on page 129).

According to the State estimates for 2001,

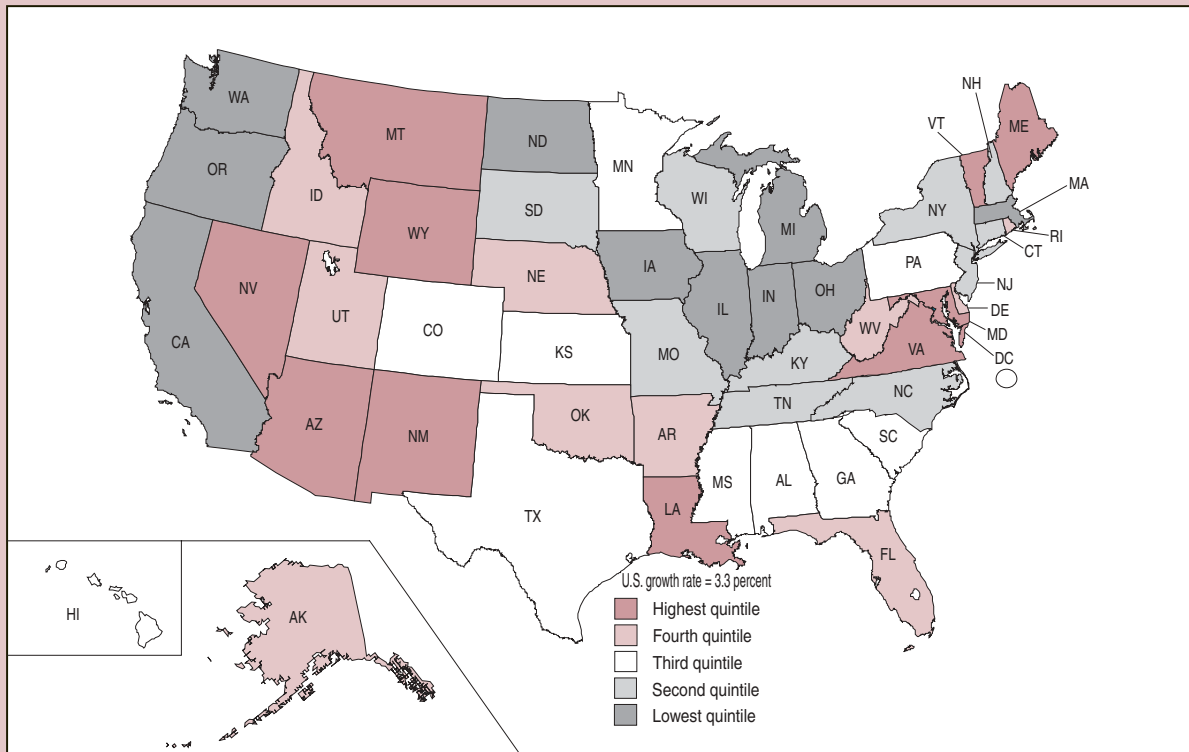

- Personal income for the Nation increased 3.3 percent after increasing 8.0 percent in 2000. The 3.3-percent increase was the smallest since 1958, when personal income grew 2.8 percent.
- The States in the fastest growing quintile accounted for only 10 percent of the Nation’s personal income, while the States in the slowest growing quintile accounted for 34 percent.
- Earnings of government employees (Federal, military, State, and local) grew at a faster rate—5.4 per-

2. BEA has recently changed its revision schedule for the NIPA estimates in order to incorporate the BLS data earlier, thus reducing future annual revisions to the NIPA wages and salary estimates (see the box “Revisions to Wages and Salaries and to Profits” in Seskin and McCulla, “Annual Revision,” 24–25).

3. “High-tech manufacturing” includes industries that manufacture computers, computer peripherals, communications equipment, and similar electronic products.

CHART 1

Growth Rates in Personal Income, 2001

cent—than earnings of private employees—2.0 percent—for the first time since 1991.

- In terms of per capita personal income levels, the States in the top quintile were unchanged from 2000. In the bottom quintile, South Carolina replaced Oklahoma.

This article presents the revised estimates of State personal income and per capita personal income for 1999–2001, and it describes the sources and the effects of the revisions to the estimates for 1999–2001. The State personal income estimates for 1996–2001 are presented in tables 1–3 at the end of this article. In addition, the 2001 NAICS-based industry earnings are presented in table 4. (See also the box “Data Availability” on page 131.)

2. Rank calculated using unrounded percent change data.

Personal income for States for 2001

In the States in the top quintile for personal income growth—New Mexico, Wyoming, Louisiana, Nevada, Vermont, Maryland, Maine, Arizona, Montana, and Virginia—the growth rates in personal income ranged from 1.5 percentage points to 3.2 percentage points more than the 3.3-percent growth rate of the Nation (table A). Arizona and Virginia are the only two States that have been in the top quintile since 1999. New Mexico and Louisiana were in the bottom quintile in 1999 and 2000.

In the States in the bottom quintile—Massachusetts, Illinois, Iowa, California, Washington, North Da-

Acknowledgments

The revised estimates of State personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. The preparation of the revised estimates was a divisionwide effort.

The estimates of nonfarm wages and salaries and other labor income were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Mauricio Ortiz, Michael G. Pilot, John A. Rusinko, and James M. Scott. Contributing staff members were Michael L. Berry, Kristin M. Chambliss, Susan P. Den Herder, Lisa B. Emerson, John D. Laffman, Lela S. Lester, Russell C. Lusher, Richard A. Lutyk, Paul K. Medzerian, Michael Phillips, Adrienne T. Pilot, Curtis Roberson, Victor A. Sahadachny, Elizabeth F. Stell, and Jaime Zenzano.

The estimates of farm wages and salaries and other labor income and of proprietors' income, property income, transfer payments, personal contributions for social insurance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Jeffrey L. Newman, and James P. Stehle. Contributing staff members were Suet M. Boudhraa, Elaine M. Briccetti, Carrie L. Case, Daniel R. Corrin, Keren Israeli, Toan A. Ly, W. Tim McKeel, and Marianne A. Ziver.

The estimates of personal tax and nontax payments were prepared by Ann E. Dunbar under the supervision of Robert L. Brown.

The public use tabulations and data files were assembled and the tables and text for this publication were prepared by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Major responsibilities were assigned to Gary V. Kennedy. Contributing staff members were H. Steven Dolan, Michael J. Paris, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

kota, Oregon, Indiana, Ohio, and Michigan—the growth rates in personal income ranged from 0.4 percentage point to 2.0 percentage points less than the Nation's growth rate. California was in the top quintile in 1999 and 2000, and Massachusetts was in the top quintile in 2000. Illinois, Indiana, Iowa, Michigan, Ohio, and Oregon had below-average growth in all 3 years.

In 2001, growth in earnings in the government sector, at 5.4 percent, exceeded the growth in earnings in the private sector, at 2.0 percent, for the first time since 1991.⁴ Since 1991, government-sector earnings increased an average of 4.2 percent, while private-sector earnings increased an average of 5.6 percent.

4. "Private" sector earnings include farm earnings and private nonfarm earnings.

Fastest growing States. For States in the top quintile, earnings growth in government, in construction, in retail trade, in finance, insurance, and real estate, and in services more than offset weakness in other sectors. These States received 21 percent of their total earnings from the government sector, compared with 16 percent for the Nation as a whole.⁵ Thus, growth was concentrated mainly in the State and local government sectors. New Mexico received the largest percentage of its earnings from the government sector, at 28 percent. Only Nevada's percentage, at 15 percent, was below the national average.

The top quintile States account for approximately 10 percent of the U.S. population. Only 3 of the States—Virginia (12), Maryland (19), and Arizona (20)—are among the 20 most populous States. Six of the States—Nevada (35), New Mexico (36), Maine (40), Montana (44), Vermont (49), and Wyoming (50)—had population rankings of 35 or lower.

Slowest growing States. With the exception of North Dakota, the States in the bottom quintile had sharp declines in earnings in both traditional and high-tech manufacturing and declines in wholesale trade. North Dakota and Iowa had large declines in farm earnings.

The bottom quintile States account for approximately a third of the U.S. population. Seven of the States—California (1), Illinois (5), Ohio (7), Michigan (8), Massachusetts (13), Indiana (14), and Washington (15)—are among the 15 most populous States in the Nation.

Per capita personal income for States for 2001

The States in the top quintile for per capita personal income levels in 2001 were Connecticut (\$42,435), Massachusetts (\$38,907), New Jersey (\$38,509), New York (\$36,019), Maryland (\$35,188), New Hampshire (\$34,138), Colorado (\$33,470), Minnesota (\$33,101), Illinois (\$33,023), and California (\$32,702) (table B). These States also composed the top quintile in 2000. The per capita income levels within the quintile ranged from 107 percent (California) to 139 percent (Connecticut) of the national average of \$30,472.

The States in the bottom quintile for per capita personal income levels in 2001 were Mississippi (\$21,750), West Virginia (\$22,881), Arkansas (\$22,887), New Mexico (\$23,155), Montana (\$23,963), Utah (\$24,180), Louisiana (\$24,535), Alabama (\$24,589),

5. Beginning in 2001, wage and salary estimates for the establishments of American Indian Tribal Councils are included in the local government component. Prior to 2001, these estimates were included in the relevant private industry components. For example, wages and salaries that were earned in casinos owned by tribal councils before 2001 were included in the Standard Industrial Classification services component "Amusement and Recreational Services."

Idaho (\$24,621), and South Carolina (\$24,886). South Carolina, which replaced Oklahoma, is the only State that was not also in the bottom quintile in 2000.

Sources of the revisions

Many of the revisions to the national estimates of personal income involve detailed estimation that cannot be replicated at the State level, because the underlying source data are not available for States. These revisions are implicitly incorporated into the State estimates through the use of the national estimates as control totals. In addition, the revisions to the State estimates reflect the incorporation of newly available State-level source data.

For wage and salary disbursements, other labor income, and personal contributions for social insurance, the estimates for 2001 incorporate newly available BLS tabulations of wages and salaries of employees covered by State unemployment insurance (UI) for the fourth quarter of 2001 and revised tabulations for the first three quarters. Previously, the estimates for 2001 were based on preliminary UI data for the first three quarters and on extrapolations for the fourth quarter that were based on data from the BLS monthly Current

Employment Survey.

For farm proprietors' income, the estimates for 1999–2000 incorporate revised national and State estimates of farm income from the U.S. Department of Agriculture (USDA). The estimates for 2001 incorporate new USDA estimates of farm expenses and revised estimates of production income and government subsidy payments.

For nonfarm proprietors' income, the estimates incorporate newly available Internal Revenue Service (IRS) tabulations from the income tax returns of sole proprietors and partnerships for 1999. The estimates for 2000–2001 are now based on extrapolations of the tabulations for 1999.

For dividends, interest, and rent, the estimates for 2000 incorporate newly available IRS tabulations of individual tax returns for 2000, and the estimates for 2001 are based on extrapolations of these tabulations. Previously, the 2000 and 2001 estimates were based on extrapolations of tabulations for 1999.

For transfer payments, the estimates for 2001 incorporate newly available data from agencies that administer benefit programs, such as data from the Social Security Administration on the benefits disbursed un-

New Industry Classifications

The estimates of State personal income for 2001 are now based on the 2002 version of the North American Industry Classification System (NAICS), the common classification system for the United States, Canada, and Mexico that was adopted in 1997.¹ NAICS replaced the 1987 Standard Industrial Classification (SIC) system, which was the basis of the previously published State personal income estimates.²

BEA received State-level estimates of employment and wages—which are the product of the Federal-State Covered Employment and Wages, or ES-202, Program—for 2001 from the Bureau of Labor Statistics (BLS) on a 2002 NAICS basis. Some NAICS classifications had to be adapted for use in BEA's estimates of earnings and employment because BEA provides estimates for the Federal, State, and local governments. For example, the estimates of employment and earnings for teachers employed by local governments are shown by BEA under the category "Local Government" instead of under the

NAICS category "Educational Services." BEA uses ownership codes provided by BLS to identify the government employees. For private-sector employees, BEA prepared earnings and employment estimates at the three-digit NAICS level for 2001 and at the two-digit SIC level for 1958–2000.³ For 2001 only, BEA also prepared State-level earnings and employment estimates with division-level SIC components in order to provide a "bridge" between the NAICS industries and the SIC industries.

In May 2003, BEA will release county and metropolitan area estimates of earnings and employment for 2001 on a NAICS basis. Earnings will be available at a three-digit NAICS level, while employment will be available at the less detailed NAICS sector level. BEA will not prepare 2001 earnings and employment estimates by division-level SIC for counties and metropolitan areas, because suppressions for 2001 are not available from BLS on an SIC basis. Estimates of earnings and employment for 1969–2000 will be published only on the SIC basis.

In July 2003, BEA will release quarterly State estimates of earnings at the NAICS-sector level beginning with the first quarter of 2001. Estimates for earlier quarters will remain on the SIC basis.

1. See John R. Kort, "The North American Classification System in BEA's Economic Accounts," *SURVEY OF CURRENT BUSINESS* 81 (May 2001): 7–13. See also Office of Management and Budget, *North American Industry Classification System: United States, 2002* (Lanham, MD: Bernan Press, 2002). Information on NAICS can be accessed on the Internet at <www.census.gov/epcd/www/naics.html>.

2. See Office of Management and Budget, *Standard Industrial Classification Manual, 1987*, (Washington, DC: U.S. Government Printing Office, 1987).

3. Table 3, at the end of this article, presents earnings estimates on an SIC-basis for 1999–2001. Table 4 presents earnings on a NAICS-basis for 2001.

der the social security retirement and supplemental security income programs and data from the Centers for Medicare and Medicaid Services on the benefits disbursed under the medicare and medicaid programs. Previously, the estimates of these benefits and of most other subcomponents of transfer payments for 2001 were based on extrapolations of 2000 data; data for 2001 were only available for unemployment compensation.

Revisions

Personal income for the Nation was revised up 0.1 percent for 1999, 1.0 percent for 2000, and 0.7 percent for 2001. For 1999, personal income was revised up for 29 States; for 2000, personal income was revised up for 48 States; and for 2001, personal income was revised up for 45 States (table C).

The largest revisions were to personal income in Vermont, which was revised up 0.7 percent for 1999,

1. Revision as a percentage of the previously published estimate; calculated from unrounded data.

2.0 percent for 2000, and 2.2 percent for 2001, and to personal income in Wyoming, which was revised up 0.6 percent for 1999, 1.4 percent for 2000, and 2.1 percent for 2001. For Vermont, upward revisions to dividends, interest, and rent for 1999–2001 contributed to

the upward revisions to personal income. For Wyoming, upward revisions to dividends, interest, and rent and to proprietors' income for 1999–2001 contributed to the upward revisions to personal income.

Tables 1 through 4 follow.

Data Availability

This article presents summary estimates of personal income and disposable personal income for 1996–2001 and of personal income by major source and earnings by industry for 1999–2001. These estimates and more detailed estimates of personal income and employment for States are available interactively on BEA's Web site. Go to <www.bea.gov/bea/regional/spi/> to access these estimates.

The following estimates are available:

- Personal income, per capita personal income, and population for 1929–57 and for 1958–2001
- Disposable personal income and per capita disposable personal income for 1948–57 and for 1958–2001
- Personal income by major source and earnings by industry (North American Industry Classification System (NAICS) three digit) for 2001 and (Standard Industrial Classification (SIC) two digit) for 1958–2000
- Personal income by major source and earnings by major industry (SIC division level) for 1929–57 and for 2001
- Wage and salary disbursements by industry (NAICS three digit) for 2001 and (SIC two digit) for 1958–2000
- Wage and salary disbursements by major industry (SIC division level) for 1929–57 and for 2001
- Full-time and part-time employment by industry (NAICS three digit) for 2001, (SIC two digit) for 1969–2000, and (SIC division level) for 2001
- Full-time and part-time wage and salary employment by industry (NAICS three digit) for 2001, (SIC two digit) for 1969–2000, and (SIC division level) for 2001
- State economic profiles (a selection of personal income and employment data for each State) for 1958–2001
- Transfer payments by major program for 1948–57 and for 1958–2001
- Farm income and expenses (including the major categories of gross receipts and expenses for all farms and for measures of farm income) for 1969–2001
- Personal tax and nontax payments by level of government and by type for 1948–57 and for 1958–2001

In addition, the entire set of estimates for all States will be available in October 2002 on a CD-ROM with an updated description of the sources and methods used to estimate State personal income. To order the CD-ROM *State Personal Income, 1929–2001* (price \$35, product number RCN-0299), call the Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

The State personal income estimates are also available through the members of the BEA User Group, which consists of State agencies and universities that help BEA disseminate the estimates in their States. For a list of the BEA User Group on BEA's Web site, go to <www.bea.gov/bea/regional/docs/usergrp.htm>.

For more information about these estimates, call the Regional Economic Information System at 202-606-5360, fax 202-606-5322, or e-mail reis.remd@bea.gov.

^r Revised.¹ Per capita personal income was computed using midyear population estimates of the Bureau of the Census.² Percent change was calculated from unrounded data.

Note: The personal income level shown for the United States is derived as the sum of the State estimates. It differs from

the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

^r Revised.

1. Per capita disposable personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

NOTE: The personal income level shown for the United States is derived as the sum of the State estimates. It differs from

the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Schedule of BEA News Releases in 2003

January	U.S. International Trade in Goods and Services, November 2002*	Jan. 17	8:30 a.m.
	State Personal Income, 3rd quarter 2002	Jan. 24	9:00 a.m.
	Gross Domestic Product, 4th quarter 2002 (advance)	Jan. 30	8:30 a.m.
	Personal Income and Outlays, December 2002.	Jan. 31	8:30 a.m.
February	U.S. International Trade in Goods and Services, December 2002*	Feb. 20	8:30 a.m.
	Gross Domestic Product, 4th quarter 2002 (preliminary)	Feb. 28	8:30 a.m.
March	Personal Income and Outlays, January 2003	Mar. 3	8:30 a.m.
	U.S. International Trade in Goods and Services, January 2003*	Mar. 12	8:30 a.m.
	U.S. International Transactions, 4th quarter 2002	Mar. 14	8:30 a.m.
	Gross Domestic Product, 4th quarter 2002 (final) and Corporate Profits, 4th quarter 2002	Mar. 27	8:30 a.m.
	Personal Income and Outlays, February 2003.	Mar. 28	8:30 a.m.
April	U.S. International Trade in Goods and Services, February 2003*	April 10	8:30 a.m.
	State Personal Income, 4th quarter 2002 and Per Capita Personal Income, 2002 (preliminary)	April 23	9:00 a.m.
	Gross Domestic Product, 1st quarter 2003 (advance)	April 25	8:30 a.m.
	Personal Income and Outlays, March 2003	April 28	8:30 a.m.
May	Local Area Personal Income, 1999–2001	May 6	9:00 a.m.
	U.S. International Trade in Goods and Services, March 2003*	May 13	8:30 a.m.
	Gross State Product by Industry, 1999–2001	May 22	9:00 a.m.
	Gross Domestic Product, 1st quarter 2003 (preliminary) and Corporate Profits, 1st quarter 2003 (preliminary)	May 29	8:30 a.m.
	Personal Income and Outlays, April 2003	May 30	8:30 a.m.
June	Foreign Investors' Spending to Acquire or Establish U.S. Businesses, 2002.	June 3	10:00 a.m.
	U.S. International Trade in Goods and Services, April 2003*	June 13	8:30 a.m.
	U.S. International Transactions, 1st quarter 2003	June 19	8:30 a.m.
	Gross Domestic Product, 1st quarter 2003 (final) and Corporate Profits, 1st quarter 2003 (revised)	June 26	8:30 a.m.
	Personal Income and Outlays, May 2003.	June 27	8:30 a.m.
	International Investment Position of the United States, 2002.	June 30	10:00 a.m.

Schedule of BEA News Releases in 2003

July	U.S. International Trade in Goods and Services, May 2003*	July 11	8:30 a.m.
	State Personal Income, 1st quarter 2003.	July 23	9:00 a.m.
	Gross Domestic Product, 2nd quarter 2003 (advance)	July 31	8:30 a.m.
August	Personal Income and Outlays, June 2003	Aug. 1	8:30 a.m.
	U.S. International Trade in Goods and Services, June 2003*	Aug. 14	8:30 a.m.
	Gross Domestic Product, 2nd quarter 2003 (preliminary) and Corporate Profits, 2nd quarter 2003 (preliminary)	Aug. 28	8:30 a.m.
	Personal Income and Outlays, July 2003.	Aug. 29	8:30 a.m.
September	U.S. International Trade in Goods and Services, July 2003*	Sept. 11	8:30 a.m.
	U.S. International Transactions, 2nd quarter 2003.	Sept. 15	8:30 a.m.
	Gross Domestic Product, 2nd quarter 2003 (final) and Corporate Profits, 2nd quarter 2003 (revised)	Sept. 26	8:30 a.m.
	Personal Income and Outlays, August 2003	Sept. 29	8:30 a.m.
October	U.S. International Trade in Goods and Services, August 2003*	Oct. 10	8:30 a.m.
	State Personal Income, 2nd quarter 2003	Oct. 23	9:00 a.m.
	Gross Domestic Product, 3rd quarter 2003 (advance)	Oct. 30	8:30 a.m.
	Personal Income and Outlays, September 2003	Oct. 31	8:30 a.m.
November	U.S. International Trade in Goods and Services, September 2003*	Nov. 13	8:30 a.m.
	Gross Domestic Product, 3rd quarter 2003 (preliminary) and Corporate Profits, 3rd quarter 2003 (preliminary)	Nov. 25	8:30 a.m.
	Personal Income and Outlays, October 2003	Nov. 26	8:30 a.m.
December	U.S. International Trade in Goods and Services, October 2003*	Dec. 12	8:30 a.m.
	U.S. International Transactions, 3rd quarter 2003	Dec. 16	8:30 a.m.
	Gross Domestic Product, 3rd quarter 2003 (final) and Corporate Profits, 3rd quarter 2003 (revised).	Dec. 23	8:30 a.m.
	Personal Income and Outlays, November 2003.	Dec. 23	8:30 a.m.

January to June *Joint release by Bureau of the Census and the Bureau of Economic Analysis.

BEA Current and Historical Data

National, International, and Regional Data

This section presents an extensive selection of economic statistics prepared by the Bureau of Economic Analysis (BEA) and a brief selection of collateral statistics prepared by other Government agencies and private organizations. Series that originate in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

BEA's economic statistics are available on BEA's Web site at <www.bea.gov>. The site contains data, articles, news releases, and other information from BEA's national, industry, international, and regional programs.

The tables present annual [A], quarterly [Q], and monthly [M] data

National Data

A. Selected NIPA tables [A, Q]	
S. Summary tables.....	D-2
1. National product and income	D-3
2. Personal income and outlays	D-7
3. Government current receipts and expenditures.....	D-8
4. Foreign transactions.....	D-12
5. Saving and investment	D-14
6. Income and employment by industry	D-17
7. Quantity and price indexes.....	D-18
8. Supplemental tables	D-25
B. Other NIPA and NIPA-related tables	
B.1 Personal income [A, M]	D-30
B.2 Disposition of personal income [A, M].....	D-30
B.3 Gross domestic product by industry [A].....	D-31
B.4 Personal consumption expenditures by type [A].....	D-32
B.5 Private fixed investment in structures by type [A].....	D-33
B.6 Private fixed investment in equipment and software by type [A].....	D-33
B.7 Compensation and wage and salary accruals by industry [A].....	D-34
B.8 Employment by industry [A].....	D-35
B.9 Wage and salary accruals by employee and by industry [A].....	D-36
B.10 Farm sector output, gross product, and national income [A].....	D-37
B.11 Housing sector output, gross product, and national income [A].....	D-37
B.12 Net stock of private fixed assets by type [A].....	D-38
C. Historical measures	
C.1 GDP and other major NIPA aggregates	D-39
D. Domestic perspectives [A, Q, M].....	D-42
E. Charts	
Selected NIPA series.....	D-44
Other indicators of the domestic economy	D-50

International Data

F. Transactions tables	
F.1 U.S. international transactions in goods and services [A, M]	D-52
F.2 U.S. international transactions [A, Q]	
F.3 U.S. international transactions by area [Q]	
F.4 Private services transactions [A]	
G. Investment tables [A]	
G.1 U.S. international investment position	D-54
G.2 USDIA: Selected items	D-55
G.3 Selected financial and operating data of foreign affiliates of U.S. companies.....	D-56
G.4 FDIUS: Selected items.....	D-57
G.5 Selected financial and operating data of U.S. affiliates of foreign companies.....	D-58
H. International perspectives [A, Q, M]	D-59
I. Charts	
The United States in the international economy	D-60

Regional Data

J. State and regional tables	
J.1 Personal income [Q].....	D-61
J.2 Personal income and per capita personal income [A]	D-62
J.3 Disposable personal income and per capita disposable personal income [A]	D-63
J.4 Gross state product [A]	D-64
K. Local area table	
K.1 Personal income and per capita personal income by metropolitan area [A]	D-65
L. Charts	
Selected regional estimates	D-67

Appendixes

A: Additional information about the NIPA estimates	
Statistical conventions.....	D-69
Reconciliation tables [A, Q]	D-70
B: Suggested reading.....	D-71

National Data

A. Selected NIPA Tables

The tables in this section include the most recent estimates of gross domestic product and its components; these estimates were released on September 27, 2002 and include the “final” estimates for the second quarter of 2002. Also included are revised estimates of wages and salaries and affected income-side series for the first quarter of 2002. These revisions permit the early incorporation of seasonally adjusted quarterly information from comprehensive Bureau of Labor Statistics tabulations of wages and salaries of employees covered by State unemployment insurance. For additional information about this change in methodology, see Eugene P. Seskin and Stephanie McCulla, “Annual Revision of the National Income and Product Accounts,” SURVEY OF CURRENT BUSINESS 82 (August 2002): 7–34.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly. In most of these tables, annual estimates are also shown.

The news release on gross domestic product is available within minutes of the time of release, and the “Selected NIPA Tables” are available later that day, on BEA’s Web site <www.bea.gov>.

The “Selected NIPA Tables” are also available on printouts or diskettes from BEA. To order NIPA subscription products, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666).

S. Summary Tables

Table S.1. Summary of Percent Change From Preceding Period in Real Gross Domestic Product and Related Measures
[Percent]

	2000	2001	Seasonally adjusted at annual rates				
			2001			2002	
			II	III	IV	I	II
Gross domestic product	3.8	.3	-1.6	-.3	2.7	5.0	1.3
Personal consumption expenditures	4.4	2.5	1.4	1.5	6.0	3.1	1.8
Durable goods	8.2	6.0	5.3	4.6	33.6	-6.3	2.0
Nondurable goods	3.9	2.0	-.3	1.3	3.6	7.9	-.1
Services	3.8	2.0	1.5	.9	2.1	2.9	2.7
Gross private domestic investment	6.2	-10.7	-17.6	-5.2	-17.3	18.2	7.9
Fixed investment	6.1	-3.8	-11.1	-4.3	-8.9	-.5	-1.0

Structures	6.5	-1.7	-8.4	2.9	-30.1	-14.2	-17.6
Equipment and software	8.2	-6.4	-16.7	-9.2	-2.5	-2.7	3.3
Residential	1.1	.3	-.5	.4	-3.5	14.2	2.7
Change in private inventories							
Net exports of goods and services							
Exports	9.7	-5.4	-12.4	-17.3	-9.6	3.5	14.3
Goods	11.3	-5.9	-16.1	-18.6	-7.9	-3.4	15.9
Services	6.0	-4.0	-2.5	-13.9	-13.8	21.7	10.7
Imports	13.2	-2.9	-6.8	-11.8	-5.3	8.5	22.2
Goods	13.5	-3.3	-9.4	-9.6	-3.3	3.7	27.9
Services	11.6	-.5	8.5	-23.2	-16.5	35.7	-2.1
Government consumption expenditures and gross investment	2.7	3.7	5.6	-1.1	10.5	5.6	1.4
Federal	1.3	4.8	6.0	1.2	13.5	7.4	7.5
National defense	-.1	5.0	2.7	4.6	14.3	11.6	7.8
Nondefense	3.6	4.5	12.0	-4.5	12.1	.4	6.9
State and local	3.5	3.1	5.4	-2.3	8.9	4.6	-1.7
Addenda:							
Final sales of domestic product	3.7	1.5	-.4	-.2	4.2	2.4	-.1
Gross domestic purchases	4.4	.4	-1.1	-.1	2.9	5.6	2.6
Final sales to domestic purchasers	4.3	1.6	.0	.1	4.3	3.0	1.3
Gross national product	3.7	-.2	-.8	-1.1	3.7	3.7	.4
Disposable personal income	4.8	1.8	-.6	10.5	-7.6	14.5	3.6

NOTE. Percent changes from preceding period in the current-dollar and price measures for these series are shown in table 8.1.

Table S.2. Summary of Contributions to Percent Change in Real Gross Domestic Product

	2000	2001	Seasonally adjusted at annual rates				
			2001			2002	
			II	III	IV	I	II
Percent change at annual rate:							
Gross domestic product	3.8	.3	-1.6	-.3	2.7	5.0	1.3
Percentage points at annual rates:							
Personal consumption expenditures	2.94	1.67	.92	.97	4.05	2.22	1.22
Durable goods	.65	.48	.42	.36	2.45	-.55	.16
Nondurable goods	.77	.39	-.07	.25	.73	1.57	-.02
Services	1.51	.80	.57	.35	.87	1.20	1.08
Gross private domestic investment	1.08	-1.90	-3.09	-.81	-2.88	2.53	1.16
Fixed investment	1.03	-.65	-1.95	-.72	-1.49	-.07	-.15
Nonresidential	.98	-.66	-1.93	-.73	-1.33	-.66	-.27
Structures	.20	-.05	-.29	.10	-1.12	-.44	-.53
Equipment and software	.78	-.61	-1.64	-.83	-.21	-.22	.26
Residential	.05	.01	-.02	.02	-.16	.60	.12
Change in private inventories	.06	-1.24	-1.14	-.09	-1.39	2.60	1.31
Net exports of goods and services	-.75	-.18	-.42	-.24	-.28	-.75	-1.40
Exports	1.04	-.59	-1.42	-1.94	-.99	.33	1.29
Goods	.85	-.47	-1.34	-1.49	-.56	-.23	.99
Services	.19	-.13	-.08	-.45	-.42	.56	.30
Imports	-1.79	.42	1.00	1.70	.70	-1.08	-2.69
Goods	-1.54	.40	1.18	1.17	.37	-.40	-2.74
Services	-.24	.01	-.18	.53	.33	-.68	.05
Government consumption expenditures and gross investment	.49	.65	1.00	-.21	1.85	1.04	.27
Federal	.08	.29	.36	.07	.80	.47	.47
National defense	.00	.19	.10	.18	.54	.46	.32
Nondefense	.08	.10	.25	-.11	.26	.01	.16
State and local	.41	.36	.64	-.28	1.05	.56	-.21

NOTE. More detailed contributions to percent change in real gross domestic product are shown in table 8.2. Contributions to percent change in major components of real gross domestic product are shown in tables 8.3 through 8.6.

Goods	1,313.7	1,270.5	1,281.1	1,249.2	1,238.7	1,250.0	1,329.2
Services	223.6	222.4	233.5	218.6	208.9	225.5	224.3
Government consumption expenditures and gross investment	1,582.5	1,640.4	1,638.0	1,633.3	1,674.5	1,697.3	1,703.3
Federal	544.4	570.6	567.2	568.9	587.2	597.8	608.7
National defense	348.7	366.0	361.4	365.5	378.0	388.5	395.8
Nondefense	195.6	204.4	205.6	203.2	209.1	209.3	212.9
State and local	1,037.4	1,069.4	1,070.2	1,064.1	1,087.1	1,099.3	1,094.7
Residual	2.1	22.6	26.7	29.1	20.2	20.2	25.1

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Percent changes from preceding period for selected items in this table are shown in table 8.1; contributions to the percent change in real gross domestic product are shown in table 8.2.

Chain-type quantity indexes for the series in this table are shown in table 7.1.

Table 1.3. Gross Domestic Product by Major Type of Product
[Billions of dollars]

	2000	2001	Seasonally adjusted at annual rates				
			2001			2002

Gross domestic product less motor vehicle output.....	8,854.8	8,896.6	8,878.5	8,864.5	8,915.7	9,022.6	9,045.9

1. Estimates for durable goods and nondurable goods for 1997 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

Percent changes from preceding period for gross domestic product and for final sales of domestic product are shown in table 8.1.

Chain-type quantity indexes for the series in this table are shown in table 7.17.

Table 1.5. Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers
[Billions of dollars]

Gross domestic product	9,824.6	10,082.2	10,049.9	10,097.7	10,152.9	10,313.1	10,376.9
Less: Exports of goods and services.....	1,101.1	1,034.1	1,059.7	1,005.8	971.1	977.5	1,018.1
Plus: Imports of goods and services.....	1,466.6	1,383.0	1,425.3	1,318.4	1,315.6	1,337.5	1,443.7
Equals: Gross domestic purchases	10,190.1	10,431.0	10,415.5	10,410.4	10,497.4	10,673.1	10,802.4
Less: Change in private inventories.....	63.6	-60.3	-57.1	-60.6	-96.5	-29.9	3.4
Equals: Final sales to domestic purchasers	10,126.6	10,491.4	10,472.6	10,470.9	10,593.9	10,703.1	10,799.0

NOTE: Percent changes from preceding period for selected items in this table are shown in table 8.1.

Table 1.6. Relation of Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers
[Billions of chained (1996) dollars]

Gross domestic product	9,191.4	9,214.5	9,193.1	9,186.4	9,248.8	9,363.2	9,392.4
Less: Exports of goods and services.....	1,137.2	1,076.1	1,098.8	1,048.0	1,021.8	1,030.6	1,065.5
Plus: Imports of goods and services.....	1,536.0	1,492.0	1,513.6	1,467.0	1,447.2	1,477.1	1,552.9
Equals: Gross domestic purchases	9,561.2	9,600.7	9,577.1	9,575.8	9,645.3	9,778.2	9,840.8
Less: Change in private inventories.....	65.0	-61.4	-58.3	-61.8	-98.4	-28.9	4.9
Equals: Final sales to domestic purchasers	9,490.7	9,644.9	9,618.7	9,620.3	9,722.3	9,794.4	9,826.0

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Percent changes from preceding period for selected series in this table are shown in table 8.1.

Chain-type quantity indexes for selected series in this table are shown in table 7.2.

Table 1.7. Gross Domestic Product by Sector
[Billions of dollars]

Gross domestic product	9,824.6	10,082.2	10,049.9	10,097.7	10,152.9	10,313.1	10,376.9
Business ¹	8,311.4	8,482.7	8,459.5	8,484.6	8,525.2	8,656.2	8,700.1
Nonfarm ²	8,233.6	8,402.1	8,379.9	8,402.7	8,443.7	8,567.6	8,631.5
Nonfarm less housing.....	7,435.9	7,571.1	7,549.3	7,566.4	7,601.5	7,712.8	7,757.5

Federal.....	289.4	291.3	291.1	291.6	292.0	294.3	296.0
State and local.....	669.0	687.0	683.0	691.0	696.5	699.7	701.7
Residual.....	-6.5	-2.4	-3	.8	-5.6	-5.4	-6

1. Equals gross domestic product less gross product of households and institutions and of general government.

2. Equals gross domestic business product less gross farm product.

3. Equals compensation of general government employees plus general government consumption of fixed capital as shown in table 3.8.

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Chain-type quantity indexes for the series in this table are shown in table 7.14.

Government enterprises	29.2	31.7	30.1	36.0	30.6	30.9	31.1
Equals: Net national product	7,994.4	7,928.1	7,933.7	7,838.8	7,961.1	8,022.0	8,001.6
Addenda:							
Gross domestic income ¹	9,311.6	9,321.7	9,296.3	9,293.6	9,369.5	9,463.1	9,541.4
Gross national income ²	9,336.4	9,344.5	9,327.6	9,307.1	9,404.2	9,467.4	9,525.7
Net domestic product	7,969.7	7,905.4	7,902.6	7,825.3	7,926.7	8,017.7	8,017.0

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.

2. Gross national income deflated by the implicit price deflator for gross national product.

NOTE: Except as noted in footnotes 1 and 2, chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

The chain-type quantity index for gross national product is shown in table 7.3.

Table 1.11. Command-Basis Real Gross National Product

Addendum:							
Terms of trade ²	101.2	103.2	102.1	105.7	104.0	104.2	102.6

1. Exports of goods and services and income receipts deflated by the implicit price deflator for imports of goods and services and income payments.

2. Ratio of the implicit price deflator for exports of goods and services and income receipts to the corresponding implicit price deflator for imports divided by 100.

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Percent changes from preceding period for gross national product are shown in table 8.1.

Chain-type quantity indexes for the series in this table are shown in table 7.3.

1. Effective with the estimates scheduled for release on November 26, 2002, chained-dollar gross product of nonfinancial corporate business for 1999 to 2002 will be revised to reflect revisions to the gross product price indexes for nonfinancial industries.

2. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100.

3. Chained-dollar net product of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

2. Personal Income and Outlays

Personal consumption expenditures less food and energy	5,057.5	5,204.5	5,179.7	5,202.4	5,293.6	5,322.1	5,353.5

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Chain-type quantity indexes for the series in this table are shown in table 7.4.

Contributions to the percent change in real personal consumption expenditures are shown in table 8.3.

State and local ⁵	584.9	598.9	595.5	602.5	607.0	609.1	610.3

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addenda.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

5. Beginning with 2001, in accordance with the Consolidated Appropriations Act of 2001, includes compensation of employees of Indian tribal governments reclassified from the private sector.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

See footnotes to table 3.7.

Chain-type quantity indexes for the series in this table are shown in table 7.11.

Contributions to percent change in real government consumption expenditures and gross investment are shown in table 8.6.

Addendum:							
Compensation of general government employees ³ ..	120.9	121.7	121.6	121.4	121.8	123.1	124.5

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addendum.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the line in the addendum.

Chain-type indexes for the series in this table are shown in table 7.12. See footnotes to table 3.10.

Addenda:							
Exports of agricultural goods ²	68.3	70.5	70.5	68.9	72.7	72.3	70.3
Exports of nonagricultural goods.....	765.4	714.9	729.7	691.4	673.1	667.1	696.0
Imports of nonpetroleum goods.....	1,225.5	1,177.1	1,182.9	1,159.7	1,148.1	1,164.1	1,236.5

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.

2. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

* Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For exports and for imports, the residual line is the difference between the aggregate line and the sum of the most detailed lines.

Chain-type quantity indexes for the series in this table are shown in table 7.10.

Contributions to the percent change in real exports and in real imports of goods and services are shown in table 8.5.

See footnotes to table 4.3.

5. Saving and Investment

Software ²	184.4	182.0	181.7	180.5	180.6	179.0	184.3
Other	187.4	163.9	165.7	158.6	151.2	154.1	158.5
Industrial equipment	160.8	153.8	156.4	149.2	144.7	148.3	145.6
Transportation equipment	186.6	163.6	161.6	160.0	165.4	151.5	143.4
Other	144.5	140.7	140.6	141.0	136.2	134.6	140.1
Residential	372.4	373.5	374.0	374.3	371.0	383.6	386.1
Structures	363.0	364.0	364.6	365.0	361.5	373.9	376.4
Single family	191.0	192.6	193.1	194.1	191.3	197.2	198.4
Multifamily	23.0	24.4	24.3	24.3	25.1	27.0	26.8
Other structures	149.1	146.9	147.2	146.5	145.1	149.6	151.0
Equipment	9.4	9.5	9.4	9.4	9.6	9.7	9.7
Residual	-67.2	-62.2	-60.9	-50.5	-68.0	-81.1	-90.0

1. Includes new computers and peripheral equipment only. Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component; accurate estimates of these contributions are shown in table 8.4.

2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Chain-type quantity indexes for the series in this table are shown in table 7.6. Contributions to the percent change in real private fixed investment are shown in table 8.4.

1. This series is derived from the Census Bureau series "current cost inventories."

2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS).

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS). Chained (1996) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Nonfarm inventories to final sales of goods and structures.....	3.65	3.60	3.44	3.42	3.49

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in the private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS).

Nonfarm inventories to final sales of goods and structures.....	3.77	3.75	3.64	3.60	3.64

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS). Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines for inventories.

NOTE. Chain-type quantity and price indexes are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current-

to chained-dollar output multiplied by 100.

Percent changes from preceding period for items in this table are shown in table 8.1. Contributions to the percent change in real gross domestic product are shown in table 8.2.

Table 7.2. Quantity and Price Indexes for Gross Domestic Product, Final Sales, and Purchases
[Index numbers, 1996=100]

	2000	2001	Seasonally adjusted				
			2001			2002

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all

general government employees is shown in the addenda.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

5. Beginning with 2001, in accordance with the Consolidated Appropriations Act of 2001, includes compensation of employees of Indian tribal governments reclassified from the private sector.

Nonprofit institutions	110.78	115.20	114.75	116.11	116.30	117.03	118.38
General government ³	112.88	116.48	116.26	116.80	117.42	119.13	119.77
Federal	111.74	114.23	114.29	114.44	114.47	118.97	119.60
State and local	113.41	117.47	117.14	117.85	118.71	119.25	119.90

1. Equals gross domestic product less gross product of households and institutions and of general government.
 2. Equals gross domestic business product less gross farm product.
 3. Equals compensation of general government employees plus general government consumption of fixed capital.

Table 7.15. Price, Costs, and Profit Per Unit of Real Gross Product of Nonfinancial Corporate Business
[Dollars]

Price per unit of real gross product of nonfinancial corporate business ¹	1.043	1.061	1.061	1.067	1.058	1.056	1.055
Compensation of employees (unit labor cost)	.698	.708	.712	.710	.697	.695	.693
Unit nonlabor cost	.254	.272	.271	.276	.273	.273	.274
Consumption of fixed capital	.118	.129	.127	.136	.129	.131	.132
Indirect business tax and nontax liability plus business transfer payments less subsidies	.100	.104	.105	.101	.105	.105	.105
Net interest	.036	.039	.039	.039	.039	.037	.037
Corporate profits with inventory valuation and capital consumption adjustments (unit profits from current production)	.091	.081	.078	.080	.088	.088	.088
Profits tax liability	.034	.024	.027	.026	.018	.023	.025
Profits after tax with inventory valuation and capital consumption adjustments	.057	.056	.051	.054	.070	.065	.063

1. The implicit price deflator for gross product of nonfinancial corporate business divided by 100.
 Note: Effective with the release scheduled for November 26, 2002, the estimates beginning with 1999 will be revised to reflect revisions to the industry-based price indexes for gross product of nonfinancial corporate business.

Table 7.16B. Implicit Price Deflators for Private Inventories by Industry
[Index numbers, 1996=100]

1. Except for exports and imports, consists of new trucks only.

2. Consists of final sales and change in private inventories of new autos assembled in the United States.

3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

Personal consumption expenditures less food and energy.....	3.75	2.35	2.38	1.44	5.81	1.78	1.94

1. Consists of gasoline, fuel oil, and other energy goods, and of electricity and gas.

NOTE: The quantity indexes on which the estimates in this table are based are shown in table 7.4. The estimates in this table differ from those in table 8.2 because this table shows contributions to real personal consumption expenditures, whereas table 8.2 shows contributions to real gross domestic product.

1. Excludes software "embedded" or bundled, in computers and other equipment.

2. For some components of final sales of computers, includes computer parts.

NOTE: The quantity indexes on which the estimates in this table are based are shown in tables 7.1, 7.2, 7.4, 7.6, 7.9, 7.11, and 7.17.

1. Includes new computers and peripheral equipment only.
 2. Excludes software "embedded," or bundled, in computers and other equipment.
 Note: The quantity indexes on which the estimates in this table are based are shown in table 7.6. The estimates in this table differ from those in table 8.2 because this table shows contributions to real private fixed investment, whereas table 8.2 shows contributions to real gross domestic product.

Table 8.5. Contributions to Percent Change in Real Exports and in Real Imports of Goods and Services by Type of Product

	2000	2001	Seasonally adjusted at annual rates				
			2001			2002	
			II	III	IV	I	II
Percent change at annual rate:

Consumer goods, except automotive.....	3.33	.33	-.52	-1.29	-.62	2.42	7.03
Other.....	.70	.07	2.07	-.09	.86	-2.16	2.32
Imports of services¹.....	1.81	-.08	1.29	-3.79	-2.54	5.31	-1.10

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment were reclassified from goods to services.

Note: The quantity indexes on which the estimates in this table are based are shown in table 7.10. The estimates in this table differ from those in table 8.2 because this table shows contributions to real exports and to real imports, whereas table 8.2 shows contributions to real gross domestic product. Because imports are subtracted in the calculation of gross domestic product, the contributions of components of real imports have opposite signs in this table and in table 8.2.

Equipment and software.....	.23	.16	.22	.20	-.06	-.25	-.07

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

Note: The quantity indexes on which the estimates in this table are based are shown in table 7.11. The estimates in this table differ from those in table 8.2 because this table shows contributions to real government consumption expenditures and gross investment, whereas table 8.2 shows contributions to real gross domestic product.

Sales of imported new autos ³	85.4	84.6	85.5	82.2	88.0	83.7	85.1

1. Except for exports and imports, consists of new trucks only.
2. Consists of final sales and change in private inventories of new autos assembled in the United States.
3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Chain-type quantity indexes for the series in this table are shown in table 7.18B.

^r Preliminary.

^p Revised. Revisions include changes to series affected by the introduction of revised wage and salary estimates for the first quarter of 2002.

1. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.

2. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized

population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates. Estimates for January 1991 through June 2000 are interpolations between Bureau of the Census population estimates for 1990 and for 2000; estimates for July 2000 forward are BEA extrapolations. BEA will substitute Bureau of the Census population estimates for 1991 forward when they are released.
Source: U.S. Bureau of Economic Analysis.

Annual Estimates

Except as noted for table B.3 below, these tables are derived from the NIPA tables that were published in the August and September 2002 issues of the SURVEY OF CURRENT BUSINESS, and the estimates reflect the most recent comprehensive and annual NIPA revisions.

1. The current-dollar statistical discrepancy equals gross domestic product (GDP) measured as the sum of expenditures less gross domestic income—that is, GDP measured as the costs incurred and profits earned in domestic production. The chained (1996) dollar statistical discrepancy equals the current-dollar statistical discrepancy deflated by the implicit price deflator for gross domestic business product.

2. Equals GDP in chained (1996) dollars less the statistical discrepancy and the sum of GDP by industry of the detailed industries. The value of not allocated by industry reflects the nonadditivity of chained-dollar estimates

and the differences in source data used to estimate real GDP by industry and the expenditures measure of real GDP.

NOTE. Estimates are based on the 1987 Standard Industrial Classification. The table is derived from tables 1 and 6 in "Gross Domestic Product by Industry for 1998–2000" in the November 2001 SURVEY. This table corrects errors in the current-dollar estimates for total "Services" for 1998–2000 that were in table 1.

Table B.4. Personal Consumption Expenditures by Type of Expenditure

* Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component.

- Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.
- Includes luggage.
- Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.
- Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
- Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
- Consists of transient hotels, motels, clubs, schools, and other group housing.
- Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.
- Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.
- Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.
- Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and express charges, premiums for fire and theft insurance on personal property less benefits and dividends, and miscellaneous household operation services.
- Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
- Consists of osteopathic physicians, chiropractors, private duty nurses, chiroprodists, podiatrists, and others providing health and allied services, not elsewhere classified.
- Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.
- Consists of (1) premiums, less benefits and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including consumption of fixed capital) of nonprofit and self-insured health plans.
- Consists of premiums, less benefits and dividends, for income loss insurance.
- Consists of premiums, less benefits and dividends, for privately administered workers' compensation.
- Consists of (1) operating expenses of commercial life insurance carriers, (2) administrative expenses of private noninsured pension plans and publicly administered government employee retirement plans, and (3) premiums, less benefits and dividends, of fraternal benefit societies. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies. For pension and retirement plans, excludes services furnished without payment by banks, credit agencies, and investment companies.

- Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.

- Consists of premiums, less benefits and dividends, for motor vehicle insurance.
- Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares.
- Consists of admissions to professional and amateur athletic events and to racetracks.
- Consists of dues and fees excluding insurance premiums.
- Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; sightseeing buses and guides; private flying operations; casino gambling; and other commercial participant amusements.
- Consists of net receipts of lotteries and expenditures for purchases of pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video cassette rentals, and recreational services, not elsewhere classified.
- For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.
- For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.
- Consists of (1) fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2) current expenditures (including consumption of fixed capital) by research organizations and foundations for education and research.
- For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious, social welfare, foreign relief, and political organizations, museums, libraries, and foundations. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and excludes relief payments within the United States and expenditures by foundations for education and research. For proprietary and government institutions, equals receipts from users.
- Beginning with 1981, includes U.S. students' expenditures abroad; these expenditures were \$0.3 billion in 1981.
- Beginning with 1981, includes nonresidents' student and medical care expenditures in the United States; student expenditures were \$2.2 billion and medical expenditures were \$0.4 billion in 1981.

Note: Consumer durable goods are designated (d), nondurable goods (n.d.), and services (s.)
 Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Table B.5. Private Fixed Investment in Structures by Type

Residual.....				-9	-9	-1.0

1. Consists of office buildings, except those constructed at industrial sites and those constructed by utilities for their own use.

2. Consists of stores, restaurants, garages, service stations, warehouses, mobile structures, and other buildings used for commercial purposes.

3. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

4. Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.

5. Consists primarily of dormitories and of fraternity and sorority houses.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Plus: Net sales of used equipment.....	39.3	38.5	32.5			
Net exports of used equipment.....	.4	-.2	.0			
Sale of equipment scrap.....	3.3	3.4	2.9			
Equals: Private fixed investment in new equipment and software.....	932.6	992.7	912.4			

1. Includes new computers and peripheral equipment only. Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component.

2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

n.e.c. Not elsewhere classified.

1. Beginning with 2001, reflects the reclassification of employees of Indian tribal governments from the private sector in accordance with the Consolidated Appropriations Act of 2001.

2. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.

3. Consists of museums, botanical and zoological gardens; engineering and management services; and services, not elsewhere classified.

4. Includes Coast Guard.

5. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE: Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to average weekly hours per employee on full-time schedules.

2. Beginning with 2001, reflects the reclassification of employees of Indian tribal governments from the private sector in accordance with the Consolidated Appropriations Act of 2001.

3. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.

4. Consists of museums, botanical and zoological gardens; engineering and management services; and services, not elsewhere classified.

5. Includes Coast Guard.

6. Includes estimates of foreign professional workers and unaccompanied Mexican migratory workers employed temporarily in the United States.

NOTE. Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

Table B.10. Farm Sector Output, Gross Product, and National Income

	Billions of dollars			Billions of chained (1996) dollars		
	1999	2000	2001	1999	2000	2001
Farm output	207.5	214.3	221.3	244.1	249.2	246.1
Cash receipts from farm marketings	191.4	199.4	200.9	226.2	233.4	224.4
Crops	95.7	99.8	94.3	125.2	130.9	122.9
Livestock	95.7	99.7	106.6	101.1	102.9	101.3
Farm housing	7.2	7.6	8.0	6.1	6.0	5.9
Farm products consumed on farms5	.6	.6	.5	.5	.5
Other farm income	9.9	8.9	10.3	11.8	10.6	12.2
Change in farm inventories	-1.5	-2.2	1.6	-2.0	-2.5	2.0
Crops	-9	-1.6	2.1	-1.4	-2.2	3.6
Livestock	-6	-6	-5	-6	-6	-4
Less: Intermediate goods and services purchased	132.3	136.5	140.7	137.2	133.3	134.6
Intermediate goods and services, other than rent	118.6	122.2	126.1	123.1	119.5	120.8
Rent paid to nonoperator landlords	13.8	14.2	14.7	14.1	13.8	13.8
Equals: Gross farm product	75.2	77.8	80.6	108.1	120.5	114.3
Less: Consumption of fixed capital	28.9	28.7	29.4	27.7	27.0	27.3
Equals: Net farm product	46.3	49.2	51.2	80.9	97.9	89.5
Less: Indirect business tax and nontax liability	5.3	5.4	5.6
Plus: Subsidies to operators	18.4	19.5	17.7
Equals: Farm national income	59.3	63.3	63.2
Compensation of employees	19.3	19.3	21.5
Wage and salary accruals	16.5	16.6	18.4
Supplements to wages and salaries	2.9	2.7	3.1
Proprietors' income and corporate profits with inventory valuation and capital consumption adjustments	29.6	33.2	30.9
Proprietors' income	27.7	22.6	19.0
Corporate profits	1.9	10.6	11.8
Net interest	10.3	10.9	10.8

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Table B.11. Housing Sector Output, Gross Product, and National Income

	Billions of dollars			Billions of chained (1996) dollars		
	1999	2000	2001	1999	2000	2001

Nonfarm housing	869.2	912.7	968.1	796.4	811.2	827.8
Owner-occupied	666.4	704.9	751.0	610.7	627.3	643.5
Tenant-occupied	202.8	207.8	217.1	185.8	184.0	184.3
Farm housing	7.2	7.6	8.0	6.1	6.0	5.9
Less: Intermediate goods and services consumed	116.9	116.3	138.4	105.5	101.3	115.9
Equals: Gross housing product	759.5	804.0	837.6	697.0	716.1	717.5
Nonfarm housing	753.6	797.8	831.1	691.9	711.0	712.6
Owner-occupied	576.3	615.5	642.3	529.1	549.9	552.1
Tenant-occupied	177.4	182.2	188.8	162.8	161.1	160.5
Farm housing	5.9	6.3	6.5	5.1	5.1	4.9
Less: Consumption of fixed capital	145.4	152.5	166.1	132.2	132.7	140.0
Capital consumption allowances	77.8	81.8	88.4
Less: Capital consumption adjustment	-67.6	-70.7	-77.7
Equals: Net housing product	614.1	651.5	671.4	478.7	494.5	489.4
Less: Indirect business tax and nontax liability plus business transfer payments	135.7	140.7	146.0
Plus: Subsidies less current surplus of government enterprises	23.7	23.8	24.3
Equals: Housing national income	502.2	534.6	549.8
Compensation of employees	10.0	10.9	11.3
Proprietors' income with inventory valuation and capital consumption adjustments	19.7	18.5	18.1
Rental income of persons with capital consumption adjustment	130.7	128.1	118.9
Corporate profits with inventory valuation and capital consumption adjustments	4.1	4.1	4.0
Net interest	337.6	373.1	397.5

1. Equals personal consumption expenditures for housing less expenditures for other housing as shown in table B.4.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Table B.12. Net Stock of Private Fixed Assets; Equipment, Software, and Structures; by Type
 [Yearend estimates]

	Current-cost valuation (Billions of dollars)						Chain-type quantity indexes (1996=100)

C. Historical Measures

This table is derived from the "GDP and Other Major NIPA Series" tables that were published in the August 2002 issue of the SURVEY OF CURRENT BUSINESS and from the "Selected NIPA Tables" that are published in this issue. (Changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1. GDP and Other Major NIPA Aggregates

[Quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	Billions of chained (1996) dollars			Percent change from preceding period		Chain-type price indexes		Implicit price deflators		Percent change from preceding period			
	Gross domestic product	Final sales of domestic product	Gross national product	Gross domestic product	Final sales of domestic product	Gross domestic product	Gross domestic purchases	Gross domestic product	Gross national product	Chain-type price indexes		Implicit price deflators	
										Gross domestic product	Gross domestic purchases	Gross domestic product	Gross national product

^p Preliminary.

^r Revised.

1. Reflects adjustments necessary to bring the Census Bureau's component data in line with the concepts and definitions

used to prepare BEA's international and national accounts.

2. Contains goods that cannot be separately identified.

Source: U.S. Bureau of Economic Analysis and U.S. Bureau of the Census.

“Table F.2.—U.S. International Transactions,” “Table F.3.—U.S. International Transactions, by Area,” and “Table F.4.—Private Services Transactions” are not published in this issue. The estimates are presented in “U.S. International Transactions, Second Quarter 2002,” which begins on page 39.

^p Preliminary.

^r Revised.

1. Represents gains or losses on foreign-currency-denominated assets due to their revaluation at current exchange rates.

2. Includes changes in coverage, statistical discrepancies, and other adjustments to the value of assets.

3. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

4. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.

5. Also includes paid-in capital subscriptions to international financial institutions and resources provided to foreigners under foreign assistance programs requiring repayment over several years. Excludes World War I debts that are not being serviced.

6. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

7. Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

NOTE: In this table, unlike in the international transactions accounts, income and capital outflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "U.S. Direct Investment Abroad: Detail for Historical-Cost Position and Related Capital and Income Flows, 2001" in the September 2002 issue of the Survey of Current Business.

NOTE: In this table, unlike in the international transactions accounts, income and capital inflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 2001" in the September 2002 issue of the SURVEY OF CURRENT BUSINESS.

Table G.5. Selected Financial and Operating Data of Nonbank U.S. Affiliates and Majority-Owned Nonbank U.S. Affiliates of Foreign Companies by Country of Ultimate Beneficial Owner and by Industry of Affiliate, 2000

	All nonbank affiliates						Majority-owned nonbank affiliates							
	Millions of dollars				Thousands of employees	Millions of dollars		Millions of dollars				Thousands of employees	Millions of dollars	
	Total assets	Sales	Net income	Gross product		U.S. exports of goods shipped by affiliates	U.S. imports of goods shipped to affiliates	Total assets	Sales	Net income	Gross product		U.S. exports of goods shipped by affiliates	U.S. imports of goods shipped to affiliates

D Suppressed to avoid disclosure of data of individual companies.

* Less than \$500,000.

1. The industry classification system used to classify the data for U.S. affiliates is based on the North American Industry Classification System. Prior to 1997, the affiliate data were classified using an industry classification system based on the Standard Industrial Classification system.

NOTES: The data in this table are from BEA's annual survey of the operations of U.S. affiliates of foreign companies; see "U.S. Affiliates of Foreign Companies: Operations in 2000," in the August 2002 issue of the SURVEY OF CURRENT BUSINESS.

Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

H. International Perspectives

The quarterly data in this table are shown in the middle month of the quarter.

1. All exchange rates are from the Board of Governors of the Federal Reserve System.

2. Rates for selected euro-area currencies can be derived by using the following conversion rates: 1 euro = 6.55957 French francs, 1.95583 German marks, and 1936.27 Italian lire.

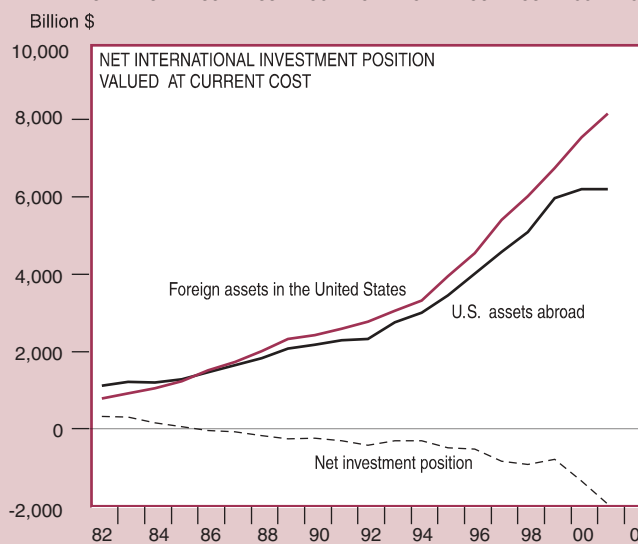

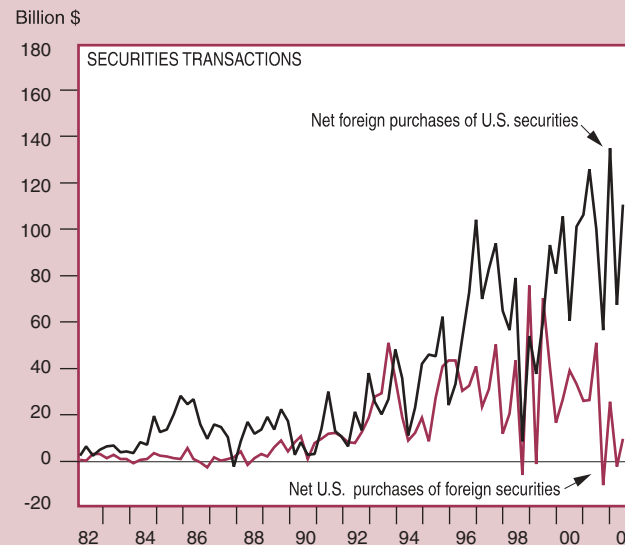

3. The rate shown for the United States is an index of the weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of major U.S. trading partners, January 1997=100. For more information on the exchange rate indexes, see "New Summary Measures of the Foreign Exchange Value of

the Dollar," *Federal Reserve Bulletin*, vol. 84 (October 1998), pp. 811-18.

NOTE: U.S. interest rates, unemployment rates, and GDP growth rates are from the Federal Reserve, the Bureau of Labor Statistics, and BEA, respectively. GDP growth rates for other countries are calculated from levels published by those countries. Most other data (including U.S. consumer prices and U.S. share prices, both of which have been rebased to 1995 to facilitate comparison) are © OECD and are reproduced with permission.

I. Charts

THE U.S. IN THE INTERNATIONAL ECONOMY

Regional Data

J. State and Regional Tables

The tables in this section include the most recent estimates of State personal income and gross state product. The sources of these estimates are noted.

The quarterly and annual estimates of State personal income and the estimates of gross state product are available on CD-ROM. For information on State personal income, e-mail reis.remd@bea.gov; write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5360. For information on gross state product, e-mail gspread@bea.gov; write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5340.

1. Per capita personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

NOTE: The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the

estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Source: Table 1 "State Personal Income, Revised Estimates for 1999-2001" in the October 2002 issue of the SURVEY OF CURRENT BUSINESS.

1. Per capita disposable personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

Note. The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the

estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Source: Table 1 "State Personal Income, Revised Estimates for 1999-2001" in the October 2002 issue of the Survey of Current Business.

NOTE: Totals shown for the United States differ from the national income and product account estimates of gross domestic product (GDP) because GSP is derived from gross domestic income, which differs from GDP by the statistical discrepancy. In addition, GSP excludes and GDP includes the compensation of Federal civilian and military personnel

stationed abroad and government consumption of fixed capital for military structures located abroad and for military equipment, except office equipment. Also, GSP and GDP have different revision schedules.

Source: This table reflects the GSP estimates for 2000 that were released on June 10, 2002. Detailed estimates are available on BEA's Web site at <www.bea.gov> under "State and local area data."

K. Local Area Table

Table K.1. Personal Income and Per Capita Personal Income by Metropolitan Area, 1998-2000—Continued

Table with columns for Area name, Personal income (Millions of dollars, Percent change), Per capita personal income (Dollars, Rank in U.S.), and Area name, Personal income (Millions of dollars, Percent change), Per capita personal income (Dollars, Rank in U.S.). Rows list various metropolitan areas like La Crosse, Lafayette, Lake Charles, etc., with data for 1998, 1999, 2000, and 2001.

1. Per capita personal income was computed using Census Bureau midyear population estimates. Estimates for 1998-2000 reflect county population estimates available as of April 2002.

2. Percent change calculated from unrounded data.

3. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts (NIPA's) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of

Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

4. Includes Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas (PMSA's designated by *), and New England County Metropolitan Areas (NECMA's). The New Haven-Bridgeport-Stamford-Danbury-Waterbury, CT NECMA is presented as a PMSA (part of the New York CMSA).

Additional Information About the NIPA Estimates

Statistical Conventions

Changes in current-dollar GDP measure changes in the market value of goods and services produced in the economy in a particular period. For many purposes, it is necessary to decompose these changes into quantity and price components. To compute the quantity indexes, changes in the quantities of individual goods and services are weighted by their prices. (Quantity changes for GDP are often referred to as changes in “real GDP.”) For the price indexes, changes in the prices for individual goods and services are weighted by quantities produced. (In practice, the current-dollar value and price indexes for most GDP components are determined largely using data from Federal Government surveys, and the real values of these components are calculated by deflation at the most detailed level for which all the required data are available.)

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP in 1997–98 uses prices for 1997 and 1998 as weights, and the 1997–98 annual percent change in the GDP price index uses quantities for 1997 and 1998 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula.¹ These annual changes are “chained” (multiplied) together to form time series of quantity and price; the percent changes that are calculated from these time series are not affected by the choice of reference period.

The quarterly changes in quantities and prices are calculated with weights from two adjacent quarters. As part of an annual or comprehensive revision, the quarterly indexes through the most recent complete year are adjusted to ensure that the average of the quarterly indexes conforms to the corresponding annual index.

In addition, BEA prepares measures of real GDP and its components in a dollar-denominated form, designated “chained (1996) dollar estimates.” These estimates are computed by multiplying the 1996 current-dollar value of GDP, or of a GDP component, by the corresponding quantity index number. For example, if a current-dollar GDP component equaled \$100 in 1996 and if real output for this component increased by 10 percent in 1997, then the “chained (1996) dollar” value of this com-

ponent in 1997 would be \$110 ($\100×1.10). Note that percentage changes in the chained (1996) dollar estimates and the percentage changes calculated from the quantity indexes are identical, except for small differences due to rounding.

Because of the formula used for calculating real GDP, the chained (1996) dollar estimates for detailed GDP components do not add to the chained-dollar value of GDP or to any intermediate aggregates. A “residual” line is shown as the difference between GDP and the sum of the most detailed components shown in each table. The residual generally is small close to the base period but tends to become larger as one moves further from it. Accurate measures of component contributions to the percentage changes in real GDP and its major components are shown in NIPA tables 8.2–8.6.

BEA also publishes the “implicit price deflator” (IPD), which is calculated as the ratio of current-dollar value to the corresponding chained-dollar value, multiplied by 100; the values of the IPD and of the corresponding “chain-type” price index are very close.

For quarters and months, the estimates are presented at annual rates, which show the value that would be registered if the rate of activity measured for a quarter or a month were maintained for a full year. Annual rates are used so that time periods of different lengths—for example, quarters and years—may be compared easily. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

Percent changes in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_o} \right)^{m/n} - 1 \right] \times 100,$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_o is the level of activity in the earlier period; m is the periodicity of the data (for example, 1 for annual data, 4 for quarterly, or 12 for monthly); and n is the number of periods between the earlier and later periods (that is, $t - o$).

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

1. In addition, because the changes in quantities and prices calculated using these weights are symmetric, the product of a quantity index and the corresponding price index is generally equal to the current-dollar index.

Reconciliation Tables

Table 1. Reconciliation of Changes in BEA-Derived Compensation Per Hour with BLS Average Hourly Earnings
[Percent change from preceding period]

	2000	2001	Seasonally adjusted at annual rates					
			2001				2002	
			I	II	III	IV	I	II
BEA-derived compensation per hour of all persons in the nonfarm business sector (less housing) ¹	7.0	2.7	2.8	0.1	1.0	1.5	2.9	3.9
Less: Contribution of supplements to wages and salaries per hour.....	-0.1	0.3	0.5	0.1	0.1	0.1	1.4	0.7
Plus: Contribution of wages and salaries per hour of persons in housing and in nonprofit institutions.....	-0.3	0.0	0.4	0.0	0.0	-0.5	0.2	-0.1
Less: Contribution of wages and salaries per hour of persons in government enterprises, unpaid family workers, and self-employed.....	0.0	0.0	0.5	0.0	-0.4	0.2	0.0	0.0
Equals: BEA-derived wages and salaries per hour of all employees in the private nonfarm sector	6.8	2.5	2.2	0.0	1.3	0.7	1.8	3.1
Less: Contribution of wages and salaries per hour of nonproduction workers in manufacturing.....	-0.1	-0.1	0.2	0.4	0.0	0.2	-0.2	0.0
Less: Other differences ²	3.1	-1.5	-1.9	-4.2	-2.5	-3.2	-1.0	0.6
Equals: BLS average hourly earnings of production or nonsupervisory workers on private nonfarm payrolls	3.8	4.1	4.0	3.8	3.8	3.8	3.0	2.5
Addendum:								
BLS estimates of compensation per hour in the nonfarm business sector ³	7.0	2.7	2.8	0.1	1.0	1.5	3.6	3.7

1. Includes BLS data on compensation and hours of nonfarm proprietors and hours worked of unpaid family workers.

2. Includes BEA use of non-BLS data and differences in detailed weighting. Annual estimates also include differences in BEA and BLS benchmark procedures; quarterly estimates also include

differences in seasonal adjustment procedures.

3. These estimates differ from the BEA-derived estimates (first line) because the BLS estimates include compensation and hours of tenant-occupied housing.
BLS Bureau of Labor Statistics

Table 2. Relation of Net Exports of Goods and Services and Net Receipts of Income in the NIPA's to Balance on Goods and Services and Income in the ITA's
[Billions of dollars]

1. Consists of statistical revisions in the NIPA's that have not yet been incorporated into the ITA's (2002:II) and statistical revisions in the ITA's that have not yet been incorporated into the NIPA's (2002:I-2002:II).

ITA's International transactions accounts
NIPA's National income and product accounts

Appendix B

Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. In addition, most of this information is available on BEA's Web site at <www.bea.gov>. Look under "Methodologies"; for articles from the SURVEY OF CURRENT BUSINESS, look under "Publications."

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of wealth and related estimates.

National income and product accounts (NIPAs)

This series of papers documents the conceptual framework of the NIPAs and the methodologies that have been used to prepare the estimates.

An Introduction to National Economic Accounting (1985) [also in the March 1985 SURVEY]

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (1985) [An updated version (March 2002) is available on BEA's Web site.]

Foreign Transactions (1987)

GNP: An Overview of Source Data and Estimating Methods (1987)

Government Transactions (1988)

Personal Consumption Expenditures (1990)

The methodologies described in these papers have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPAs. For more information, see the following.

National Income and Product Accounts of the United States, 1929-97 (2001) provides the definitions of the major NIPA aggregates and components, discusses the measures of real output and prices, explains how production is classified and how the NIPAs are presented, describes the statistical conventions that are used, and lists the principal source data and methods that are used to prepare the estimates of gross domestic product (GDP). [Go to <www.bea.gov/bea/an/nipaguid.htm>.]

Information about the sources and methods that are used to prepare the national estimates of personal income, which are the basis for the State estimates, is in *State Personal Income, 1929-97* (1999).

In addition, see the following articles in the SURVEY.

"Updated Summary NIPA Methodologies" (October 2002) briefly describes the principal source data and methods used to prepare the current-dollar and real estimates of GDP.

"Annual Revision of the National Income and Product Accounts" (August 2002).

"BEA's Chain Indexes, Time Series, and Measures of Long-Term Economic Growth" (May 1997) is the most recent in a series of articles that describe the conceptual basis for the chain-type measures of real output and prices that are used in the NIPAs.

"Reliability of GDP and Related NIPA Estimates" (January 2002) evaluates the principal NIPA estimates by examining the record of revisions to them.

Wealth and related estimates. *Fixed Reproducible Tangible Wealth in the United States, 1925-94* (1999) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1925-98" (April 2000) describes the definitional and statistical improvements that were incorporated in the comprehensive revision of the estimates.

Industry accounts

The industry accounts consist of the estimates of gross domestic product by industry, the input-output accounts, and two satellite accounts.

Gross product by industry. "Improved Estimates of Gross Product by Industry for 1947-98" (June 2000) describes the most recent comprehensive revision of these estimates.

Mission Statement and Strategic Plan

The mission statement of the Bureau of Economic Analysis and the latest update to its strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at <www.bea.gov>. See also "BEA's Strategic Plan for 2001-2005" in the May 2002 issue of the SURVEY OF CURRENT BUSINESS.

“Gross Domestic Product by Industry for 1998–2000” (November 2001) describes the most recent annual revision of these estimates.

Input-output accounts. “Benchmark Input-Output Accounts for the U.S. Economy, 1992” (November 1997) describes the preparation of the 1992 accounts and the concepts and methods that underlie the accounts.

“Annual Input-Output Accounts of the U.S. Economy” presents annual tables that update the 1992 benchmark accounts

For 1996 (January 2000)

For 1997 (January 2001)

For 1998 (December 2001)

Satellite accounts. These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

“U.S. Transportation Satellite Accounts”

For 1992 (April 1998)

For 1996 (May 2000)

“U.S. Travel and Tourism Satellite Accounts”

For 1992 (July 1998)

For 1996 and 1997 (July 2000)

International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts (ITAs). *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (1990) describes the methodologies used to prepare the estimates in the ITAs and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the ITAs.

The annual revisions of the ITAs are described in a series of articles, the latest of which is published in the July 2002 SURVEY.

Direct investment. *International Direct Investment: Studies by the Bureau of Economic Analysis* (1999) is a collection of previously published articles on U.S. direct investment abroad and foreign direct investment in the United States. It also includes the following information.

The “Methodology for U.S. Direct Investment Abroad,” which is also available in *U.S. Direct Investment Abroad: 1994 Benchmark Survey, Final*

Results (1998)

“A Guide to BEA Statistics on U.S. Multinational Companies,” which is also available in the March 1995 SURVEY

“A Guide to BEA Statistics on Foreign Direct Investment in the United States,” which is also available in the February 1990 SURVEY

In addition, the updated methodology for foreign direct investment in the United States is available in *Foreign Direct Investment in the United States: Final Results From the 1997 Benchmark Survey* (2001)

International services. *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis* (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

“Selected Issues in the Measurement of U.S. International Services” (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services and explores possible actions to address these issues.

Regional accounts

The regional accounts include estimates of personal income and gross state product.

Personal income. Estimates of personal income are prepared for States and for local areas.

“Comprehensive Revision of State Personal Income for 1969–99” (June 2000) summarizes the changes in the methodology that is used to prepare the estimates. The detailed methodology is available on the CD-ROM *State Personal Income, 1929–2000*.

“Comprehensive Revision of Local Area Personal Income for 1969–98” (July 2000) summarizes the changes in the methodology that is used to prepare the estimates for counties and metropolitan areas. The detailed methodology is available on the CD-ROM *Regional Economic Information System, 1969–2000*.

Gross state product. “Comprehensive Revision of Gross State Product by Industry, 1977–94” (June 1997) summarizes the sources and the methods that are used to prepare the estimates. “Gross State Product by Industry, 1977–98” (October 2000) describes the most recent comprehensive revision of these estimates.
