Connecting Education and Training to Workforce Outcomes

Panel on Measuring Skills Acquisition
Presentation to the Federal Economic
Statistics Advisory Committee (FESAC)

December 11, 2015

Christina Peña

WDQC Mission

- Advocate for **inclusive, aligned and market-relevant** education and workforce data that can help our nation's human capital policies meet the challenges of a changing economy.
- Promote federal and state reforms for data systems that provide useful information for **policymakers, students and workers, business leaders and educators**.
 - State Blueprint with 13 key features of a high-quality data infrastructure
 - Address federal legislation, funding and technical assistance
 - Policy agenda developed by broad coalition of national organizations, state leaders and technical experts across education/workforce spectrum

Connecting Education/Training to Workforce Outcomes

Stakeholders want to know that education and training lead to the acquisition of skills that are aligned with labor market demand:

- Colleges
- Students
- Employers
- Policymakers

Measuring Alignment

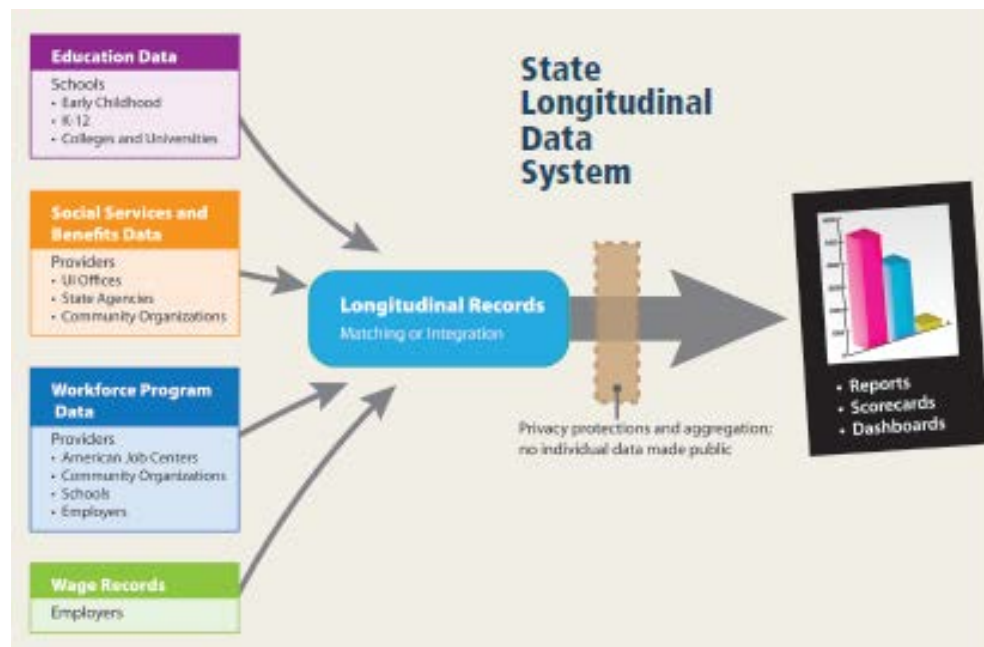

We have two proxies for checking on alignment of skills with labor market demand:

- Attainment of credentials valued by employers, i.e. “industry-recognized credentials”
- Employment outcomes of program graduates

Using Administrative Data

- Efforts increasing to encourage use of both federal and state level administrative data to track program performance
- Less time-consuming to design, run, fund, and re-run; in many cases already being collected
- Surveys still useful, and administrative data not without challenges of maintenance; sometimes less flexibility

Measuring Credential Attainment

- Certifications = for specific occupation/skill, time limited, earned through exam, awarded by industry associations or employers
- Licenses = allows practice in specialized field, time limited, awarded by state agency
- Efforts underway to get better administrative data on these credentials

Measuring Credential Attainment

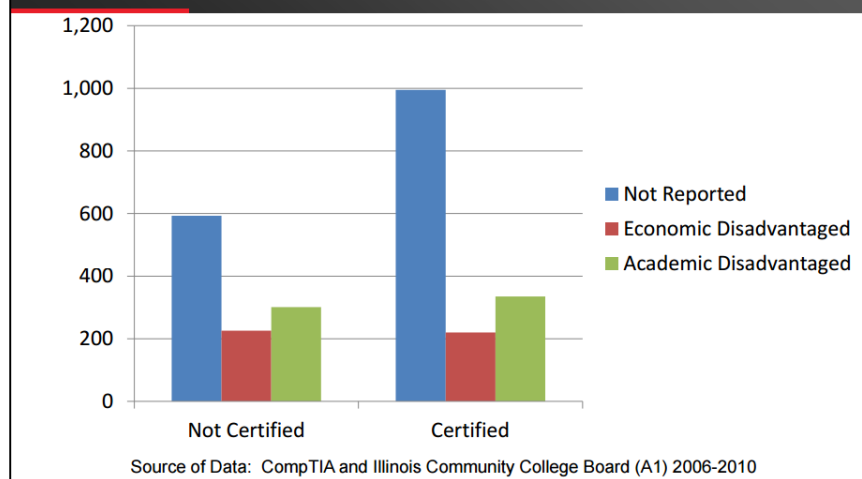

Federal Developments

- WIOA “recognized postsecondary credential”
- New questions on federal surveys

State Efforts

- Certification Data Exchange Pilot
- Workforce Credentials Coalition

**CompTIA Overall Certification Results
Disadvantaged Status of Tested Students in the
Illinois Community College System**

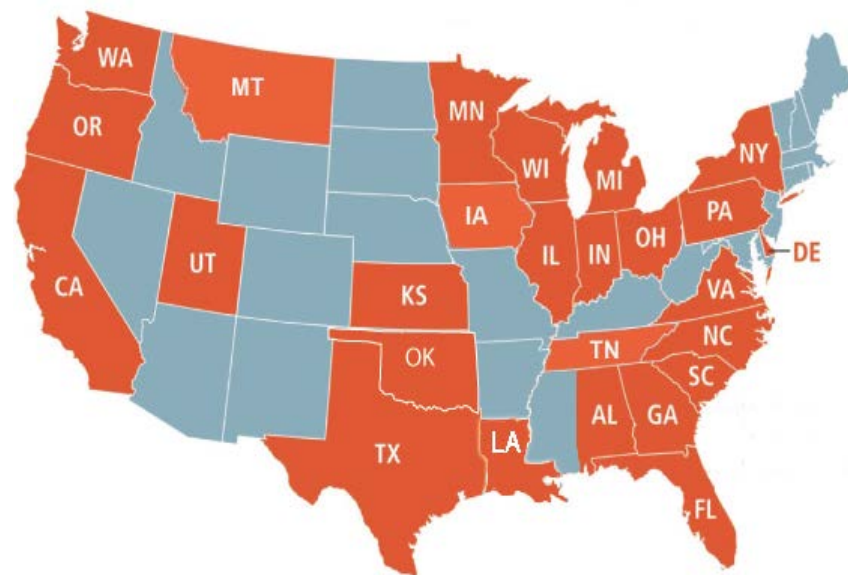

Koch and Parke, CompTIA, PowerPoint, Jan. 2013

Measuring Credential Attainment

Workforce Credentials Coalition

- Led by California Community Colleges Chancellor's Office and Doing What Matters for Jobs and the Economy; and the North Carolina Community College System
 - Establish joint data standards
 - Solidify data sharing agreements
 - Form a single data repository
- Goal: More easily share certification outcomes amongst community colleges across United States
- Learn more:
www.workforcecredentialscoalition.org

Assessing Employment Outcomes

UI Wage Records

- State
 - Each state collects quarterly
 - Housed at state workforce agency
- Multi-state exchange
 - WRIS/WRIS2
 - Regional models (e.g. WICHE)
- Federal
 - National Directory of New Hires (NDNH)
 - Census

Tax Data

- State
 - Has income tax, but little access
- Federal
 - Income tax forms collected by IRS
 - Annual, all workers
 - SSA & Census hold IRS records

Assessing Employment Outcomes

Federal Developments

- WIOA training provider eligibility
- College Scorecard
- HEA and Perkins reauthorization

State Efforts

- Data sharing agreements
- Legislation on wage record access
- Performance-based funding
- Tools for students/families/workers

State Progress

WDQC released latest survey on its 13-point Blueprint on state workforce data.

SUMMARY OF STATE SURVEYS			
	Minimal Progress —	In Progress ↑	Achieved ✓
Capture Diverse Credentials	17	26	3
Know if Graduates Get Jobs	9	15	22

Final Frontier: Measuring Skills

- Beta Credentials Framework designed by CLASP and the Corporation for a Skilled Workforce; supported by Lumina
- Workforce Information Council's (WIC) "Skills Initiative"
- Texas Skills to Work initiative

Discussion Questions for FESAC

- How can we ensure that data systems at all levels of government include a wider range of relevant credentials with agreed upon definitions?
- For the purpose of informing policies to help students and workers obtain in-demand skills, what new types of linkages would be useful among already-collected data at various federal agencies?
- In order for LMI to capture most effectively skills that are in demand, is there more that should be done to systematize how different types of credentials signal the presence of certain skills?
