

Effect of the ARRA on Federal Receipts & Expenditures

(billions of dollars, SAAR)

Revision Summary

2009Q1 – 2013Q1

Estimates of the effects of the American Recovery and Reinvestment Act of 2009 (ARRA) on BEA's estimates of federal government receipts and expenditures were revised for the first quarter of 2009 through the first quarter of 2013. Revisions were based on the results of the 2013 Comprehensive Revision. Specifically, spending on R&D was reclassified from current expenditures to gross investment. For more information, see the FAQ "[How did BEA change the treatment of spending for research and development during the 2013 comprehensive revision?](#)"
