Distribution movement.....	44		

SUMMARY FOR JUNE.

Due at least in part to seasonal trend, figures on June business registered decreases from May, for most lines of commercial and industrial activity. Production of pig iron, steel ingots, copper, brick, and the various species of lumber declined from the high output maintained during the three previous months. Cotton consumption, orders for steel castings, sales of fabricated structural steel, shipments of locomotives, unfilled steel orders and building contracts awarded declined from May. The index of unfilled orders for basic commodities compiled by the Department of Commerce stood at 77 on July 1, based on 1920 as 100, as against 87 on June 1 and 66 on July 1, 1922.

The wholesale price index at 153 compares with 156 for May and 150 for June, 1922, all on a 1913 base. The retail food index for June was 144 as against 143 in May and 141 in June, 1922.

Sales of mail-order houses declined seasonally. June sales of ten-cent stores and department stores were considerably above a year ago.

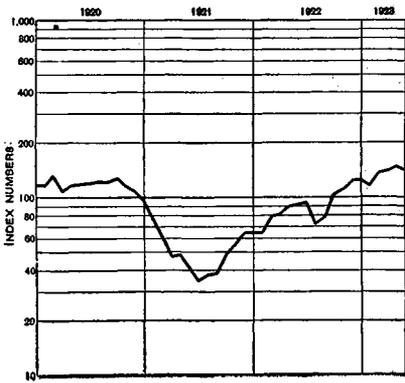

Business failures continued to decline while savings deposits and sales of new life insurance continued to increase.

Freight-car loadings continued to break all previous records for this season of the year while the daily net available surplus of cars increased, amounting to 46,775 at the end of June.

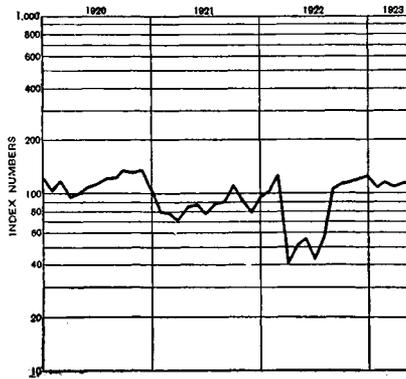

BUSINESS INDICATORS.

(1913 monthly average=100. See explanation on inside front cover.)

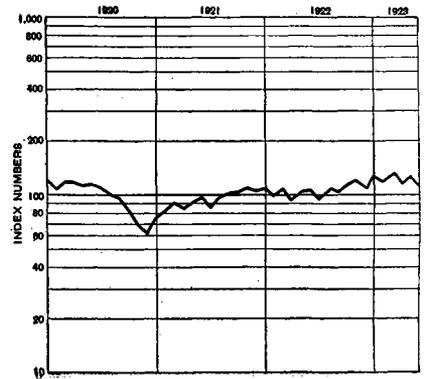

PIG IRON PRODUCTION.

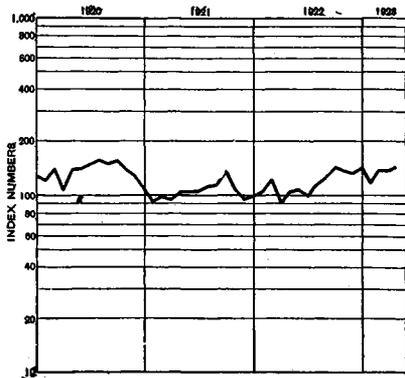

BITUMINOUS COAL PRODUCTION.

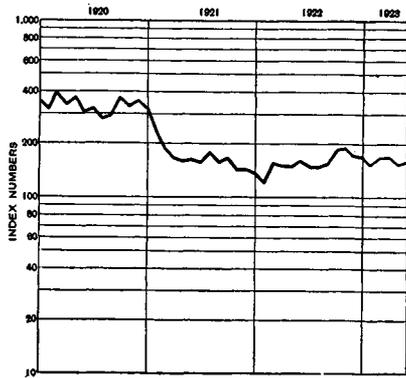

COTTON CONSUMPTION.

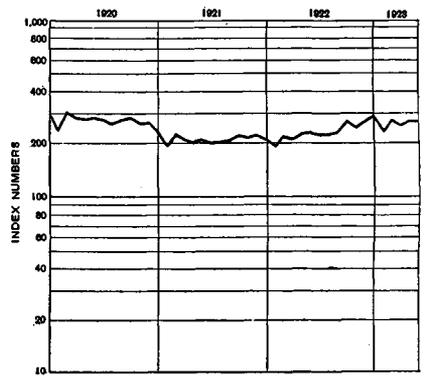

NET FREIGHT TON-MILES.

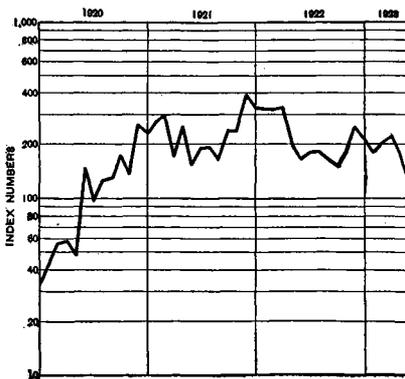

EXPORTS (VALUES).

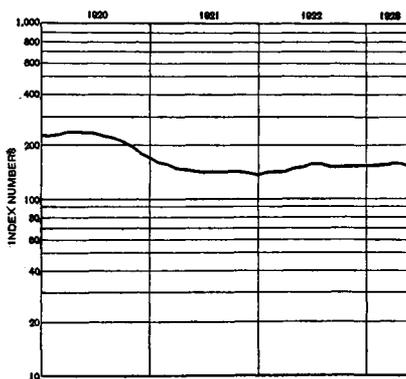

BANK CLEARINGS OUTSIDE NEW YORK CITY (VALUES).

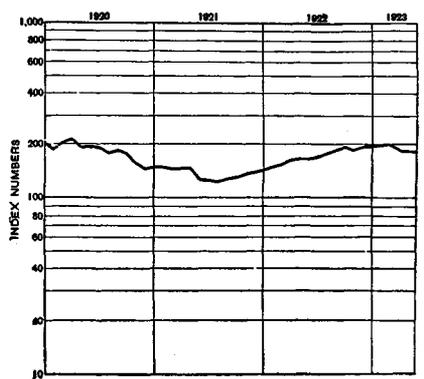

DEFAULTED LIABILITIES (VALUES).

WHOLESALE PRICES.

PRICES OF 25 INDUSTRIAL STOCKS.

BUSINESS INDICATORS.

The following table gives comparative index numbers for a selected list of important business movements. It is believed that this table will prove useful, because it separates out from the large mass of material a comparatively small number of items which are often regarded as indicative of business in general.

The table has been divided into two parts, the first containing those items for which index numbers can be calculated, using 1913 as a base. The second part contains items for which comparable data back to 1913 are not available. This latter group of index numbers is calculated by letting the 1919 monthly average equal 100. Care should therefore be exercised in comparing the absolute value of the two sets of data. In either group, however, the upward or downward trend of the index numbers, compared to previous months, does reflect the present tendency in each item and will give a basis for business judgment.

* Monthly statistics on the movements since January, 1913, or as far back as available, are given on pages 47-49 of the December Survey (No. 16).

1 Monthly prices are for the 15th of the month indicated.

2 Based on the total computed production reported by 5 associations. Includes southern pine, Douglas fir, western pine, North Carolina pine, and Michigan hard and soft woods. The total production of these associations in 1919 was equal to 11,190,000,000 board feet, compared with a total lumber production for the country of 34,552,000,000 board feet reported by the census.

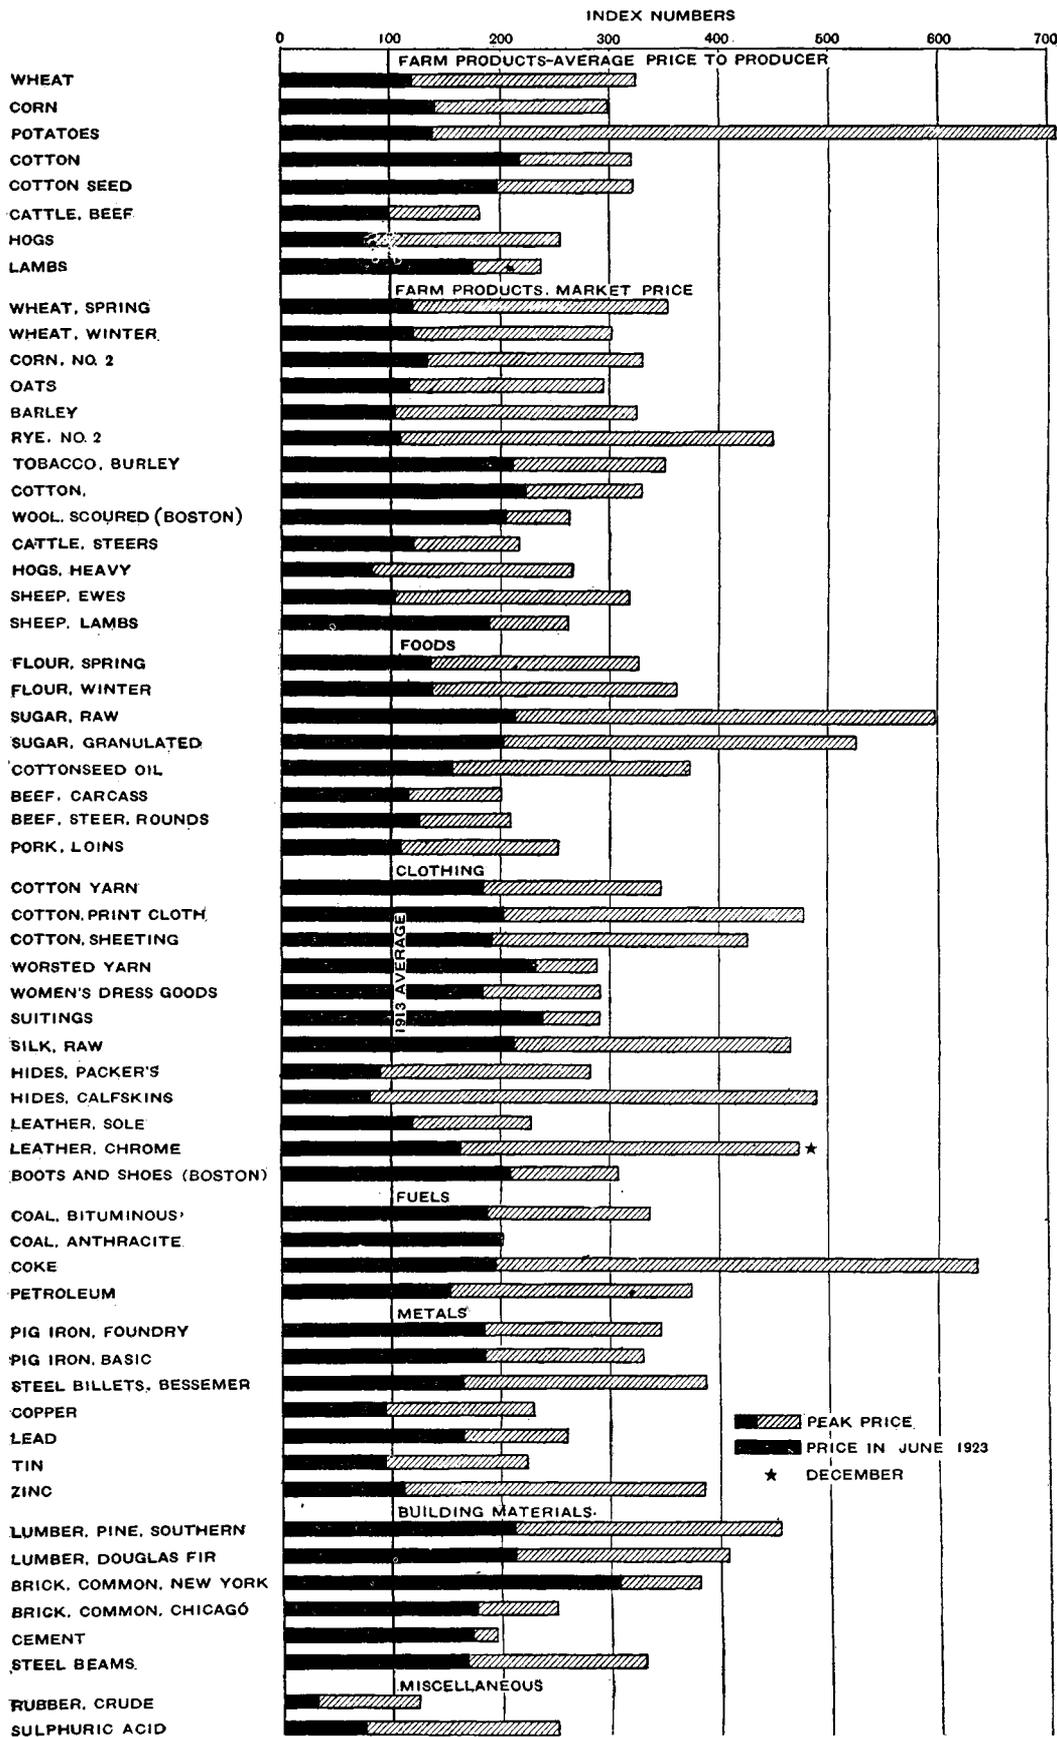

3 Less than 1.

4 Yearly figures are monthly averages for the crop year ending July 31 of year indicated.

5 Does not include stocks of topped oil or crude oil held at refineries; this omission reduced the January stocks by about 15,000,000 barrels.

COMPARISON OF PRESENT WHOLESALE PRICES WITH PEAK AND PRE-WAR.

(Relative prices 1913=100.)

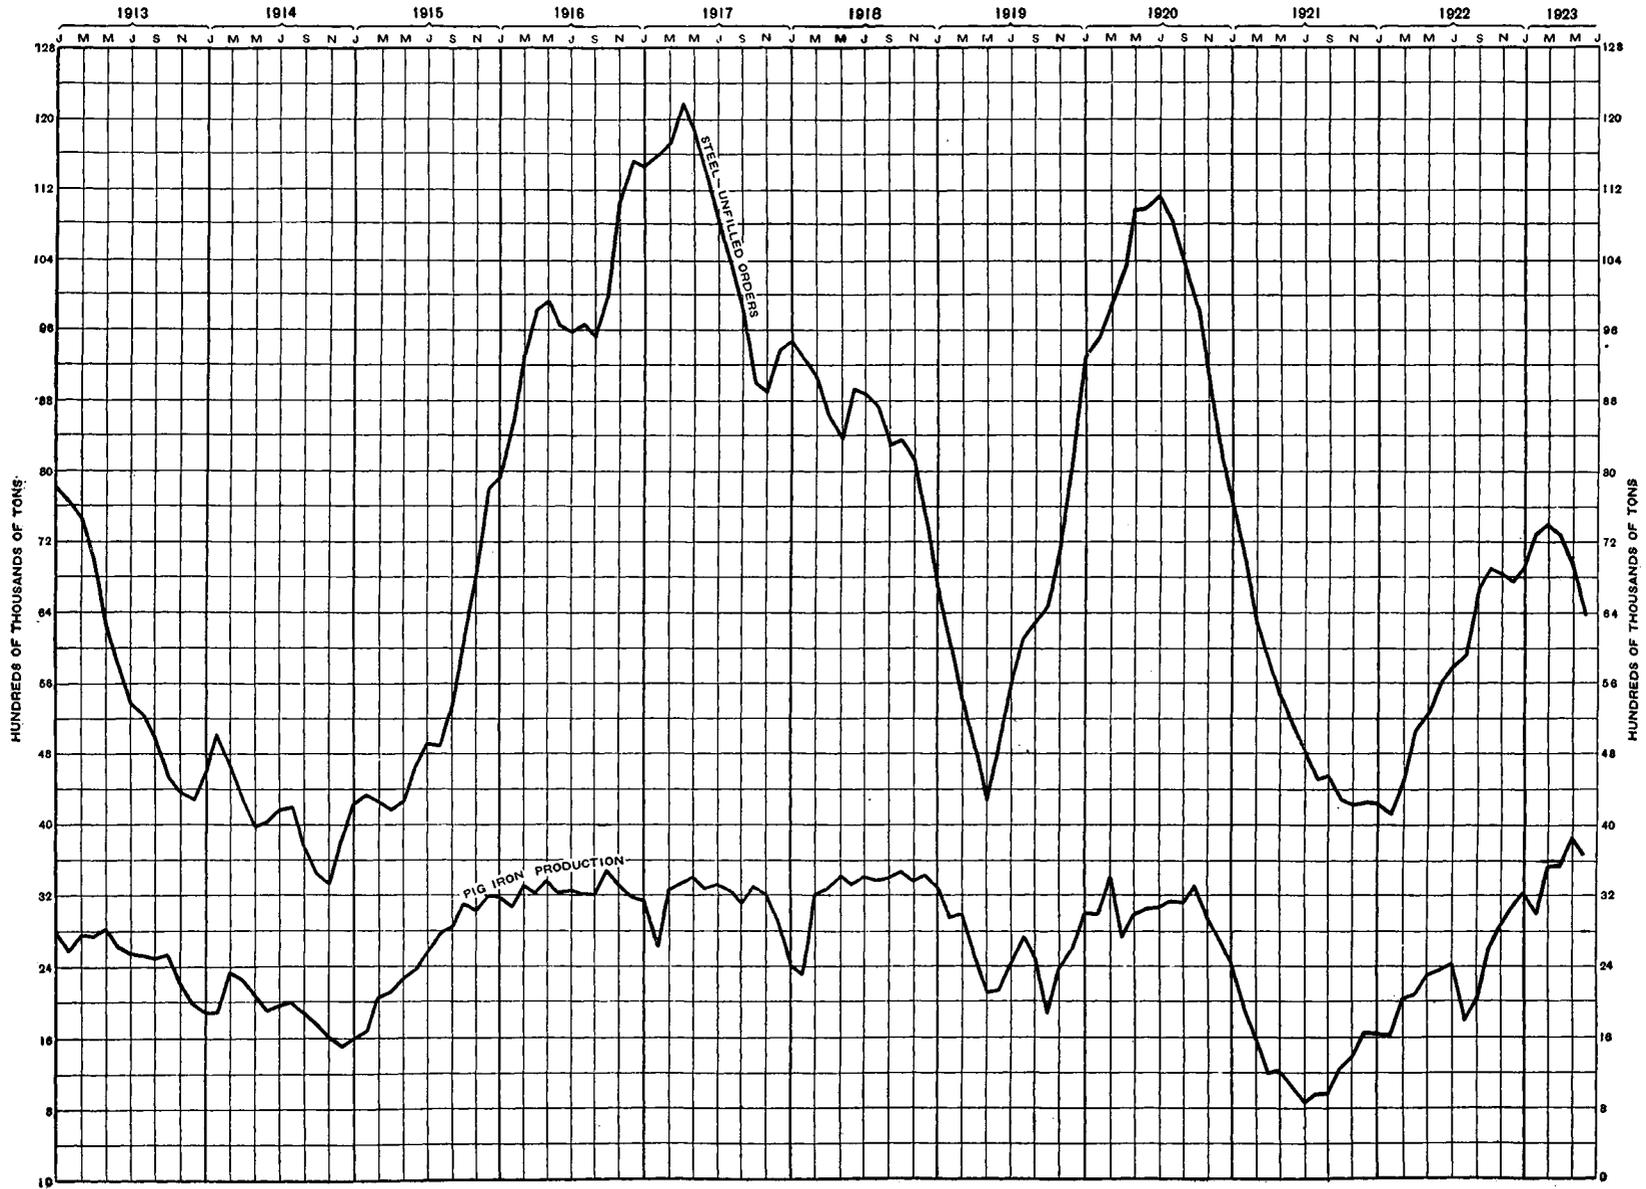

WHOLESALE PRICE COMPARISONS—MAXIMUM PRICE COMPARED TO PRICE IN RECENT MONTHS.

NOTE—Prices to the producer on farm products are from *U. S. Department of Agriculture, Bureau of Agricultural Economics*. All other prices are from *U. S. Department of Labor, Bureau of Labor Statistics*, except market price of wool compiled by *U. S. Department of Commerce, Bureau of the Census*. As far as possible all quotations represent prices to the producer or at the mill. See diagram on opposite page.

Brick, common building, salmon, run of kiln (Chicago).....	Oct., 1920	251	178	178	176	- 1.1
Cement, Portland, net without bags to trade, f. o. b. plant (Chicago district).....	Sept., 1920	195	173	173	173	0.0
Steel beams, mill (Pittsburgh).....	June, 1917	331	172	174	169	- 2.9
Rubber, Para Island, fine (New York).....	Jan., 1913	124	34	31	31	0.0
Sulphuric acid, 66° (New York).....	Feb., 1916	250	71	75	75	0.0

PIG-IRON PRODUCTION AND UNFILLED ORDERS AT THE END OF EACH MONTH: 1913-1923.

(UNFILLED ORDERS FROM UNITED STATES STEEL CORPORATION.)

BUSINESS CONDITIONS IN JUNE.

The following pages contain a review by principal industries of the more important statistics shown in the table on the "Trend of Business Movements" (p. 25). Summaries of production, stocks, sales, unfilled orders, and price changes are given also.

PRODUCTION.

June manufacturing production, in general, declined from the high figures of the preceding month. The index of mineral production, based on 1919 as 100, at 146 for June may be compared with 141 for May and 85 for June a year ago, while marketings of animal products declined seasonally.

Out of 42 individual commodities for which comparisons can be made between May and June on a 1919 base, there were 37 decreases and 5 increases. Compared with June a year ago there were 30 increases and 12 decreases. Production in June with but few exceptions was considerably ahead of the corresponding month of 1920, as shown in the accompanying diagram.

The production figures, without exception, for the first half of 1923 show considerable increase over the corresponding period a year ago. Production of pig iron, steel ingots, and copper, Douglas fir, cement, oak flooring, and face brick, cotton and wool consumption, and production of passenger automobiles and locomo-

tives for this period showed percentage increases, for the metals, averaging well above 50 per cent, for the building materials above 25 per cent, and for the textiles 20 per cent, while for automobiles and for locomotives the corresponding percentage increases were 77 and 288, respectively.

RELATION OF PRODUCTION, STOCKS, AND UNFILLED ORDERS.

COMPARISON OF JUNE PRODUCTION WITH CORRESPONDING MONTH OF 1920.

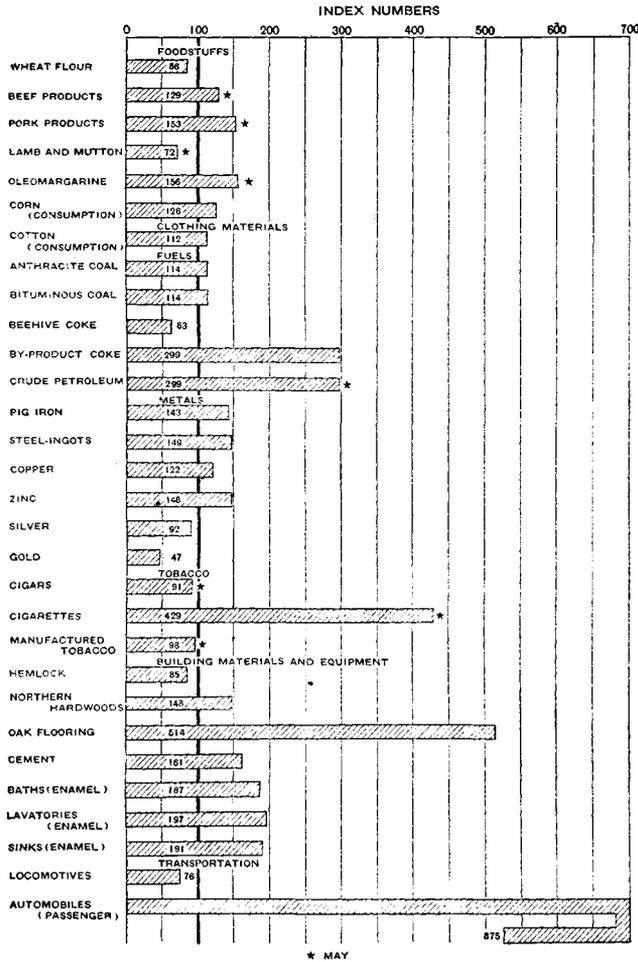

STOCKS.

Stocks of commodities, allowing for seasonal tendencies, showed little change in June. Of 36 individual commodities for which comparison can be made between May and June on a 1919 base there were 18 declines, 7 of which may be attributed to the seasonal tendency, while of the 18 increases, 5 may be assigned to the seasonal element.

Compared with a year ago there were 17 increases and 19 decreases in inventories of basic commodities. Among the foodstuffs there were 9 increases, as compared with 7 decreases, while among the construction materials there were 9 decreases, as against 4 increases over a year ago.

COURSE OF COMMODITY STOCKS SINCE 1919 (TAKEN AT END OF MONTH).

(Relative stocks 1919=100.)

SALES AND UNFILLED ORDERS.

Of the 14 individual commodities for which data are available, the sales in June, with the exception of merchant pig iron, registered declines from the preceding month.

Retail sales, based on reports from mail-order houses, ten-cent chains, and department stores, showed the usual seasonal decline, but were well above the sales reported for June a year ago.

Comparing the volume of sales for the first half of 1923 with the corresponding period of a year ago, increases of 37 per cent, 20 per cent, and 13 per cent are to be noted, respectively, in the sales of mail-order houses, ten-cent chains, and department stores.

Postal receipts and newspaper advertising in the principal cities of the country likewise made a seasonal decline.

Sales of stocks amounted to 78 per cent of the 1919 average as against 89 per cent in May and 92 per cent in June, 1922, while bond sales were 80 per cent of the 1919 average in June, as compared with 86 per cent in May and 92 per cent a year ago. Life insurance new business was 156 in June compared with 1919 as 100, as against an index of 151 in May and 118 in June, 1922.

The index of unfilled orders for basic commodities compiled by the Department of Commerce was 77 on July 1, based on 1920 as 100, compared with 66 a year ago. The accompanying table gives in detail unfilled orders for specified commodities by semiannual periods from July 1, 1920, to July 1, 1923. Of the 12 commodities shown there were on July 1 five decreases from the first of the year while the 7 commodities which were still above January 1 were maple flooring, clay fire brick, face brick, baths and other enamelware, and locomotives.

PRICES.

The index of prices received by farmers for their crops on June 15 stood at 139 as against 140 on May 15 and 117 on June 15, 1922. The index of live-stock prices at 100 compares with 105 for May and 119 for a year ago.

The wholesale price index of the Department of Labor declined in June to 53 per cent above the pre-war average as compared with 56 per cent for the preceding month.

The Federal Reserve Board's regrouping of this index shows a decline of almost 3 per cent in prices of those goods which are essentially still in the raw or semifinished state, requiring additional manufacture, while the price decline in goods ready for consumption was less than 1 per cent. As compared with a year ago, prices of producers' goods were slightly over 13 per cent greater in June, while prices of consumers' goods showed only a 3 per cent increase. Dun's and Bradstreet's indexes of wholesale prices declined also.

The retail food index increased almost 1 per cent in June, while the cost of living index compiled by the National Industrial Conference Board for June shows no change. The quarterly index of cost of living compiled by the Department of Labor shows an increase of one-half to 1 per cent over the preceding quarter, the greatest increases occurring in furniture and house furnishings, with a decline of 3 per cent in the cost of fuel and light.

Wholesale prices in Great Britain, Canada, Italy, India, and Japan declined, while increases in France and Sweden were noted for June.

Comparing prices of the individual commodities shown in the table and chart on pages 4 and 5 increases are noted in prices paid for corn, potatoes, cotton, and cattle, while decreases occurred in wheat, cottonseed, hogs, and lambs. Prices of cloths and clothing declined, declines of about 10 per cent being noted in raw Japanese silk and hides. Declines in fuel, metals, and building materials were general, those of 5 per cent or over occurring in bituminous coal, coke, petroleum, pig iron, copper, zinc, yellow pine, and Douglas fir.

TEXTILES.

Wool consumption in June declined about 15 per cent from May and the activity of wool machinery was slightly lower than in May. Receipts of wool at Boston declined in spite of the seasonal increase in arrivals of domestic wool, as imports declined. Receipts of both foreign and domestic wool were less than in June, 1922. Prices of wool and woolens showed no change in June.

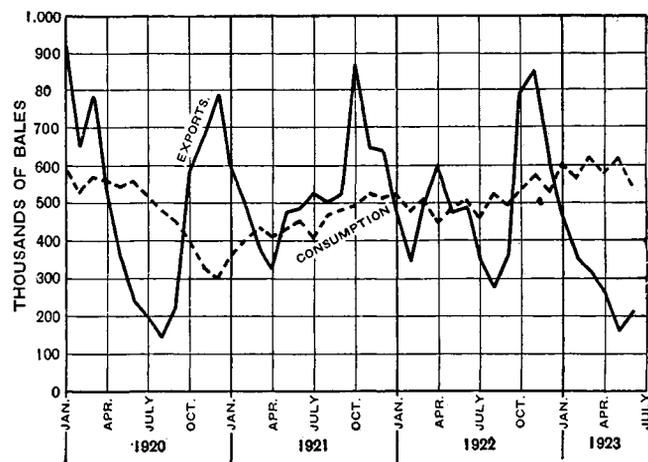

The monthly report of the Bureau of the Census on men's and boys' clothing shows the following comparisons for 332 identical establishments:

MEN'S AND BOYS' CLOTHING.

KIND.	NUMBER OF GARMENTS CUT.			
	February.	March.	April.	May.
Men's suits, wholly or partly of wool.....	871,933	965,751	707,663	706,304
Men's suits, wholly or partly of mohair, cotton, silk, linen, etc.....	148,716	158,526	132,273	132,531

Boys' overcoats and reefers (all grades).....	15,549	21,294	33,527	56,897

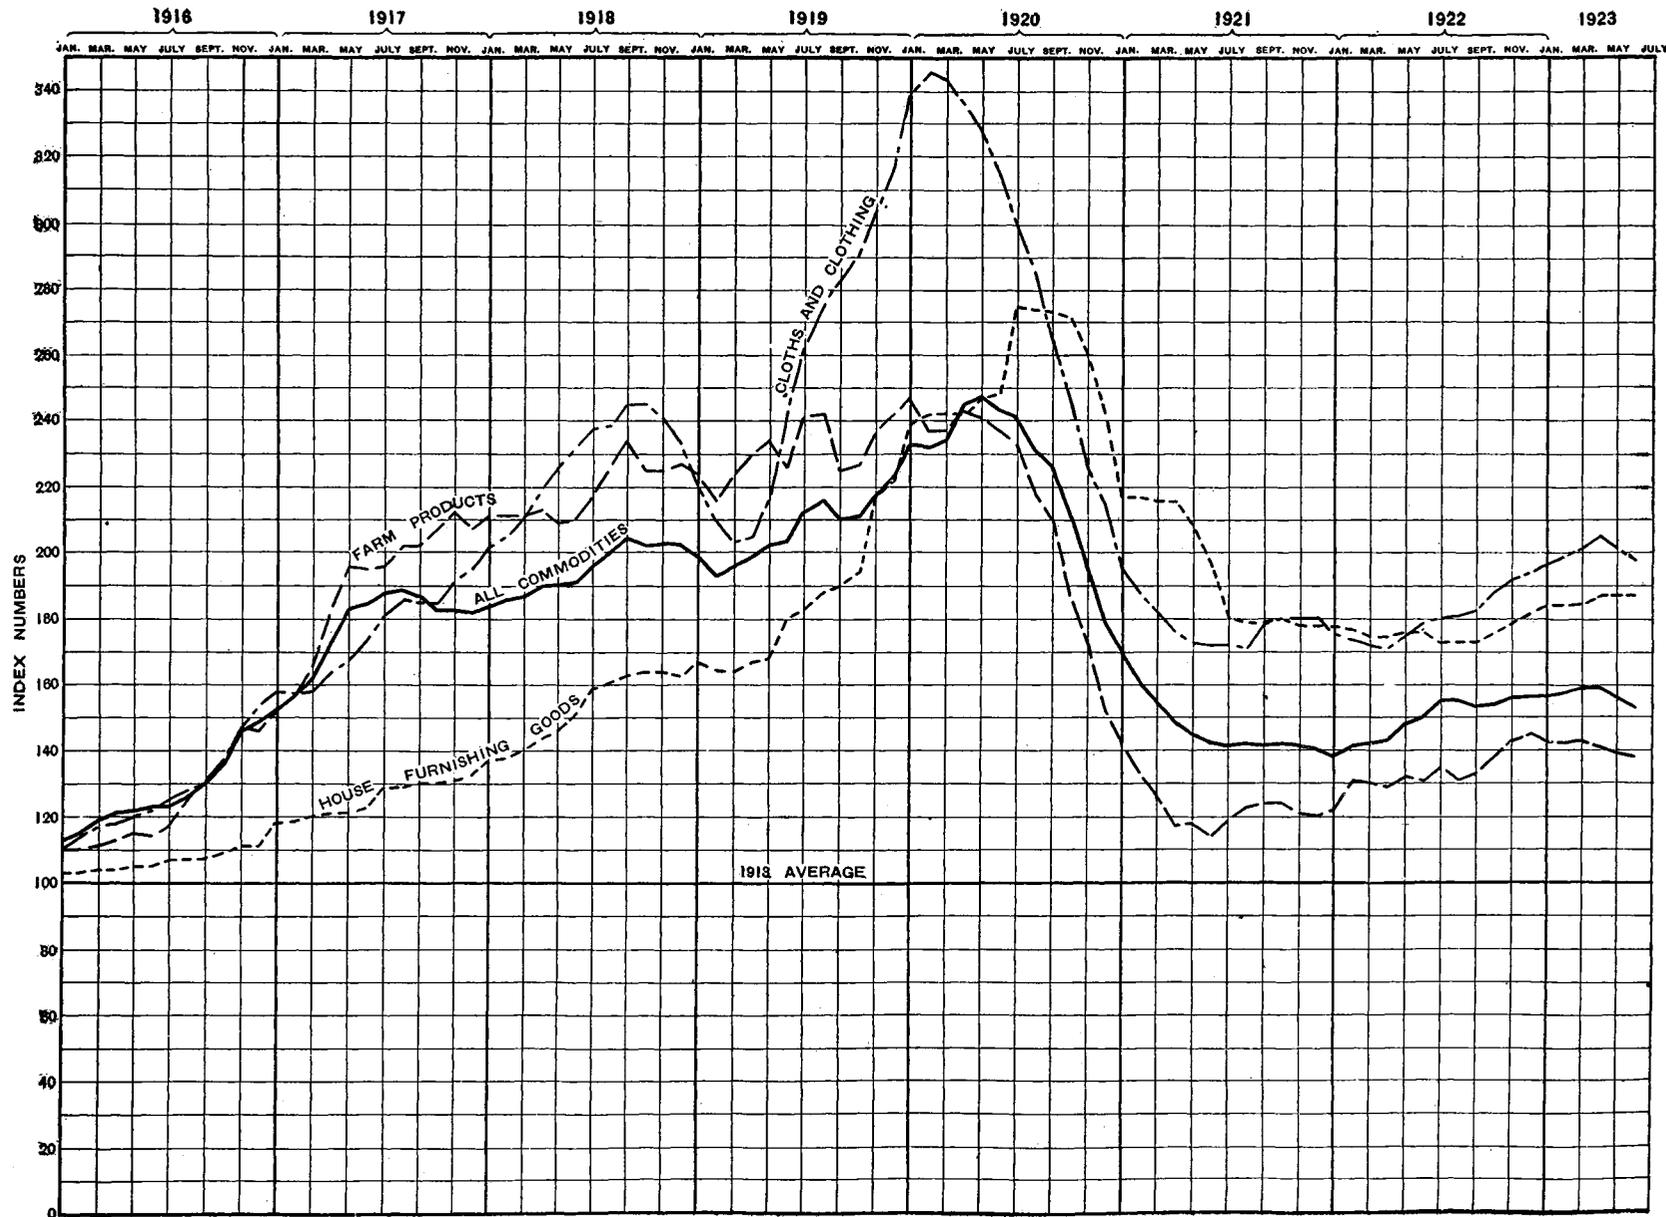

Cotton consumption by textile mills declined in June to 542,166 bales, a decline of almost 13 per cent from May but still considerably larger than a year ago.

EXPORTS AND CONSUMPTION OF COTTON.

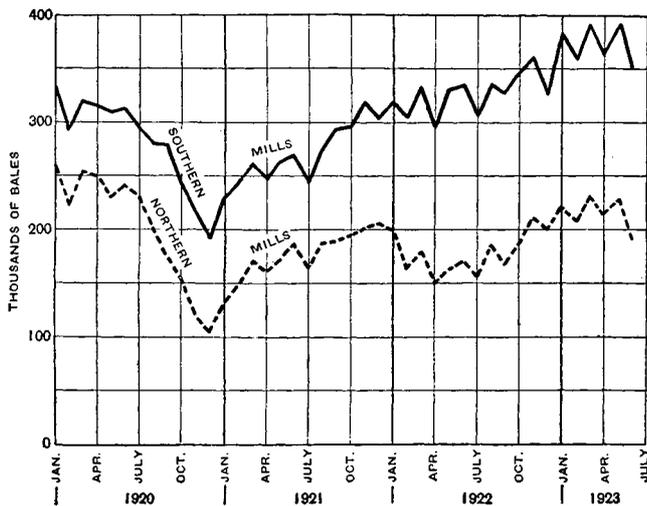

COMPARISON OF WHOLESALE PRICES BY GROUPS.

(U. S. Department of Labor index numbers. Relative prices 1913=100.)

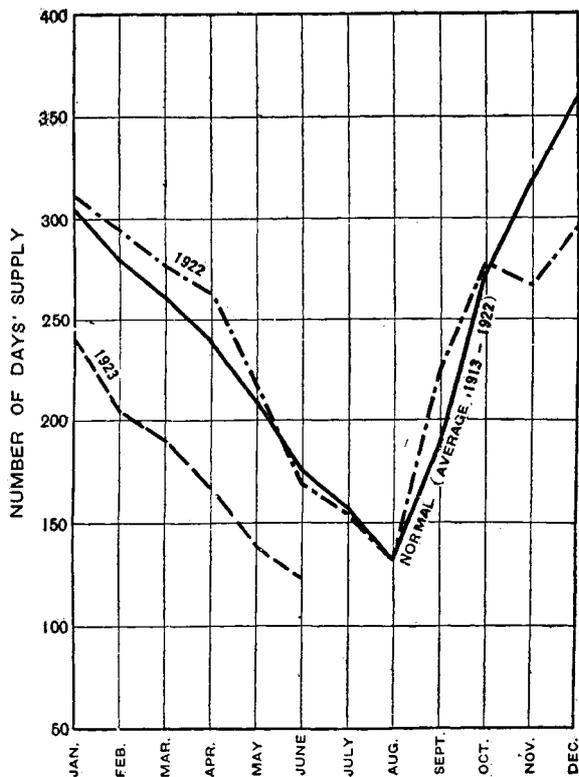

Stocks of cotton at the end of June were about the same as last year at the mills but warehouse stocks were over 700,000 bales less. Imports of cotton were the lowest since last September but exports increased slightly over the May low level. Cotton-cloth exports continued to decline. Production of fine cotton goods in the New Bedford district declined slightly but sales were almost 50 per cent larger than in May, though only half as large as a year ago. Slightly less cotton spindles were active in June and total activity decreased 10 per cent from May. Raw cotton prices, both to producer and on the New York market, advanced slightly, but prices of cotton products declined from May.

COTTON CONSUMPTION IN NORTHERN AND SOUTHERN MILLS.

STOCKS OF COTTON: NUMBER OF DAY'S SUPPLY AT DAILY RATE OF CONSUMPTION.

The monthly hosiery report of the Bureau of the Census shows the following comparative summary for 316 identical establishments representing 392 mills.

HOSIERY (IN DOZEN PAIRS).

	APRIL.			MAY.		
	Total.	Men.	Women.	Total.	Men.	Women.
Production:						
All cotton.....	1,599,641	1,004,556	595,085	1,714,578	1,057,022	657,556
All natural silk..	925,535	249,093	676,442	995,000	248,657	746,343

Production and new orders for knit underwear declined, while shipments and cancellations increased slightly. Unfilled orders were 10 per cent less than at the end of May.

Imports of raw silk in June amounted to 3,945,000 pounds as against 4,904,000 in May and 5,077,000 a year ago. Deliveries from warehouses increased 13 per cent. Stocks of raw silk were further reduced and prices declined. Burlap and fiber imports both declined considerably in June.

The monthly report of the Bureau of the Census on pyroxylin-coated textiles shows the following comparisons, covering 12 manufacturers with a capacity of 2,174,333 yards:

PYROXYLIN-COATED TEXTILES.

	March.	April.	May.
Pyroxylin spread.....pounds..	3,055,319	3,002,415	2,931,077

Heavy goods.....linear yds..	1,926,700	1,743,598	1,414,495
Unfilled orders, 1st of month:			
Light goods.....linear yds..	1,159,843	865,501	744,472
Heavy goods.....linear yds..	3,003,568	2,216,755	2,338,240

IRON AND STEEL.

Iron ore shipments through the Sault Ste. Marie Canal in June were larger than a year ago and for the season to date almost 90 per cent above last season. Stocks of iron ore at furnaces at the end of June were about the same as a year ago, but on Lake Erie docks a smaller supply existed. Consumption of iron ore declined slightly in June.

The production of pig iron declined 5 per cent from the May record and steel ingot output declined almost 11 per cent from the May high mark. Merchant pig iron output declined slightly, sales increased and stocks increased about one-third, but shipments and unfilled orders fell off. Exports and imports of iron and steel products declined slightly in June and unfilled orders of the United States Steel Corporation continued to fall.

PRODUCTION OF PIG IRON AND STEEL INGOTS AND U. S. STEEL CORPORATION'S UNFILLED ORDERS.

Bookings of commercial steel castings declined slightly in June, although a larger tonnage of railway specialties was booked than in May. Inquiries by the Bureau of the Census show the following annual figures on capacity and bookings of steel castings by 65 firms representing about two-thirds of the commercial steel castings capacity of the United States. The figures for companies representing about 6 per cent of the miscellaneous castings are not available prior to 1920, and the miscellaneous totals have been prorated by that amount to allow comparison, but the railroad bookings are complete.

The monthly report of the Bureau of the Census on malleable castings manufactured for sale (excluding castings used in the plant or finished and sold as other products) shows the following comparisons:

MALLEABLE CASTINGS.

	May.	June.
Plants reporting.....number..	90	96
Capacity.....tons..	91,174	92,004
Production.....tons..	64,726	61,949
Shipments.....tons..	62,806	61,441
Orders booked.....tons..	52,898	38,536
Production relative to capacity.....per cent..	71.0	67.3

Wholesale prices of pig iron and steel billets again declined in June but finished steel products remained stable.

Production and shipments of steel sheets by independent companies declined 16 per cent, while sales fell off 29 per cent. Unfilled orders for sheets declined slightly and stocks rose, due to larger unsold stocks. Shipments of steel barrels declined in June and production fell off to 41 per cent of capacity, but unfilled orders made a slight increase.

Sales of fabricated structural steel declined to 51 per cent of capacity in June as compared with 57 per cent in May and 73 per cent in June, 1923. The following table gives figures compiled by the Bureau of the Census showing the total tonnage booked each month by 175 firms with a monthly capacity of 229,575 tons, and total sales computed to a capacity of 250,000 tons per month at the rate of sales to capacity of the reporting firms:

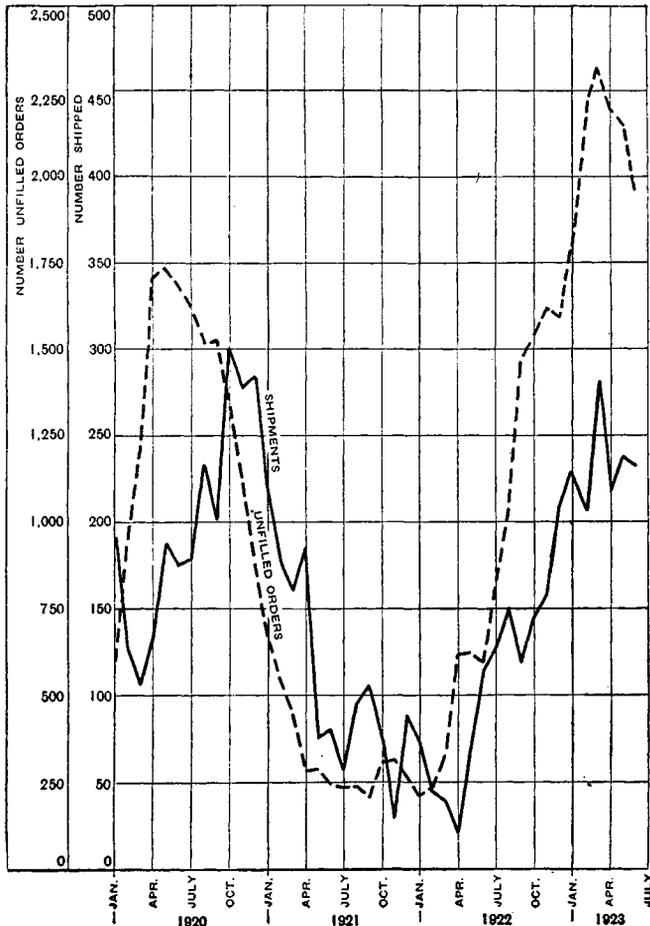

BOOKINGS OF FABRICATED STRUCTURAL STEEL.

YEAR AND MONTH.	Actual tonnage booked.	Per cent of capacity.	Computed total bookings.
1922.			
April.....	200,588	87	217,500
May.....	184,638	81	202,500
June.....	168,498	73	182,500

May.....	130,828	57	142,500
June.....	112,785	51	127,500

¹ Reported by 173 firms with a capacity of 229,225 tons.
² Reported by 169 firms with a capacity of 228,850 tons.
³ Reported by 152 firms with a capacity of 223,595 tons.

Shipments of railroad locomotives from principal manufacturers declined slightly in June, and unfilled orders underwent a further decline. Freight car orders placed in June were also less than the May orders. Sales of stocks and of tubular plumbing goods declined markedly, and a decline was also noted in shipments of steel furniture.

LOCOMOTIVE SHIPMENTS AND UNFILLED ORDERS.

NONFERROUS METALS.

Copper production in June was slightly lower than the May high mark but exports increased and the wholesale price of electrolytic copper declined.

Zinc production declined and stocks increased. Receipts at St. Louis declined somewhat but shipments were larger than in May. The price of zinc declined.

Imports, deliveries, and stocks of tin declined in June and the price of tin also receded from May.

Lead production in June rose slightly to a new high level since monthly figures became available. Receipts and shipments at St. Louis showed little change and the wholesale price declined slightly.

FUELS.

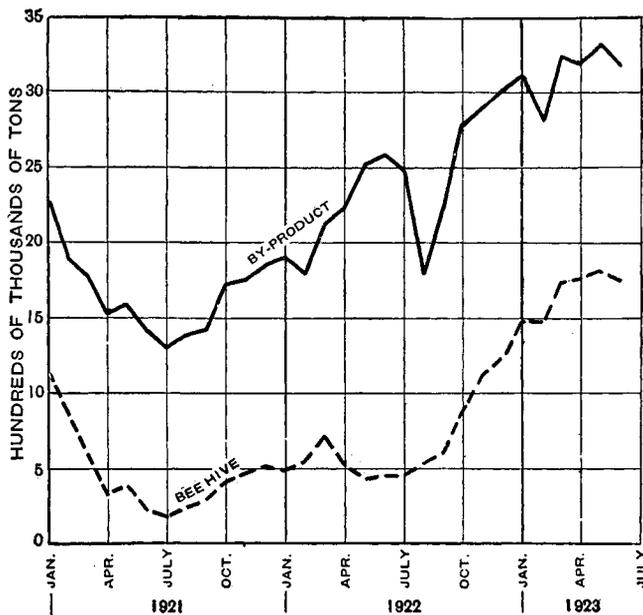

The output of anthracite coal increased slightly in June but a slight decline took place in bituminous production, as well as in the production of both beehive and by-product coke. Exports of bituminous coal were larger than in May but anthracite and coke were shipped out in smaller quantities, especially the latter. Wholesale prices of coal and coke declined but retail prices remained firm.

The table on page 16 shows the estimated commercial stocks of bituminous coal in the United States on specified dates from reports compiled by the Bureau of the Census and the Geological Survey, together with statistics of anthracite stocks in the hands of 413 identical retail coal dealers.

PRODUCTION OF BITUMINOUS AND ANTHRACITE COAL.

June 1.	41,000,000	30	668,491	19

¹ At current rate of consumption.² At least 63,000,000 tons. No canvass made of consumers for this date.

The output of crude petroleum declined slightly in June from May. Stocks, however, continued to increase. Consumption of petroleum declined from May, and imports increased slightly in spite of a slight drop in exports from Mexico. The price of crude oil was reduced in June, and less oil wells were completed than in May. Exports of gasoline declined slightly.

May figures of refineries, which have recently become available, show a further increase in the output of gasoline and a consumption surpassed only in August, 1922. Production of kerosene oil and lubricating oil increased over April, the latter making a new high record, while the output of gas and fuel oils declined. Stocks of all refined oils declined, but crude petroleum stocks at refineries continued to increase.

AUTOMOBILES.

The output of automobiles declined in June to 336,317 passenger cars and 40,565 trucks from the May high record. Shipments of automobiles by manufacturers also declined except for the seasonal increase of shipments by boat.

BUTTONS.

Activity among fresh-water pearl button manufacturers declined in June, and stocks of buttons increased.

BUILDING CONSTRUCTION.

Building costs in general showed little change in June but the cost of plumbing fixtures advanced slightly.

The volume of building contracts awarded declined 23 per cent from May, and for the first time this year showed a decrease from the corresponding month of 1922. Measured in value, the decline was only 14 per cent. The chief declines took place in residential and industrial buildings, measured by floor space, both showing the lowest amounts since the early months of this year. Fire losses increased slightly in June.

BUILDING MATERIALS.

Lumber production for June did not change much from May. Increases occurred in Douglas fir, Michigan softwoods, northern pine, walnut and northern hemlock and hardwoods, while declines took place in southern pine, California redwood, Michigan hardwoods, and western pine. Shipments as a rule were less than in May, northern hemlock and hardwoods and Douglas fir making the only increases. Stocks of lumber increased. Exports of lumber were the highest since the war. The prices of both hardwood and softwood lumber declined from May.

Production and shipments of flooring declined slightly in June, while new orders fell off about one-third from May, and unfilled orders declined about 20 per cent. Stocks of maple flooring declined slightly, but oak flooring stocks increased 26 per cent.

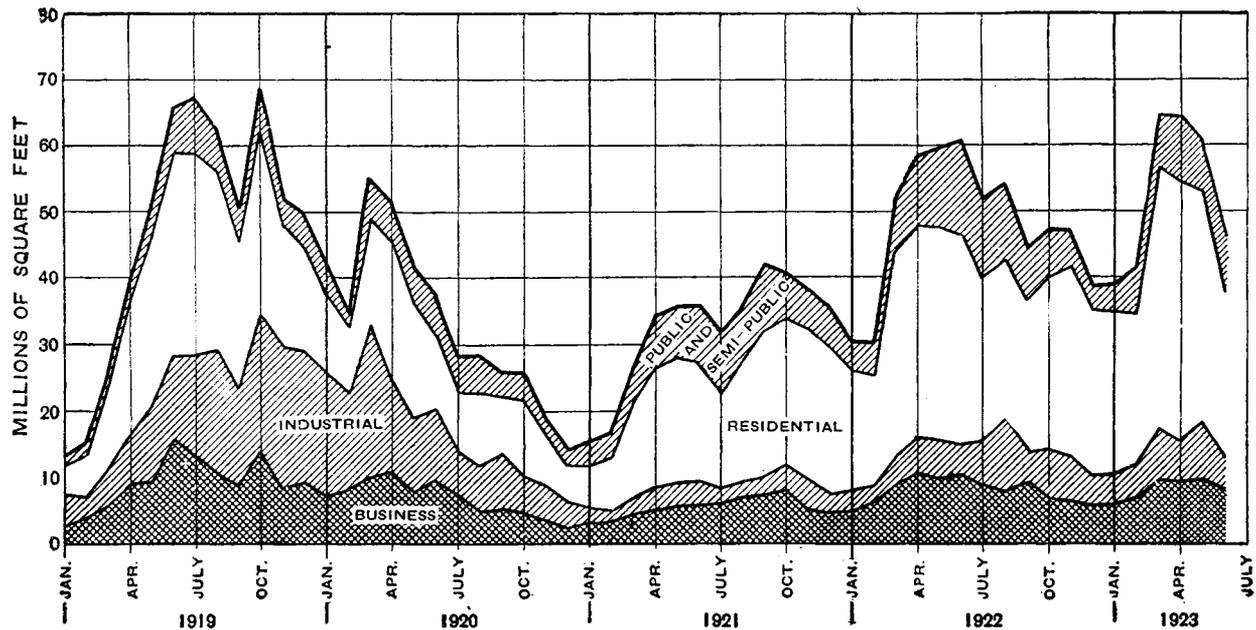

The brick industry shows general declines in production, shipments, new orders and unfilled orders for clay fire, silica and face brick. Stocks of clay fire brick rose slightly but for silica and face brick, declines in stocks occurred. Prices remained unchanged.

Figures reported by the National Paving Brick Manufacturers' Association are as follows:

PAVING BRICK (No. 1 QUALITY).

Production (No. 1 and No. 2 brick) :				
Per cent of capacity.....		77	71	66

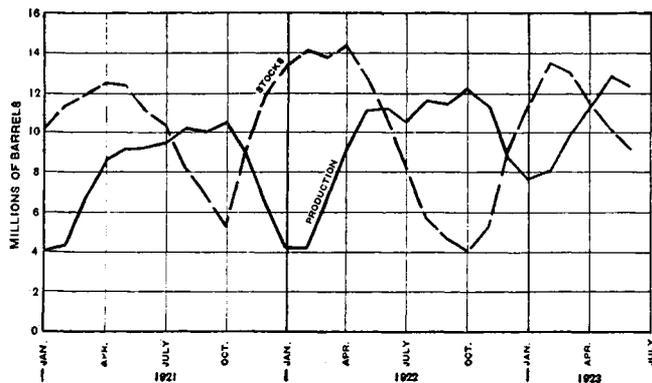

VOLUME OF BUILDING CONTRACTS AWARDED, BY CLASSES.

Production and shipments of cement declined in June as contrasted with an increase a year ago. Production, however, was higher than in June, 1922, but shipments were slightly less. Stocks made the usual seasonal decline and were lower than a year ago. The price of cement remained unchanged.

A slight decline in shipments and stocks and a larger decline in orders received, all seasonal movements, were noted in June in sanitary enamel ware, but all these movements were as a rule considerably lower than a year ago. Unfilled orders declined as against increases in June, 1922, but were still much higher than last year.

PRODUCTION AND STOCKS OF PORTLAND CEMENT.

HIDES AND LEATHER.

Imports of hides and skins declined slightly in June, due to the smaller amount of cattle hides imported. Prices of hides declined.

Production of all kinds of leather declined in June, but exports increased. Sales of belting declined.

Boot and shoe production again declined in June and exports also were less than in May. Prices of boots and shoes remained unchanged.

57735°—23—2

The first monthly report of the Bureau of the Census on leather gloves and mittens shows the following figures of gloves cut during May by 221 firms representing 232 factories, comprising 80 per cent of the total value of leather gloves and mittens reported by the Census of Manufactures of 1921.

LEATHER GLOVES AND MITTENS.

(Quantity cut in May in dozen pairs.)

	Men's and boys'.	Women's and children's.
Dress and street gloves, mittens, etc.:		
Imported.....	35,755	11,320
Domestic.....	25,164	4,701
Work gloves, mittens, etc.	269,423	275

CHEMICALS, FATS, AND OILS.

The output of acetate of lime and methanol increased in May and stocks of wood at chemical plants were larger than in April, but less than in May, 1922. Imports of potash increased in June but nitrate of soda imports declined almost 77 per cent. Exports of sulphuric acid and dyes declined but fertilizer exports increased. Prices of essential oils and drugs and pharmaceuticals advanced while crude drugs and chemicals declined.

Receipts of turpentine and rosin at southern ports increased in June in a seasonal movement. Stocks of rosin increased but turpentine stocks underwent a decline.

Production and stocks of cottonseed oil and stocks of cottonseed made the usual seasonal decline in June, but all three items were larger than a year ago. Receipts, shipments, and stocks of flaxseed exceeded both May, 1923, and June, 1922, figures. Exports of vegetable oils declined from May,

CEREALS.

The August 1 estimate of the wheat crop indicates a production of 793,376,000 bushels. June exports of wheat and flour decreased both from the preceding month and from June a year ago. Receipts of wheat increased but shipments declined, both being smaller than their respective movements in June a year ago. Prices of wheat and flour continued to decline.

The following report by the Bureau of the Census represents the second monthly tabulation of the output of the wheat-milling industry, and is based on reports in June from 1,025 mills, which produced 78.3 per cent of the total wheat-flour output in 1921 according to the census of that year, as compared with 1,060 reporting firms in May which produced 79.9 per cent of the output in 1921:

MONTH.	Mills reporting (number).	Wheat ground (bushels).	PRODUCTION.		Daily (24-hour) capacity in wheat flour (barrels).
			Wheat flour (barrels).	Wheat grain offal (pounds).	
May.....	1,060	34,031,418	7,453,428	490,430,656	655,389
June.....	1,025	27,965,838	6,104,050	592,063,500	652,212

The corn crop estimated as of August 1 was almost 100,000,000 bushels larger than the final estimate of the 1922 crop. Receipts of corn increased in June while shipments declined, both movements being considerably below June a year ago. Exports of corn were over 75 per cent below the exports in June, 1922. The visible supply of corn on June 30 amounted to 4,269,000 bushels as against 33,068,000 bushels a year ago. The price of corn continued to advance.

Reports furnished to the Department of Commerce by the Iowa-Nebraska Cannery Association show a decline in unsold stocks during June of 27 per cent.

The oats crop is estimated at about 100,000,000 bushels larger than in 1922. The visible supply of oats continued to decline and on June 30 was 80 per cent below a year ago. Exports declined sharply both from the preceding month and from June, 1922, and the price of oats receded 3 per cent during the month. Exports of barley and rye declined as did prices of these grains, the price of rye in June being 22 per cent lower than a year ago.

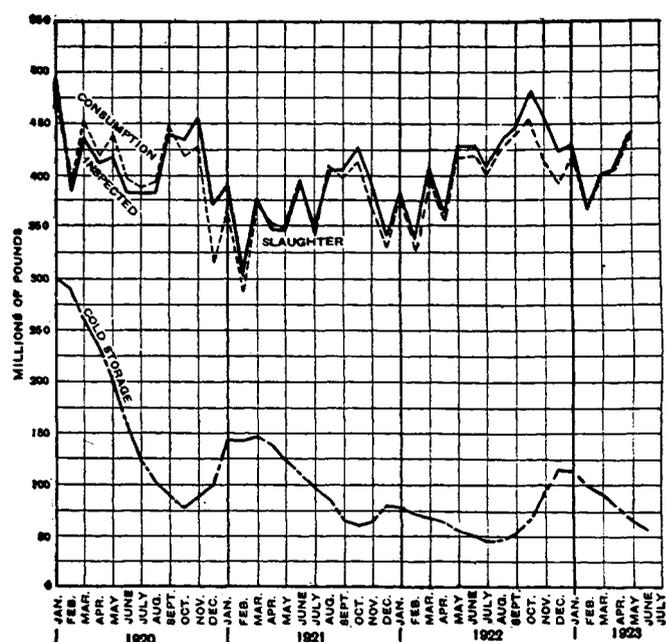

OTHER CROPS.

Receipts of rice at the mills increased in June while exports declined. Car-lot shipments of apples declined both from the preceding month and June a year ago while the cumulative total for the first half of the year was over 50 per cent above the shipments in the corresponding period of 1922. Shipments of potatoes increased 31 per cent over May while the movements of onions and citrus fruits were below the May shipments.

MEATS AND DAIRY PRODUCTS.

The movement at primary markets of cattle, hogs, and sheep in June declined from the preceding month and, with the exception of receipts and shipments of hogs, was below June a year ago. Exports of beef and beef products increased 10 per cent, but were considerably less than a year ago. Pork exports declined in June but the total for the first half of 1923, amounting to 1,006,349,000 pounds, was 44 per cent greater than the exports in the first half of 1922. Cold-storage holdings of beef and pork were higher than a year ago while holdings of lamb were less. Consumption of beef and pork in May, figures for which have just become available, were considerably higher than in May a year ago. Prices of cattle, beef, and lambs advanced, while hogs and pork declined.

INSPECTED SLAUGHTER, CONSUMPTION, AND COLD-STORAGE HOLDINGS OF BEEF.

Receipts of poultry at 5 principal markets increased 24 per cent in June and the total for the first half of 1923, amounting to 126,908,000 pounds, was 36 per cent greater than the movement in the corresponding period of 1922. Cold storage holdings of poultry on July 1 were below the June 1 holdings, but considerably above the holdings on July 1 a year ago. The total fish catch at the principal ports increased in June, while the cold storage holdings of fish on June 15 were 17 per cent less than the holdings a year ago.

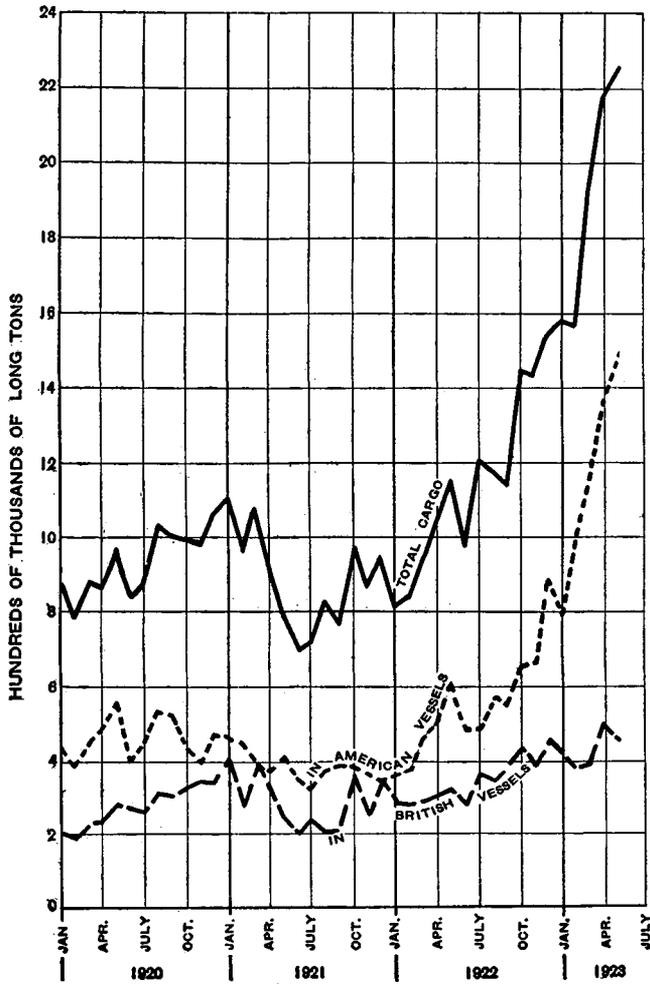

Receipts of butter and cheese were larger in June than in the preceding month and their cumulative movements for the first half of the year were above the receipts for the corresponding period of 1922. Receipts of eggs, although below the movement in May, were considerably above June a year ago. Storage holdings of butter were less than a year ago, but holdings of cheese and eggs increased. Prices of but-

ter declined while cheese prices increased during June. Exports of condensed and evaporated milk, amounting to 88,500,000 pounds for the first six months of 1923, were 26 per cent below the same period of 1922.

WATER TRANSPORTATION.

Tonnage of vessels clearing from United States ports in foreign trade increased 3 per cent over May while tonnage entering declined less than 1 per cent. Figures for May indicate a continuance of the record movement in Panama Canal cargo traffic, while the movement of freight through the Sault Ste. Marie Canals was twice the volume of a year ago. The index of ocean freight rates to Europe declined 4 per cent in June.

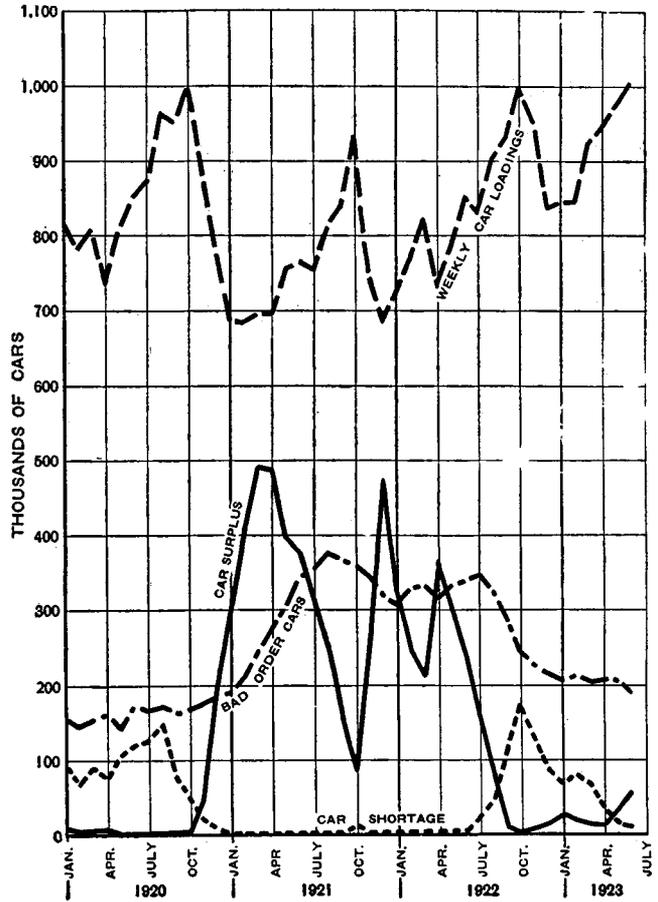

PANAMA CANAL TRAFFIC.

RAILROADS.

The weekly average car loadings for June were 1,005,162 cars as compared with 978,341 cars in May and 851,700 cars in June, 1922. The average daily net surplus of cars at the end of June amounted to 46,775 as against 16,166 at the end of May.

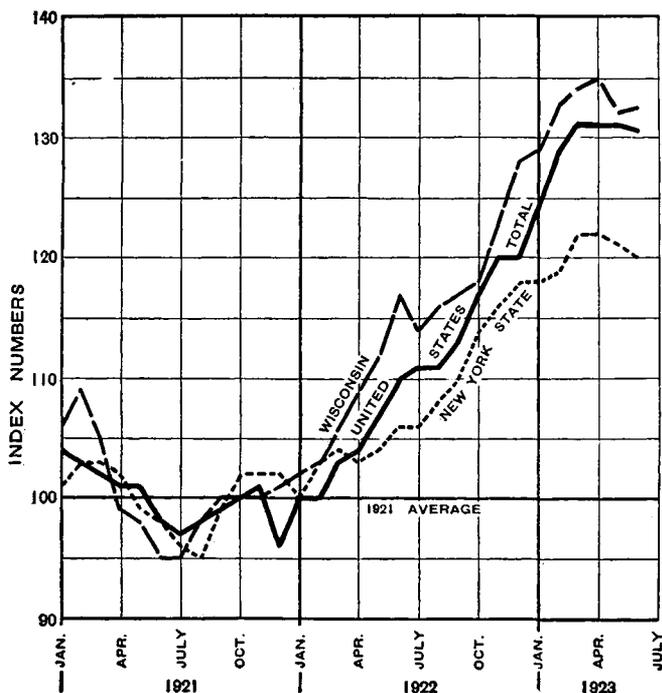

SHORTAGE, SURPLUS, BAD-ORDER, AND TOTAL LOADINGS OF FREIGHT CARS.

LABOR.

Employment in 1,428 representative United States factories, each employing 500 or over, showed a decline of less than 1 per cent from the preceding month. Unemployment in Pennsylvania on July 1 amounted to 8,997, as against 167,405 on July 1, 1922.

RELATIVE FACTORY EMPLOYMENT.
(Relative monthly employment 1921=100.)

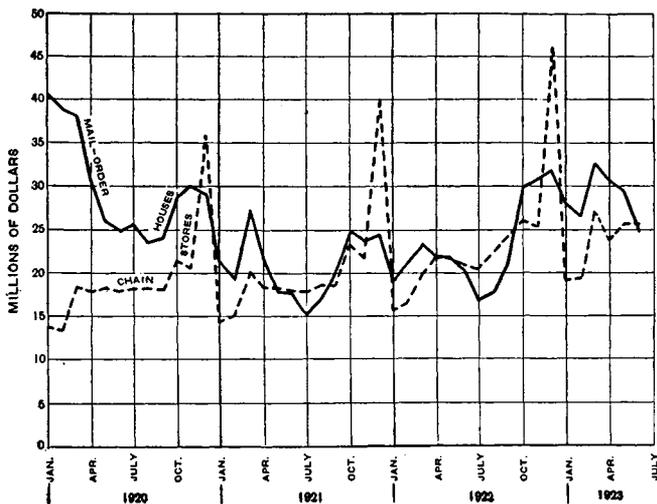

DISTRIBUTION MOVEMENT.

Retail sales by the large mail-order houses continued the usual seasonal decline, but the volume of business in June was considerably above the corresponding months of 1921 and 1922. The total sales for the first half of 1923 were 37 per cent above the corresponding total for 1922.

June sales of ten-cent chain stores totaled \$25,785,000, as against \$21,099,000 a year ago. The total sales for the first half of 1923 exceeded by 20 per cent the business in the corresponding period of 1922.

SALES OF MAIL-ORDER HOUSES AND TEN-CENT CHAIN STORES.

The index of department-store sales for June stood at 122, based on 1919 as 100, as against 126 for May and 108 for June, 1922. Department store inventories made the usual seasonal decline, and at 117 the June index, on a 1919 base, compares with 108 for a year ago and 133 for June, 1920.

The June weighted index of wholesale trade as compiled by the Federal Reserve Board, based on 1919 as 100, stood at 84 as against 80 in May and 77 in June a year ago.

Newspaper advertising made the usual seasonal decline in June, but the lineage was almost 10 per cent above June a year ago. Magazine advertising in July similarly declined and the total for the first seven months of 1923 was 28 per cent above the corresponding period last year.

Postal receipts in 50 selected cities during June totaled \$23,802,000 as compared with \$22,231,000 in June, 1922. During the first six months of 1923 the receipts in these cities exceeded by 13 per cent the receipts during the same period of 1922.

PUBLIC FINANCE.

During the fiscal year ending June 30, 1923, the total interest-bearing debt of the United States Government was reduced \$703,000,000, the debt on June 30 amounting to \$22,007,000,000. Customs receipts declined almost 5 per cent in June but were considerably higher than a year ago. During the first half of 1923 the total receipts amounted to \$313,005,000 as compared with \$209,435,000 for the first half of 1922. Ordinary receipts for the first half of the year exceeded by 19 per cent the receipts during the same period of 1922, while ordinary expenditures during this period made an increase over the first half of 1922 amounting to only 9 per cent. The per capita distribution of money held outside of the United States Treasury and the Federal Reserve System amounted to \$42.37 as against \$42.34 in May and \$39.86 in June, 1922.

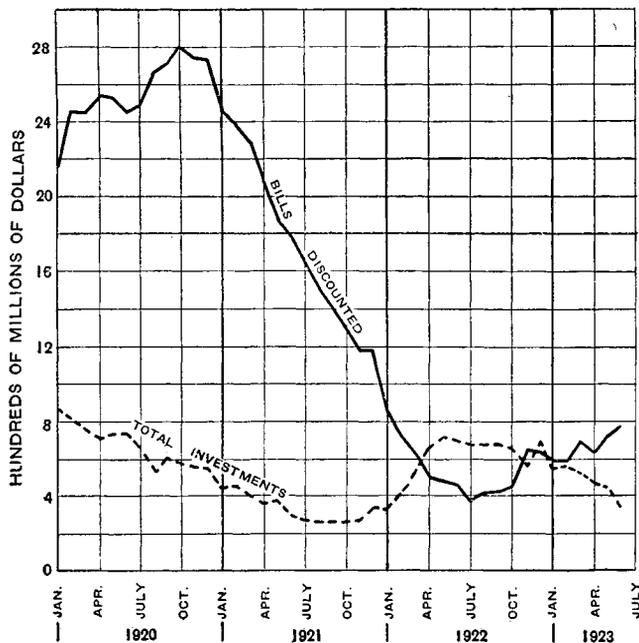

BANKING AND FINANCE.

Debits to individual accounts outside of New York City declined but were 14 per cent above June a year ago, while the total for the first half of 1923 showed an increase of 15 per cent over the first half of 1922. Both bank clearings and debits in New York City were below their respective movements in June, 1922, but the totals for the first half of 1923 were 3 per cent and 5 per cent greater, respectively, than for the same period of last year.

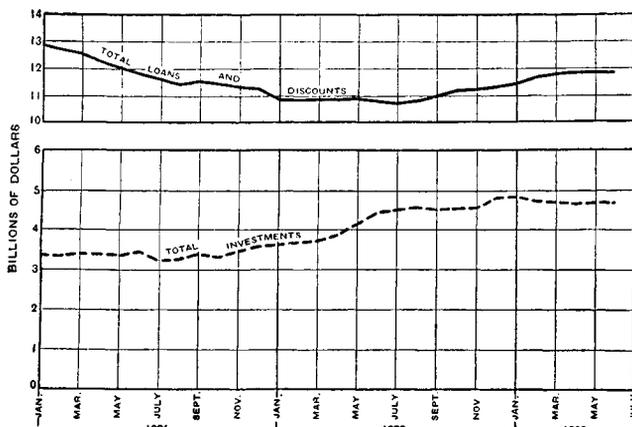

Discounts of the Federal Reserve Banks continued to increase while investments again declined. Total reserves and the reserve ratio increased while total deposits and notes in circulation declined. Member banks of the Federal Reserve System showed increases

in loans, discounts and investments and a decline in net demand deposits. The average interest rate on commercial paper at 4.98 per cent for June showed a decline from the preceding month while the average call loan rate at 5.05 per cent recorded an increase for the month, both rates being considerably above June, 1922.

BILLS DISCOUNTED AND TOTAL INVESTMENTS OF FEDERAL RESERVE BANKS.

LOANS, DISCOUNTS, AND TOTAL INVESTMENTS OF FEDERAL RESERVE MEMBER BANKS.

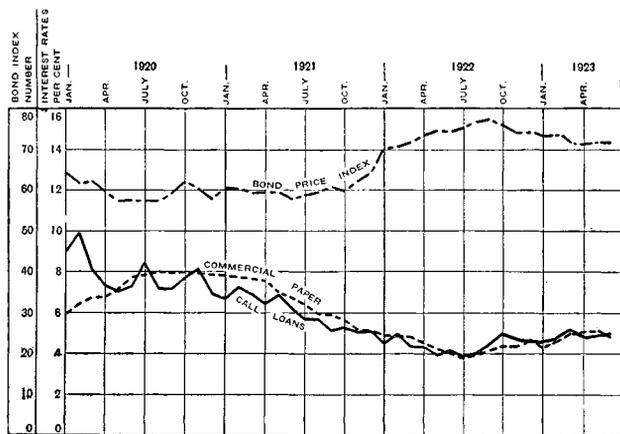

Savings deposits in banks of the Federal Reserve System exclusive of the St. Louis district made an increase of almost 2 per cent over May 31, and 11 per cent over June 30, 1922. Of the several Federal Reserve districts, Richmond was the only one to record a decline, which amounted to less than 1 per cent, while St. Louis showed an increase of 5 per cent. The total new life insurance written in June increased and was 32 per cent greater than June, 1922. The aggregate policy value of the insurance sold during

the first half of 1923 amounted to \$3,922,363,000 as compared with \$3,143,738,000 for the same period of last year.

The number of business failures declined in June, and for the first half of 1923 amounted to 9,724 firms representing a decline of over 27 per cent from the business mortality in the same period of 1922. Similarly the liabilities in the first half of 1923, amounting to \$259,423,000, showed a decline of 31 per cent from a year ago.

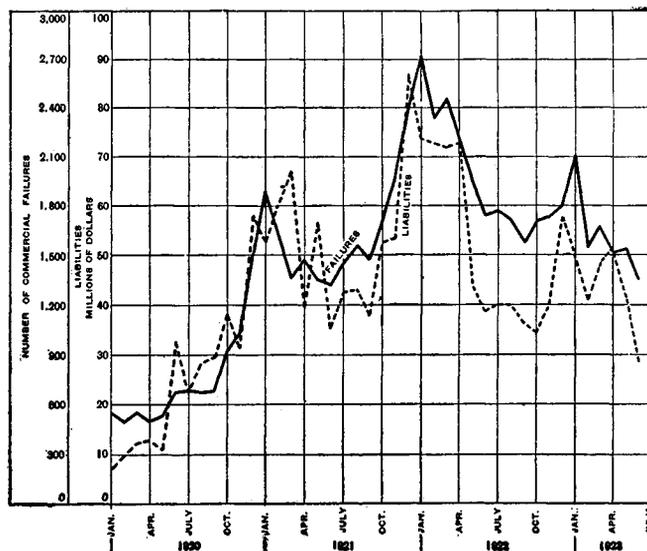

New capital issues declined in June both from the preceding month and from June a year ago, while the total for the first half of 1923 was 14 per cent greater than for the same period last year. New incorporations increased both over the preceding month and June a year ago, amounting to \$5,338,045,000 for the first half of 1923, as compared with \$4,195,047,000 for the same period of 1922.

INTEREST RATES AND BOND PRICES.

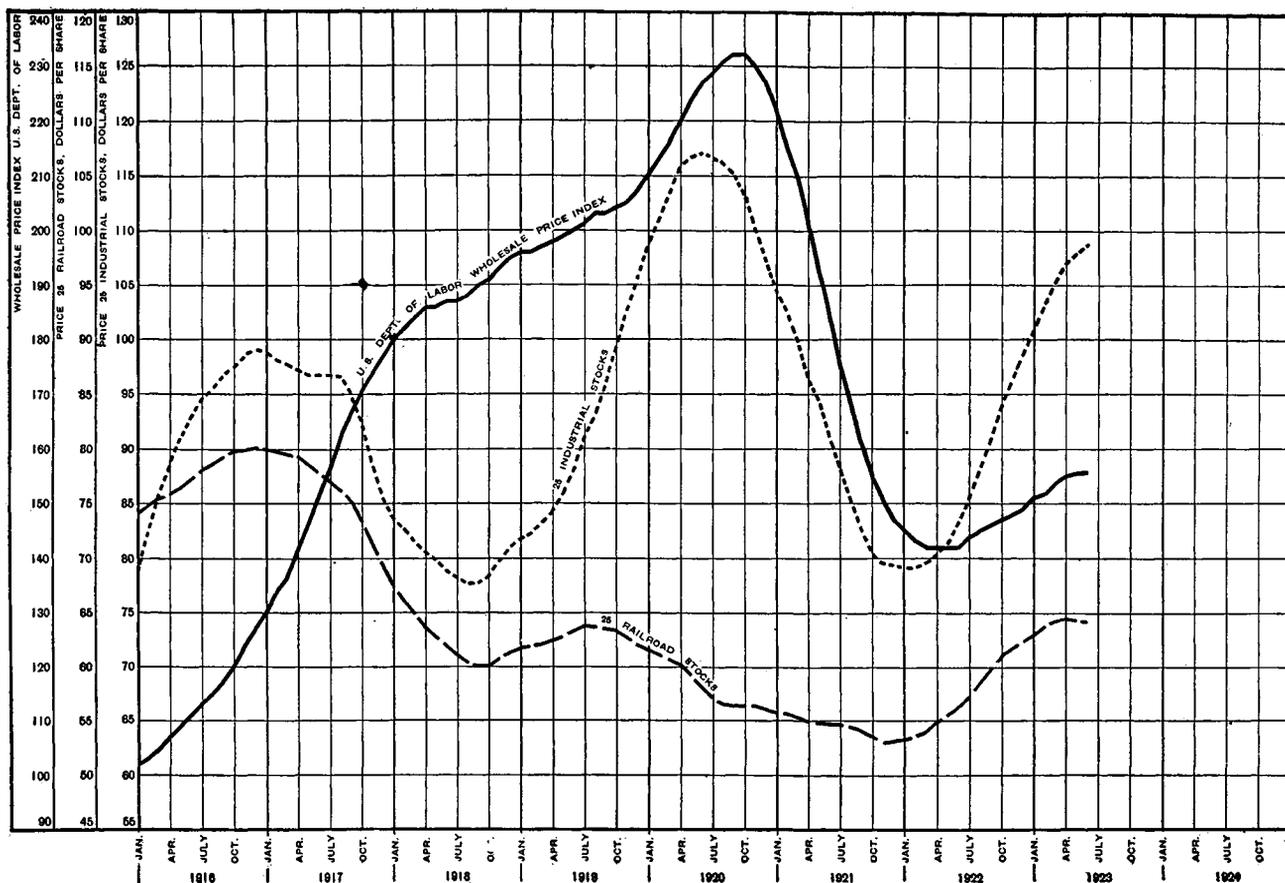

A total of \$365,510,000 was distributed in July in the form of dividend and interest payments which may be compared with \$344,050,000 in July, 1922, and \$340,166,000 in July, 1921.

NUMBER OF BUSINESS FAILURES AND AMOUNT OF DEFAULTED LIABILITIES.

COMPARISON OF WHOLESALE PRICES AND STOCK PRICES.
(Twelve months' moving average.)

Prices of industrial stocks declined while railroad shares rallied. Bond prices in general advanced during June. Sales of stocks on the New York Stock Exchange, totaling 20,317,000 shares showed a decrease of 12 per cent from May. Bond sales during the month declined 7 per cent.

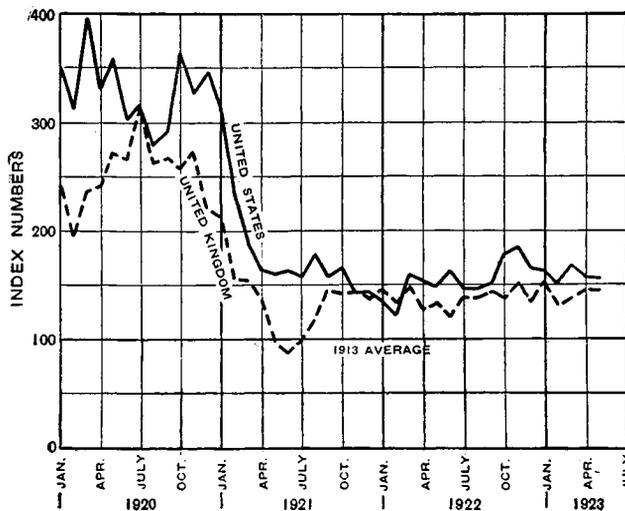

GOLD AND SILVER.

Domestic gold receipts at the mint totaled 69,422 fine ounces, a decrease of 13 per cent from the May receipts. The Rand output for June declined but the total for the first half of 1923 was 84 per cent greater than for the corresponding period of 1922. Gold imports and exports declined in June. Silver production declined but the total output for the first half of the year was 37 per cent greater than the production for the same period of 1922. Imports and exports of silver increased during the month while the prices of silver both at New York and London declined over 3 per cent.

FOREIGN EXCHANGE.

Exchange on London continued to decline in June while exchange on Netherlands and Chile increased during the month. Exchange on the other important countries either declined or remained stationary in May. The general index of foreign exchange for June at 65 may be compared with 66 for May and 71 for June, 1922.

EXPORTS FROM THE UNITED STATES AND THE UNITED KINGDOM.

FOREIGN TRADE.

Total exports from the United States amounted to \$320,054,000 as compared with \$316,649,000 in May and \$335,117,000 in June, 1922. Exports of manufactures ready for consumption totaling \$131,552,000 showed an increase from May and may be compared with a total of \$121,319,000 for June, 1922. Exports of foodstuffs in crude condition in the first half of 1923 showed a decline of 32 per cent from the corresponding period of 1922, while exports of man-

ufactures for consumption and for further use in manufacturing registered increases of 16 per cent and 21 per cent, respectively, over the first half of 1922.

Imports into the United States declined in June, amounting to \$320,257,000, which may be compared with \$260,461,000 for June a year ago. The total imports of crude materials for use in manufacturing amounted to \$816,783,000 for the first half of 1923,

representing an increase of 64 per cent over the same period of 1922. Imports of foodstuffs partly or wholly manufactured increased 62 per cent in the same period while manufactured goods for further use in manufacturing amounted to \$394,637,000 for the first half of the year, an increase of 71 per cent over a year ago. Imports of manufactures ready for consumption during this period increased 15 per cent.

INDEX NUMBERS OF PRODUCTION AND MARKETING.

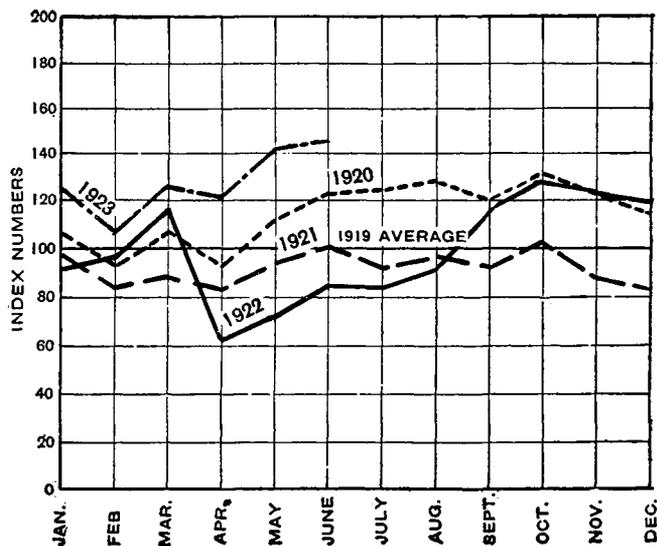

In recent numbers of the Survey there have been published detailed discussions of certain index numbers of production and marketing dealing particularly with raw materials. The following tables give the recent figures for each of these index numbers compared with the corresponding months of 1922. The methods of compiling these indexes and the weighting factors used are discussed in detail in the issues of the Survey referred to. A summary and combined raw material index number is given on page 7 of this issue.

INDEX OF MINERAL PRODUCTION.¹

³ Revised.

TREND OF BUSINESS MOVEMENTS.

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. The numerical data for the latest months are given and in addition index numbers for the last four months and for two corresponding months of a year ago. In many lines the figures do not lend themselves readily to statistical uniformity, due to lateness of their publication or publication at other than monthly intervals; therefore the following explanations of the various headings are offered to make clear such distinctions and in general to facilitate the use of the table:

May, 1923.—This column gives the May figures corresponding to those for June shown in the next column—in other words, cover the previous month, and in some cases, where indicated by a footnote, refer to the previous quarter; that is, ending March 31, 1923.

June, 1923.—In this column are given the figures covering the month of June, or, as in the case of stocks, etc., the situation on June 30 or July 1. In a few cases (usually where returns are reported quarterly only), the figures are for the quarter ending June 30 or the condition on that date. Where this column is left blank, no figures for June were available at the time of going to press (August 7).

Corresponding month, May, 1922, or June, 1922.—The figures in this column present the situation exactly a year previous to those in the "June, 1923," column (that is, generally June, 1922), but where no figures are available for June, 1923, the May, 1922, figures have been inserted in this column for comparison with the May, 1923, figures. In the case of quarterly figures, this column shows the corresponding quarter of 1922.

Cumulative total through latest month.—These columns set forth, for those items that properly can be cumulated, the cumulative total for the first six months of the calendar years 1922 and 1923, respectively, except where the June, 1923, figures are lacking, in which case the cumulative total for five months in each year is given.

Percentage increase (+) or decrease (-) cumulative, 1923 from 1922.—This column shows the per cent by which the cumulated total for the six months ending June, 1923, is greater (+) or less (-) than the total for the corresponding period ending June, 1922.

Base year or period.—For purposes of comparison with a previous more or less normal period, all items, so far as possible, are related to such a period by index numbers. The period taken for each item, called the base, is the monthly average of the year or period stated in this column. Wherever possible, the year 1913 is taken as a base, and if no pre-war figures are available, 1919 is usually taken to avoid using a war year as a basis. In some cases it will be noted that figures were not available prior to 1920 or even 1921, and that sometimes a month, or an average of a few months, has to be used rather than a year's average. Also, for some industries, 1919 would not be a proper base on account of extraordinary conditions in the industry and therefore some more representative year has been chosen.

Index numbers.—In order to visualize the trend of each movement, index or relative numbers are given for the last four months and for two corresponding months of a year ago. These index numbers are computed by allowing the monthly average for the base period, usually 1913 or 1919, to equal 100. If the movement for a current month is greater than the base the index number will be greater than 100. If the converse is true the index number will be less than 100. The difference between 100 and any index number gives at once the per cent increase or decrease compared with the base period. Index numbers may also be used to compute the approximate per cent increase or decrease from one month to the next.

Percentage increase (+) or decrease (-) June from May.—The last column shows the per cent increase or decrease of the figure for the last month compared with the preceding month.

NOTE.—Detailed tables covering all items are given in this number. Consult index at end of bulletin. <i>In many cases July figures are now available and may be found in the detailed tables (pp. 52-202) for each subject.</i>	NUMERICAL DATA. ¹ Weighted average of 62 commodities with comparable monthly figures from January, 1920, and representing about 36 per cent of the entire manufacturing industry based on value added by manufacture; for details, see January, 1923, issue (No. 17) of Survey of Current Business.

² Weighted average of 8 commodities; for details see May, 1923, issue of Survey of Current Business.

³ Weighted average of 31 commodities; for details see May, 1923, issue of Survey of Current Business.

⁴ Weighted average of 9 commodities representing about 87 per cent of the total mineral production; for details, see May, 1922, issue (No. 9) and September, 1922, issue (No. 13) of Survey of Current Business.

⁵ Weighted average of 26 commodities representing about 94 per cent of the total crop production; for details, see July, 1922, issue (No. 11) of Survey of Current Business.

⁶ Weighted average of 9 commodities representing about 99 per cent of marketed live stock and live-stock products; for details, see June, 1922, issue (No. 10) of Survey of Current Business.

⁷ Weighted average of 13 commodities representing about 80 per cent of forest products marketed; for details see August, 1922, issue (No. 12) of Survey of Current Business.

⁸ Weighted average of above groups; for details, see September, 1922, issue (No. 13) of Survey of Current Business.

⁹ Weighted average of 70 commodities with comparable monthly figures from November, 1921, and representing about 44 per cent of the entire manufacturing industry; for details, see January, 1923, issue (No. 17) of Survey of Current Business.

¹⁰ Weighted average of 14 commodities; for details, see March, 1922, issue of Federal Reserve Bulletin.

¹¹ Weighted average of 7 commodities; for details, see March, 1922, issue of Federal Reserve Bulletin.

¹² Weighted average of 34 commodities; for details, see March, 1922, issue of Federal Reserve Bulletin.

¹³ Weighted average of 22 commodities corrected for seasonal variations; for details, see December, 1922, issue of Federal Reserve Bulletin.

¹ Receipts of wool at Boston compiled by Boston Chamber of Commerce; Imports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and quarterly stocks from U. S. Department of Agriculture, Bureau of Agricultural Economics, until April, 1922, beginning with April, 1922, compiled by U. S. Department of Commerce, Bureau of the Census, in cooperation with U. S. Department of Agriculture, Bureau of Agricultural Economics.

² These figures have been revised to include only comparable reports each month and thus do not contain the figures for the American Woolen Company and a few small firms, for which estimates had been made in previous compilations. Stocks include wool, tops and noils.

³ Average of the last two quarters of 1920.

⁴ Average of the first three quarters of 1921.

⁵ Includes U. S. Government stocks.

⁶ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

⁷ Average of the last three quarters of 1922.

COTTON.

¹ Except receipts into sight, compiled by *New Orleans Cotton Exchange*, and world visible supply of American cotton, compiled by *Commercial and Financial Chronicle*. Production estimates from *U. S. Department of Agriculture, Bureau of Agricultural Economics*; imports and exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; consumption and domestic stocks from *U. S. Department of Commerce, Bureau of the Census*. Linters are not included in the statistics in this table, except in the exports. It should be noted that the monthly averages of stocks (except visible supply) and consumption are based on the crop year ending July 31 of the year stated, while for ginnings the average is for the crop grown in the year stated. Other averages are based on the calendar years.

² These figures are for fiscal years ending June 30 of the year given; those following are for calendar years.

³ All bales are running bales counting round as half bales, except for imports which are given in equivalent 500-pound bales.

COTTON.

¹ The yearly figures represent the latest revised estimates of total production for the year (not a monthly average). The monthly figures show the current estimates of total production as reported each month.² Figures for September include first 25 days of the month only; remaining 5 days are included with October. January figures cover the first 16 days of the month, and February figures cover all ginnings of the crop made after Jan. 16.³ Computed from figures on ginnings, imports, reexports, exports (excluding linters), consumption, and mill and warehouse stocks, and corrected at the end of each crop year by reports to the Bureau of the Census.⁴ Computed from total crop and ginnings to date. September figures are as of Sept. 25, January as of Jan. 16; otherwise as of last day of the month.⁵ These figures represent world visible supply of American cotton.⁶ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ Except exports of cotton cloth from the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce. The figures for knit underwear are secured from the Associated Knit Underwear Manufacturers of America; those relating to fine cotton goods from the Fine Cotton Goods Exchange.

² These figures are for fiscal years ending June 30 of the years specified; others are for calendar years.

³ Includes duck and other cloth, bleached, unbleached, and colored. Beginning with January, 1921, the figures are reported in square yards instead of linear yards, which probably makes the figures slightly smaller than when given in linear yards.

⁴ Reported by 24 identical mills in the New Bedford district, representing about 50 per cent of the fine cotton goods industry in New England and from 20 to 30 per cent throughout the United States.

⁵ Prorated from percentages of normal production, as reported by the association, representing mills of an estimated normal production of 900,000 dozens per month. Reports on production cover from 50 to 60 mills, while for other items the reports cover from 30 to 40 mills.

⁶ Average for last six months of year.

⁷ Nine months' average, April to December.

MISCELLANEOUS TEXTILES.

¹ Imports of total raw silk, unmanufactured fibers and burlap are from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and stocks at warehouses of raw silk are from the Silk Association of America; sales of elastic webbing are from the Webbing Manufacturers Exchange; Fall River mill dividends from G. M. Haffards & Co.

² Total unmanufactured silk, including raw silk, cocoons, and waste.

³ Consumption figures represent withdrawals from warehouses. Note that February to December, 1920, inclusive, is used as the base period.

⁴ Includes flax, hemp, jute, kapok, manila, New Zealand flax, sisal, etc.

⁵ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

⁶ Dividends for quarter ending in month given. Yearly figures are quarterly averages.

ACTIVE TEXTILE MACHINERY.

¹ Data from U. S. Department of Commerce, Bureau of the Census.² Formerly reported as of the first of the following month representing previous month's operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.³ The monthly averages are for cotton crop years (beginning Aug. 1 and ending July 31). Figures opposite any one year represent the monthly average number of active cotton spindles for the period beginning Aug. 1 of the preceding year.⁴ Data for 1913 collected by the National Association of Wool Manufacturers.

HOURLY ACTIVITY IN TEXTILE MACHINERY.

² The price of cotton to the producer represents a composite of all grades as they come from the farms. The market price is quoted on a specific grade and includes handling and transportation charges.³ Based on the price of unwashed wool, except prior to 1917 when it was based on the price of washed wool. This difference in 1917 changed the average from \$1.145 on the washed base to \$1.164 on the unwashed base.

² Eleven months' average, February–December, 1921.

³ The composite pig iron price compiled by the *American Metal Market* is the average price of 10 tons of iron distributed as follows: One ton each of Bessemer Valley; No. 2 foundry valley; No. 2 X foundry at Philadelphia and at Buffalo; No. 2 foundry at Cleveland and at Chicago; two tons each of basic valley and No. 2 Southern foundry at Cincinnati.

¹ Yearly figures represent the monthly averages of total production of all companies as compiled annually by the American Iron and Steel Institute. The institute reported up to 1923 monthly production figures for 30 companies which produced 84.2 per cent of the total output of the country in 1920, 87.48 per cent in 1921, and 84.15 per cent in 1922. In order to make the monthly figures comparable, they have been calculated to a 100 per cent production each year on the basis of the above percentages. The 1923 figures are calculated on the basis of reports from companies which produced 95.35 per cent of the total production in 1922, the total computations to 100 per cent in 1922 and 1923 being made by the American Iron and Steel Institute.

² Unfilled orders of steel and earnings reported by U. S. Steel Corporation.

³ Sheets, blue, black, and galvanized, reported by the National Association of Sheet and Tin Plate Manufacturers, representing almost all the independent sheet manufacturers and about 70 per cent of the total output of sheets.

⁴ Bookings of commercial steel castings reported by the Steel Founders Society and principal nonmember firms to the U. S. Department of Commerce, Bureau of the Census. Reports are by 65 identical firms with a capacity of 96,900 tons per month, of which 58,700 tons are usually devoted to railway specialties. This represents over two-thirds of the castings capacity of the United States devoted to commercial castings (as distinguished from castings used in further manufacture in the same plant). Prior to 1920, figures for companies representing about 6 per cent of the miscellaneous castings are not available and the totals for this class have been prorated by that amount for these years in order to afford comparison with later years.

¹ Locomotive shipments and unfilled orders reported direct by principal locomotive companies; Freight car orders by domestic railroads compiled by the *Iron Trade Review*; vessels under construction and vessels completed, *U. S. Department of Commerce, Bureau of Navigation*; fabricated structural steel by the *Bridge Builders and Structural Society* up to April, 1922, and since then compiled by *U. S. Department of Commerce, Bureau of the Census*, including reports from the *Structural Steel Society*; iron and steel exports by *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; steel furniture compiled by the *U. S. Department of Commerce, Bureau of the Census*, including reports from the *National Association of Steel Furniture Manufacturers*.

² Gross ton represents in units of 100 cubic feet the entire cubical capacity of the vessel, including crew and engine space.

³ Tonnage under construction on the first of the month refers to the gross tons of shipping, building or under contract to build for private owners. Includes only steel vessels of over 100 gross tons. Does not include Government ships or ships building or contracted for by U. S. Shipping Board.

⁴ Includes ocean-going, lake and river vessels built and officially numbered by the *U. S. Department of Commerce, Bureau of Navigation*. Includes vessels of the U. S. Shipping Board and private American owners, but not vessels built for foreign owners.

See footnotes on opposite page also.

¹ Percentages of capacity calculated from reports of the *Bridge Builders and Structural Society* up to April, 1922, and applied to estimated total capacity each year based on a special survey by the *Bureau of the Census* (see *January, 1923*, issue, No. 17, p. 13, for details). Beginning with April, 1922, reports received from 175 firms with a total capacity of 225,575 tons have been prorated to the estimated total capacity of the United States, 250,000 tons, for comparison with previous figures.

² This column gives a total of pig iron and rolled products as used in the *Iron Trade Review*, which is comparable each month back to 1913.

³ Beginning with January, 1922, all commodities are given in quantities in the export reports, many of which were previously available only on a value basis. This column gives the total of all pig iron and rolling-mill products as compiled by the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*.

⁴ These data comprise shipments from 22 manufacturers, representing practically the entire production of stock goods, which include sections, counters, office and vault verticals, safes and interiors, desks and tables, and small miscellaneous articles, exclusive of shelving and lockers.

⁵ Covers first 21 days only, during which period the old tariff law was in effect. Remaining 9 days of September are included with October.

¹ Iron ore movement from the U. S. War Department, Engineer Corps; Lake Superior iron ore movement from the Lake Superior Iron Ore Association; copper production representing smelter production from domestic ores, for 1913 through 1920, from the U. S. Department of the Interior, U. S. Geological Survey, 1921 and 1922 figures from American Bureau of Metal Statistics; exports from the U. S. Department of Commerce; prices of copper from U. S. Department of Labor, Bureau of Labor Statistics.

² Twelve month's average June, 1919, to May, 1920, inclusive.

³ No allowance made for seasonal variation in computing these index numbers. The figures represent the total iron ore movement, both for the United States canal and the Canadian canal which is equivalent to about 85 per cent of the total iron ore production of the United States. Figures for 1913 to 1922 represent monthly averages computed from the total movement for the year on a six months' basis during the equivalent of which period the total movement takes place. The canals, however, are open from April to December, inclusive, and the monthly data here shown cover the entire season during which the canals are open.

⁴ Furnaces reporting vary in number from 319 to 341. Beginning with June, 1922, reports from 15 Canadian furnaces are included.

⁵ Index number less than 1.

¹ Data on foundry equipment from *Foundry Equipment Manufacturers' Association*; shipments of agricultural pumps from the *Federal Reserve Bank of Chicago* in cooperation with the *National Association of Farm Equipment Manufacturers* and covers 22 firms, except for May and June, 1922, when only 21 firms reported; data on brass faucets from the *National Association of Brass Manufacturers*; tubular plumbing sales from the *Tubular Plumbing Goods Association*.

² Data reported by 13 members of the *Foundry Equipment Manufacturers' Association*, said to represent 65 to 70 per cent of the foundry equipment industry. The principal products are molding machines, sand-cutting machines, sand-blast machines, tumbling barrels, sand-mixing machines, cupolas, ladles, core-making machines, etc.

³ These figures include, besides the articles shown in other two columns, the value of cylinders shipped separately.

⁴ Data represent the total of 22 different classes of faucets reported to the association by its members.

⁵ Seven months' average.

⁶ Eight months' average.

⁷ Eleven months' average.

¹ Patents granted compiled from the official records on file in the U. S. Department of the Interior, U. S. Patent Office, Division of Publications; stoker sales through December, 1922, from the Stoker Manufacturers' Association, said to represent approximately 99 per cent of the industry, beginning with January, 1923, from reports to U. S. Department of Commerce, Bureau of the Census, from 15 manufacturers representing practically the entire industry.

² It should be noted that inasmuch as patents are granted on Tuesdays only, the number of patents shown for a given month represents the total of either 4 or 5 Tuesdays.

³ Data include patents granted falling within the official classification of "agricultural implements; planters, harrows and diggers, plows, harvesters, scattering unloaders, and threshing implements."

⁴ Figures are incomplete owing to the failure of 2 or 3 member companies to report.

¹ Crude petroleum production, imports, consumption, and completion of oil wells, from *U. S. Department of the Interior, Geological Survey*; stocks of crude petroleum included in "Total for Comparison" are from the *U. S. Department of the Interior, Geological Survey*, and include pipe-line stocks and tank farm stocks, producers' stocks in California, and stocks of Mexican petroleum held by importers. Beginning with January, 1923, topped oil and imported oil at refineries have not been reported by the *Geological Survey*, but the imported stocks reported by the Bureau of Mines have been added to the *Geological Survey* figures to compensate for the exclusion of the latter. This change in the method of computation reduced the January, 1923, total from 264,675,000 to 233,235,000 barrels, an almost negligible difference. Beginning with January, 1923, the *Geological Survey* total of stocks, pipe-line tank farm producers' stocks in California, and imported oil held outside refineries are given in the separate column headed "Tank farms and pipe lines." Total at refineries is from *U. S. Department of the Interior, Bureau of Mines*, and includes both imported and domestic oil. Wholesale price of crude petroleum, average for the month, from *U. S. Department of Labor, Bureau of Labor Statistics*; data on gasoline from *U. S. Department of the Interior, Bureau of Mines*. Mexican petroleum shipments are from the *Oil Trade Journal*, the current month being an approximate from the *Wall Street Journal*.

² Represents production transported from field of production, does not include oil consumed at locality of production.

³ Figures for earlier years adjusted to represent approximate net stocks to conform with data for current months.

¹ Mexican petroleum shipments from the three ports, Tampico, Port Lobos, and Tuxpam, form the best current measure of Mexican oil production.² "Exports of gasoline," as used by the Bureau of Mines, includes the items "gasoline" and all "other naphtha, etc.," as reported by the U. S. Department of Commerce, less exports to the Philippine Islands.³ Covers first 21 days only, during which period the old tariff law was in effect; remaining nine days included in October.⁴ Stocks held by refiners.⁵ Imports of crude petroleum beginning February, 1923, exclude topped oil; on this basis the January, 1923, imports were only 5,069,000 barrels. Consumption calculated on the new basis was 56,210,000 barrels in January, 1923, while days' supply was 140 at the end of December, 1922, and 138 at the end of January, 1923, on this basis.⁶ Based on total for comparison.

¹ Automobile shipments from *National Automobile Chamber of Commerce*; current automobile production data from *U. S. Department of Commerce, Bureau of the Census*; yearly figures 1913-1921 from *National Automobile Chamber of Commerce*; internal-revenue taxes on automobiles and accessories from *U. S. Treasury Department, Bureau of Internal Revenue*.

² Represents shipments from factories covering almost the entire automobile production of the United States.

³ Total of membership of the *National Automobile Chamber of Commerce*, to which are added reports to the *Bureau of the Census* from outside manufacturers, representing practically complete production. Annual figures through 1921 represent complete production as compiled by *National Automobile Chamber of Commerce*. Monthly figures from January, 1920, through June, 1921, have been estimated by the *Cleveland Trust Company* on the basis of shipments and are given in detail in the July, 1923, issue (No. 23) of the *Survey of Current Business*.

⁴ Data represent internal-revenue taxes collected under the revenue acts of 1918 and 1921. For taxes on automobiles and motor cycles ("including tires, inner tubes, parts, and accessories therefor, sold in connection therewith") the rate is 5 per cent and payable by the manufacturer. For taxes on automobile trucks and automobile wagons ("including tires, etc., sold on or in connection therewith") the rate is 3 per cent and payable by the manufacturer. For taxes on "automobile accessories and parts sold to any person other than a manufacturer (of automobiles)" the rate is 5 per cent and payable by the manufacturer.

⁵ Six months' average, July to December, inclusive.

¹ Data furnished by the Rubber Association of America. The number of firms has increased from 36 in November, 1920, to a maximum of 66 in 1922. It is stated by the Rubber Association that this variation in the number of firms does not change the totals to any great degree, except for the omission of the Firestone Tire Company, beginning in September, 1921.

² India-rubber imports including latex, from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; wholesale prices, average weekly, from U. S. Department of Labor, Bureau of Labor Statistics.

¹ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.² Computed from census data for the year indicated. The figures are not directly comparable but are given here to show the production of automobile tires as ascertained from the census of manufacturers for the years 1914 and 1919.

See footnotes on opposite page also.

Based on figures compiled by the U. S. Department of Commerce, Bureau of the Census. The data embrace returns from packers, tanners, dealers, importers, and manufacturers. As given in the detailed monthly reports, which can be obtained upon request from the Bureau of the Census, the returns for hides and skins are expressed in numbers of hides and skins. For the above summary these have been reduced to pounds on the basis of the average weights of each class. Similarly data on leather have been converted to pounds or square feet from reports in skins, sides, backs, butts, pounds, etc.

¹ Prior to July, 1922, these figures were compiled by the Tanners' Council. Since July, 1922, they have been compiled by the Bureau of the Census and for skiver and harness production represent returns from a much larger number of firms than reported to the Tanners' Council. Hence the figures from July, 1922, on are not directly comparable with those for preceding months. The index numbers in Table 27 for the months after July, 1922, have been computed by chain relatives and take account of the percentage variation rather than the absolute variation in the figures. The index numbers show the trend of the industries irrespective of the change in the number of firms reporting.

³ Beginning December, 1919, these statistics cover amount of harness leather "stuffed" rather than that produced, but it is stated that the variation between these items is small.

⁴ Includes estimated production of firms outside *Tanners' Council*.

⁵ Data on sales of oak leather belting from the *Leather Belting Exchange*, and is estimated to represent from 65 to 75 per cent of the industry.

⁶ Includes skins with and without wool, but does not include weight of wool.

⁷ Compiled by U. S. Department of Commerce, Bureau of the Census, from over 1,000 firms each month. Figures for the years 1919 and 1921 are those reported by the census of manufactures for those years. Production in 1914 totaled 252,516,603 pairs, or an average of 21,043,000 pairs per month.

⁸ Four months' average, September to December, inclusive.

HIDES AND LEATHER—TRADE AND PRICES.

Table 33.—INDEX NUMBERS.

Based on data from Government sources.

[Base year in bold-faced type; numerical data on opposite page.]

YEAR AND MONTH.	EXPORTS OF LEATHER. ¹			IMPORTS OF HIDES AND SKINS. ¹					WHOLESALE PRICES. ²							
	Sole.	Upper. ³	Total boots and shoes.	Total hides and skins.	Calf-skins.	Cattle hides.	Goat-skins.	Sheep-skins.	Hides.		Leather.		Boots and shoes.			
									Green salted, packers' heavy native steers (Chicago).	Calf-skins, country No. 1 (Chicago).	Sole, oak, scoured, backs, (Boston).	Chrome calf, "B" grades (Boston).	Men's black calf, blucher (Boston).	Men's dress welt tan calf (St. Louis).	Women's black kid, Good-year welt (St. Louis).

¹ Represent five-year (1909-1913) monthly average imports for total hides and skins, total goatskins and total sheepskins. Calfskins and cattle hides based on four-year average, 1910-1913.³ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.⁶ No quotation.

NEWSPRINT PAPER.

¹ Printing activity based on productive hours reported by plants in 52 cities in 30 states, each department being weighted for the combined index number.² Purchases of printing paper and sales of printed product by about 350 concerns, doing from 20 to 25 per cent of the total commercial printing business of the country. As the paper industry was abnormal in 1919, index numbers based on that year are not regarded as true indices; therefore 1918 was taken as a base.³ Stocks on hand end of year.⁴ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ Between 10 and 15 per cent of the books manufactured in America are new editions, the remainder being new books; while about 95 per cent of the books manufactured in this country are by American authors.² Books imported are books of foreign manufacture catalogued and marketed by American publishers.³ Incomplete returns from manufacturers prevented the compilation of the March figure.

¹ Data from *The Container Club and National Association of Corrugated and Fibre Box Manufacturers* through April, 1923, and since April from the *National Container Association*, giving the statistics of both old associations.

² Average of last six months of year.

³ Per cent of normal operating time and left-hand production column represent 17 and 16 identical firms, respectively, as reported by *The Container Club*, except that, for the first three of the six months of 1919 reported, two companies are omitted which do not appreciably affect the total. The figures in the right-hand production column are from 17 identical firms as reported by the *National Association of Corrugated and Fibre Box Manufacturers*. No index numbers have been calculated on the per cent of operating time. The column showing the total represents the combined production of the reporting members of both associations.

⁴ Per cent of normal operating time and left-hand production column reported by *The Container Club* from six or seven firms. The right-hand figures are from the *National Association of Corrugated and Fibre Box Manufacturers*, comprising three firms, except November, 1921, when four firms reported, and December, 1921, when two firms reported. No index numbers have been calculated on the per cent of operating time. The column showing the total represents the combined production of the reporting members of both associations.

⁵ Stocks at end of year.

¹ Folding paper boxes and labels from the *Association of Folding Box and Label Manufacturers*, said to represent approximately 60 per cent for the folding-box industry and 75 per cent for the label industry.

² Rope paper sacks from *Rope Paper Sack Manufacturers' Association*, said to represent approximately 95 per cent of the industry.

³ Data compiled by the *Abrasive Paper and Cloth Manufacturers' Exchange*, estimated to represent 90 per cent of the industry. The totals given include the sales of garnet, emery, flint, and artificial (silicon, carbide, and aluminous oxide) paper, cloth, and combinations. Figures are stated in equivalent reams, 9 by 11 inches in size. The data submitted show that in 1919 the total domestic sales were made up of the following approximate percentages: Garnet 39, emery 8, flint 32, and artificial 20 per cent.

⁴ Twelve months' average, July, 1921, to June, 1922. Numerical data not furnished by the association.

⁵ Data on fresh-water pearl buttons from *National Association of Button Manufacturers* from reports of 17 firms, representing 95.2 per cent of the machine capacity of the association members, except prior to July, 1922, when 16 firms reported.

¹ Building material price indexes representing the relative cost of building materials entering into the construction of a six-room frame house and a six-room brick house from the U. S. Department of Commerce, Bureau of Standards, Division of Building and Housing, and Bureau of the Census, which is based on prices paid for material by contractors in some 60 cities of the United States. The prices are weighted by the relative importance of each commodity in the construction of a six-room house; plumbing fixtures, wholesale price, compiled by the Bureau of the Census, is an average of 12 reports of combined net selling prices to retailers, without freight, on the following competitive fixtures: Bath tub, washstand, water-closet, sink, two-part cement laundry tub, and 30-gallon range boiler.

² This index number, furnished through the courtesy of the *Aberthaw Construction Co.*, is designed to show the relative changes in the cost of constructing a standard concrete factory building. The company believes that the year 1914 gives a normal base and that July, 1920, with an index number of 265, represented the peak of costs. Beginning with June, 1923, the Morton C. Tuttle Company has also prepared an index on a similar basis, with the same results except for July, 1923, at 207, and August, 1923, at 204. These index numbers are given as of the first day of the month.

³ The construction cost index, computed by the *Engineering News Record*, is based upon the costs of steel (structural shapes, Pittsburgh base), cement (f. o. b. Chicago, exclusive of bags), lumber (southern pine, New York base), and the rates paid common labor in the steel industry through 1920, after which common labor rates are averages reported from about 20 cities by correspondents of the *Engineering News Record*. The prices are weighted on the basis of the total production of steel, cement, and lumber, and the total supply of common labor.

⁴ Compiled by the *Engineering News Record*, on the basis of contracts let as reported by this publication and its construction cost index number, based on 1913 costs.

⁵ Data from *National Bottle Manufacturers Association*, based on reports of identical firms representing approximately 90 per cent of the capacity of the industry.

⁶ Data from reports of identical firms by the *Illuminating Glassware Guild*, estimated to represent from 70 to 75 per cent of the capacity of the industry, based on a normal capacity of 6,000 turns.

⁷ Data from the *Optical Manufacturers Association*, representing about 60 per cent of the industry.

⁸ Twelve months' average, May, 1921-April, 1922.

¹ Southern construction from *Manufacturers' Record*. Other data compiled by the F. W. Dodge Co., covering small towns and rural districts as well as large cities. Prior to May, 1921, these figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

¹ Data compiled by the F. W. Dodge Co., covering small towns and rural districts as well as large cities in 27 northeastern states, except fire losses in the United States and Canada, included here for convenience, compiled by the *New York Journal of Commerce*, and fire losses in Great Britain compiled by the *London Times*. Prior to May, 1921, the building figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

² Prior to January 1923 these figures did not include fires involving losses of less than £1,000.

³ Grand total includes military and naval buildings and miscellaneous, in addition to the groups listed in this and the preceding table (p. 95).

¹ Data on Michigan hardwoods (chiefly maple, birch, basswood, and beech) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.² Quarterly average.³ Ten months' average.

¹ Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills. These figures represent actual reports from 60 to 75 mills each month. The hardwoods cut are mostly maple, birch, and beech.² Compiled by *American Walnut Manufacturers' Association* from reports of identical firms representing from 50 to 60 per cent of the walnut lumber industry.³ Combined figures representing average shipments and unfilled orders per firm from reports of 50 identical firms of the *National Association of Chair Manufacturers*, from 42 to 58 firms of the *Southern Furniture Manufacturers Association*, and from about 100 firms of the *National Alliance of Case Goods Associations*.

¹ The figures given for production and stocks of yellow pine are computed from data furnished by the *Southern Pine Association*. The method of computing is first to find the per cent which the actual production of the mills reporting is to the normal production of these same mills. This per cent is then applied to the normal production of 192 mills. Assuming that the mills reporting are a good sample of the industry, the resulting figure in each month is equivalent to the actual production of the 192 identical mills and hence shows the trend of the industry. The same procedure is followed in the case of stocks. The normal monthly production of the 192 mills is given as 484,065,392 feet and the normal stocks of the same mills as 1,262,450,326 feet. By normal production the *Southern Pine Association* means the average output for the first 4 months of 1916 and normal stocks refer to the average stocks during the 16 months ending with April, 1916.

² The *Western Pine Manufacturers' Association* has supplied figures showing the actual and normal production for the mills reporting in each of the periods shown. From these figures the per cent of normal production is obtained in each case, and this per cent is applied to the normal production of 54 identical mills. The normal monthly production of these 54 mills is given as 148,000,000 board feet and is estimated to represent 70 per cent of the output of the western pine territory.

³ Actual figures reported by about 20 mills each month to the *California White and Sugar Pine Association*; the number of mills varies from 13 to 26.

⁴ Northern pine from the *Northern Pine Manufacturers' Association*, and includes reports from some 24 mills, both member and nonmember, located chiefly in Minnesota.

⁶ Data computed from reports on actual production and shipments as furnished by the North Carolina Pine Association, Inc., for mills varying in number from 31 to 56. The computed figures given are obtained by first determining for a given month the per cent which the actual production is of the normal production of the identical mills reporting. This per cent is then applied to an arbitrary figure of 70,000,000 board feet, which represents the approximate monthly average normal production of the mills which reported in 1919. A similar per cent of actual shipments to normal production is applied to the same figure to obtain the computed shipment figures. The resulting figures represent a computed production as of identical mills for each month. The figures are of the same order of magnitude as the actual reported production and shipments, but avoid the rather wide variations due to different mills reporting in different months.

⁶ Data from U. S. Department of Labor, Bureau of Labor Statistics, and represent average weekly prices for the month. The 1913 monthly average on which the index numbers are based is \$23.04 per thousand feet.

See footnotes on opposite page also.

¹ The figures of production and shipments of Douglas fir were obtained by applying the percentage figures of actual production and shipments to normal production of reporting mills as supplied by the *West Coast Lumbermen's Association* to the actual production of 124 mills for May, 1920. The production in that month was 447,654,540 board feet.

² Data from *U. S. Department of Labor, Bureau of Labor Statistics*, and represent average weekly prices for the month for the State of Washington.

³ Data on Michigan softwoods (chiefly hemlock) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

⁴ Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills, from actual reports of from 60 to 75 mills each month.

LUMBER—MISCELLANEOUS SPECIES.

⁵ The California Redwood Association has furnished to the Bureau of the Census the figures on the actual production, shipments, and orders received by 7 identical mills for each month of 1918, 1919, and 1920. These 7 mills represent 40 per cent of the capacity of all listed mills for these years. For the first 4 months of 1921 reports were furnished from 10 mills representing 56 1/2 per cent of the capacity of all listed mills. For the remaining months of 1921 reports are available from 11 mills representing 71 per cent of the total listed capacity, and for 1922 reports are available from 14 mills representing 73 per cent of the total listed capacity. The actual average monthly production of the 7 reporting mills for 1918 was 14,984,000 feet. On the basis of 40 per cent capacity, the 1918 average monthly production of all mills is computed as 37,460,000 feet. Regarding this as normal production, there has been computed the probable production of the total redwood capacity based on the proportion which capacity of the reporting mills bears to the total of all mills. The columns on shipments and orders received represent a similar relationship between the actual reported figures and the total capacity of all mills.

⁶ Figures in this column represent the total cut of 10 species of lumber—yellow pine, Douglas fir, hemlock, western pine, redwood, maple, birch, beech, white fir, and sugar pine—representing over 70 per cent of the total cut of lumber in the United States. Annual figures for 1913 and 1914 are from actual reports to the U. S. Department of Agriculture, Forest Service, and from 1915 through 1920 are computed on the basis of actual reports to the Forest Service. Monthly figures for 1920 are obtained by prorating the cut of each species as reported by the associations whose figures are carried in these columns to the Forest Service totals. For subsequent months prorating is done on an approximate average for the years 1917 to 1920.

⁷ Exports of lumber are from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.

⁸ These indices are for the first week in each month as published in "Lumber," and represent a combined weighted average for the respective series of lumber, based on quotations on various grades for each species, and the species weighted according to annual production of the previous year, changing about May of each year, when the new production figures are available. The softwood index is based upon seven species: Yellow pine, Douglas fir, North Carolina pine, white pine, hemlock, spruce, and cypress. The hardwood index is based upon 13 species: Maple, birch, basswood, elm, beech, oak, gum, ash, cottonwood, chestnut, poplar, hickory, and walnut.

¹ Data on maple flooring (including also birch and beech) are from reports of 20 identical mills to the *Maple Flooring Manufacturers' Association*, said to represent about 70 per cent of the industry; data on oak flooring from reports of the *Oak Flooring Manufacturers' Association*, by 25 mills, said to represent about 90 per cent of the total oak flooring industry; receipts and stocks at end of month of turpentine and rosin at Jacksonville, Savannah, and Pensacola compiled from reports of *Savannah Board of Trade*, *Jacksonville Chamber of Commerce*, *Pensacola Chamber of Commerce*, and the *Naval Stores Review*.

² Monthly averages for years refer to seasons beginning April 1, of year indicated.

¹ Except wholesale prices, monthly averages, from U. S. Department of Labor, Bureau of Labor Statistics. The sources of the other data in this table are: Clay fire and silica brick from the Refractories Manufacturers' Association and face brick from the American Face Brick Association.

² Figures for 1921 are from reports of 68 identical mills with a monthly capacity of 73,645,942 bricks, which is estimated by the association to represent from 68 to 70 per cent of the total clay fire brick capacity of the United States. Figures for 1919, 1920, and 1922 are computed to this capacity, respectively, from reports from 53, 56, and 60 mills having a monthly capacity for the years in question of 71,572,186 and 73,526,103, and 73,307,190 bricks.

BRICK.

² Figures for 1921 are from reports of 15 identical mills with a monthly capacity of 27,305,500 bricks, which is estimated by the association to represent from 78 to 80 per cent of the total silica brick producing capacity of the United States. Figures for earlier years are computed to this capacity from reports of 12 identical mills with a monthly capacity of 25,448,833 bricks.

⁴ The figures on face brick include data from 32 identical firms reporting to the American Face Brick Association each month. Comparable monthly data for the months of 1919 and 1920 are shown in the April "Survey" (No. 20.)

⁵ Ten months' average.

¹ Data furnished by the *Enamelled Sanitary Ware Manufacturers' Association* and said to represent approximately 98 per cent of the total output in the United States. The Association explains that orders shipped are the best current index of the industry. Orders received are likely to pyramid during periods of great activity to be followed by cancellations if the demand drops off. Stocks always increase during the winter and spring months because more efficient work at the enameling ovens can be done in cold weather and manufacturers operate at maximum capacity as long as they can finance operations and find storage capacity for the products.

² Small ware includes lavatories, sinks, and miscellaneous.

³ Average of 8 months, May to December, inclusive.

¹ Data on cement is from the U. S. Department of the Interior, Geological Survey, except prices, which are average of weekly prices reported by the U. S. Department of Labor, Bureau of Labor Statistics; data on concrete pavements for roads, streets, and alleys from Portland Cement Association, Highways Bureau.

² Yearly figures represent stocks at end of year, not an average of monthly stocks, except for 1921 and 1922.

³ Of the numerical 1919 monthly average, 3,221,000 yards was actually reported. The remainder is the prorated portion of a total of 3,338,309 yards for the year of pavement less than 6 inches thick not allocated by class of pavement. This has been prorated to roads on the basis of the roads' share of allocated contracts.

⁴ Includes streets and alleys besides roads.

¹ Compiled from reports of the National Wood Chemical Association to which are added reports from the principal nonmember firms. Total reports for each month vary from firms with a capacity of 3,200 cords to 4,500 cords daily; all months are therefore prorated to a daily capacity of 4,500 cords, representing about 90 per cent of the industry, on the basis of capacity reporting each month.

² August, 1914.

³ Compiled from weekly wholesale quotations of 35 drugs and pharmaceutical chemicals by the Oil, Paint, and Drug Reporter.

⁴ Compiled from weekly wholesale quotations of 20 essential oils by the Oil, Paint, and Drug Reporter.

⁵ Compiled from weekly wholesale quotations of 40 crude botanical drugs by the Oil, Paint, and Drug Reporter.

⁶ The chemical price index from Chemical and Metallurgical Engineering includes quotations on 25 commodities selected on the basis of their importance as representing both qualitatively and quantitatively the principal branches of the chemical industry. These prices are weighted on the basis of total production plus total imports in the year 1919. The figures are averages of weekly prices.

⁷ Wholesale average monthly price of sulphuric acid from United States Department of Labor, Bureau of Labor Statistics.

¹ Except shipments of linseed oil and cake and meal from *Minneapolis Chamber of Commerce*. The sources of the other data are: Imports and exports of vegetable oils from the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; Cottonseed oil from the *U. S. Department of Commerce, Bureau of the Census*; and Oleomargarine production and consumption from the *U. S. Treasury Department, Bureau of Internal Revenue*.

² Includes cottonseed, corn, and linseed oils.

³ These figures are for fiscal years beginning July 1 of year stated.

⁴ The following oils are included: Chinese nut, cocoa butter, coconut, cottonseed, olive (inedible), olive (edible), palm, palm kernel, peanut, rapeseed, soya bean, and linseed. Where certain of these are reported in gallons, they have been converted into pounds, allowing 7½ pounds per gallon.

⁵ Colored and uncolored, as represented by tax-paid withdrawals.

⁶ Figures for 1917 to 1922 are monthly averages of cottonseed-oil production and stocks on hand at the end of the month during cotton crop years (beginning August 1 of the preceding year and ending July 31 of the year to which the figure is credited).

⁷ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

VEGETABLE AND FISH OILS.

¹ The figures given on pages 114, 115, 118, and 119 represent the movement of certain more important vegetable and animal fats and oils, as reported quarterly by the Bureau of the Census, Department of Commerce. The data cover factory production, factory consumption, and factory and warehouse stocks. The stock figures refer to the amount on hand at the end of each quarter.

¹ Wheat flour production, consumption, and stocks reported by U. S. Grain Corporation, prior to July, 1920, later months from *Russell's Commercial News*; Visible supply of wheat and corn from *Bradstreet's*; Receipts and shipments of wheat and corn and receipts and visible supply (at nearest week to end of month) of oats, compiled by *Chicago Board of Trade*, from the *Price Current-Grain Reporter*; receipts of barley and rye compiled from reports of commercial organizations by *Federal Reserve Board*; grindings of corn by the wet process in the manufacture of cornstarch, glucose, etc., compiled by the *American Manufacturers Association of Products from Corn* and comprise the entire production of the United States.

² Consumption calculated from production, stocks, imports, and exports. Stocks represent flour in all positions, calculated from actual reports bearing a known relation to total stocks.

³ Aggregate stocks in United States and Canada east of the Rocky Mountains, on nearest Saturday to end of the month.

⁴ At principal primary markets.

⁵ For monthly production figures since January, 1914, see page 47 in the October, 1922 (No. 14) issue of the Survey.

CEREAL EXPORTS.

Table 75.—(A) INDEX NUMBERS AND (B) NUMERICAL DATA.

Based on data from Government sources.¹

[Base year in bold-faced type.]

YEAR AND MONTH.	EXPORTS OF GRAIN (including flour and meal as grains).											
	Barley and barley flour. ²	Corn and corn meal. ³	Oats and oat-meal. ⁴	Rye and rye flour. ⁵	Wheat and wheat flour. ⁶	Total grains.	Barley and barley flour. ²	Corn and corn meal. ³	Oats and oat-meal. ⁴	Rye and rye flour. ⁵	Wheat and wheat flour. ⁶	Total grains.
	Relative to 1913.						Thousands of bushels.

¹ Receipts, shipments and stocks at mills from *Rice Millers' Association*, comprising movement of the whole rice crop except California rice. Shipments of rice through New Orleans compiled by *New Orleans Board of Trade*. Imports and exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*, data for rough rice being reduced to the equivalent clean rice at 162 pounds of rough to 100 pounds of clean.

² Rough rice barrels of 162 pounds are equivalent to clean rice pockets of 100 pounds each.

³ Covers first 21 days only, during which period the old tariff law was in effect; other 9 days included in October figures.

See footnotes on opposite page also.

¹ Exports reported by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; cold-storage holdings from the U. S. Department of Agriculture, Bureau of Agricultural Economics; production of beef and pork from animals slaughtered under Federal inspection reported by the U. S. Department of Agriculture, Bureau of Animal Industry. Apparent consumption has been computed from the inspected slaughter plus imports less exports and the change in storage holdings. Wholesale prices are average for the month from U. S. Department of Labor, Bureau of Labor Statistics.

² Cold-storage holdings are distinctly seasonal. No allowance for this has been made in calculating index numbers. Figures represent storage holdings on the first day of each month.

³ Total dressed weight slaughtered under Federal inspection, including veal with beef. The slaughter under Federal inspection, according to census figures in 1919, amounted to 63 per cent of the total number of animals slaughtered in the United States in the case of hogs, 82 per cent in the case of beef and 91 per cent for lamb.

¹ Receipts, stocks, and meltings and Cuban movement reported by the *Statistical Sugar Trade Journal*; Imports and exports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Wholesale and retail sugar prices, from U. S. Department of Labor, Bureau of Labor Statistics.

² Figures include reports from seven ports: Boston, New York, Philadelphia, Savannah, New Orleans, Galveston, and San Francisco until 1921, when Baltimore was added upon completion of refinery in that city. Prior to that year it is stated that little sugar moved through Baltimore. Meltings are calculated from weekly reports, the odd days being prorated. Stocks represent the amount of raw sugar in the hands of refiners on the dates nearest the end of the month as reported for each port.

³ Covers first 21 days only, during which period the old tariff law was in effect.

¹ Represents the total of plug, twist, fine-cut, smoking tobacco, and snuff.² The Internal Revenue reports the number of large cigars, i. e., those weighing over three pounds per thousand, and the number of small cigars weighing less than the above amount. Likewise they report the number of large and small cigarettes, the former weighing more than three pounds per thousand. Large cigars and small cigarettes represent more than 90 per cent of the total number manufactured in each case and are the only ones given in this table.³ Yearly figures on crop production represent the latest revised estimates as reported by the U. S. Department of Agriculture, Bureau of Agricultural Economics. The monthly figures for 1921 and 1922 are the current monthly estimates of total production.⁴ Partly estimated. Kentucky sales for first half year not available and are estimated as equal to the sum of the sales in the other States, which is approximately the normal proportion of Kentucky sales to the total.

¹ Panama Canal traffic reported by *The Panama Canal*; Tonnage entered and cleared in foreign trade, *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; Sault Ste. Marie Canal traffic, *U. S. War Department, Engineer Corps*; New York State canal traffic from *New York State Superintendent of Public Works*; receipts and shipments of cargo by river at St. Louis (almost all by Mississippi River) from *Merchants Exchange of St. Louis*; Cargo tonnage on Government-owned barge line from *U. S. War Department, Mississippi-Warrior service*; Index of ocean freight rates from the *Federal Reserve Board, Division of Analysis and Research*.

² Represents tonnage of cargo carried by commercial vessels. Yearly figures refer to fiscal years ending June 30.

³ Figures for 1913 to 1922 represent monthly averages for eight months during which the canals are usually open.

⁴ The index of ocean freight rates represents rates to 7 ports in the United Kingdom and a total of 17 ports for all of Europe. The index numbers are weighted by the geometric means of these rates. The weights include the relative importance of each port and also the relative importance of the 5 principal products—grain, provisions, cotton, cottonseed oil, and sack flour.

⁶ About two-thirds of this traffic is through the Erie Canal and one-third through the Champlain Canal. Figures for 1913 to 1922 represent monthly averages for seven months, during which the canals are usually open.⁶ Net ton represents 100 cubic feet internal carrying capacity after prescribed allowances for crew and engine space.⁷ January, 1920.

¹ Data from the American Railway Association.² Daily average for the last period (7 or 8 days) of the month, exclusive of Canadian roads. The Association reports the number of freight cars which are idle (surplus) and also the number of requests for cars which can not be filled (shortage). The difference between these two figures represents the net freight-car situation for the country as a whole. The car shortages can not ordinarily be filled from the idle cars because of the uneven geographical distribution of the latter.³ Includes other classes than groups listed.⁴ Total includes coke shipments in addition to commodity groups listed.⁵ Index number less than 1.⁶ Number of railroad freight cars in need of repairs on first day of each month. Note that 1913 is the base year, having a monthly average of 150,909 cars in need of repairs.

¹ Telephone earnings are the combined reports of 13 largest telephone companies, and telegraph earnings are the combined reports of the Western Union and Postal Telegraph Cos., as reported to the *Interstate Commerce Commission*; gas and electric earnings are the combined reports to the *U. S. Department of Commerce, Bureau of the Census*, of 73 companies or systems operating gas, electric light, heat, power and traction services and comprising most of the large companies in the United States. Gross earnings are in general the gross operating revenues, while net earnings in general represent the gross less operating expenses and taxes, but owing to a lack of uniformity in the accounts of individual companies, it has not been possible to secure these actual items for each company, and in such cases the nearest comparable figures have been

PUBLIC UTILITIES.

taken. Also in some cases the figures for prior years do not cover exactly the same subsidiaries owing to acquisitions, consolidations, etc., but these differences are not believed to be great in the aggregate. Gross revenue received from the sale of electrical energy as reported by the *Electrical World* represents the total receipts from the sale of electricity computed to 100 per cent of the industry on the basis of the percentage which the reporting companies bear to the installed central station rating of the country. Fuel consumption by public utility plants and production of electric power from *U. S. Department of the Interior, U. S. Geological Survey*.

¹ One company missing.

See footnotes on opposite page also.

¹ Internal revenue taxes on admissions to theaters, cabarets, etc., and candy sales from U. S. Treasury Department, Bureau of Internal Revenue; postal receipts in 50 selected cities and quarterly data on second-class mail and money orders, from U. S. Post Office Department; magazine advertising as reported by Printer's Ink; newspaper advertising compiled by New York Evening Post.

² Data represent internal revenue taxes collected under the revenue acts of 1918 and 1921. For taxes on theater and cabaret admissions the rate of tax under the act of 1921 (represented by data for 1922) is "1 cent for each 10 cents or fraction thereof of the amount paid for admission," payable by the person paying such admission, except "where the amount paid for admission is 10 cents or less, no tax shall be paid." The act of 1918 provided for the same rate of taxation but allowed no exceptions and, hence, the data for 1922 are not quite as comprehensive as the earlier data. However, the variance is not such as will not allow comparison.

³ Computed on the basis of a 5 per cent excise tax prior to January, 1922, and since January, 1922, on the basis of a 3 per cent tax (revenue act of 1918 superseded by revenue act of 1921). This column thus represents actual value of sales, not the taxes paid on sales.

⁴ The war revenue act of Oct. 3, 1917, provided for an increase in the rate for first-class letter mail from 2 cents per ounce or fraction thereof prior to Nov. 1, 1917, to 3 cents per ounce or fraction thereof, from Nov. 1, 1917, to July 1, 1919, and an increase of the rate on postal and post cards from 1 cent to 2 cents each during the same period. Since July 1, 1919, the old rates on first-class mail have been restored. Under this act a stamp tax of 1 cent for each 25 cents postage charge or fraction thereof is collectible on parcel-post matter.

¹ Note that data in these columns represent quarters ending in the months specified and the annual figures represent quarterly averages for each year, not monthly averages. The war revenue act of Oct. 3, 1917, provided for a series of graduated annual rate increases on second-class mail as follows, compared with a flat rate of 1 cent per pound previous to July 1, 1918: From July 1, 1918, to June 30, 1919, 14 cents, and since July 1, 1919, 12 cents per pound, these changes applying, regardless of zone or distance, to portions of publications devoted to reading matter. For the advertising portions the country was divided into eight zones, each with a graduated rate and its corresponding annual increases, beginning with July 1, 1918, and reaching the maximum on July 1, 1921, making, for the first time, a differentiation between the rates on reading and advertising matter.

² These figures represent the number of lines of advertising carried by the leading magazines dated for the month noted.

³ Compiled from 22 identical cities: New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Boston, Baltimore, Los Angeles, Buffalo, San Francisco, Milwaukee, Washington, Cincinnati, New Orleans, Minneapolis, Indianapolis, Columbus, Louisville, St. Paul, Birmingham, and Houston. For the years 1916 to 1918 no reports were available for Boston, Louisville, Houston, and Columbus. The totals for those years were computed from the actual reports of the 18 other cities, allowing 13.85 per cent of the total to the four missing cities, the average ratio of those cities to the total in the subsequent years.

⁴ Six months' average, July to December, inclusive.

¹ This table is submitted in response to a demand for publication of the figures of sales of individual stores, which have been compiled from published reports. These figures represent money values sales. Data on American Wholesale Corporation placed here for convenience. Mail-order and chain-store sales are reported directly by the companies or compiled from the *Commercial and Financial Chronicle*, except the index of four mail-order houses.

² Compiled by the *Federal Reserve Board, Division of Analysis and Research*, and the index, based upon the combined average sales in 1919, includes Sears, Roebuck & Co., Montgomery Ward & Co., Larkin Co., and the National Cloak & Suit Co.

³ Includes Sears, Roebuck & Co. and Montgomery Ward & Co.

RETAIL SALES.

¹ Compiled by the Federal Reserve Board, Division of Analysis and Research. Index numbers are based upon dollar values.² With the exception of the 4 music chains which operate only locally through the West, these data include the larger individual chain-store systems, which in the aggregate cover practically the entire country. 13,337 unit stores are represented by the 21 grocery chains; 1,708 unit stores by the 4 five and ten cent chains; 463 unit stores by the 8 drug store chains; 2,732 unit stores by the 3 cigar chains; 276 unit stores by the 5 shoe chains; and 58 unit stores by the 4 music chains.³ In calculating bases estimates are made for sales of stores in the Minneapolis and Dallas districts for the months of 1919 for which there are no reports.

¹ Compiled from weekly reports to the U. S. Department of Labor, Employment Service, by state and municipal employment agencies. Eastern states included in the report are Connecticut, District of Columbia, Massachusetts, New Jersey, New York, and Rhode Island (Delaware, Maryland, and Pennsylvania, now reporting, are excluded to show true comparison). Central states are Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. Southern states include Alabama, Arkansas, Georgia, Kentucky, North Carolina, Oklahoma, Texas, and Virginia. Western states include Arizona, California, Colorado, Idaho, Oregon, and Washington; Montana is included beginning with March, its figures being so small as not to affect the total.

² One week in July estimated for South Dakota.

³ One week in August estimated for Iowa and Michigan.

⁴ Month of September for South Dakota and one week for Iowa estimated.

⁵ First two weeks in July estimated for Arkansas.

⁶ First two weeks in July estimated for Washington.

LABOR.

¹ Figures represent reports from 1,648 firms in New York State employing more than one-third of the factory workers of the State. The 1914 average upon which the index numbers are calculated is an average of the 7 months, June to December, 1914, inclusive. As originally published by the *New York Department of Labor*, the index numbers are based on June, 1914, and have been recalculated to the 7-month average.

² Relative to first quarter of 1915.

³ On 15th of month.

⁴ Includes total admitted, both immigrants and nonimmigrants.

⁵ Includes total departed, both emigrants and nonemigrants.

⁶ Nine months' average, April to December.

⁷ A average for the quarter beginning with the month for which figures are shown.

¹⁰ Excludes passports issued to Government officials.

COST OF LIVING.

¹ Index numbers represent retail prices on the first day of the month, except food, which is the retail food index of the U. S. Bureau of Labor Statistics for the 15th of the preceding month. Beginning with March, 1922, all prices shown are as of the 15th of the month indicated. The index is weighted according to the estimated consumption of average wage earners before the war, on the following basis: Food 43.1 per cent, shelter 17.7 per cent, clothing 13.2 per cent, fuel and light 5.6 per cent, sundries 20.4 per cent.

² Index numbers represent averages for the month in 32 cities; food prices reported by 15 to 25 dealers in each city, fuel and light by 10 to 15 firms, including public utilities, in each city; other quotations secured directly from records. Rentals are based on 250 to 950 houses and apartments in each city, and for each item of clothing, furniture, and miscellaneous, four quotations are secured in each city (five in New York City).

PRICES.

¹ Wholesale prices and retail food prices from the U. S. Department of Labor, Bureau of Labor Statistics; farm prices from the U. S. Department of Agriculture, Bureau of Agricultural Economics.

² The revised wholesale price index number of the U. S. Department of Labor, Bureau of Labor Statistics, is based on quotations of 404 commodities. These commodities are arranged in 9 groups as given in the table. In computing this index, the price of each commodity is weighted by multiplying it by the estimated quantity of that article marketed in the census year 1919. For comparable yearly data for the period 1890 to 1921, see the Monthly Labor Review for September, 1922, p. 46; and for comparable monthly data for period 1913 to 1922, see the Monthly Labor Review for July, 1922, p. 60.

³ The retail food price index compiled by the Bureau of Labor Statistics represents the changes in the price of 22 articles of food as reported by retail dealers in 51 of the larger cities as of the 15th of the month.

⁴ As of the 15th of each month. Farm prices represent the relative average prices to farmers of the 10 leading crops and leading live stock respectively.

WHOLESALE PRICES.

¹ First eight columns give the revised wholesale price index numbers of the U. S. Department of Labor, Bureau of Labor Statistics, as reclassified by the Federal Reserve Board into the groupings as shown. The weights are the same as those used by the Bureau of Labor Statistics and the total of all commodities is therefore the same as the revised Department of Labor index. Dun's and Bradstreet's index numbers are calculated as of the first of each month, but really refer to prices in the preceding month; the index numbers have been calculated to a 1913 base from the actual figures as published in these journals. Bradstreet's index is the sum of prices per pound of the commodities, while Dun's is weighted by the amount "annually consumed by each inhabitant."

² The term "consumers' goods" in general applies to those commodities which because of their finished condition are ready for consumption; the term "producers' goods" applies to those products which are essentially still in the raw state or semifinished condition requiring additional manufacture.

FOREIGN PRICE COMPARISONS.

¹ Data in the first three columns are original compilations of the Federal Reserve Board constructed for the purpose of international price comparisons; basic prices are obtained from trade journals and private firms and weighted according to the 1913 volume imported and exported, respectively, for "imported goods" and "exported goods." The total index number includes also goods produced, weighted by production in 1913, and goods consumed, weighted by consumption in 1913.

² Compiled by the London Economist; quotations on 44 commodities, mostly raw materials, unweighted.

³ Compiled by British Government Board of Trade; quotations on 150 commodities.

⁴ Compiled by Bulletin de la Statistique Generale of the French Ministry of Labor and Social Welfare; quotations on 45 commodities, mostly raw materials, unweighted.

⁵ Compiled by Prof. Bach; quotations on 38 commodities until 1920, thereafter 76 commodities.

⁶ Compiled by the Federal Reserve Board on the same basis as their United States index for international price comparison. Detailed descriptions of these index numbers may be found in the following numbers of the Federal Reserve Bulletin: United Kingdom, February, 1922, pp. 147-153; Canada, July, 1922, pp. 801-806; France, August, 1922, pp. 922-929; Japan, September, 1922, pp. 1052-1059.

⁷ Compiled by Svensk Handelstidning as of the middle of each month; 47 quotations.

⁸ Compiled by Neue Züricher Zeitung as of the first of each month; quotations on 71 commodities.

⁹ Compiled by the Canadian Department of Labor; quotations on 272 commodities, unweighted.

¹⁰ Compiled by the Bank of Japan; quotations in Tokyo on 56 commodities, unweighted.

¹¹ Compiled by the Australian Commonwealth's Bureau of Census and Statistics; quotations on 92 commodities, weighted by consumption.

¹² Compiled by the Indian Department of Statistics; quotations on 75 commodities.

¹ Compiled by the Association of Life Insurance Presidents. The data represent only new business that has been paid for, exclusive of revivals, increases, and dividend additions. The 40 companies whose new business is included in this table had in force 77.1 per cent of the total legal reserve life insurance outstanding in the United States as of Dec. 31, 1920.

SAVINGS DEPOSITS.

² Yearly figures from 1914 to 1920, inclusive, are averages of deposits on June 30 and December 31 of each year; 1913 figures are for December 31; 1921 is average of quarterly figures.³ Approximate figure calculated from deposits and withdrawals.⁴ Because no data covering deposits in the St. Louis district are available for 1920 the total here shown is for the 11 districts, exclusive of St. Louis, for which comparable data since 1920 are available.

¹ Figures for Debits to individual accounts, condition of Federal Reserve Banks, and condition of reporting member banks are from the *Federal Reserve Board; Bank Clearings from Bradstreets*; Interest rates in New York market from the *Commercial and Financial Chronicle*.

² Debits of banks in about 150 of the larger clearing-house centers, covering weekly totals, the first and last weeks of the month being prorated.

³ Condition as of last Wednesday of the month. Prior to April, 1921, figures are of last Friday of month.

⁴ Includes reports from more than 800 banks in the leading cities in the United States on condition as of last Wednesday of month. Prior to April, 1921, figures are as of last Friday of month.

⁵ This column has been recomputed so as to include clearings from 117 identical cities in each year. Estimates had to be made for a few of the smaller cities in the earlier years to complete the data.

⁶ Prior to March, 1921, net deposits were used in calculating reserve ratios.

¹ Prices are averages, as taken at the end of each week, of the closing prices for these stocks on New York Stock Exchange.² These indices are combined from the yields of the average prices of the bonds for each day of the month, the average yields for the 10 bonds of each class being capitalized at 4 per cent to give the index.³ Includes 6 Liberty and Victory bonds, 16 foreign government and city, 20 railroads, 10 public utilities, and 5 telegraph and telephone issues taken as of the last day of the month.⁴ Average market yield of bonds of 20 large cities at the first of each month.

See footnotes on opposite page also.

¹ Business failures are from *Dun's Review*; Dividend and interest payments, New capital issues, and New incorporations from the *New York Journal of Commerce*; Municipal bond issues from *The Bond Buyer*; Southern bond issues from the *Manufacturers' Record*; Stock, Bonds, and Total Corporate securities from *Commercial and Financial Chronicle*.

² Represents the value of the authorized capital of new enterprises incorporated in the principal eastern states.

³ Monthly data for the period 1913-1921 will be found in the October SURVEY (No. 24), page 46.

⁴ Includes bank dividends not separately shown for those months where such payments are reported. The total interest payments may be obtained by subtracting total dividend payments from total interest and dividend payments, monthly data of which for the period 1913-1921 were published in the September SURVEY (No. 13), p. 51. It is to be noted that the total dividend and interest payments for July, 1918, should be stated as \$333,011,000, instead of \$633,011,000.

CORPORATE AND MUNICIPAL FINANCING.

¹ Data on loans closed by joint-stock banks and Federal farm-loan banks from the *Federal Farm Loan Board*; other agricultural loans from the *War Finance Corporation*; new corporate bond issues are compiled by the *Commercial and Financial Chronicle*.

² Index number less than 1.

³ These data represent loans for agricultural development secured by mortgages on land and buildings. For detailed information as to organization and operations of the Federal Farm Loan Board see the first "Annual Report" of the board, Document No. 714, and subsequent "Annual Reports" of the board. The banks were closed during the greater part of 1920, pending litigation in the Supreme Court involving the constitutionality of the Federal farm-loan act. When operations were resumed the banks were flooded with loan requests, many of which could not be granted because the cessation of bond selling had depleted the resources. These facts will account for the diminished figures of 1920 and 1921.

AGRICULTURAL AND CORPORATE FINANCING.

¹ Advances for "Agricultural and live-stock purposes" under the agricultural credits act of August 24, 1921.² Loans to banks and live-stock associations were combined because of their parallel trend. Cooperative Marketing Association figures could not well be combined because of their opposite movement.³ Represents bond issues of the following industries combined: Iron, steel, coal, copper, equipment, manufacturers, motors and accessories, and miscellaneous industrial and manufacturing companies.

¹ Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of payment items reported bears to the total number of transactions reported. The commodities covered by these transactions are largely textiles. The year 1916 is taken as a base, as payments were abnormally high in 1919.

² California, Oregon, and Washington.

³ Arizona, New Mexico, Colorado, Utah, Nevada, Idaho, and Wyoming.

⁴ Montana, North and South Dakota, Minnesota, and Wisconsin.

⁵ Kansas, Nebraska, Iowa, Missouri, Illinois, Indiana, Kentucky, and Ohio.

⁶ Texas, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Tennessee, Georgia, Florida, North and South Carolina.

⁷ States east of and including Pennsylvania, West Virginia, and Virginia.

¹ Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of items reported relating to orders or to creation of indebtedness bears to the total number of transactions reported. As one transaction may cover both an order and an indebtedness or a payment, the sum of the percentages of orders, indebtedness, and payments will usually exceed 100 per cent. The commodities covered are largely textiles, and the individual orders are stated to average from \$250 to \$600, depending on trade conditions. The year 1916 is taken as a base, as it is believed to be more nearly normal than 1919, in which orders and payments were unusually large and indebtedness unusually small.

¹ The foreign exchange index number recently computed by the *Federal Reserve Board* is based upon the average rates of exchange for 17 countries, Germany excluded, and is here substituted for the weighted geometric average previously published. The index represents the "aggregative" average of cable transfer rates on these countries and is based on the total volume of imports and exports of merchandise, gold, and silver from and to each country for the preceding 12 months. The countries used in computing the index are Belgium, Denmark, England, France, Italy, Netherlands, Norway, Spain, Sweden, Switzerland, Canada, Argentina, Brazil, Chile, China, India, and Japan. The method of computation and the reasons for the change are explained in detail in the *Federal Reserve Bulletin* for October, 1922, page 1260.

² Average value of the paper peso in 1913.

³ The quotation on July 31 was equivalent to \$0.88 per million marks as against six dollars per million marks on July 2.

¹ Compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, and represent imports of merchandise only. Up to and including May, 1921, import values represented "actual market value or wholesale price at the time of exportation to the United States, in the principal markets of the country from whence exported, including the value of all containers and coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Tariff act of 1913.) Beginning with June, 1921, the import values are either the actual foreign market value, as defined above, or "the export value, including any export tax imposed by the country of exportation," whichever is higher. (Emergency tariff act of May 27, 1921.)

² Figures for September, 1922, include only the first 21 days of September, during which the old tariff law was in force.

IMPORTS BY CLASSES OF COMMODITIES.

¹ Compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, and represent exports, including reexports, of merchandise only. Values are those at time of exportation in the ports of the United States whence exported, except reexports from bonded warehouses, which are expressed in their import value.

² Total for year 1917 is \$3,275. No figures for 1918.

GOLD AND SILVER.

¹ Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Figures for France include lignite (averaging 66,000 tons per month in 1913). Beginning 1919, Alsace-Lorraine (averaging 203,000 tons monthly in 1919 and 264,000 tons in 1920) is included with France instead of with Germany and beginning 1920 the Saar district (734,000 tons per month) is similarly transferred. Upper Silesia, whose disorders were responsible for the curtailment of German production in May, 1921, was included as a whole with Germany until June, 1922, since which time only the part of Upper Silesia allotted to Germany is included.

² One metric ton is equivalent to 2,204.6 pounds.

³ Five weeks period; other months cover 4 weeks.

⁴ Includes upper Silesia. The old territory produced 837,000 tons in July.

¹ Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Canadian figures furnished direct by Dominion Department of Labour, Employment Service of Canada. The figures, except in the case of British compulsory insurance, which relate to the operations of the Government labor bureau, represent the percentage of trade-union members employed. They have been converted, by inverting, from the original figures showing percentage unemployed.

² December.

³ Average of quarters, March, June, September, and December.

⁴ Quarter ending this month.

⁵ The report for December covers 6,075,755 organized workers of whom only 97,687, or 1.6 per cent, were unemployed.

FOREIGN TRADE OF THE UNITED KINGDOM.

INDEX.

Page numbers refer to data in detailed tables (51-202) only. Items in the table on "Trend of Business Movements" (pp. 25-50) and in the text are arranged in groups which should make reference easy without the necessity of an index. Note that only the page containing the index number tables is given here. Where the numerical data for these items are in a separate table, they will always be found on the page opposite the index numbers.
