SURVEY OF
CURRENT BUSINESS

OCTOBER, 1930

No. 110

ISSUED BY

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

IMPORTANT NOTICE

In addition to figures given from Government sources, there are also incorporated for completeness of service figures from other sources generally accepted by the trades, the authority and responsibility for which are noted in the "Sources of Data" on pages 140-143 of the August, 1930, semiannual issue.

INTRODUCTION

The SURVEY OF CURRENT BUSINESS is designed to present each month a picture of the business situation by setting forth the principal facts regarding the various lines of trade and industry. The figures reported are very largely those already in existence. The chief function of the department is to bring together these data which, if available at all, are scattered in hundreds of different publications. A portion of these data are collected by Government departments, other figures are compiled by technical journals, and still others are reported by trade associations.

At semiannual intervals detailed tables are published giving, for each item, monthly figures for the past two years and yearly comparisons, where available, back to 1913; also blank lines sufficient for six months have been left at the bottom of each table, enabling those who care to do so to enter new figures as soon as they appear (see August, 1930 issue). In the intervening months the more important comparisons only are given in the table entitled "Trend of business movements."

WEEKLY SUPPLEMENT

Realizing that current statistics are highly perishable and that to be of use they must reach the business man at the earliest possible moment, the department has arranged to distribute supplements every week to subscribers in the United States. The supplements are usually mailed on Saturdays and give such information as has been received during the week ending on the preceding Tuesday. The monthly information contained in these bulletins is republished in the SURVEY and the supplements also contain charts and tables of weekly data.

RELATIVE AND INDEX NUMBERS

To facilitate comparison between different important items and to chart series expressed in different units, relative numbers (often called "index numbers," a term referring more particularly to a special kind of number described below) have been calculated. The monthly average for 1923-1925 has usually been used as a base equal to 100.

The relative numbers are computed by allowing the monthly average for the base year or period to equal 100. If the movement for a current month is greater than the base, the relative number will be greater than 100, and vice versa. The difference between 100 and the relative number will give at once the per cent increase or decrease compared with the base period. Thus a relative number of 115 means an increase of 15 per cent over the base period, while a relative number of 80 means a decrease of 20 per cent from the base.

Relative numbers may also be used to calculate the approximate percentage increase or decrease in a movement from one period to the next. Thus, if a relative number at one month is 120 and for a later month it is 144 there has been an increase of 20 per cent.

When two or more series of relative numbers are combined by a system of weightings, the resulting series is denominated an index number. The index number, by combining many relative numbers, is designed to show the trend of an entire group of

This issue presents practically complete data for the month of August and contains text covering the early weeks of September (page 1), for which the basic figures in table and chart form are represented regularly in the weekly supplements. As most data covering a particular month's business are not available until from 15 to 30 days after the close of the month, a complete picture of that month's operations can not be presented at an early date, but the weekly supplements give every week the latest data available.

industries or for the country as a whole, instead of for the single commodity or industry which the relative number covers. Comparisons with the base year or with other periods are made in the same manner as in the case of relative numbers.

RATIO CHARTS

In most instances the charts used in the SURVEY of Current Business are of the type termed "Ratio Charts" (logarithmic scale), notably the Business Indicator charts on page 2. These charts show the percentage increase and allow direct comparisons between the slope of one curve and that of any other curve regardless of its location on the diagram; that is, a 10 per cent increase in an item is given the same vertical movement whether its curve is near the bottom or near the top of the chart. The difference between this and the ordinary arithmetic form of chart can be made clear by an example. If a certain item having a relative number of 400 in one month increases 10 per cent in the following month, its relative number will be 440, and on an ordinary chart would be plotted 40 equidistant scale points higher than the preceding months. Another movement with a relative number of, say, 50 also increases 10 per cent, making its relative number 55. On the ordinary (arithmetic) scale this item would rise only 5 equidistant points, whereas the previous item rose 40 points, yet each showed the same percentage increase. The ratio charts avoid difficulty and give to each of the two movements exactly the same vertical rise, and hence the slopes of the two lines are directly comparable. The ratio charts compare percentage changes while the arithmetic charts compare absolute changes.

RECORD BOOK

As an aid to readers in comparing present data with monthly statistics in previous years, the department is compiling a Record Book of BUSINESS STATISTICS, in which data now carried in the SURVEY of CURRENT BUSINESS are shown by months as far back as 1909, if available. Full descriptions of the figures and reports of how the data are used in actual practice by business firms are contained in the Record Book. The sections covering textiles, metals, and fuels, automobiles, and rubber have already been issued and may be obtained for 10 cents per copy from the Superintendent of Documents, Government Printing Office, Washington, D. C. (Do not send stamps.) Notices of other sections will be given in the SURVEY as they are issued.

METHODS OF USE

Methods of using and interpreting current business statistics have been collected by the department from many business concerns and are described in a booklet entitled "How to Use Current Business Statistics" together with methods of collecting statistics. This booklet may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 15 cents per copy. (Do not send stamps.)

SURVEY OF CURRENT BUSINESS

PUBLISHED BY

UNITED STATES DEPARTMENT OF COMMERCE

Subscription price of the SURVEY OF CURRENT BUSINESS is \$1.50 a year; single copies (monthly), 10 cents, semiannual issues, 25 cents. Foreign subscriptions, \$2.25; single copies (monthly issues), including postage, 14 cents; semiannual issues, 36 cents. Subscription price of COMMERCE REPORTS is \$4 a year; with the SURVEY, \$5.50 a year. Make remittances only to Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency at sender's risk. Postage stamps or foreign money not accepted

PRELIMINARY SUMMARY FOR SEPTEMBER

Dividend and interest payments paid during September by steam railroads, street railways, and industrial companies were much larger than those paid during August. As compared with a year ago interest payments were greater, while the payments of dividends as a whole were less. Loans and discounts of Federal reserve member banks, although showing but slight difference from the preceding month, were lower than the level at the end of September, 1929. Prices paid for industrial and railroad stocks averaged higher during September than a month ago; however, they were lower than the same period, a year ago. Bond prices on the other hand, were higher than either comparative period. Rates of interest on time loans averaged lower than in August, while call-money rates showed but slight change. Both rates were lower than a year ago. Business failures, although greater in number than the preceding month showed smaller liabilities. Bank debits, outside New York City, declined from both the month of August, 1930, and September, 1929.

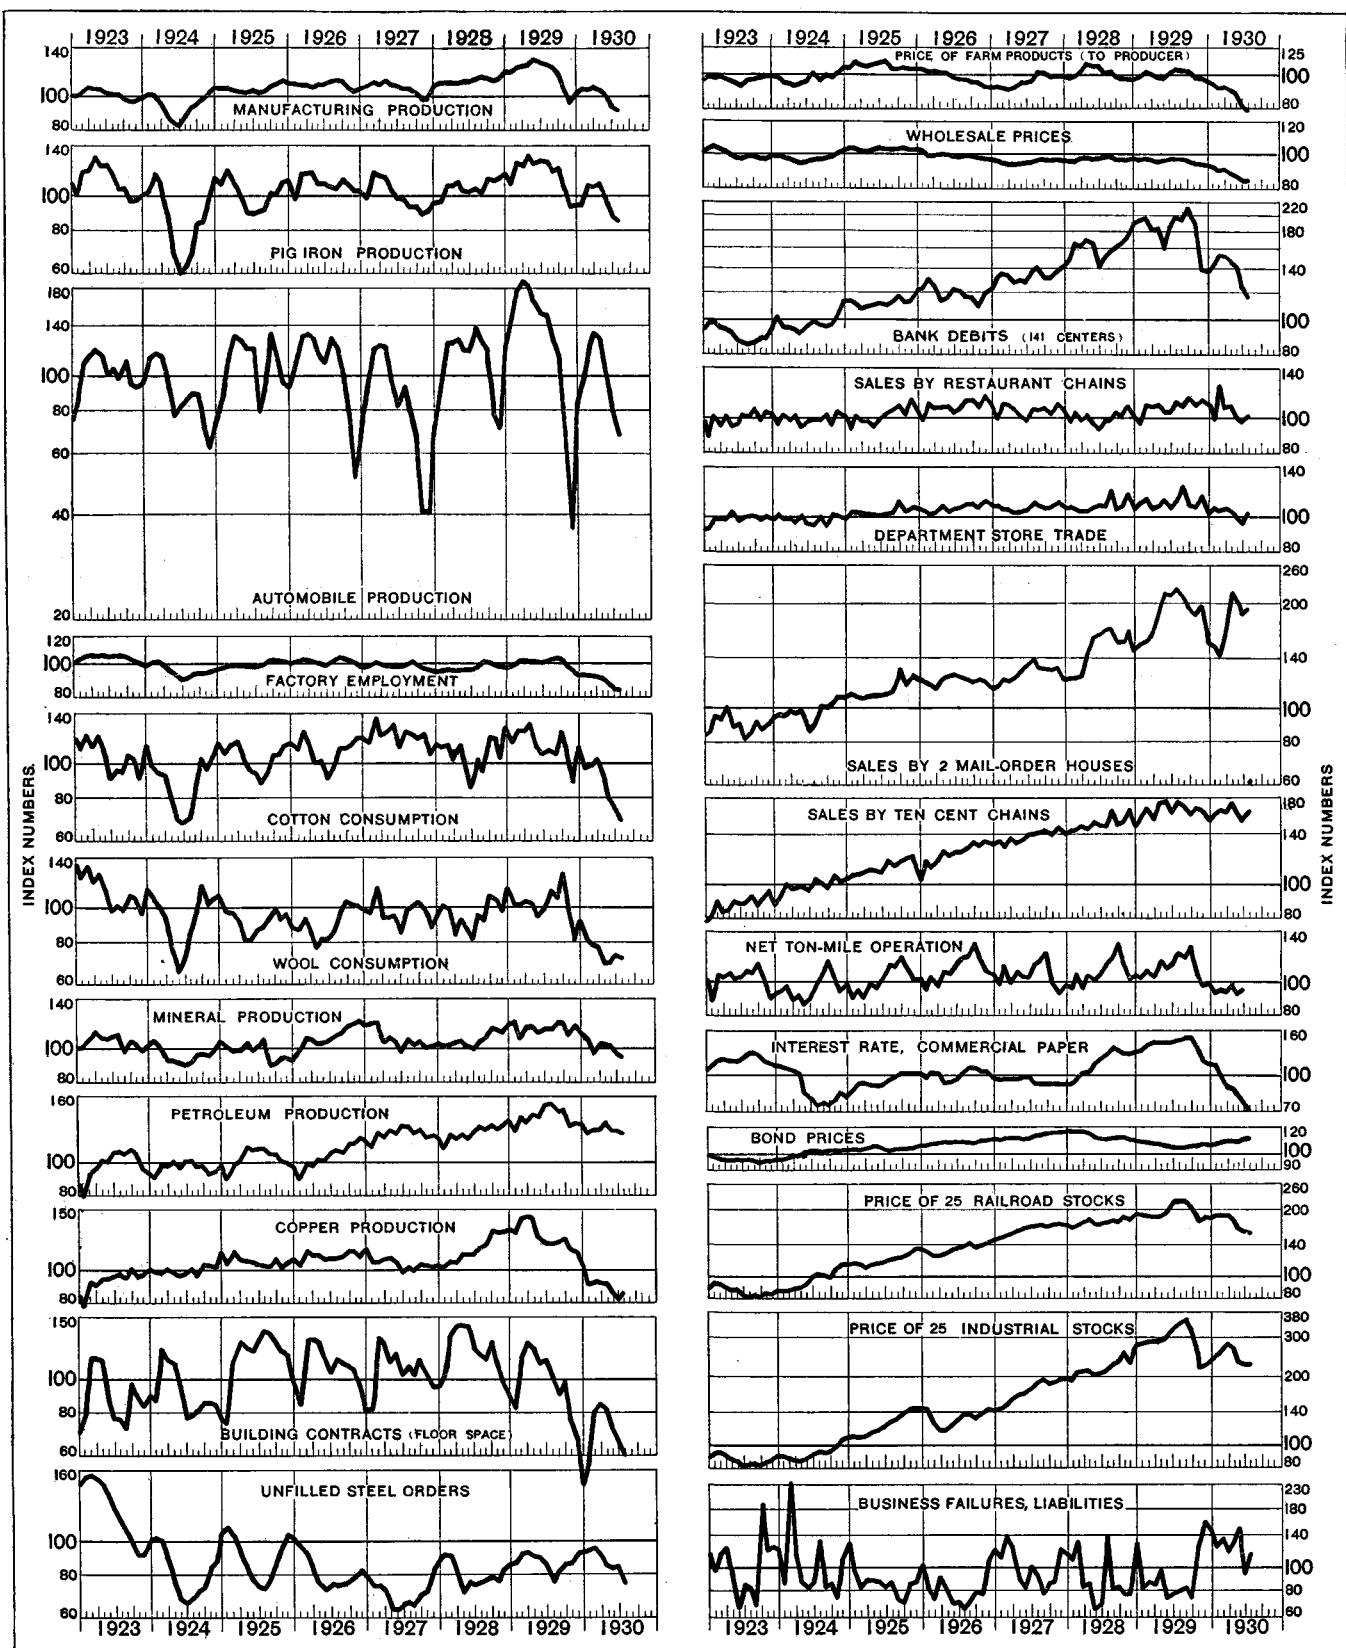

Receipts of both foreign and domestic wool at Boston, declined seasonally from August and were lower than during September, 1929. The activity of steel mills, during the early weeks of the month, showing a steady increase was greater than the corresponding period in August. Detroit employment, usually accepted as an indicator of the automobile industry, indicated slight change from the preceding month, but was about twice what it was during July, two months ago. The distribution of goods by railroads as shown by carloadings for the early weeks of September was smaller than either a month ago or the same period in 1929.

The wholesale price level as measured by Fishers' index, averaged higher during September than a month ago, but was considerably below the level of last year.

Increases were noted in September, 1930, over September, 1928, in loans and discounts of Federal reserve member banks, and the prices of principal bonds.

MONTHLY BUSINESS INDICATORS, 1923-1930

[Ratio charts—see explanations on inside front cover. The curves on check payments, wholesale trade, 10-cent chains, and department stores have been adjusted for normal seasonal variations, and manufacturing production for the varying number of working days in the month as well. 1923-1925 monthly average=100]

MONTHLY BUSINESS INDICATORS

The principal business indicators are shown below, all calculated on a comparable basis, the average for the years 1923 to 1925, inclusive. Thus the table gives a bird's-eye view of the business situation in a concise form, so that trends of the principal indicators may be seen at a glance.

Certain indicators, in which there is a marked seasonal movement, are shown with the average seasonal variations eliminated, as noted below. In this manner a more understanding month-to-month comparison may be made.

* Seasonal adjustments.

BUSINESS CONDITIONS IN AUGUST

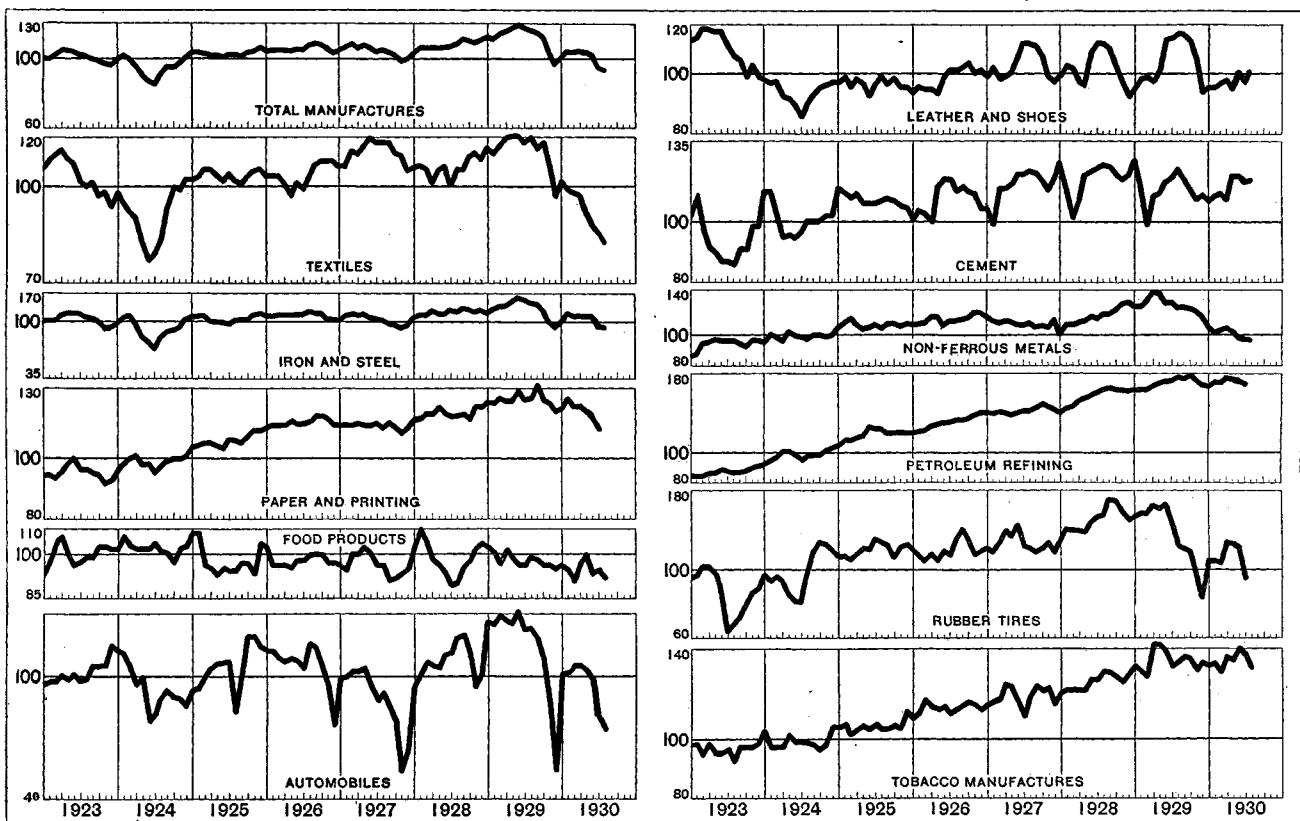

Manufacturing and mineral production in August, 1930, according to the weighted index of the Federal Reserve Board, showed slight declines from the preceding month and were considerably below their respective levels of August, last year. Among the items in the manufacturing group to show increases over July, were leather and shoes, and cement, while iron and steel showed no change. Although the other items recorded declined, the loss in any case did not exceed 2 per cent with the exception of tobacco, where

iron and steel and transportation equipment showed declines, while those for lumber showed no change.

Wholesale trade in August as reported to the Federal Reserve Board by firms selling groceries, dry goods, hardware, and drugs, indicated that sales in these lines were smaller than during August, 1929. The total sales for the year to date also declined from the corresponding period last year. Department store sales of 490 leading establishments in the 12 Federal reserve districts showed a gain of 7 per cent

MANUFACTURING PRODUCTION BY MAJOR GROUPS

[Relative numbers, monthly average 1923-1925, taken as 100, adjusted for seasonal variations]

the decline was more. In the output of minerals, increases were noted in the production of anthracite coal, iron ore, copper, and zinc.

Automobile production showed a decline from July and was less than a year ago. Steel ingot production was greater than that of the month of July but declined from a year ago, while the output of pig iron was less than either comparative period. Renewed activity was noted in the cotton textile industry by the increased production, shipments, stocks, new and unfilled orders of cotton textiles over the preceding month.

SALES

Unfilled orders for manufactured goods at the end of August recorded declines from both the preceding month and the month of August a year ago. As compared with the month of July, 1930, orders for

over the month of July, but were somewhat smaller than a year ago.

Sales by leading 5 and 10 cent chains registered gains in almost every case over the preceding month. As compared with the month of August, 1929, sales were lower. Mail-order sales also showed an upward tendency during August, being higher than the sales of July, but, like the sales of 10-cent chains, fell off.

IMPORTS AND EXPORTS

Total imports of merchandise during August were smaller than during the preceding month and August, 1929. Increases over July occurred in the imports of crude materials and finished manufactured goods, while declines occurred in the foodstuffs and semi-manufactured groups. Total exports showed a considerable gain over the preceding month, gains occurring in all the groups making up the total.

PRICES

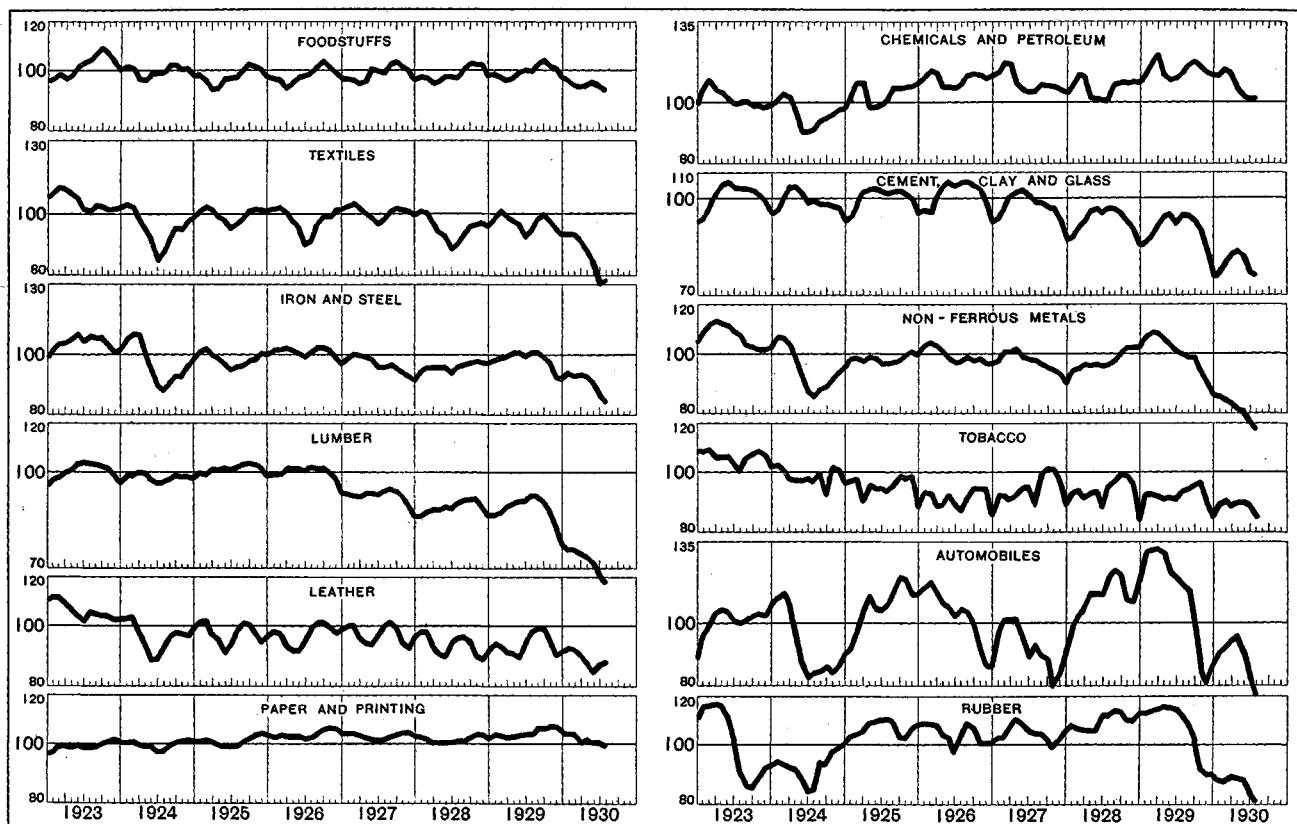

The general index of wholesale prices in August, as compiled by the Department of Labor, showed no change from the month of July, but was considerably lower than August, 1929. While most groups stood at practically the same level of preceding month, increases were noted in foodstuff prices, while fractional losses occurred in the prices for hides and leather products, textiles, metals, building materials, and house furnishing goods. Classified by state of manufacture, prices for all groups showed slightly lower averages from both the preceding month and a year ago. Although the

In comparison with the previous month, increased employment occurred in factories producing textiles, leather goods, and chemicals. The principal declines occurred in factories producing iron and steel, machinery, foodstuffs, lumber, automobiles, and tobacco. As compared with the month of August, 1929, all groups showed decreased employment.

Factory pay rolls, in general, in keeping with decreased employment, were lower than a month ago. Although wage payments were in the main lower than July, increased payments were made by establishments producing textiles and leather and shoes, while no

FACTORY EMPLOYMENT, BY GROUPS

[1926 monthly average=100. August, 1930, is latest month plotted]

averages were lower than those for July, the decline did not exceed 1 per cent in any case.

The index representing prices received by farmers for their products was 3 per cent lower than in July and 25 per cent lower than a year ago. As compared with the prices that ruled in July, increases occurred in prices received for grains and dairy and poultry products, while declines were noted in the prices for fruits and vegetables, meat animals, cotton and cotton-seed and unclassified items. In comparison with August, last year, declines occurred without exception in each case.

EMPLOYMENT

Factory employment as indicated by the index of the Federal Reserve Board showed but slight change from the month of July but was lower than a year ago.

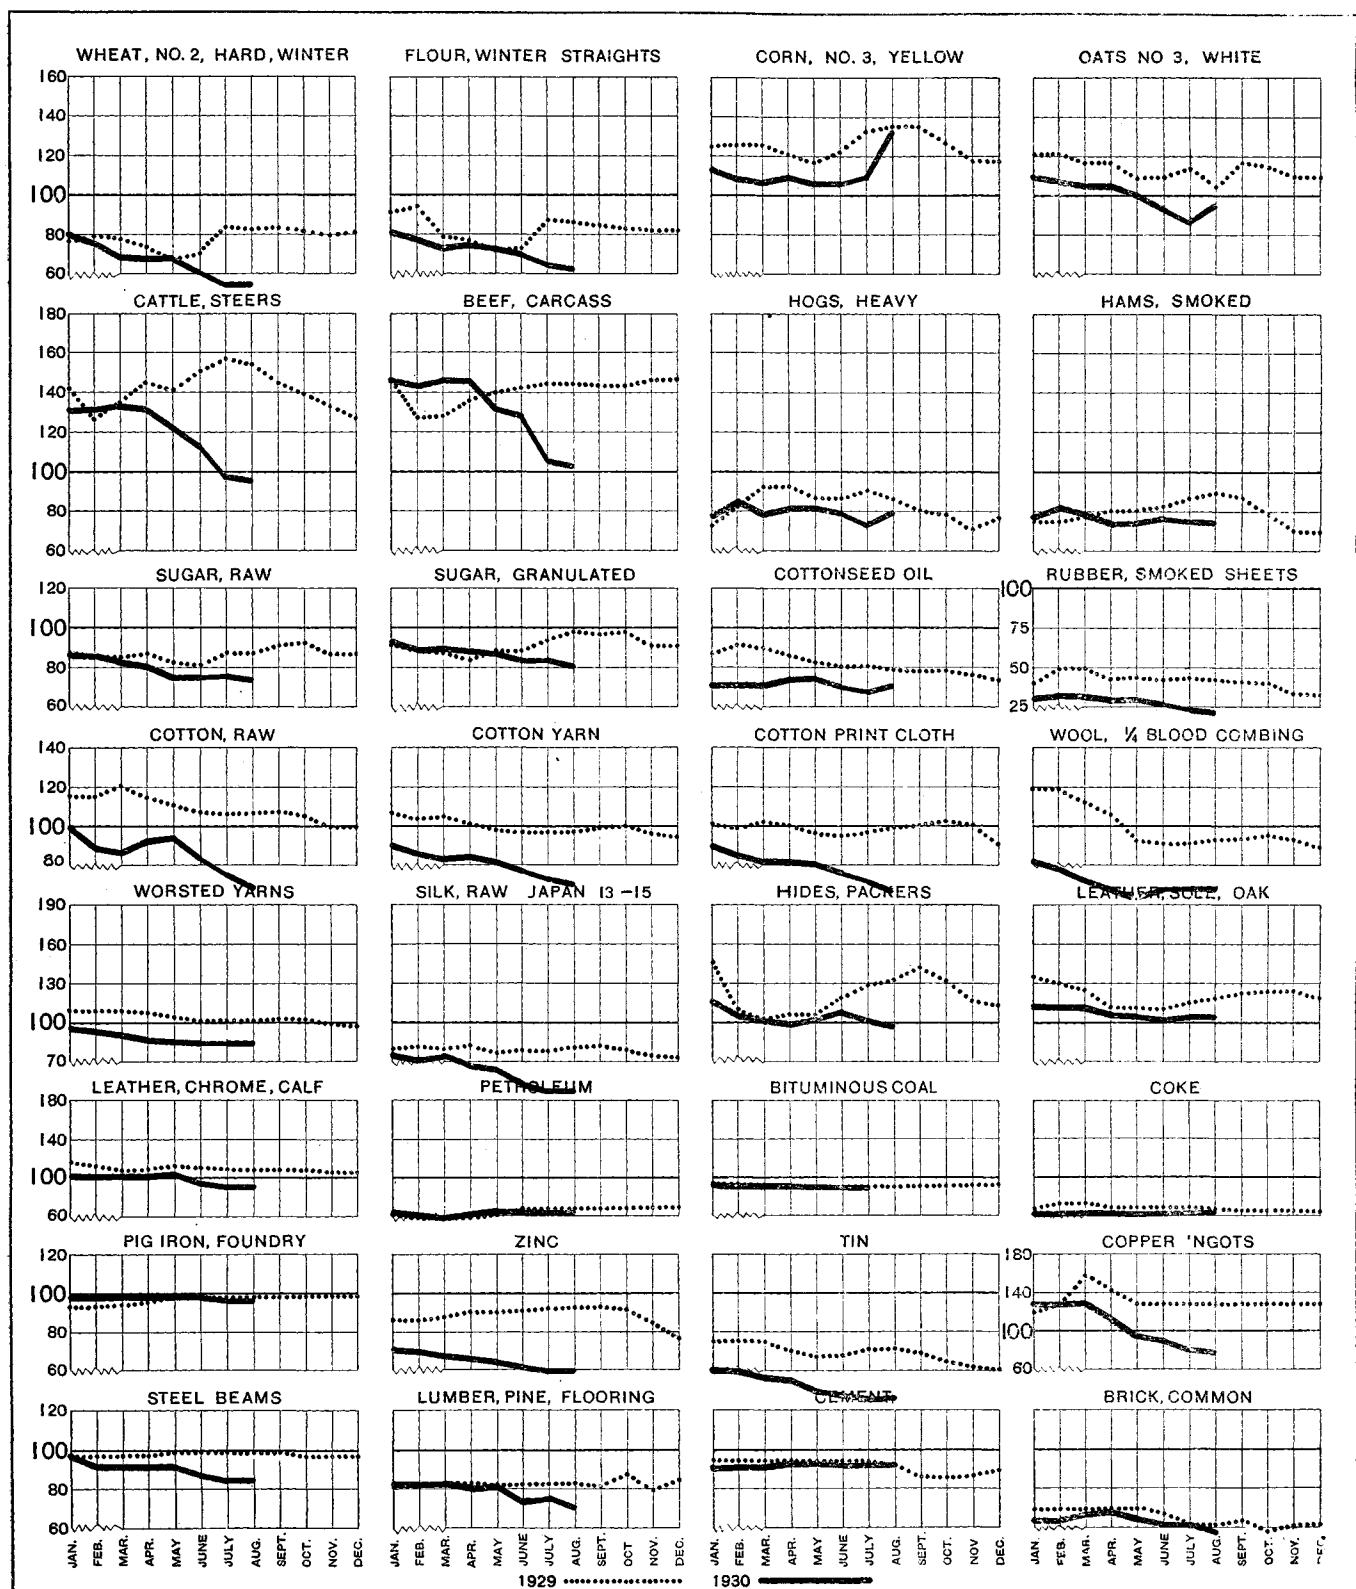

change in wage payments were noted in the cement and chemical industries. The principal declines from a month ago were indicated in factories producing automobiles and petroleum products, this being due to decreased activity in those industries.

COST OF LIVING

The general cost-of-living index, as compiled by the National Industrial Board, remained at the same level as a month ago but showed a considerable decline from the month of August, 1929. Declines from July occurred in the shelter, clothing, and the sundries groups, while the foodstuff group and the group comprising fuel and light showed no change. As compared with August, 1929, all cost-of-living groups registered substantial declines.

WHOLESALE PRICES FOR SPECIFIED COMMODITIES

[Relative numbers, 1926 monthly average taken as 100. August, 1930, is latest month plotted. Data from which these charts are drawn are given on the opposite page]

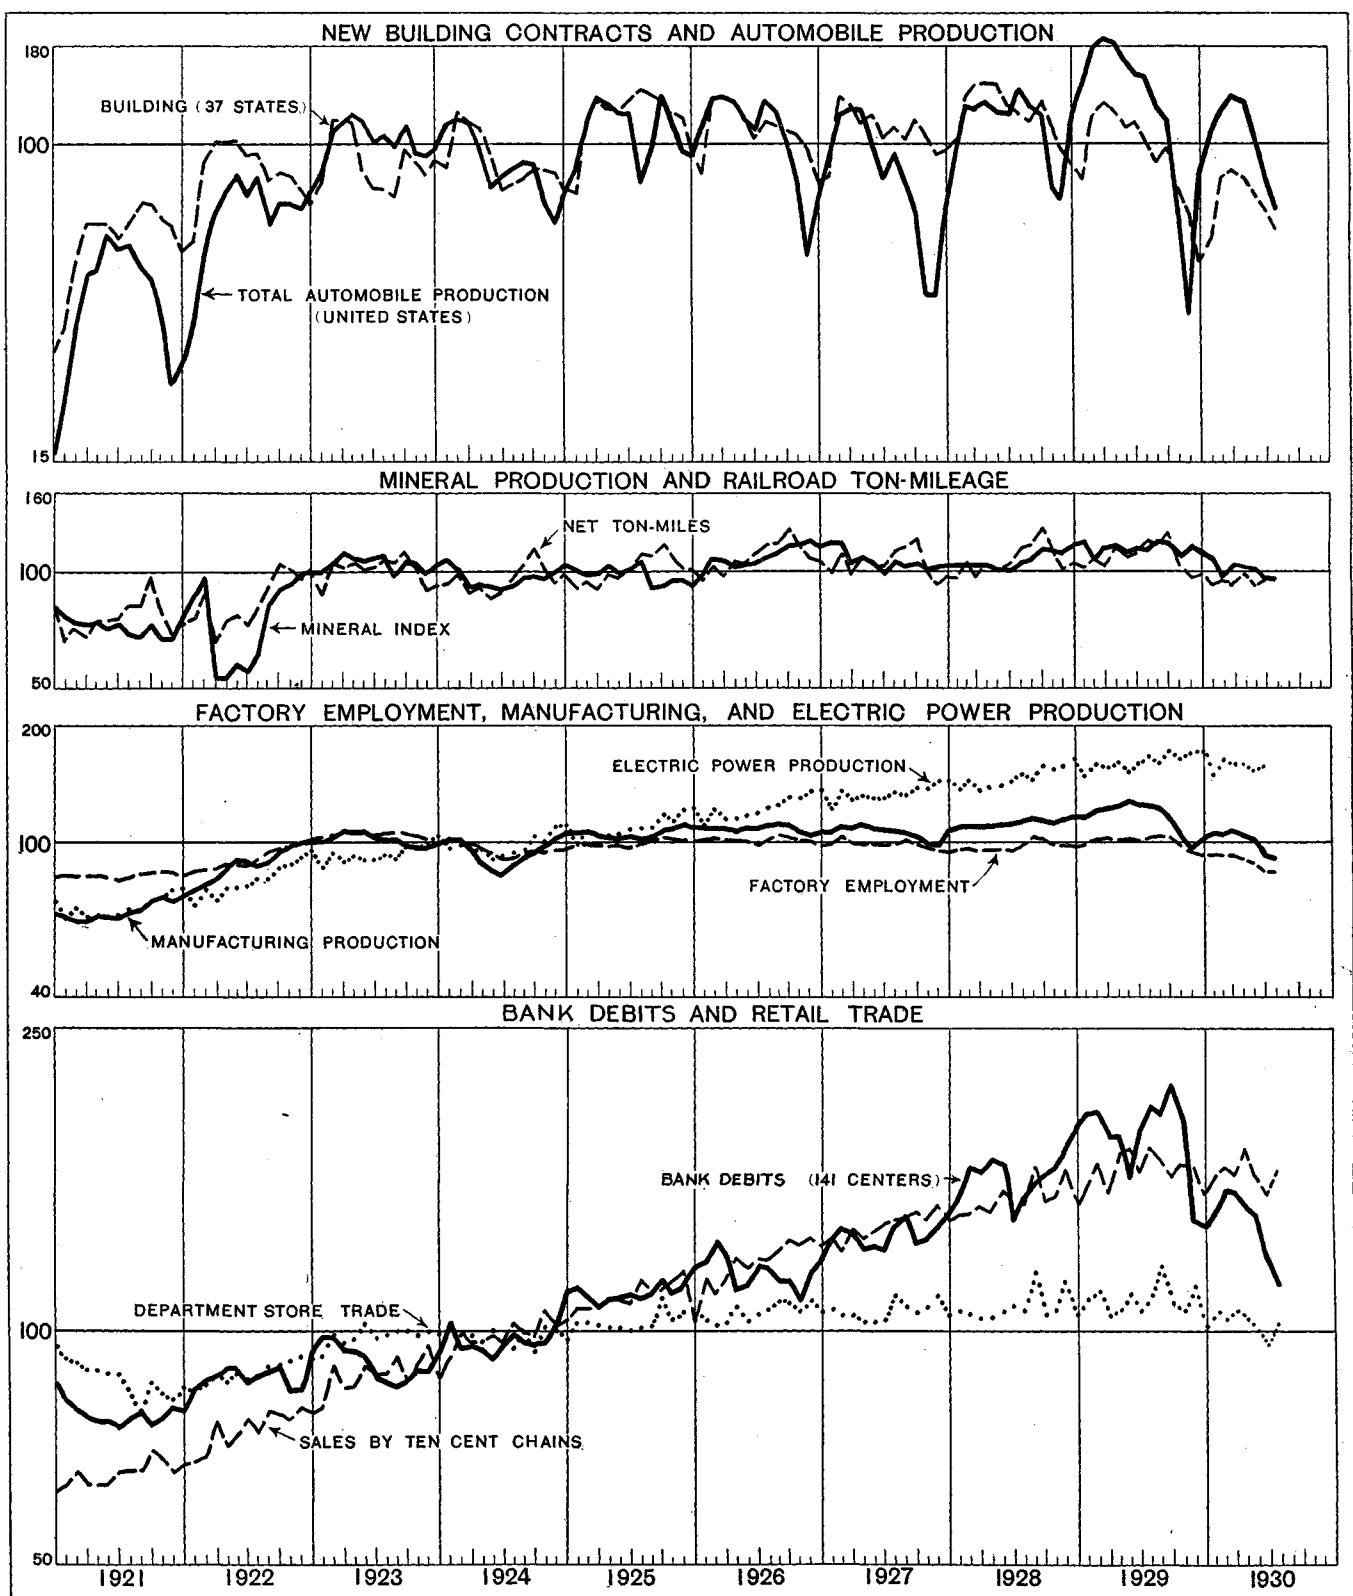

WHOLESALE PRICES FOR SPECIFIED COMMODITIES

NOTE.—Prices to producer on farm products and market price of wool and grain prices are from U. S. Department of Agriculture, Bureau of Agriculture Economics; nonferrous metals from the Engineering and Mining Journal-Press, except tin, which is from the American Metal Market. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics. So far as possible all quotations represent prices to producer or at mill.

MEASURES OF INDUSTRIAL AND COMMERCIAL ACTIVITY

[Relative numbers, monthly average 1923-1925, taken as 100]

REVIEW OF PRINCIPAL BRANCHES OF INDUSTRY AND COMMERCE

TEXTILES

Imports of wool in August registered an increase over the previous month but declined from August, 1929. Consumption of wool by textile mills, although showing but slight change from a month ago, was lower than last year. The activity of wool machinery indicated by the per cent of active hours was lower in most cases than either prior period. The activity of spindles in worsted spinning was greater and woolen spinning was less than the previous month.

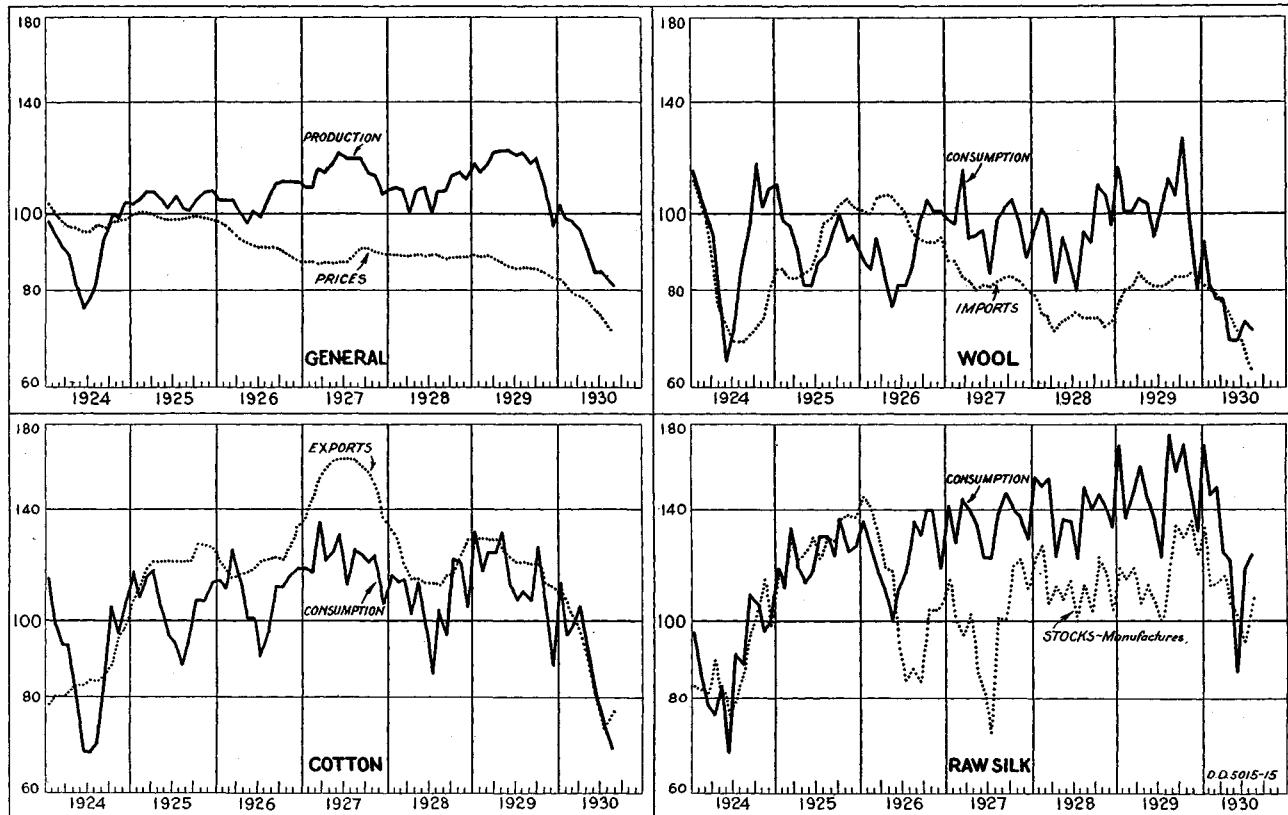

Cotton receipts into sight during August, as reported by the New Orleans Cotton Exchange, registered an increase over both the preceding month and the month of August, 1929. Exports of cotton likewise showed

about half what they were last year. Rayon prices showed no change from the preceding month.

The production of cotton textiles during August presented rather a bright spot in the textile industry, increases over July occurring in the production, shipments, and new and unfilled orders, stocks alone showing a downward trend. Compared with a year ago, all these trends showed a decline with the exception of stocks. Imports of cotton cloth were smaller than during prior comparative periods. Exports showed practically the same level as a month ago. Both imports and exports were less than during August, 1929. Shipments and unfilled orders of finished cotton goods, although greater than during July, were less than dur-

THE TEXTILE INDUSTRIES

[Relative numbers, monthly average 1923-1925, taken as 100. August, 1930, is latest month plotted. Curves covering imports of wools and exports of cotton are plotted from 12 months' moving monthly average plotted on the end month]

gains over both prior periods. The consumption of raw cotton by textile mills was lower than either previous period. For the first eight months of the year cotton consumption was smaller than in the same period of last year.

Imports of silk were greater than the month of July but fell off from the imports of August a year ago. Consumption of silk, as measured by deliveries of the commodity, showed a gain over a month ago, but, like imports, were less than during 1929.

Rayon imports, including yarns, threads, and filaments, were larger than in July, but smaller than a year ago. For the year to date imports of rayon were

ing August, last year. On the other hand, billings, orders for gray yardage, and stocks were less than either prior period. The activity of the industry for the past month was greater than during July.

The production of carded yarns during August, was less than during the preceding month or a year ago. Unfilled orders were greater and stocks less than the previous month. Prices for yarns showed slight losses from a month ago.

Imports of buttons and shells were on the whole greater than either prior period. Vegetable ivory or tagua nuts, however, showed declines from both prior periods.

METALS

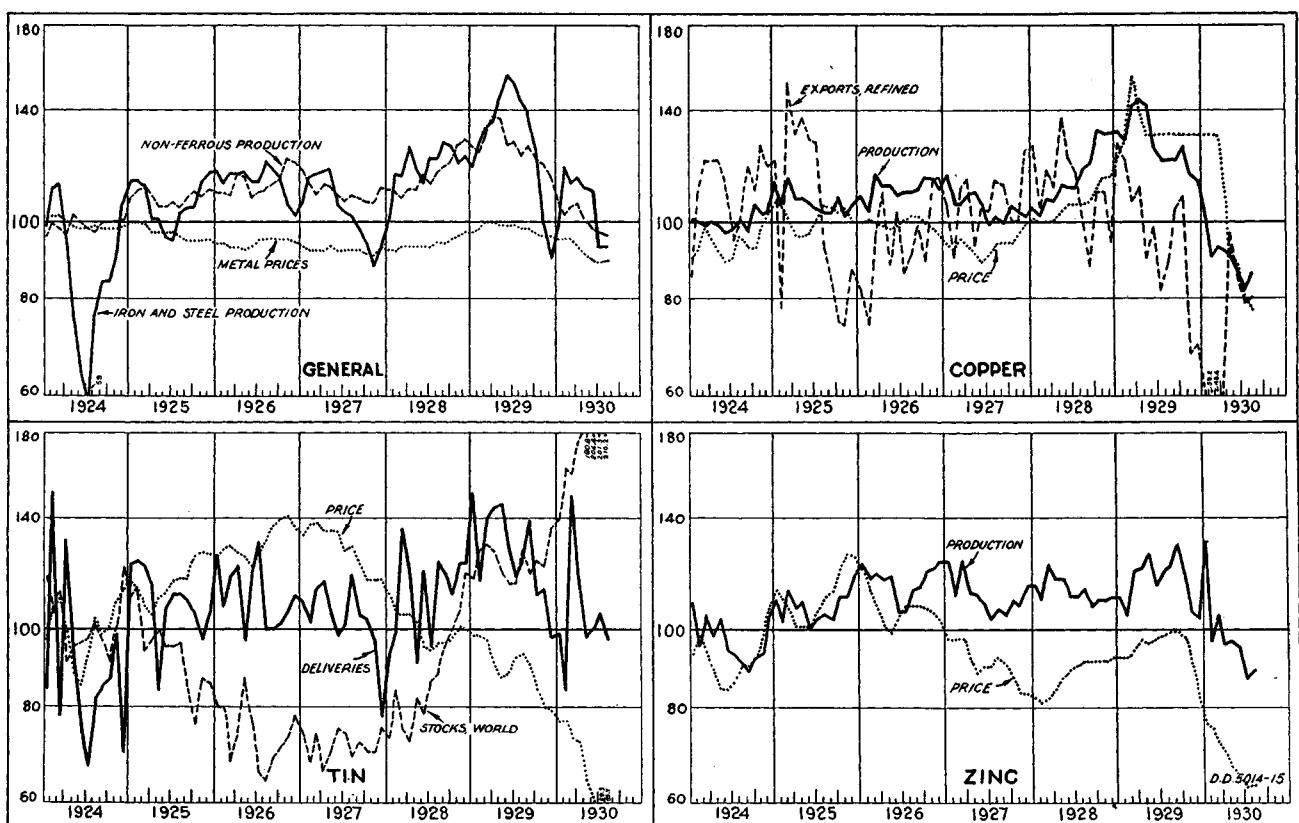

Iron ore shipments from the mines during August were fractionally smaller than in July but showed a falling off from a year ago. Receipts at Lake Erie ports and furnaces showed similar tendencies. Pig-iron production declined from both the preceding month and the same month in 1929. For the year to date less pig iron was produced than during the same period last year. However, it would be well to note that the amount produced this year showed but slight change from the corresponding period in 1928, two years ago.

orders of steel boilers were greater in quantity than a month ago.

Steel furniture shipments in the business group increased over the preceding month, unfilled and new orders of this group being lower. In the shelving class, shipments and new orders declined from July, while unfilled orders increased. As compared with a year ago all-trends were lower. Shipments stocks, new and unfilled orders were generally smaller for baths, sinks, and lavatories than the previous month, while shipments and new orders for miscellaneous sanitary ware were greater. The number of patents issued for agri-

THE METAL INDUSTRIES

[Relative numbers, monthly average 1923-1925, taken as 100. August, 1930, is latest month plotted]

The output of steel ingots in the United States showed an increase over the preceding month but was lower than in 1929. Unfilled orders of the United States Steel Corporation showed a decline from the preceding month and the same period last year.

New orders and shipments of structural steel showed declines from the preceding month and a year ago. Shipments to date, showing a tonnage of 2,260,000 short tons, indicate a marked gain over the corresponding period two years ago, when the shipments were 1,978,000 tons. The production of steel barrels, steel castings, and fabricated plate registered declines from both prior periods. As compared with the year to date increases were noted in the production and shipments of steel barrels and in the production of steel castings over a similar period in 1928. Unfilled

cultural machinery and internal combustion engines were both less than either the preceding month or in August, 1929.

Mine copper output in the United States and world blister copper production were both higher than a month ago. At the end of August stocks of refined copper at the refineries were greater, while those of blister were less than at the end of July. The stocks of North and South American refined copper at the end of August were greater than a year ago.

Deliveries of tin during August registered declines from both prior periods. Stocks of this commodity showed increases over both July and a year ago. Zinc production and stocks were greater than a month ago. As compared with the previous month production was less while stocks were greater.

FUELS

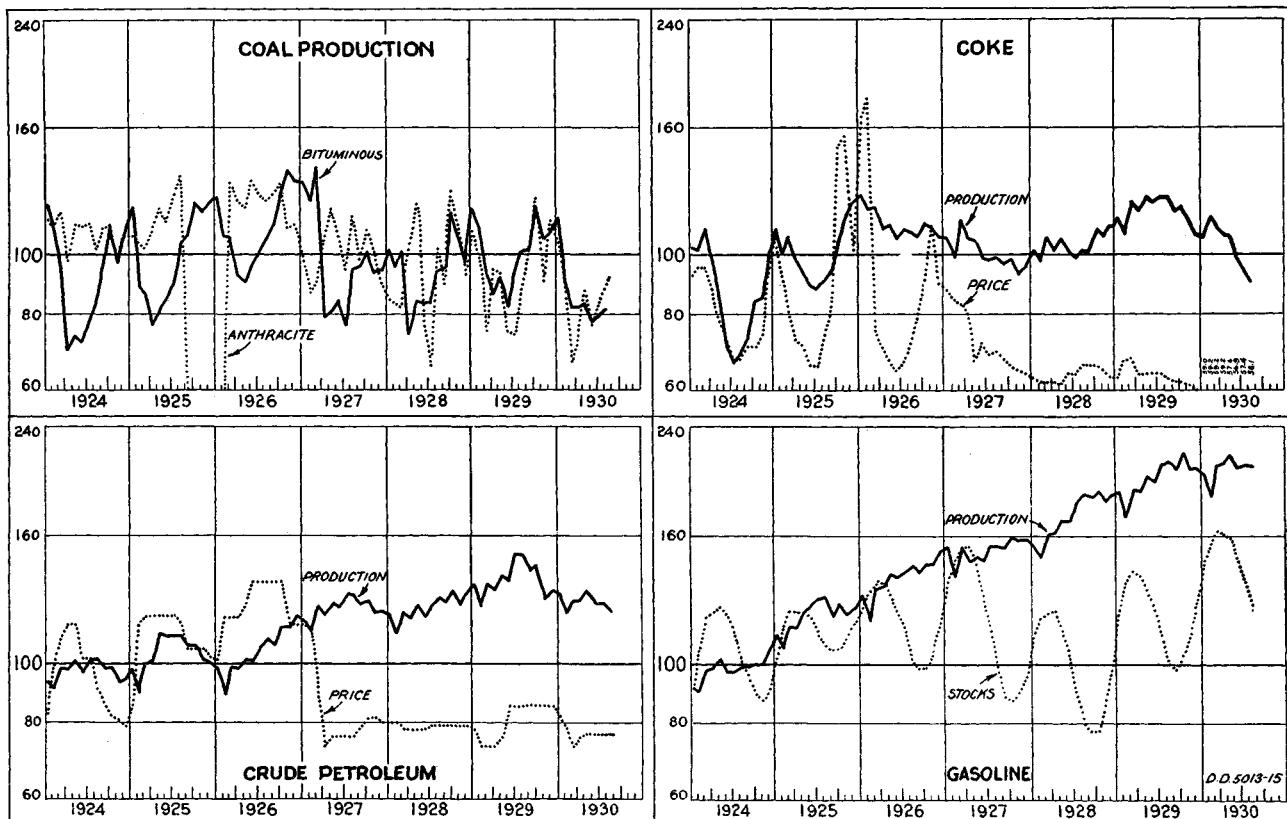

Production of bituminous coal in the United States during August amounted to 35,661,000 tons. This compares with the production of 34,715,000 tons during July and 44,475,000 tons during August a year ago. Canadian production of this fuel was greater than a month ago but less than August, 1929. Anthracite coal output registered increases over both the preceding month and a year ago. The total output of coke recorded declines from both prior periods. For the year to date by-product coke production in the United States was greater than during August, 1928. Canadian coke production was about what it was last month; however, as compared with a year

HIDES AND LEATHER

Imports of hides and skins from foreign countries during August were generally smaller than during either July, 1930, or August, 1929. For the first eight months of the current year total imports were smaller than during the same period of 1929. Fewer cattle, calves, and swine were slaughtered under Federal inspection in the United States than during either the month of July or a year ago. More sheep and lambs were slaughtered than during either prior month. Prices of cattle, hides, and calfskins averaged lower than either comparative period. Fewer cattle and calves were slaughtered in Canada during the month of August: slaughterings were also smaller

THE FUEL INDUSTRIES

[Relative numbers, monthly average 1923-1925 taken as 100. August, 1930, is latest month plotted where data were available]

ago, a decline was noted. The price of coke was higher than July but lower than August last year.

AUTOMOBILES AND RUBBER

The total production of automobiles including passenger cars, taxicabs, and trucks declined from both the preceding month and August, 1929. For the year to date the total production was 2,704,957 as against 4,224,911 in 1929 and 3,054,905 in 1928. The Canadian production likewise showed losses from both prior periods. General Motor Co. sales were greater in August than July, in sales to dealers and consumers and for export. Shipments of accessories and parts during August showed increases over July, in original equipment, replacement parts, accessories, and service parts. Imports of rubber, including latex, although greater than the preceding month were less than in August, 1929.

than a year ago. Exports of sole and belting leather showed declines from both prior periods. There were 23,016,999 pairs of shoes manufactured in the United States during the month of August, 1930, by 810 establishments. This compares with 20,220,735 pairs made in July by the same firms.

PAPER AND PAPER PRODUCTS

The output of newsprint paper both in the United States and Canada was lower than during the month of July, 1930, or August a year ago. Consumption of newsprint by publishers, although showing a fractional change from the preceding month was considerably greater than last year. For the year to date more newsprint was used in the United States than during the same period of 1929 and 1928. Imports of newsprint during August were smaller than either prior period.

BUILDING CONSTRUCTION

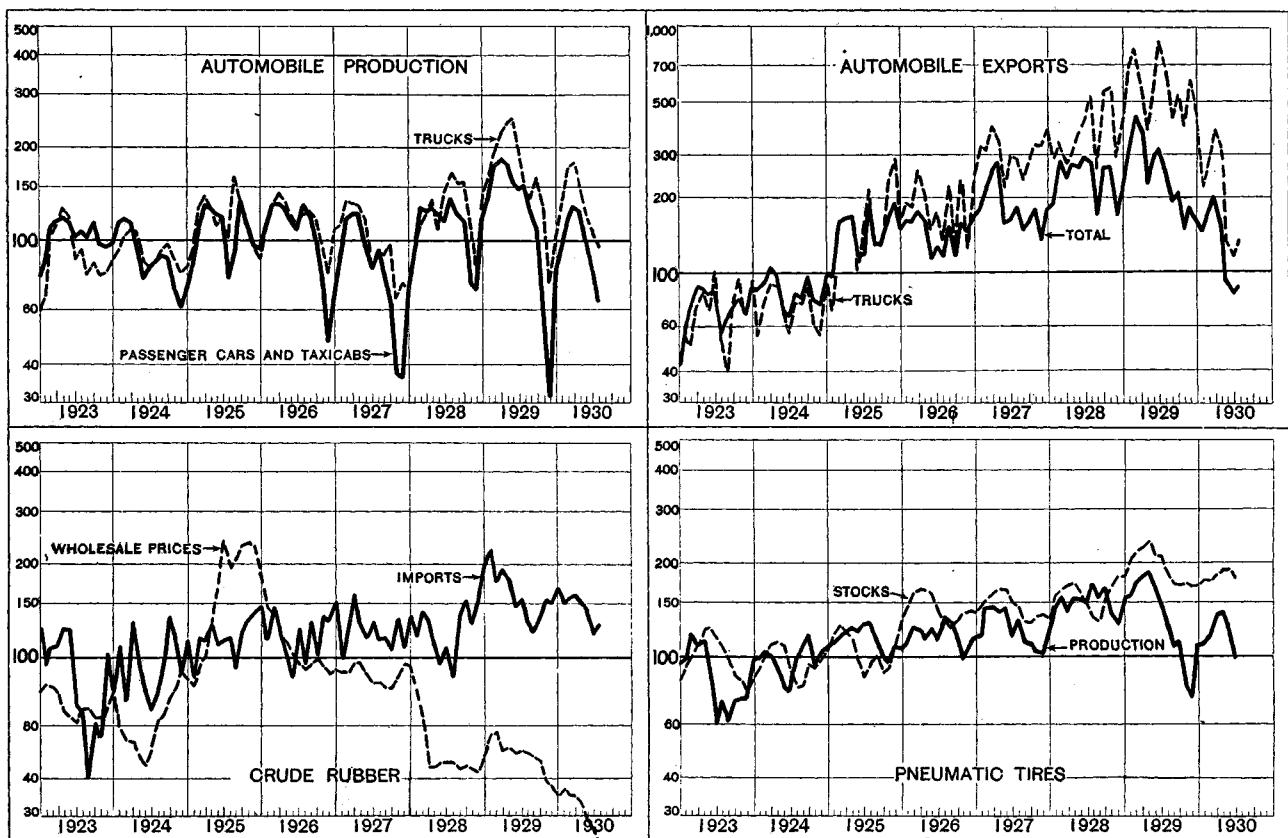

Building costs were generally lower in August than in either the previous month or August of last year. The value of new-building contracts awarded during the month as a whole declined from both July and a year ago. However, increases were noted over July in new construction as measured by contracts awarded for commercial buildings, hospitals, and institutions, social and recreational buildings, and public works and utilities. The valuation of contracts let for the year to date showed marked gains over the years of 1929 and 1928 in hospital and institutional buildings, public buildings, and public works and utilities con-

Maple flooring output, shipments, stocks, and new orders all recorded fractional declines from the month of July. However, the decline in unfilled orders was more noticeable. As compared with the trends of this product in August, 1929, losses occurred in each instance.

The production of wood pulp in August was lower than in July, consumption and stocks showing similar changes. Imports, however, were greater than the previous month. For the first eight months of the present year the production was greater than during a similar period in 1928, two years ago. The production of veneer for use in making shipping containers

THE AUTOMOBILE AND RUBBER INDUSTRIES

[Relative numbers, monthly average 1923-1925 taken as 100. Where available, August, 1930, is latest month plotted]

struction. Contracts awarded in Canada, although registering an increase over the month of July, were lower than a year ago.

LUMBER AND LUMBER PRODUCTS

The output of California redwood was greater than July but smaller than a year ago. Northern pine production also showed similar losses; the output of northern pine lath, in keeping with the smaller lumber production, showed declines from both comparative periods. Northern hardwoods and hemlock lumber, in keeping with the other lumber species, were lower both in production and shipments than either prior period.

declined from the preceding month and a year ago. Household-furniture shipments in the North Carolina district registered a gain over shipments in July; unfilled orders, however, fell off. In the Grand Rapids district new orders showed no change from the preceding month; shipments and plant operations were greater.

STONE AND CLAY PRODUCTS

In the cement industry increases occurred over the month of July in output, shipments, and stocks. As compared with August, a year ago all trends were lower. Common brick also showed increases over July in shipments, unfilled orders, and stocks.

FOODSTUFFS AND TOBACCO

The latest official estimate of 837,761,000 bushels indicates a larger wheat crop this year than a year ago, when the estimate was 805,790,000 bushels. However, both these estimates are under the estimate for the year of 1928. The visible supply of wheat, both in the United States and Canada, at the end of August was greater than a year ago. Wheat receipts at principal markets in the United States were smaller while shipments were larger during August than the preceding month. Both items were smaller than a year ago. Exports of wheat and flour were larger than July, 1930, and a year ago.

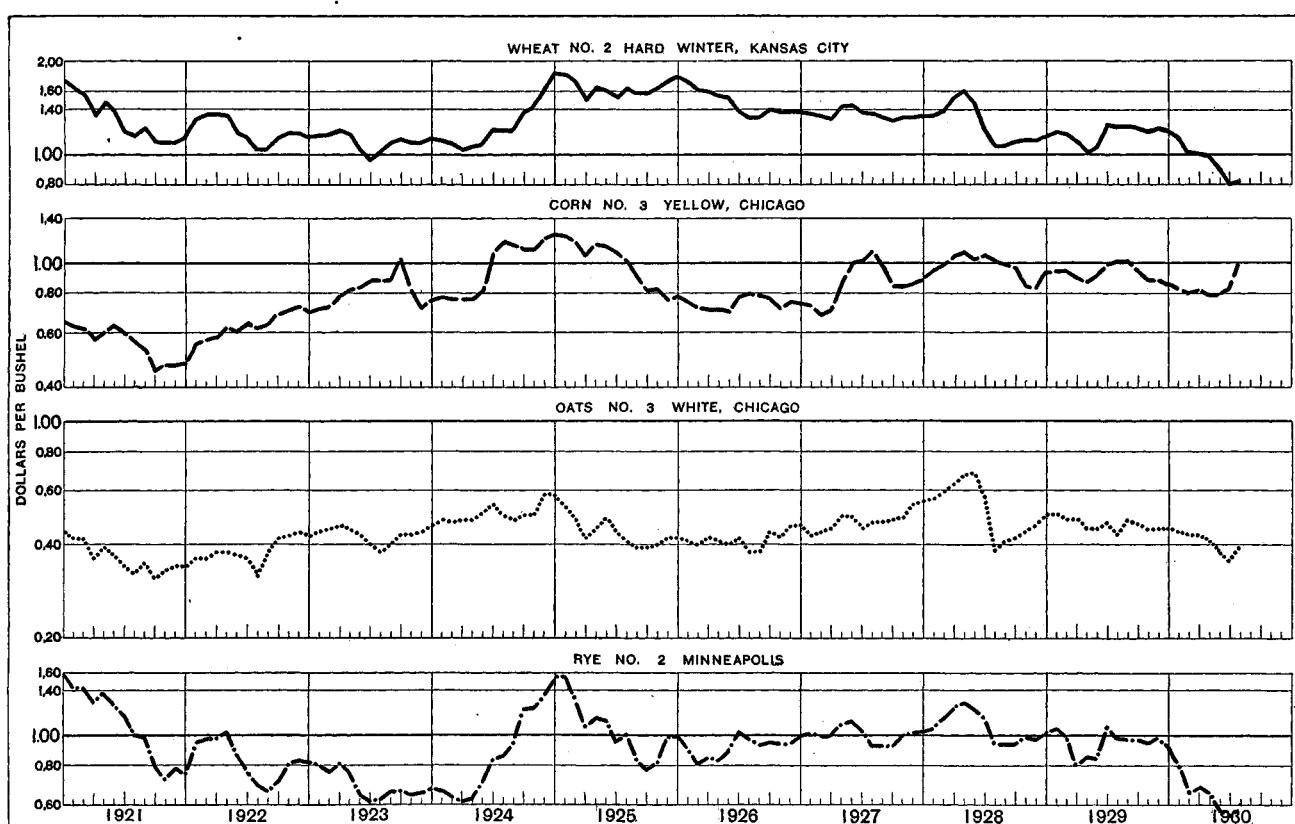

at the end of August last year. Prices for beef averaged higher than in either period.

Receipts and total shipments of hogs at primary markets were smaller than the previous month. Receipts were smaller and shipments greater than a year ago. The production of pork and its products was less than either comparative period. Cold-storage holdings and exports also showed losses from previous periods.

Receipts and shipments of sheep and lambs during August were greater than in the preceding month. Receipts were greater and shipments less than the same month in 1929. The production and consump-

MOVEMENT OF GRAIN PRICES

[Weighted price per bushel. August is latest month plotted]

Receipts and shipments of corn registered increases over the month of July. The visible supply of corn also was greater than July but less than at the end of August, 1929. Corn prices were uniformly higher in August, due mainly to the drought that existed throughout the summer months. The available stocks of oats were smaller than at the end of August last year, but rye was considerably greater. Receipts of oats, barley, and rye at principal markets also declined from a year ago.

Movements of cattle and calves at primary markets were greater than during July. Both receipts and shipments declined from the levels of a year ago. The production of beef and veal was smaller than in July and a year ago. Holdings in cold storage of these products, while declining from July, were greater than

a year ago. Receipts and shipments of hogs at primary markets were smaller than the previous month. Receipts were smaller and shipments greater than a year ago. The production of pork and its products was less than either comparative period. Cold-storage holdings and exports also showed losses from previous periods.

Receipts and shipments of sheep and lambs during August were greater than in the preceding month. Receipts were greater and shipments less than the same month in 1929. The production and consumption of mutton and lamb were greater than during either the previous month or a year ago. Storage holdings of this product, although smaller than at the end of July, were greater than a year ago. The prices of ewes at Chicago increased while lamb prices declined during August. Poultry receipts at central markets were greater while storage holdings were less than July. Both declined from a year ago. Receipts of butter and cheese were less than either the month of July or a year ago.

Consumption of both cigarettes and cigars fell off from both prior periods. For the year to date the consumption of cigarettes was greater and cigars less than the corresponding period in 1929 and 1928. The official estimate indicates a smaller tobacco crop than a year ago.

TRANSPORTATION

Car loadings for the 5-week period in August, 1930, registered a decline from the month of August, 1929. Declines occurred in the loadings of all kinds of freight when contrasted with the previous year. Transportation on the Sault Ste. Marie canal declined from the month of July and a year ago. New York canal traffic, although less than the preceding month, was considerably greater than during August, last year. Cape Cod canal traffic returns show gains over both prior periods. Canadian canal traffic was larger than either prior period. River traffic in most cases showed small change from the preceding month or a year ago. Clearances of vessels engaged in foreign trade from United States ports increased over the previous month and the same month in 1929.

Orders for new locomotives increased over both prior periods. Unfilled orders in the hands of manufacturers were less than at the end of either prior period. The number being built by railroad companies, although fewer than at the end of July, were more than a year ago. Orders for new freight cars were fewer than either prior month.

BANKING AND FINANCE

Bank debits, outside New York City, declined from the month of July, 1930, and August, 1929. Total loans and discounts of Federal reserve member banks fell off slightly from the levels of prior comparative periods. Brokers' loans during August also registered declines from preceding month and August, 1929. The value of new insurance written was less than either prior period. Dividend and interest payments during August, although declining from July, were greater than August, 1929. For the year through August these

payments exceeded payments of similar periods for the years of 1929 and 1928.

Interest rates in general were lower during August than during July or a year ago. Rates charged by the Federal land banks were higher and rates of the intermediate credit banks lower than during August, 1929. Business failures, although numbering fewer firms, showed greater liabilities than during July. Both the number of failing firms and the amount of liabilities exceeded those of August, last year.

GOLD, SILVER, AND FOREIGN EXCHANGE

Gold receipts at the United States mint declined from the month of July but were larger than a year ago. For the year to date mint receipts of gold exceeded those of both previous years. Exports of gold declined from July but were much larger than last year. Imports of the metal showed similar tendencies. Silver production in the United States and Canada was lower than during August, 1929. Exports and imports, while showing declines, when compared with the preceding month were higher, in each instance, than during the same month last year.

Foreign exchange quotations on the principal countries in August showed but slight change from the preceding month or the same month in 1929. Among the increases over July were rates with the Netherlands and Argentina. Slight declines occurred from July in rates with India and Brazil. Rates with other countries showed no change. Compared with August, 1929, rates with England, Belgium, the Netherlands, Sweden, Switzerland, and Canada, registered increases, while rates with Japan, Argentina, and Brazil declined. Exchange rates with France, Italy, India, and Chile showed no change from a year ago.

INDEXES OF BUSINESS

The index numbers presented in this table are designed to show the trend in production, prices, trade, etc., by commodities or groups. They consist in general of weighted combinations of series of individual relative numbers; often the individual relative numbers are also given. The function of index and relative numbers is explained on the inside front cover. All of the index numbers, except where noted, are based on the average of the years 1923 to 1925, while maxima and minima are given only since 1923, thus eliminating the abnormal period prior to 1923. Complete descriptions and figures for earlier years may be found in the following issues of the Survey (later data being available in the latest semiannual issues): Production in the July, 1928, issue (No. 83), pages 18 to 22; stocks in the August, 1928, issue (No. 84), pages 20 to 22; new orders in the September, 1928, issue (No. 85), page 19; unfilled orders in the January, 1928, issue (No. 77), pages 22 and 23; wholesale trade in the January, 1928, issue (No. 77), page 21; mail-order and chain stores in the May, 1928, issue (No. 81), pages 20 and 21; department stores in the April, 1928, issue (No. 80), pages 20 and 21; employment, based on 1923 as 100, in the August, 1928, issue (No. 84), page 108; farm prices in the August, 1928, issue (No. 84), page 27; wholesale prices (Department of Labor) in the November, 1927, issue (No. 75), page 24, and the June, 1928, issue (No. 82), page 23; wholesale prices, commercial, in the August, 1928, issue (No. 84), page 26; cost of living in the August, 1928, issue (No. 84), page 27, and the June, 1926, issue (No. 58), page 24.

PROSPECTIVE CAR LOADINGS, FOURTH QUARTER OF 1930

Commodity loadings by railroads in carload lots for the fourth quarter of 1930 are estimated by the regional advisory boards set up by the American Railway Association at somewhat more than 7 per cent below the corresponding period of 1929. These estimates are compiled from detailed reports of committees representing shippers of the various commodities as first described in the August, 1927, issue of the SURVEY OF CURRENT BUSINESS, page 20, and are comparable with similar data published currently since that time. The boundaries of the various economic districts set up by these boards are shown in the accompanying chart.

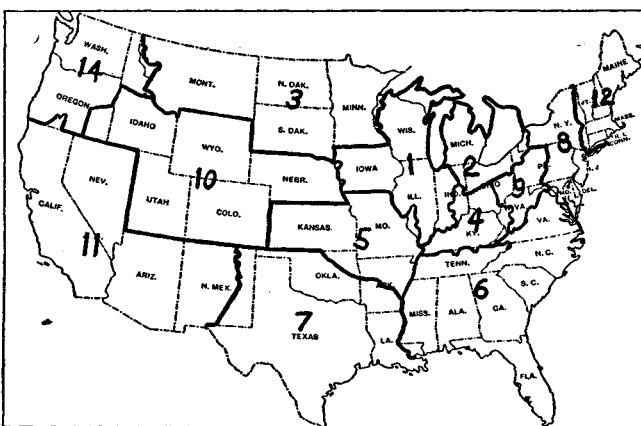

The estimated decline from a year ago is largely due to the decrease in the loadings of cotton, ore and concentrates, lumber and forest products, brick and clay products, agricultural implements, and automobiles. Large decreases are also anticipated in the loadings of citrus fruits, and machinery and boilers, each of these groups showing prospective declines of 10 per cent or more. Included among the principal increases are flour, meal, and other mill products, fresh fruits other than citrus, potatoes, fresh vegetables, petroleum and its products, sugar and sirup, and molasses.

Although declines were estimated for the country as a whole for the fourth quarter of this year, in comparison with a year ago material gains were estimated

over the loadings of a year ago in the loadings of automobiles in the Allegheny district, grain in the Great Lakes, trans-Missouri and northwest districts.

In the southeast district, comprising the States of Tennessee, Mississippi, Alabama, Florida, Georgia, and North and South Carolina, although as a whole showing a decline of 7 per cent from a year ago, many marked increases in loadings will occur. Among those that stand out are anticipated loadings of hay, cottonseed and cottonseed oil, live stock, fresh vegetables, gravel, and stone.

REGIONAL ADVISORY BOARD DISTRICTS

TREND OF BUSINESS MOVEMENTS

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. These data represent continuations of the figures presented in the latest semiannual number (August, 1930), in which monthly figures for 1929 and 1930 may be found, together with explanations as to the sources and exact extent of the figures quoted. The figures given below should always be read in connection with those explanations. Data on stocks, unfilled orders, etc., are given as of the end of the month referred to. For explanations of relative numbers, including base periods, see introduction on inside front cover.

<i>The cumulatives shown are through August, except where otherwise noted. Earlier data for items shown here may be found on pages 27 to 139 of the August, 1930 "Survey"</i>	1930			1929			1928			CUMULATIVE TOTAL FROM JANUARY 1 THROUGH AUGUST 31

PUBLICATIONS OF THE DEPARTMENT OF COMMERCE

Recent publications of the Department of Commerce having the most direct interest to readers of the *SURVEY OF CURRENT BUSINESS* are listed below. A complete list may be obtained by addressing the Division of Publications, Department of Commerce, at Washington. Copies of the publications may be purchased from the Superintendent of Documents, Government Printing Office, Washington, at the prices stated. If no price is mentioned, the publication is distributed free.

Acoustics.—**Sound Absorption Coefficients of More Common Materials.** ii+2 pages. (Bureau of Standards Circular No. 384.) Data on sound absorption coefficients of a number of materials used as acoustic correctives. Price, 5 cents.

Agricultural machinery.—**British Market for Agricultural Machinery and Implements.** ii+16 pages. (Bureau of Foreign and Domestic Commerce. Trade Information Bulletin No. 712.) Discussion of the character of farms in the United Kingdom, the British agricultural implement industry, the trade in these implements, types of machinery commonly used, and sales methods employed. There is included a list of agricultural fairs held annually. Price, 10 cents.

Aviation.—**Aeronautics Trade Directory:** Part I, Commodities; Part II, Activities. ii+54 pages. (Aeronautics Branch, Aeronautics Bulletin No. 3.) List of manufacturers of aircraft equipment arranged alphabetically by kind of apparatus produced, and list of operators of aircraft arranged by State and town from which their activities start.

Bureau of Standards Journal of Research is published monthly and contains the papers formerly issued as Scientific and Technologic Papers series, which have been discontinued. The articles in the journal are known as the Research Papers series and are issued separately after publication in the journal. Single copies, 10 cents; annual subscription, \$2.75.

Coal and coke.—**Fuel Briquets in 1929**, by O. E. Kiesling and J. M. Corse. (Bureau of Mines. Mineral Resources of United States, 1929, Pt. III, pp. 23-33.) This publication shows the production, sales, and imports of briquets in the United States, and the world production of this kind of fuel. Price, 5 cents.

Commercial standards.—**Interchangeable Ground Glass Joints.** vi+12 pages, 1 illustration. (Bureau of Standards. Commercial Standard CS21-30.) These are the standards established for ground glass joints for laboratory and industrial glassware. Price, 15 cents.

Commercial Standards Monthly. Review of Progress in Commercial Standardization and Simplification. Published monthly by the Bureau of Standards. Annual subscription, \$1.

Explosives.—**Procedure for Testing Explosives for Permissibility for Use in Coal-Mines**, with Test Requirements, Tolerance Limits, and Schedule of Fees. ii+11 pages, 1 chart. (Bureau of Mines. Schedule 17B.)

Fish.—**Migrations and Other Phases in Life History of Cod off Southern New England**, by William C. Schroeder. (Bureau of Fisheries. Document No. 1081.) From Bulletin of Bureau of Fisheries, Vol. XLVI, 1930, pp. 1-136, 6 illustrations, 3 pages of plates, 18 charts. This publication describes the methods used in obtaining data such as tagging and measuring of fish when first caught, and the results obtained in the study of the migratory habits of the cod. A bibliography is included. Price, 45 cents.

Fish nets.—**Investigations upon Deterioration of Nets in Lake Erie**, by A. C. Robertson and W. H. Wright. (Bureau of Fisheries. Document No. 1086. Appendix VII to Report of Commissioner of Fisheries for Fiscal Year 1930, pp. 149-176, 10 illustrations.) Discussion of the causes of deterioration of fish nets in Lake Erie and methods which may be employed to prevent such deterioration. Price, 5 cents.

Foodstuffs.—**San Francisco Restaurant Industry.** iv+28 pages. (Bureau of Foreign and Domestic Commerce.) Study of the restaurants of San Francisco, showing the number in operation, amount of investment, character of equipment, number of employees and pay roll, seating capacity of the various establishments, average annual sales, relation of wages of employees to sales made, average amount of customer's check, and length of time each restaurant has been operated under same management. Price, 5 cents.

Foreign Trade of United States in Fiscal Year 1929-30. ii+22 pages. (Bureau of Foreign and Domestic Commerce. Trade Information Bulletin No. 718.)

Machinery.—**Far Eastern Markets for Dairy Equipment and Supplies.** ii+23 pages. (Bureau of Foreign and Domestic Commerce. Trade Information Bulletin No. 711.)

Standards Committee, 4 pages. (Bureau of Standards. American Marine Standard E No. 33-1930.) Price, 5 cents.

Metals and minerals.—**Arsenic in 1929**, by V. C. Heikes. (Bureau of Mines. Mineral Resources of United States, 1929, Pt. I, pp. 1-4.) This pamphlet shows the production, imports, and sales of arsenic in the United States during 1929, the market conditions during this year, and world production of this mineral for the years 1924 to 1928. Price, 5 cents.

Copper Electrotyping. ii+34 pages. (Bureau of Standards. Circular No. 387.) This publication outlines the process of electrotyping, gives general principles of electrodeposition, and describes the conditions necessary for satisfactory operation and control of copper electrotyping solutions. Price, 10 cents.

Mineral Resources of United States, 1929. (Preliminary Summary). ii+120 pages. (Bureau of Mines.) The tables in this report show production of different minerals in the United States and trade in these minerals for a series of years, and for production in the different States, arranged in alphabetic order. Price, 20 cents.

Zinc Smelting from Chemical and Thermodynamic Viewpoint, by C. G. Mayer. iv+93 pages, 19 charts. (Bureau of Mines. Bulletin 324.) In this bulletin is shown the application of theoretical data to the general chemistry of zinc reduction in smelting. Price, 20 cents.

Monthly Summary of Foreign Commerce of United States, July, 1930. Parts I and II. (Bureau of Foreign and Domestic Commerce.) Part I contains statistics of exports of domestic merchandise, and imports by articles for July, 1929 and 1930, and for seven months ending July, 1929 and 1930. Single copies, Part I, 10 cents; Part II, 5 cents; annual subscription, \$1.25.

Petroleum.—**Effect of Vacuum on Oil Wells**, by Ben E. Lindsley and W. B. Berwald. vi+133 pages, 13 illustrations, 9 pages of plates, charts. (Bureau of Mines. Bulletin 322.) Description of the so-called vacuum method of extracting petroleum from oil wells. Price, 35 cents.

Radio Service Bulletin is issued monthly by the Radio Division of the Department of Commerce and contains list of radio stations. Single copies, 5 cents; annual subscription, 25 cents.

Shipping.—**American Documented Seagoing Merchant Vessels of 500 Gross Tons and Over**. Published monthly by the Bureau of Navigation. Single copies, 10 cents; annual subscription, 75 cents.

Pilot Rules for Certain Inland Waters of Atlantic and Pacific Coasts and of Coast of Gulf of Mexico. ii+38 pages, illustrations. (Steamboat Inspection Service. Form 804.)

Simplified practice recommendations.—**Color for School Furniture.** vi+12 pages, 1 plate, 1 chart. (Bureau of Standards. Simplified Practice Recommendation R111-30.) Price, 5 cents.

Industrial Truck Tires. iv+14 pages, 1 chart. (Bureau of Standards. Simplified Practice Recommendation R103-29.) Price, 5 cents.

Stoves.—**Market for Cooking and Heating Appliances in Canada and Latin America.** ii 55 pages. (Bureau of Foreign and Domestic Commerce. Trade Information Bulletin No. 714.) Discussion of the kinds of cooking and heating appliances in demand and conditions for their marketing in Canada and the different countries of Latin America. Price, 10 cents.

Tariff.—**Handbook of Foreign Tariffs and Import Regulations on Agricultural Products: III. Canned Foods in Western Hemisphere**, by Roberta P. Wakefield and Robert S. Hollingshead. xiv 379 pages. (Bureau of Foreign and Domestic Commerce. Trade Promotion Series No. 97.) This publication gives the sanitary manufacture, import, and sales regulations for canned foods in the different countries of the Western Hemisphere. Price, 50 cents.

Vital statistics.—**Fifteenth Census of United States, 1930: Arkansas, Number and Distribution of Inhabitants.** 26 pages, map. (Bureau of the Census. Population Bulletin, First Series.)

CHIEF FUNCTIONS OF THE DEPARTMENT OF COMMERCE

R. P. LAMONT, Secretary of Commerce

JULIUS KLEIN, Assistant Secretary of Commerce.

EPHRAIM F. MORGAN, Solicitor

AERONAUTICS BRANCH

CLARENCE M. YOUNG, Assistant Secretary of Commerce for Aeronautics

Establishment of civil airways and maintenance of aids to air navigation; inspection and registration of aircraft and licensing of pilots; enforcement of air traffic rules; investigation of accidents; encouragement of municipal air ports; fostering of air commerce; scientific research in aeronautics; and dissemination of information relating to commercial aeronautics. (Some of these functions are performed by special divisions of the Lighthouse Service, the Bureau of Standards, and the Coast and Geodetic Survey.)

BUREAU OF THE CENSUS

WILLIAM M. STEUART, Director

Taking censuses of population, mines and quarries, water transportation, and religious bodies every 10 years; censuses of agriculture and electrical public utilities every 5 years, and a census of manufactures every 2 years.

Compilation of statistics of wealth, public debt and taxation, including financial statistics of local governments, every 10 years; annual compilation of financial statistics of State and municipal governments.

Compilation of statistics of marriage, divorce, births, deaths, and penal and other institutions annually, and of death rates in cities and automobile accidents weekly.

Compilation quarterly or monthly, of statistics on cotton, wool, leather, and other industries; annually of forest products.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

WILLIAM L. COOPER, Director

The collection of timely information concerning world market conditions and openings for American products in foreign countries, through commercial attaches, trade commissioners, and consular officers, and its distribution through weekly Commerce Reports, bulletins, confidential circulars, the news and trade press, and district and cooperative officers in 65 cities.

The maintenance of commodity, technical, and regional divisions to afford special service to American exporters and manufacturers.

The compilation and distribution of lists of possible buyers and agents for American products in all parts of the world and publication of weekly lists of specific sales opportunities abroad.

The publication of statistics on imports and exports.

The study of the processes of domestic trade and commerce.

The Survey of Current Business.

BUREAU OF STANDARDS

GEORGE K. BURGESS, Director

Custody, development, and construction of standards of measurement, quality, performance, or practice; comparison of standards used by scientific or other institutions; determination of physical constants and properties of materials; researches and tests on materials and processes; and publication of scientific and technical bulletins reporting results of researches and fundamental technical data.

Preparation of specifications for Government purchases, through the Federal Specifications Board.

Collection and dissemination of information concerning building codes and the planning and construction of houses.

Establishment of simplified commercial practices through cooperation with business organizations in order to reduce the wastes resulting from excessive variety in commodities.

BUREAU OF MINES

SCOTT TURNER, Director

Technical investigations in the mining, preparation, and utilization of minerals, including the study of mine hazards and safety methods and of improved methods in the production and use of minerals.

Testing of Government fuels and management of the Government Fuel Yard at Washington.

Research on helium and operation of plants producing it.

Studies in the economics and marketing of minerals and collection of statistics on mineral resources and mine accidents.

The dissemination of results of technical and economic researches in bulletins, technical papers, mineral resources series, miners' circulars, and miscellaneous publications.

BUREAU OF FISHERIES

HENRY O'MALLEY, Commissioner

The propagation and distribution of food fish and shellfish, in order to prevent the depletion of the fisheries; investigations to promote conservation of fishery resources; the development of commercial fisheries and agriculture; study of fishery methods; improvements in merchandising and collection of fishery statistics; administration of Alaska fisheries and fur seals; and the protection of sponge off the coast of Florida.

BUREAU OF LIGHTHOUSES

CHARLES R. PUTNAM, Commissioner

Maintenance of lighthouses and other aids to water navigation. Establishment and maintenance of aids to navigation along civil airways.

Publication of Light Lists, Buoy Lists, and Notices to Mariners, giving information regarding these aids to navigation.

COAST AND GEODETIC SURVEY

RAYMOND S. PATTON, Director

Survey of the coasts of the United States and publications of charts for the navigation of the adjacent waters, including Alaska, the Philippine Islands, Hawaii, Porto Rico, the Virgin Islands, and the Canal Zone; interior control surveys; magnetic surveys; tide and current observations; and seismological investigations.

Publication of results through charts, coast pilots, tide tables, current tables, and special publications.

BUREAU OF NAVIGATION

ARTHUR J. TYREN, Commissioner

Superintendence of commercial marine and merchant seamen. Supervision of registering, enrolling, licensing, numbering, etc., of vessels under the United States flag, and the annual publication of a list of such vessels.

Enforcement of the navigation and steamboat inspection laws, including imposition of fees, fines, tonnage, taxes, etc.

STEAMBOAT INSPECTION SERVICE

DICKINSON N. HOOVER, Supervising Inspector General

The inspection of merchant vessels, including boilers, hulls, and life-saving equipment; licensing of officers of vessels; certification of able seamen and lifeboat men, and the investigation of violations of steamboat inspection laws.

UNITED STATES PATENT OFFICE

THOMAS E. ROBERTSON, Commissioner

The granting of patents and the registration of trade-marks, prints, and labels after technical examination and judicial proceedings.

Maintenance of library with public search room, containing copies of foreign and United States patents and trade-marks. Recording bills of sale, assignments, etc., relating to patents and trade-marks. Furnishing copies of records pertaining to patents.

Publication of the weekly Official Gazette, showing the patents and trade-marks issued.

RADIO DIVISION

W. D. TERRELL, Chief

Inspection of radio stations on ships, inspection of radio stations on shore, including broadcasting stations; licensing radio operators; assigning station call letters; enforcing the terms of the International Radiotelegraphic Convention; and examining and settling international radio accounts.
