the BUSINESS SITUATION

PARTIAL but conclusive evidence indicates that the slide in real GNP accelerated in the fourth quarter. The month-long coal strike was not a major factor; the decline was mainly the result of a broadly based and pronounced weakening of demand.

The largest decline was in automobiles. Data through mid-December indicate that sales of domestic models were down 29.4 percent from the third quarter. There were sizable real declines in consumer purchases of goods other than autos, and in the automobile and truck components of fixed business investment. The contraction in homebuilding intensified. As yet, little is known about inventories, except that there occurred a large involuntary accumulation of automobile inventories, as the reduction in output fell short of the reduction in sales. Inventories will be a major factor determining the steepness of the fourth quarter decline in real GNP.

A major shakeout in labor markets also took place. Employment, which had been rising slowly earlier in the year, declined in October and November, and layoffs rose sharply. The unemployment rate reached 6.5 percent in November and will rise further in December. Inflation continued at a rapid rate, although there was a slowdown in price increases for commodities other than food, especially in industrial materials prices, which are cyclically sensitive.

Consumer Income and Spending

The growth of personal income slowed from a seasonally adjusted annual rate of 12.6 percent per month in the third quarter to 7.4 percent in October; in November, income declined 2.2 percent. The weakening was in private wages and salaries and farm proprietors' income (table 1).

Private wages and salaries rose 4.8 percent in October—about half the average monthly rise in the third quarter—and declined 11.4 percent in November. The weakness was due to declines in employment and in average weekly hours, and, to a lesser extent, to a slowdown in the rise of hourly earnings. Average hourly earnings of production workers in the private nonfarm economy, adjusted for overtime in manufacturing and interindustry employment shifts, increased at an annual rate of 7.7 percent in October and 6.8 percent in November. These increases were well below the average rate of 10.2 percent per month in the third quarter, and the 12.5 percent second-quarter rate which included catchup effects that resulted from the removal of wage controls.

The decline in private payrolls in November was in the commodity-producing industries. Payrolls fell 25.0 percent in manufacturing and 30.6

NOTE.—Quarterly changes are averages of the monthly changes within the quarter.

percent in other-commodity producing industries. The latter drop was mainly due to the strike in the coal industry. Government payrolls increased substantially in October and November, because of the pay raises for military and Federal civilian employees, most of which became effective in October.

Farm proprietors' income declined in October and November due to rising costs and a smaller volume of marketings.

The growth of transfer payments slackened in October and November. The slowdown centered in social security benefits, which had increased substantially in the second and third quarters as the result of legislated increases in rates. Unemployment insurance benefits included in personal income rose sharply in October and November. Supplemental unemployment benefits, which are provided by privately administered plans and excluded from personal income, represented only small additions to the payments that are included. Transfer payments will be boosted in December by a major increase in veterans benefits that is retroactive to September.

The weakness in personal income, combined with rapid increases in consumer prices, resulted in a further decline in real disposable income. Real income declined in each of the first three quarters of 1974 and was 3.2 percent below the peak in the fourth quarter of 1973.

Spending

Confronted by tapering incomes and increases in the cost of living and unemployment, consumers have cut back

sharply on their spending. There was a precipitous cut in spending for automobiles. Sales of new cars, including imports, plunged to a seasonally adjusted annual rate of 7.8 million units in October and 6.8 million in November. These declines followed a spurt to an annual rate of 10.3 million units in the third quarter, when the higher prices announced for the 1975 models led buyers to step-up their purchases of 1974 models.

Current-dollar retail sales of other durables were unchanged or lower in October and November and down sharply in real terms. Spending for non-durables rose in October and declined in November, and, for the 2 months taken together, showed a small increase. The rise was in the food group and reflected higher prices. Spending for other nondurables declined in both October and November, reflecting a contraction in the general merchandise and apparel groups.

In efforts to bolster consumer spending, retailers have sponsored major preholiday price-cutting promotion programs that gave some transitory strength to retail sales in December. It seems likely that a meaningful recovery in consumer spending will have to await a significant slowdown in inflation and strengthening in labor demand, or both.

Residential Construction

New housing starts continued to decline in the fourth quarter, although not as rapidly as in the third, and residential investment, which reflects both past and current starts, declined sharply. Starts were at a seasonally

adjusted annual rate of 1.0 million units in October and November, down 13 percent from the third quarter, and more than 55 percent from the highs of early 1973 (chart 1).

Starts of single-family homes averaged 780,000 units in October and November, down 10 percent from the third quarter. New home sales declined sharply in the third quarter and further in October, the latest month for which data are available (table 2). The inventory of unsold homes was also lower, but represented an average 10.7 months of sales in the third quarter and 12.1 months in October. Historically, these are very high figures.

Shipments of mobile homes, an important source of low cost housing, have also declined sharply. Mobile home shipments totaled 248,000 units at a seasonally adjusted annual rate in October, 30 percent below the average for the third quarter and more than 60 percent below the peak in the first quarter of 1973.

Multiunit starts averaged 267,000 units in October and November, down 20 percent from the third quarter, and 75 percent below the peak rate in the first quarter of 1973. The number of units under construction remained large, even though it has declined over the past year. At the end of the third quarter there were 742,000 units under construction.

The contraction in multiunit housing is the most severe on record, and is far worse than that for single-family units. Several factors contributed to this result. There has been overbuilding of both rental and condominium units. Both construction loans and mortgage

loans have been costly and difficult to obtain. Materials prices and wage rates have soared, and consequently profitability has been eroded. Many large builders have defaulted on loans, seriously weakening the lending ability of important construction financiers, especially real estate investment trusts.

Most money market interest rates have declined about 3 percentage points since late August and early September. Initially, the decline reflected weakening loan demand. Subsequently, the

monetary authorities appear to have pursued a less restrictive policy. However, the evidence for this depends on the interpretation of recent actions taken by the Federal Reserve—the reduction in reserve requirements and in the discount rate, and also open market operations.

Short-term market instruments are alternatives to savings accounts for many investors, and the decline in money market rates has resulted in an improvement in the flow of funds to the thrift institutions. New savings, excluding dividends credited to depositors, exceeded withdrawals by \$300 million at federally insured savings and loan associations in October; according to preliminary data, flows continued positive in November. The recent improvement followed 3 consecutive months of net withdrawals that totaled \$2.9 billion. The prospects are that savings flows will strengthen in the months ahead and that the associations will accelerate their mortgage lending. However, not all of the increase in savings flows will be available for this purpose. The associations are heavily in debt to the Federal Home Loan banks and will use new funds in part to reduce this debt.

Aside from the prospects for greater availability of mortgage funds, the single-family market will also get some help from the recent extension of Federal mortgage assistance to include conventional mortgage financing for existing home sales. However, there are factors limiting the strength of the recovery: the sharp increases in housing prices and high mortgage rates will restrict demand; the excess inventory of unsold homes must be corrected; and most importantly, consumers' real incomes and their willingness to spend must improve.

The outlook for multiunit construction is worse. Completion of the large number of units under construction is likely to result in a further increase in vacancy rates. The rate, which has risen in each year since 1970, will have to stabilize, at the very least, before significant recovery in multiunit starts gets underway. In addition, as mentioned earlier, the multiunit

market is experiencing special financial difficulties. Also, the shifts among rental and condominium properties are contributing further uncertainties that are likely to be obstacles to a revival of the multiunit market.

Business Investment

The rise in business spending for plant and equipment slowed in the fourth quarter. According to the latest BEA survey, taken in November and reported on pages 16–20 of this issue of the SURVEY, business expects capital outlays to show a rise of only 1.4 percent at a seasonally adjusted annual rate, a sharp deceleration from the third-quarter rise of 9.6 percent. In real terms, outlays undoubtedly declined substantially in the fourth quarter.

Business has been reducing investment plans throughout the year. According to the February survey, plant and equipment spending in the second half of the year was expected to average 14.4 percent (seasonally adjusted annual rate) above the first half. In the May survey, the increase was scaled down to 10.4 percent, and in November, to 8.8 percent. Both manufacturing and nonmanufacturing industries reduced their investment plans; the largest reductions were in nonmanufacturing, mainly reflecting substantial downward revisions by electric utilities.

The weakness in capital spending will extend into 1975. Many industries are planning cutbacks, and only a few are planning substantial expansion. The latter are either energy-related (petroleum and gas) or have until recently been operating at capacity and would quickly experience capacity pressures once a recovery gets underway (iron and steel and nonferrous metals).

For definitional and methodological reasons, the plant and equipment series moves somewhat differently from the nonresidential fixed investment component of the GNP. On the basis of detail underlying the latter, the main reason for the deceleration of investment outlays in the fourth quarter was a large reduction in outlays on automo-

CHART 1

Residential Construction and Mobile Homes

• Average of October and November

Data: Census

biles and trucks, which had been very strong in the third quarter. Business outlays on other types of producers' durable equipment and on construction continued weak.

As regards inventory investment, a major factor was the large involuntary accumulation of automobile inventories. The drop in automobile sales was sudden and sharp, and inventories increased by more than 25 percent from the end of September to the end of November, when they were equal to about four months of sales. It is likely that sales remained depressed and that in December, in spite of widespread plant closings, production exceeded sales and inventories rose further.

Labor Markets

The demand for labor weakened appreciably from the third to the fourth quarter. Employment, as measured by both the household and the nonfarm payroll series, showed little change in October and declined sharply in November; unemployment, which had increased abruptly in September, rose sharply in both months.

The number of employees on nonfarm payrolls declined about 440,000 (seasonally adjusted) in November. Employment in service-producing industries, which had been expanding, fell 35,000 in November (table 3). The drop was due to a contraction in retail trade; moderate expansion continued in State and local government and in

the miscellaneous services group. Employment in goods-producing industries, which had been declining all year, plunged more than 400,000, as layoffs in manufacturing intensified and spread to nearly every major component group. The largest declines were in electrical machinery and autos, where weak sales resulted in sizable production cuts. Further closings of auto plants occurred in late November and December, and more are scheduled for January; the auto industry will continue to be a major source of weakness for some time. Among nondurables, declines intensified in both October and November. The largest cutbacks were in textiles and apparel, where employment has declined almost without interruption since late last year.

The weakening demand for labor in manufacturing was also evident in hours of work and labor turnover. The workweek declined in both October and November, primarily as a result of reduced overtime. The size of the decline suggested shortening of the basic workweek in some industries, such as lumber, furniture, textiles, and apparel. (Data separating overtime from regular hours are not available for individual industries.) The latest figures on labor turnover (those for October) showed layoffs rising sharply and the rate of new hires falling to its lowest level in over 2 years.

Employment in construction declined somewhat faster than earlier in the

year, reflecting both the continued drop in homebuilding and recent weakening in commercial and industrial construction. Mining employment fell a little in November, but because most miners were on payrolls the first day of the survey week, the coal strike had little effect on the figures. However, secondary cutbacks in coal-dependent industries will be evident in the figures for December, particularly in the steel industry, where layoffs were announced in late November.

The labor force increased in October and decreased in November; unemployment rose in both months. The unemployment rate moved gradually higher from late 1973 to August of this year and then rose 0.4 of a percentage point to 5.8 percent in September (chart 2). Some of this rise may actually have taken place in earlier months, and may have been masked by technical problems associated with seasonally adjusting the labor force and employment data for the impact of school closings in June and openings in September. Sharp increases in unemployment have continued and the overall unemployment rate reached 6.5 percent in November.

The unemployment rate for household heads is an important indicator of the seriousness of a rise in unemployment. Increasing unemployment for this group nearly always reflects job losses, rather than new entries or re-entries into the labor force, which frequently affect the measures of unem-

ployment for other demographic groups. The unemployment rate for household heads began increasing sharply in September and reached 3.9 percent in November.

The unemployment rate for adult men began to rise steeply in October and reached 4.6 percent in November, mainly reflecting unemployment among blue-collar workers, particularly in durables manufacturing and construction. The unemployment rate for adult women was steady in October after a jump in September, but rose sharply again in November; the November rise reflected heavy layoffs in textiles and apparel.

At 17.3 percent, the November unemployment rate for teenagers was 3 percentage points higher than at the end of last year. It showed little change in the last 2 months because labor force participation declined. In a period of rising unemployment, teenagers are typically among the first to be laid off, and if they do not quickly find alternative employment, they are more likely than older workers to drop out of the labor force.

Recent Price Developments

Wholesale and retail prices increased less rapidly thus far in the fourth quarter than in the third. The slower rate of increase was due to a slackening in price rises for commodities other than food; food prices continued to rise sharply.

Wholesale industrial commodity prices rose about 1 percent (seasonally

adjusted) in October and November, as compared with 2.1 percent per month in the third quarter (table 4). The slowdown reflected a decline in prices of industrial materials resulting from broadly based weakness in industrial activity, both here and abroad. Prices of crude industrial materials declined in both October and November, following an average increase of 2.2 percent per month in the third quarter. The monthly rise in intermediate goods prices slowed to about 1 percent, from an average of 2.4 percent in the third quarter. Price rises for finished goods continued strong in October, but slowed markedly in November.

Prices of crude materials are generally more sensitive to changes in demand and supply than are commodities representing later stages of fabrication. This is so, because these prices are set by worldwide competitive bidding and promptly reflect both current and prospective changes in demand and supply. Changes in the prices of crude materials take time to work through to the later stages of production.

Among major commodity groups, the slowdown was largely attributable to substantial price declines in lumber, textiles and apparel, and leather, and a leveling off of metals and metal products prices. Price increases continued rapid for chemicals, machinery, household durables, and transportation equipment. The rise in chemicals was largely due to continuing strong demand and limited supplies, particularly of agri-

cultural chemicals and fertilizers. In other groups, where demand weakened, increases reflected the need to cover rapidly rising costs. One of the biggest increases occurred in transportation equipment and was largely due to a 4.7 percent rise (seasonally adjusted) in new car prices in October.

Prices of farm products and processed foods and feeds increased sharply in October and slowed in November; on balance, the rise was about the same as in the third quarter.

Consumer prices

The increase in consumer prices also slowed a little in October; the latest month for which data are available. Prices of commodities other than food rose only 0.6 percent, or half the average monthly rise in the third quarter (table 5). Despite extremely weak auto sales, new car prices were raised 1.1 percent in October. The increase was less than in the second and third quarters, when prices on 1974 models were raised on several occasions. However, the full impact of the increase for 1975 models has not yet been reflected in the Consumer Price Index, because a large proportion of new cars sold in October were 1974 models. In the Wholesale Price Index, all of the increase was reflected because all factory sales were 1975 models.

The price increase for used cars also slowed but, at 2.4 percent, it was much larger than increases for other major consumer durables. Among nondurable goods, gasoline and oil prices fell 2.3 percent in October, and apparel prices were about unchanged; in the third quarter, gasoline and oil prices fell only a little and the rise in apparel prices averaged 1 percent.

The rise in retail food prices accelerated somewhat in October, reflecting the stronger increases in wholesale farm product and food prices. The acceleration occurred mainly in cereals and bakery products, sugar and sweets, and fresh fruits and vegetables. Prices of meats, poultry, and fish, on the other hand, declined 1 percent.

Revised Corporate Profits and GNP

The national income measure of profits—profits from current production—showed little change from the second to the third quarter. Compared with the preliminary figure issued last month, the total was revised down almost \$1 billion. The revision was largely in profits originating in the rest of the world and in manufacturing. The rest-of-the-world estimate was revised up \$1 billion incorporating information from BEA's survey of foreign direct in-

vestment. Manufacturing profits were revised down about \$2 billion as a result of more complete information from the quarterly survey by the Federal Trade Commission.

The rest-of-the-world revision affects the gross national product estimate since income from abroad is a component of that measure. Third quarter GNP in current dollars was revised up \$0.9 billion. In real terms, the decline in GNP from the second quarter was revised slightly, from -2.1 percent to -1.9 percent at an annual rate. The estimate of gross domestic product (GDP) was not affected by the revision in rest-of-the-world income.

With the revised figures, the statistical discrepancy was \$3.0 billion in the third quarter. The statistical discrepancy is the difference between GNP as measured from the product side (the sum of final purchases and inventory change) and the alternative measure from the income side (national income, indirect business taxes, capital consumption allowances, etc.). The statistical discrepancy has been -\$6.3 billion in the first quarter. The swing from the first to the third quarter amounts to over \$9 billion indicating that GNP as measured from the income side shows more weakness over this period than does the conventional product side measure.

Before-tax book profits increased \$18 billion in the third quarter. With profits from current production showing little change, the third-quarter increase in before-tax book profits was almost entirely in inventory profits. In the national income and product accounts, inventory profits are measured by the inventory valuation adjustment (with its sign reversed). They are defined as the gains or losses due to the difference between the replacement cost of goods taken out of inventory and the cost at which these goods are charged to production.

The November SURVEY discussed problems being encountered in measuring GNP, GDP and corporate profits (including the tax liability) which arise from the high rate of inflation and from the shift by corporations

from the FIFO to the LIFO method of inventory accounting. As a result of these problems the third-quarter estimates are subject to more than the usual margin of error.

The estimated reduction in inventory profits resulting from the shifts from FIFO to LIFO as described in the November SURVEY was revised from \$6.6 billion to \$7.1 billion for the third quarter. The estimates for the first and second quarters were not revised.

Industry profits

Table 6 updates the industry estimates of profits on a national income basis which were first shown in the September SURVEY. These measures contain a substantial degree of error and they are subject to considerable revision.

The third-quarter figures show profits originating in the rest of the world up almost \$1 billion from the previous quarter. This increase primarily reflects higher earnings of foreign branches of U.S. petroleum companies. Profits of financial institutions continued at the second-quarter rate.

Nonfinancial corporations' profits were down somewhat. Manufacturers' earnings were up almost \$2 billion. Petroleum refining earnings increased sharply. Other nondurable manufacturing industries showed little change. Earnings of the motor vehicle industry remained at a depressed level. Most other durable manufacturing industries declined, a major exception being primary metals. Trade profits were down sharply as a result of declines in retail profit margins.

- In November: The unemployment rate rose to 6½ percent
- Nonfarm payroll jobs declined 443,000
- Wholesale prices increased 1 percent

TOTAL PRODUCTION

THE LABOR MARKET

PRICES

* Seasonally Adjusted ** Seasonally Adjusted at Annual Rates

- In November: Personal income declined \$2¼ billion
- Retail sales fell mainly as the result of the drop in auto sales
- Housing starts and permits continued to decline

HISTORICAL STATISTICS

THE national income and product data for 1929-63 are in *The National Income and Product Accounts of the United States, 1929-1965, Statistical Tables* (available at \$1 from Commerce Department District Office or the Superintendent of Documents; see addresses inside front cover). Each July SURVEY contains preliminary data for the latest 2 years and fully revised data for the preceding 2. The July 1974 issue has data for 1970-73. Prior July issues have fully revised data as follows: 1969-70, July 1973; 1968-69, July 1972; 1967-68, July 1971; 1966-67, July 1970; 1965-66, July 1969; 1964-65, July 1968.

1. Excludes gross product originating in the rest of the world.

2. This is equal to the deflator for gross product of nonfinancial corporations, with the decimal point shifted two places to the left.

3. Personal saving as a percentage of disposable personal income.

4. On February 18, 1974, the U.S. Government granted to India \$2,015 million (quarterly rate) in rupees under provisions of the Agricultural Trade Development and Adjustment Act. Tentatively, this transaction is being treated as capital grants paid to foreigners in the national income and product accounts but as current unilateral transfers in the balance of payments accounts. Accordingly, this transaction is excluded from Federal Government transfers to foreigners and related totals shown in tables 12, 13, and 15, and is included in the first quarter of 1974 as —\$8.1 billion (annual rate) in capital grants received by the U.S. shown in tables 12 and 15.

Capital Expenditures Expected To Rise at Slower Rate in the First Half of 1975

BUSINESS expects spending for new plant and equipment to rise 3.2 percent in the first quarter of 1975 and 1.2 percent in the second, according to the BEA survey conducted in late October and November. Capital outlays in the first half of 1975 are projected at a

seasonally adjusted annual rate of \$118.8 billion,¹ 8½ percent above the first half of 1974 and 4 percent above the second half.

Capital expenditures reported in the August survey showed a 3.8 percent increase from the first to the second quarter. The latest survey indicates that spending increased 2.3 percent from the second quarter to the third, and—if expectations are realized—will rise only one-half of 1 percent from the third to the fourth. These figures are not adjusted for price changes. Capital goods prices, as measured by the implicit price deflator for fixed nonresidential investment in the national income and product accounts, rose about 3.6 percent from the second to the third quarter—more than the increase in investment. If business expects this trend to continue and has assumed comparable price increases in its latest spending projections, real investment will have declined in the second half of 1974 and will decline further in the first half of 1975.

While the November survey results indicate weakness in business expectations, most of the recent adverse economic developments—such as the continued drop in auto sales since October and the sharp increase in the November unemployment rate to 6.5

CHART 7
Plant and Equipment Expenditures

1. The expectations figures have been adjusted for systematic biases (table 6, footnote 2). For example, the projected 1974 expenditures before adjustment were \$111.81 billion for all industries, \$46.10 billion for manufacturing, and \$65.70 billion for nonmanufacturing. The adjustments are applied separately to each major industry; the net effects are to lower the manufacturing total by \$0.31 billion and to raise the nonmanufacturing total by \$0.42 billion.

percent—probably have not been taken into account or anticipated in the latest reports of investment plans. Past experience suggests that the review and modification of investment plans by business in response to changing economic and financial conditions may actually require several months.

MANUFACTURING PROGRAMS

In the third quarter, manufacturers' spending rose 3.8 percent to a seasonally adjusted annual rate of \$47 billion following a 5.8 percent rise in the second. Plans for the fourth quarter are for a one-half of 1 percent rise; if these

plans materialize, outlays in the second half of 1974 will be 7 percent above the first half—a substantially smaller half-year gain than those recorded over the past 2 years. Sizable spending advances in the second half of this year are expected by primary metals, nonelectrical machinery, stone-clay-glass, paper, and chemicals, but these are partially offset by declines for motor vehicles, textiles, and rubber.

Manufacturers expect a 9½ percent increase in outlays from the second half of 1974 to the first half of 1975. Large percentage increases are expected by the petroleum, chemical, paper, and primary metal industries. (These basic materials industries also programed

large advances in spending for the full year 1974.) Sizable declines in the first half of 1975 spending are projected by the rubber and electrical machinery industries.

Table 3 shows a measure of the pervasiveness of the changes in manufacturers' outlays, calculated by matching outlays reported by each company in the survey sample for a given quarter with those reported by the company in the year-earlier quarter. In the third quarter of 1974, 54 percent of the companies reported over-the-year increases in spending, compared with 55 percent in the preceding quarter and 57 percent in the third quarter of last year.

New investment projects started by manufacturers in the third quarter of 1974 totaled \$13.6 billion, after seasonal adjustment, compared with \$14.2 billion in the preceding quarter and \$12.1 billion a year earlier. Starts by durable goods producers declined 2 percent in the third quarter, principally reflecting decreases for the primary metal and transportation equipment industries. Producers of nondurable goods reported a 7 percent decline in the third quarter starts with the food-beverage and petroleum industries accounting for most of the decline.

The value of new projects started in the third quarter again exceeded spend-

ing, resulting in an increase in carry-over—the amounts still to be spent on projects already underway. Seasonally adjusted carryover at the end of September totaled \$37.7 billion, up \$1.8 billion from the end of the second quarter.

Manufacturers' evaluations of the adequacy of their plant and equipment facilities relative to current and prospective sales indicated little change from 3 months earlier in the need for more facilities. Companies owning 51 percent of fixed assets in manufacturing reported that they needed more facilities compared with 52 percent as of June. Increases in the proportion of firms

needing more facilities were indicated by the primary metal industries, but an offsetting decrease was reported by the chemical industry.

NONMANUFACTURING PROGRAMS

Capital spending by nonmanufacturing industries rose 1.3 percent in the third quarter. Projected spending in the fourth quarter is a little higher, moderate increases are projected by all industries in the group except air transportation and mining. A one-half of 1 percent increase is expected in the first quarter of 1975 and a decline of about 1 percent in the second.

For the first half of 1975, expenditures are expected to be about the same as in the second half of 1974. Sizable increases are expected by airlines and gas utility firms; smaller increases are expected by mining, railroad, communication, and electric utility companies and declines by industries in the commercial group.

Railroads expect spending to rise in the second half of 1974 to a rate of about \$2.7 billion, exceeding the previous high of \$2.6 billion in the second quarter of 1966. Further increases are projected for the first half of 1975. New orders for freight cars advances sharply in 1973 and have been at high levels throughout most of this year. The projected ad-

vances in investment are supported by sharply higher earnings in the past several quarters.

The value of new projects started in the third quarter of 1974 by public utilities totaled \$14.3 billion, slightly below the record \$14.6 billion in the second quarter but 27 percent higher than in the third quarter of 1973. Carryover of projects totaled \$87.8 billion at the end of September, up from \$78.6 billion at the end of June. The continued growth in utility carryover—about \$28 billion in the past year—reflects the continued expansion of electric generating facilities and, within the past several months, a substantial increase in natural gas project starts.

1. Excludes agricultural business; real estate operators; medical, legal, educational, and cultural services; and nonprofit organizations.

2. Estimates are based on expected capital expenditures reported by business in late October and November 1974. The estimates for the fourth quarter of 1974 and first quarter of 1975 have been corrected for systematic biases. The adjustment procedures are described in the February 1970 issue of the SURVEY OF CURRENT BUSINESS. Before such adjustments, 1974 expenditures were expected to be \$111.81 billion for all industries, \$46.10 billion for manufacturing and \$65.70 billion for nonmanufacturing.

3. Includes data not shown separately.

4. Includes guided missiles and space vehicles.

5. Includes fabricated metal, lumber, furniture, instrument, ordnance and miscellaneous except guided missiles and space vehicles.

6. Includes apparel, tobacco, leather and printing-publishing.

7. Includes trade, service, construction, finance and insurance.

NOTE.—Details may not add to totals because of rounding.

Manufacturing Capacity Utilization in September 1974 Remains Unchanged From June

PRODUCTIVE capacity in manufacturing was utilized at an overall rate of 84 percent (seasonally adjusted) in September 1974, unchanged from rates reported in earlier surveys for March and June, but lower than the rates reported in 1973. According to the survey conducted by BEA in November ² there were sizable changes

in some of the component industries; the largest changes occurred in motor vehicles and textiles.

2. These surveys are part of a new quarterly program to measure the utilization of manufacturing capacity. Utilization rates for industry and asset-size groups are weighted averages of individual company rates reported in the survey. See "The Utilization of Manufacturing Capacity, 1965-73," SURVEY OF CURRENT BUSINESS, July 1974, pp. 47-57.

Motor vehicle companies reported a 5 point increase, to 92 percent, in capacity utilization, reflecting their optimistic expectations for 1975 model auto sales. Industry sources indicate that the operating rate would have been even higher except for work stoppages affecting some segments of the industry.

CHART 10

Manufacturers' Capacity Utilization Rates by Major Industry Groups

U.S. Department of Commerce, Bureau of Economic Analysis

74-12-10

Between June and September, textile companies reduced their operating rate 7 points to 80 percent. This is the lowest rate reported since the survey was initiated in December 1965, and the sharpest decline over a 3 month period since quarterly reports were begun in 1968. Industry sources attribute the drop to declining sales of household furnishings and apparel products.

Smaller changes in utilization rates included decreases for electrical machinery, petroleum, food and beverage, and rubber; an increase was reported for aircraft.

Operating rates for large firms (assets of \$100.0 million and over) as a group were changed little between June and September. However, medium- and

small-size firms reduced utilization rates by 2 percent. The declines occurred in both durable and nondurable goods, primarily textile, rubber, stone-clay-glass, and several other industries not shown separately.

Primary-processed goods industries as a group operated at 86 percent of capacity in September compared with 83 percent for advanced-processed goods. Neither group showed a sizable change from June. A 1 point drop for the primary-processed goods industries between June and September reflected declines for petroleum, rubber, and textile. The September gap in the capacity utilization rate between the primary-processed goods industries and the advanced-processed goods industries was the smallest since March 1973.

U.S. Balance of Payments Developments: Third Quarter and First Nine Months of 1974

INTERNATIONAL petroleum developments, the rapid pace of world inflation, and the effects on international financial markets of losses incurred by certain banks were major influences on U.S. balance of payments transactions in the third quarter. Slowing economic activity here and abroad also affected U.S. international transactions, particularly merchandise trade.

The largest change in the third quarter was a \$5.6 billion decrease to \$1.9 billion in U.S. bank-reported capital outflows. Other major changes included a \$2.2 billion shift to net capital outflows through direct investment transactions, a \$0.9 billion increase in the merchandise trade deficit, and a \$2.5 billion decline in net inflows

of foreign private liquid funds and all foreign official funds.

A reappraisal of lending policies by U.S. banks, following several losses, and tightness in U.S. credit markets, contributed to the decline in loans to foreigners. Also, there was some easing in foreign demand for U.S. bank loans as a result of substantial loans received by some petroleum-importing countries from foreign countries and international agencies. A large payment to a foreign petroleum affiliate of a U.S. company more than accounted for a shift to a small net outflow in foreign direct investment in the United States. Two-fifths of the value rise in the trade deficit was due to increased petroleum

imports, and the remainder was attributable to a slower rise in exports than imports. The decline in net inflows of liquid funds primarily resulted from reductions in funds held here by foreign official agencies of some petroleum-importing countries.

Petroleum-related transactions

International petroleum developments had a dominant influence on U.S. balance of payments transactions in the first 9 months. The direct effects of major identifiable petroleum-related transactions after the sharp increase in petroleum prices on January 1, 1974, are summarized in the following table:

Table A.—Summary of U.S. International Transactions

1. Organization of Petroleum Exporting Countries

NOTE.—Details may not add to totals because of rounding.

The higher costs of petroleum imports shifted the U.S. trade balance into deficit in the first quarter, and accounted for most of the increases in the deficit in each of the following two quarters. Net direct investment income also rose early in the year, reflecting higher receipts from foreign petroleum operations of U.S. companies, but subsequently declined as petroleum-producing countries' shares of the income increased.

U.S. net capital outflows for direct investment abroad were reduced in the first quarter because of large petroleum-related inflows. Those inflows were reversed in the following quarters. The rise in foreign direct investment in the United States in the first two quarters mainly reflected funds assumed owed to a petroleum-producing country that had made a participation payment to a major U.S.-incorporated petroleum company in 1973; a substantial payment on the debt was made in the third quarter.

Foreign petroleum-importing countries financed much of the extraordinary rise in the cost of their

petroleum imports by large borrowings from U.S. banks, especially in the first half of the year. Some of these countries' payments to petroleum-exporting countries were, in turn, invested directly in the United States by the members of the Organization of Petroleum Exporting Countries (OPEC). Some were invested by OPEC members in Euro-market banks, and those banks then channeled the funds to the United States. These funds were attracted by high U.S. interest rates and the broad U.S. market for liquid financial instruments favored by the petroleum-exporting countries.

During the spring months, as increasing amounts of OPEC members' funds were invested here, directly and indirectly, the dollar strengthened against other major currencies. That improvement continued through the summer months, and by the end of September the trade-weighted average depreciation of the dollar against the currencies of other industrial countries, measured against May 1970 exchange rates, was about 13.8 percent (chart 11).

Major Transactions

Merchandise trade

The merchandise trade deficit was \$2.6 billion in the third quarter, compared with \$1.6 billion in the second. Merchandise imports increased \$1.5 billion to \$27.2 billion, and exports \$0.5 billion to \$24.6 billion. (These figures are adjusted to a balance of payments basis, which excludes military trade of U.S. defense agencies and reflects various other adjustments to Census Bureau trade figures for timing, coverage, and valuation.) Both export and import prices, as measured by the Census Bureau's unit value index, rose nearly 7 percent. In volume terms, exports dropped 4 percent and imports 1 percent (chart 12). Almost half the drop in export volume was attributable to lower agricultural shipments, partly related to reduced U.S. supplies. The volume decline in other exports was due largely to the slowing of foreign economic activity.

For the first 9 months, the trade deficit was \$4.3 billion, compared with

CHART 11

Change in Selected Exchange Rates From May 29, 1970 Base Rates

3. Spot rates at end of quarter.

\$0.7 billion in the same period of 1973. Excluding trade in petroleum and products, the balance was in surplus by \$14.0 billion, compared with a \$4.2 billion surplus a year earlier. Merchandise imports increased 48 percent, to \$75.3 billion, and exports rose 42 percent, to \$71.0 billion. In volume terms, imports declined less than 1 percent, and exports increased 11 percent.

More than half the \$24.5 billion rise in imports from the first 9 months of 1973 was due to higher prices of petroleum and products. Imports of petroleum (including imports into the Virgin Islands) more than tripled in value to \$18.8 billion, but volume was about 3 percent less. Most of the price rise occurred during the first two quarters of 1974; in the third quarter it was

less than 1 percent. The volume of petroleum imports dropped in the first quarter during the Arab embargo, and subsequent increases left average quarterly levels below those of the second half of 1973.

Other imports rose \$11.0 billion to \$56.4 billion in the first 9 months of 1974. The gain was more than accounted for by a 26 percent increase in prices. Nearly half the rise in value was in imports of industrial supplies and materials other than petroleum (table B1).

Higher prices were also a major factor in the rise of exports in the first 9 months of 1974. The \$4.2 billion increase to \$16.7 billion in agricultural exports was more than accounted for by higher prices, which rose sharply through the first quarter, and then

leveled off. In volume terms, agricultural exports were down 7 percent. About two-thirds of the \$16.8 billion gain in the value of nonagricultural exports was due to higher prices. Non-agricultural industrial supplies rose \$7.6 billion in value, and machinery, \$4.9 billion.

Expanded petroleum imports, primarily from countries in Latin America, Africa, and Asia, and increased exports to most major areas resulted in major shifts in area trade balances in the first 9 months of 1974 (table B2). The deficit with developing countries in Latin America, Asia, and Africa increased \$6.6 billion; the deficit with members of OPEC increased more than \$7.0 billion; and the balance with other countries in the developing areas shifted into a small surplus. The deficit with Canada, also an important supplier of petroleum imports, decreased, due to a more rapid increase in exports than imports. Among other industrial areas, the deficit with Japan was virtually unchanged, and surpluses with Western Europe and with Australia, New Zealand, and South Africa increased. The surplus with Eastern Europe declined \$0.8 billion, as exports declined and imports rose.

Investment income

Net investment income increased \$0.4 billion to \$2.2 billion in the third quarter. Among receipts, there was a \$0.2 billion rise in income from U.S. direct investment abroad, entirely from petroleum affiliates, and a \$0.4 billion rise in income from other U.S. assets abroad, largely due to higher interest rates. Income payments to foreign direct investors were about the same as in the second quarter, and other income payments were up \$0.2 billion.

For the first 9 months of the year, net investment income was \$7.1 billion, compared with \$3.9 billion in the same period of 1973. Most of the rise was due to increased income receipts from direct investment abroad in the petroleum industry, which rose \$6.4 billion to \$9.5 billion. Partly offsetting was a rise of \$4.1 billion in income payments due to a petroleum-exporting country on its participation in a U.S. petroleum

CHART 12

U.S. Merchandise Trade in Current and Constant (1967) Dollars^{1/}

1. Deflated by unit value indexes (1967=100) prepared by the Foreign Trade Division of the Bureau of the Census.

2. Excluding both exports and imports of petroleum and products.

company. Receipts from other direct investment abroad rose \$0.7 billion, and payments for other foreign direct investment in the United States remained unchanged. Income receipts on U.S. banking and other assets abroad rose \$2.3 billion. Most of that rise was related to increased interest rates and the large buildup in U.S. bank claims on foreigners. Income payments on U.S. liabilities to foreigners, other than direct investment, rose \$2.0 billion; that rise was also associated with higher interest rates, together with increased liquid liabilities to foreigners.

Government grants and capital transactions

U.S. Government grants and capital transactions in the third quarter resulted in a net outflow of \$0.8 billion, down \$0.1 billion from the second (table A, lines 6 and 8). There were no major special transactions similar to those with India in the first quarter and with Israel and Vietnam in the second, which helped boost U.S. grants to \$4.8 billion in the first 9 months from \$1.5 billion in the same period a year ago. Each of those special

grants was fully offset by U.S. Government capital inflows. (See SURVEY, June 1974, p. 27, and September 1974, p. 38.) Total net outflow through U.S. Government grants and capital transactions amounted to \$2.8 billion, compared with \$2.2 billion in the same period of 1973.

U.S. direct investment abroad

Capital outflows for direct investment abroad were \$2.0 billion in the third quarter, compared with \$1.5 billion in the second. For the first 9 months, the outflow totaled \$4.1

32	Balance on merchandise trade, adjusted to balance of payments basis, excluding "military" (17).....	471	-954	-363	578	1,210	-74	-1,631	-2,557	-926	-739	-4,262	-3,523

* Preliminary.

* "Adjusted" items reflect balance of payments corrections to Census trade figures for coverage, valuation, and timing: Line 4 is adjusted for changes in stocks of U.S. grain stored in Canada; lines 6 and 22 include exports and imports of nonmonetary gold, electric power, and petroleum trade of the Virgin Islands, but petroleum imports by U.S. military agencies are excluded from line 22 (and line 23); line 22 also excludes imports—and line 17 excludes reexports—of natural gas in transit through the United States from western to eastern Canada; lines 24 and 25 include imports of vessels not recorded in Census statistics; lines 27 and 28 reflect adjustments for the overvaluation in Census import data of autos and trucks from

Canada. (NOTE.—Quarterly figures for all items are adjusted to correct for discrepancy between sum of four quarters, seasonally adjusted, and the unadjusted recorded annual totals.)

1. The statistical identification of automotive products exports to Canada (line 14) is not as complete and comprehensive as the identification of automotive products imports from Canada, which are more definitively classified for duty-free status under the U.S.-Canada Automotive Products Trade Act. The less comprehensive identification in U.S. trade statistics of automotive parts exports, combined with some degree of unreported export shipments; results in an undercounting of automotive exports to Canada (line 14) which—estimated from examination of Canada's import statistics—amounted to about \$875 million in 1973.

billion, up \$0.6 billion from the same period of 1973.

Detailed data for U.S. direct investment abroad are not available on a seasonally adjusted basis. Transactions between U.S. companies and their foreign petroleum affiliates indicate about a \$1.0 billion rise in outflows in the third quarter; outflows to other foreign affiliates declined \$0.7 billion.

Net capital outflows from U.S. companies to their affiliates in Western Europe, Japan, and Latin America increased substantially in the first 9 months of 1974; these were partly offset by net inflows from affiliates in the developing countries of Asia and Africa, mainly attributable to a buildup

early in the year of liabilities owed by U.S. companies to their petroleum-producing affiliates for higher-priced petroleum. Transactions between U.S. companies and all their foreign petroleum affiliates resulted in a small decline in net outflows, compared with the same period a year ago. Net capital outflows to nonpetroleum foreign affiliates rose about \$1.0 billion. Part of the rise may have been due to the need for increased capital to finance higher-priced foreign plant and equipment expenditures.

Foreign direct investment in U.S.

Transactions related to foreign direct investment in the United States re-

sulted in virtually no net capital flow in the third quarter, compared with a net inflow of \$1.7 billion in the second. For the first 9 months, the net inflow was \$2.9 billion, compared with \$1.8 billion in the same period of 1973. Petroleum-related transactions accounted for most of the change. In both the first and second quarters, there was a sizable buildup in debts owed to a foreign affiliate by a U.S.-incorporated petroleum company; in the third quarter this was reduced after a substantial payment was made to the foreign affiliate.

Security transactions

Net U.S. purchases of foreign securities were \$0.3 billion in the third

^a Preliminary.

1. Annual data shown in this table match corresponding country and area data in table 9,

lines 2 and 16; seasonally adjusted quarterly data shown in this table are computed from corresponding unadjusted quarterly data presented in table 9, lines 2 and 16.

quarter, about the same as in the second. For the first 9 months of 1974, they totaled \$1.3 billion, compared with \$0.3 billion in the same period of 1973. Most of the rise resulted from increased U.S. purchases of newly issued Canadian bonds. Although the interest equalization tax on U.S. investments in securities of industrialized countries, which was not applicable to new Canadian issues, was removed in January, only a few small European bond issues were placed in the U.S. market beginning in the second quarter.

Net foreign purchases of U.S. securities other than Treasury issues were \$0.2 billion in the third quarter, the lowest since the fourth quarter of 1967. Net foreign purchases of U.S. stocks remained low, as high short-term interest rates and declining economic activity continued to dampen buying. New bonds issued abroad by U.S. corporations were small for the third consecutive quarter, reflecting both the high cost of borrowing and the removal of U.S. foreign investment controls. Foreign purchases of other U.S. bonds, mainly U.S. Government agency obligations, declined. The \$1.3 billion net inflow from foreign purchases of U.S. securities in the first 9 months was \$2.1 billion less than in the same period of 1973. Purchases of U.S. stocks and of newly issued bonds abroad were reduced \$1.8 billion and \$0.7 billion; partly offsetting was a \$0.4 billion increase in purchases of other U.S. bonds.

Bank-reported capital outflows

Bank-reported capital outflows declined to \$1.9 billion in the third quarter from \$7.5 billion in the second (table 3, lines 41-43). Short-term outflows slowed considerably; those to Japan dropped by half to \$1.5 billion, and those to Western Europe shifted by \$2.4 billion to net inflows of \$1.2 billion. (Area data are not seasonally adjusted.)

The \$14.5 billion bank-reported capital outflow for the first 9 months was \$10.7 billion more than in the same period of 1973. Most of the increase was in short-term claims, especially loans and acceptance credits, and the bulk of the increase went to Japan, Latin America, and other developing countries. Outflows to Japan—mostly acceptance credits—were \$6.0 billion, compared with \$1.6 billion a year earlier. Outflows to Latin America rose \$3.3 billion to \$4.0 billion; nearly half of that increase was to the Bahamas and probably reflected outflows to branches of U.S. banks there for relending to other countries. Long-term outflows were \$1.0 billion. Most of that outflow occurred in the second quarter and was widespread by area.

Liquid liabilities

The sum of liquid liabilities to private foreigners and of all liabilities to foreign official agencies rose \$5.2 billion in the third quarter, compared with a rise of \$7.7 billion in the second (table 1, lines 38, 43-45). Identifiable increases in li-

abilities to members of the Organization of Petroleum Exporting Countries (OPEC) amounted to about \$4.5 billion in the third quarter, up nearly \$1.8 billion from the second. Most of these liabilities were to official agencies. The increase in liabilities to other countries was \$0.7 billion in the third quarter; a substantial reduction in liabilities to official foreigners was more than offset by a rise in liabilities to private foreigners.

The rise in liabilities to all areas was \$16.8 billion in the first 9 months, more than twice the increase in the same period of 1973. Most of the acceleration in the increase was due to a rise in liabilities to OPEC members. The increase in liabilities to other countries rose \$0.6 billion to \$8.4 billion. That relatively small change resulted from a large decrease in liabilities to official foreigners that nearly offset an accelerated rise in liabilities to private foreigners.

Reserve transactions

U.S. official reserve assets rose \$1.0 billion in the third quarter. Most of the increase was in the unconditional drawing rights of the United States on the International Monetary Fund and resulted from dollar drawings by other countries. Similar, but smaller, increases occurred earlier in the year, and contributed to the \$1.6 billion rise in the value of U.S. official reserve assets in the first 9 months. In the same

* Revised. * Preliminary. † Portion of line.

1. Excludes claims and liabilities of U.S. banking and brokerage institutions.
2. Includes proceeds from new issues of stocks as well as bonds sold abroad by U.S. corporations. Excludes funds obtained abroad by U.S. corporations through bank loans and other credits and also excludes securities issued by subsidiaries incorporated abroad. However, securities issued by finance subsidiaries incorporated in the Netherlands Antilles are treated

as if they had been issued by U.S. corporations to the extent that the proceeds of such issues are transferred to U.S. parent companies.

3. Excludes brokerage transactions.

4. Corporate foreign borrowing and changes in "other corporate claims" may include funds to finance trade or other activities not entirely related to direct investment. The amounts cannot be disaggregated.

period of 1973, reserve assets declined \$0.2 billion, mainly because of a reduction in U.S. holdings of foreign convertible currencies.

The Balances

THE balance on goods and services was in deficit by \$0.3 billion in the third quarter, little changed from the second (chart 13). For the first 9 months, it was in surplus by \$2.4 billion, compared with a \$1.6 billion surplus for the same period of 1973. In addition to the increase in net investment income that almost offset the rise in the trade deficit, the net deficit on other goods and services declined \$1.1 billion, mainly due to increased receipts from military agency sales and lower net payments for travel and transportation.

The balance on current account was in deficit by \$1.6 billion in the third quarter, compared with a deficit of \$2.1 billion in the second. For the first 9 months the deficit was \$3.7 billion, up from the \$1.1 billion deficit in the same period of 1973. The previously mentioned extraordinary U.S. grants that were fully offset in the Government capital accounts, tended to distort this balance in the first and second quarters of 1974. Excluding those grants, the balance on current account was in deficit by \$0.1 billion in the first 9 months.

The balance on current account and long-term capital was in deficit by \$3.6 billion in the third quarter, compared with \$2.5 billion in the second. The \$4.2 billion deficit in the first 9 months

was \$4.0 billion more than in the same period of 1973. This balance is intended to serve as a rough indicator of long-term trends in the U.S. balance of payments by attempting to exclude volatile short-term capital transactions but is subject to limitations. For instance, all direct investment transactions are classified among the long-term capital accounts although many of the transactions are short-term and may be reversed within relatively short time periods, as were the large short-term flows this year between petroleum companies and their foreign affiliates.

The net liquidity balance was in deficit by \$4.5 billion in the third quarter, compared with a \$6.2 billion deficit in the second. The deficit for the first 9 months was \$11.7 billion, compared with \$6.7 billion in the same period a year ago. This balance was intended, under fixed exchange rates, to indicate potential pressures on the dollar resulting from changes in the U.S. liquidity position. Under a system of managed floating exchange rates, the net liquidity balance is subject to a number of deficiencies—as it was under fixed rates—related to difficulties in distinguishing liquid from nonliquid liabilities and claims, which has recently become more blurred.

The official reserve transactions balance was in deficit by \$0.3 billion in the third quarter, compared with a \$4.5 billion deficit in the second. For the first 9 months it was in deficit by \$3.8 billion, down from \$8.0 billion in the same period of 1973. The official balance was intended, under fixed exchange rates, to indicate net exchange market pressure on the dollar during the reporting period resulting from international transactions of the United States. Changes in the balance are measured by changes in U.S. liabilities to foreign official agencies, net of changes in U.S. reserve assets. Changes in liabilities to foreign official agencies under the current managed floating exchange rate system are no longer the result of obligatory exchange market intervention to support a particular fixed rate, although there is limited

CHART 13

Balances on Major U.S. International Transactions

*Excludes exports under military grants and U.S. military agency sales contracts and imports of U.S. military agencies.

* Revised. * Preliminary. * Less than \$500,000 (±). N.A. Not available. † See p. 22.

1. Adjusted to balance of payments basis; excludes exports under U.S. military agency sales contracts and imports of U.S. military agencies.

2. Fees and royalties from U.S. direct investments abroad or from foreign direct investments in the United States are excluded from investment income and included in "other services."

3. Conceptually, line 11 is equal to net exports of goods and services, and the sum of lines 15 and 31 is equal to "net foreign investment" in the national income and product accounts of the United States. Beginning with 1973-IV however, these components in the product accounts exclude the shipments and the financing of extraordinary military orders placed by Israel. The balance of payments accounts include these transactions as follows in billions of dollars (line references are to tables 2 and 3): 1973-IV, line 3, 0.6, line 35, -0.6; 1974-I, line 3, 0.1, line 35, -0.1; 1974-II, line 3, 0.1, line 35, 0.5, line 30, -0.6; 1974-III, line 3, 0.1, line 35, 0.1, line 30, -0.2.

4. Includes some short-term U.S. Government assets.

5. Includes changes in nonliquid liabilities reported by U.S. banks and in investments by foreign official agencies in debt securities of U.S. Government corporations and agencies, private corporations, and State and local governments.

6. Includes return import into the United States, at a depreciated value, of aircraft originally reported as transfers under U.S. military agency sales contracts under long-term lease in 1970-III.

7. Includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions" in June 1974 SURVEY, p. 27.

NOTE.—Details may not add to totals because of rounding.

^{*} Revised. [†] Preliminary. [‡] Less than \$500,000 (±).

1. Credits, +; Exports of goods and services; unilateral transfers to U.S.; capital inflows (increase in U.S. liabilities or decrease in U.S. assets); decrease in U.S. official reserve assets. Debits, -: Imports of goods and services; unilateral transfers to foreigners; capital outflows (decrease in U.S. liabilities or increase in U.S. assets); increase in U.S. official reserve assets.

2. Excludes transfers of goods and services under U.S. military grant programs.

3. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, and imports of goods included under direct defense expenditures identified in Census import documents, and reflects various other balance-of-payments adjustments (for valuation, coverage, and timing) to Census statistics; see table 4.

4. Includes interest, dividends, and branch earnings; excludes reinvested earnings of foreign incorporated affiliates of U.S. firms or of U.S. incorporated affiliates of foreign firms.

5. Includes sales of foreign obligations to foreigners.

6. Includes changes in nonliquid liabilities reported by U.S. banks and in investments by foreign official agencies in debt securities of U.S. Government corporations and agencies, private corporations, and State and local governments.

7. Includes return import into the United States, at a depreciated value of \$21 million in 1972-IV and \$22 million in 1973-II, of aircraft originally reported in 1970-III in line 3 as a long-term lease to Australia.

8. Includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions" in June 1974 SURVEY, p. 27.

NOTE.—Details may not add to totals because of rounding.

^a Preliminary. *Less than \$500,000.

1. Mainly net additions to or liquidations of U.S.-owned grains stored in Canada, and exports of electrical energy.

2. Mainly exports of exposed motion picture film for rental rather than sale.

3. Irregular and occasional adjustments; valuation adjustments for goods considered to be underpriced or overpriced in Census data; timing adjustments for goods recorded in Census data in one period but found to have been shipped in another; and coverage adjustments for special situations in which shipments were omitted from Census data (e.g., vessels).

4. Correction for discrepancy between sum of four quarters, seasonally adjusted, and the unadjusted recorded annual totals.

5. Exports of military equipment under U.S. military agency sales contracts with foreign governments to the extent such exports are identifiable from Census export documents. These exports are included in table 2, line 3: "Transfers under U.S. military agency sales contracts."

6. Mainly imports of electrical energy.

7. Mainly foreign charges for repair of U.S. vessels abroad, which are included in tables 2, 3, and 9, line 20 (other transportation).

8. Merchandise imported directly by the Department of Defense, as well as "defense" imports of the Coast Guard and Atomic Energy Commission, to the extent such imports are identifiable from Census import documents and verifiable from separate reports of the importing agencies. These imports are included in tables 2, 3, and 9, line 17: "Direct defense expenditures."

9. Includes nuclear fuel materials and fuels, formerly in exports of "other metals"—(1.33) and in imports of "steelmaking materials"—(1.76).

10. The statistical identification of automotive products exports to Canada (line 47) is not as complete and comprehensive as the identification of automotive products imports from Canada, which are more definitively classified for duty-free status under the U.S.-Canada Automotive Products Trade Act. The less comprehensive identification in U.S. trade statistics of automotive parts exports, combined with some degree of unreported export shipments, results in an undercounting of automotive exports to Canada (line 47) which—estimated from examination of Canada's import statistics—amounted to about \$875 million in 1973.

NOTE.—Details may not add to totals because of rounding.

*Revised. *Preliminary. *Less than \$500,000 (±).

1. Expenditures under Public Law 93-199 to release Israel from its contractual liability to pay for defense articles and services purchased through military sales contracts are included in line A.3. Parts of such expenditures are applied first in lines A.31 and A.35, to reduce short-term claims previously recorded in lines A.30 and B.14; however, this application of funds is excluded from lines B.12 and B.15 which record cash collections from the foreign government. The remaining part of such expenditures, financing future deliveries under military sales contracts, is applied directly into lines A.30 and B.14. Deliveries against these military sales contracts are included in line B.16.

2. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency. However, such data for third quarter 1974 are only extrapolated estimates by BEA, because of incomplete reports from one operating agency, and are to be revised in future issues of the SURVEY.

3. Line A.29 includes foreign currency collected as interest and line A.31 includes foreign currency collected as principal, as recorded in lines A.8 and A.9.

4. Lines A.30 and A.32 include some short-term U.S. Government claims, collections of which are recorded in line A.35. Collections of these short-term claims recorded in lines A.30 and B.14 are included in line B.15.

5. Consists of (a) transfers of military goods and services financed by U.S. Government credits and (b) advance payments to the Defense Department (on military sales contracts) financed by credits or grants extended to foreigners by U.S. Government agencies.

6. Includes securities payable in U.S. dollars and in convertible foreign currencies.

7. Transactions under military sales contracts are those in which the Defense Department sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. The entries for the several categories of transactions related to military sales contracts in this and the other tables are partially estimated from incomplete data.

8. Lines B.12 and B.15 exclude recovery of investment value of aircraft on long-term lease through physical return of depreciated aircraft; see footnote 6 to table 1.

9. Consists of transfers of military goods and services financed by U.S. Government credits (included in line B.16) and of increases in Defense Department liabilities (on military sales contracts) which arise from advance payments to the Defense Department financed by credits or grants to foreigners by U.S. Government agencies.

10. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line B.11.

* Revised. * Preliminary. * Less than \$500,000. n.a. Not available.

1. Acquisition of capital stock of existing and newly established companies, capitalization of intercompany accounts, and other equity contributions.

2. Sales and liquidations of capital stock and other equity holdings, total, and partial.

3. Mining and smelting includes the exploration and development of mining properties, the extraction of raw ores and the processing necessary for basic refined metals. Petroleum includes the exploration, development and production of crude oil and gas, and the transportation, refining and marketing of petroleum products exclusive of petrochemicals. Manufacturing excludes petroleum refining and the smelting operations of mining companies. "Other" industries include all industries except those previously listed, the major ones being agriculture, public utilities, transportation, trade, insurance, finance and services.

4. As published in Treasury Bulletin. Treasury data are based on transactions by foreigners

reported by banks and brokers in the United States; net purchase by foreigner (+) corresponds to net U.S. sales (-).

5. Redemptions measure scheduled retirements and identifiable premature retirements of U.S.-held foreign debt securities. Unidentifiable nonscheduled retirements appear in line 45.

6. Securities newly issued by finance subsidiaries incorporated in the Netherlands Antilles are included to the extent that the proceeds are transferred to U.S. parent companies.

7. Mainly reflects exclusion of investments by foreign official reserve agencies in debt securities of U.S. Government corporations and agencies, private corporations, and State and local governments. These investments are included in table 2, line 56.

NOTE.—Details may not add to totals because of rounding.

* Revised. * Preliminary. * Less than \$500,000(±).

1. Position figures reflect increase of \$15 million in U.S. Treasury bills and certificates (line 27), \$113 million in U.S. Treasury bonds and notes (line 31), \$19 million in nonmarketable nonliquid U.S. Treasury obligations (line 38), and a negligible amount in convertible currencies (line 45), as a result of revaluations in foreign currencies due to the dollar devaluation in the first quarter, 1973. Total official reserve assets (line 42), also include an increase of \$1,436 million resulting from change in par value of the dollar on October 18, 1973, consisting of \$1,165 million gold, \$217 million special drawing rights, and \$54 million reserve position in the International Monetary Fund.

2. With maturity of 1 year or less; negotiable certificates of deposit with a maturity of 1 year or less are included in "other obligations."

3. Includes debt securities of U.S. Government corporations and agencies with a maturity of 1 year or less.

4. Includes nonliquid liabilities reported by U.S. banks and investment in debt securities of U.S. Government corporations and agencies, private corporations, and State and local governments.

5. Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The amounts outstanding for the U.S. SDR holdings and reserve position in IMF are also valued on this basis beginning in the third quarter 1974. Changes in U.S. holdings of SDR and in the U.S. gold tranche position reported in the balance of payments accounts continue to be reported on the basis of the value of the transactions only. At valuation used prior to July 1974 (SDR 1=\$1.20635) SDR holdings September 30, 1974 amounted to \$2,318 million; gold tranche position in IMF, \$1,733 million, and total U.S. reserve assets, \$15,949 million.

NOTE.—Details may not add to totals because of rounding.

¹Revised. ²Preliminary. ³Less than \$500,000 (±).

1. Credits, +; Exports of goods and services; unilateral transfers to U.S.; capital inflows (increase in U.S. liabilities or decrease in U.S. assets); decrease in U.S. official reserve assets. Debits, -; Imports of goods and services; unilateral transfers to foreigners; capital outflows (decrease in U.S. liabilities or increase in U.S. assets); increase in U.S. official reserve assets.

2. Excludes transfers of goods and services under U.S. military grant programs.

3. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, and imports of goods included under direct defense expenditures identified in Census import documents, and reflects various other balance-of-payments adjustments (for valuation, coverage, and timing) to Census statistics; see table 4.

4. Includes interest, dividends, and branch earnings; excludes reinvested earnings of foreign incorporated affiliates of U.S. firms or of U.S. incorporated affiliates of foreign firms.

5. Includes sales of foreign obligations to foreigners.

6. The "European Economic Community (9)" includes the "European Economic Com-

munity (6)," the United Kingdom, Denmark, and Ireland.

7. The "European Economic Community (6)" includes Belgium, France, Germany, Italy, Luxembourg, and the Netherlands.

8. Includes transactions with shipping companies operating under the flags of Honduras, Liberia and Panama.

9. Includes return import into the United States, at a depreciated value of \$21 million in 1972-IV and \$22 million in 1973-II, of aircraft originally reported in 1970-III in line 3 as a long-term lease to Australia.

10. Includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions" in June 1974 Survey, p. 27.

NOTE.—Details may not add to totals because of rounding.

* Revised.

* Preliminary.

1. Balance of payments by area on the net liquidity basis and the official reserve transactions basis lack validity because liquid dollar holdings of private and official foreigners may be affected not only by their transactions with the United States but also by transactions among themselves. The balances shown by area here have some shortcomings due to statistical discrepancies including errors, omissions, and incorrect area attributions.

Balances are derived from lines in table 2 (all areas) and table 9 (individual areas) as follows:

Merchandise trade..... 2, 16.
 Goods and services..... 1, 15.
 Goods, services and remittances..... 1, 15, 31, 32.
 Current account..... 1, 15, 29.
 Current account and long-term capital..... 1, 15, 29, 33, 39-41,
 44, 48, 49-51, 53
 (by area only part
 of line 53 is included).

The balance on current account and long-term capital with "all areas" includes changes in long-term liabilities to all private foreigners reported by U.S. banks; with "international organizations" includes only liabilities to IBRD and affiliated organizations; and with other

areas includes only liabilities to regional organizations. Increases in the long-term liabilities to other private foreigners included in the total, but not in the areas, amounted to (millions of dollars): 1973 year, 71; 1973-I, 36; 1973-II, 6; 1973-III, 39; 1973-IV, -10; 1974-I, -29; 1974-II, -12; 1974-III, 34.

2. Adjusted to balance of payments basis; excludes exports under U.S. military agency sales contracts and imports under direct defense expenditures.

3. Includes some short-term U.S. Government assets; area data exclude long-term liabilities reported by U.S. banks other than to international organizations (see footnote 1).

4. The "European Economic Community (9)" includes the "European Economic Community (6)", the United Kingdom, Denmark, and Ireland.

5. The "European Economic Community (6)" includes Belgium, France, Germany, Italy, Luxembourg, and the Netherlands.

6. The current account balance reflects the effect on a U.S. Government grant of \$2.0 billion (in rupees) to India. This was offset in the balance on current account and long-term capital by the repayment by India (in rupees) of loans previously extended by the U.S. Government.

NOTE.—Details may not add to totals because of rounding.

Source: U.S. Department of Commerce, Bureau of Economic Analysis.

Revisions since January 1964 in aggregate manufacturing and trade inventories and sales and inventory-sales ratios, regularly published on page S-5 of the SURVEY are shown below in table 1. These revisions reflect revisions in merchant wholesale inventories and sales, shown in table 2 and retail inventories shown in table 3. Data for retail sales and manufacturers' inventories and sales have not been revised.

Details on the revision in wholesale inventories and sales which starts in January 1964 are published in the Census Bureau's *Monthly Wholesale Trade* report for July 1974. Retail inventories starting in January 1973 have been adjusted to the levels of the Census Bureau's 1973 *Annual Retail Trade Survey*, which provides the annual benchmark for the monthly series; in addition, the seasonal factors have been updated.

p Preliminary.

(Continued from page 28)

official exchange market intervention. Thus, changes in liabilities to foreign official agencies now inadequately reflect pressures (upward or downward) on the dollar in exchange markets. In 1974, the changes have to a large extent reflected investment decisions by monetary authorities of petroleum-

producing countries to place (withdraw) surplus exchange revenues in (from) U.S. money markets.

Thus, exchange market pressures on the dollar are inadequately reflected in the net liquidity and official reserves transactions balances to a larger extent than was the case before the introduction of managed floating exchange rates and the emergence of large flows of funds related to global petro-

leum developments. A review of the balance of payments presentation, designed to make it more useful for the analysis of balance of payments and exchange rate developments under current and prospective conditions, is being conducted by an interagency group under the direction of the Office of Management and Budget (OMB). A private advisory committee, selected by OMB, is participating in the review.

From the U.S. DEPARTMENT OF COMMERCE,
Bureau of Economic Analysis

Input-output analysis
can help you figure out
the economic chain
reaction of changes in
demand and supply.

To estimate the impact of change, you need the just-published

Input-Output Structure of the U.S. Economy: 1967

Get the detailed input-output tables for 367 industries from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

CURRENT BUSINESS STATISTICS

THE STATISTICS here update series published in the 1973 edition of BUSINESS STATISTICS, biennial statistical supplement to the SURVEY OF CURRENT BUSINESS. That volume (available from the Superintendent of Documents for \$5.15) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1969 through 1972 (1962-72 for major quarterly series), annually, 1947-72; for selected series, monthly or quarterly, 1947-72 (where available). Series added or significantly revised after the 1973 BUSINESS STATISTICS went to press are indicated by an asterisk (*) and a dagger (†), respectively; certain revisions for 1972 issued too late for inclusion in the 1973 volume appear in the monthly SURVEY beginning with the August 1973 issue. Also, unless otherwise noted, revised monthly data for periods not shown herein corresponding to revised annual data are available upon request.

The sources of the data are given in the 1973 edition of BUSINESS STATISTICS; they appear in the main descriptive note for each series, and are also listed alphabetically on pages 189-90. Statistics originating in Government agencies are not copyrighted and may be reprinted freely. Data from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1971	1972	1973	Seasonally adjusted quarterly totals at annual rates

[†] Revised. [‡] Preliminary. ¹ Estimates (corrected for systematic biases) for Oct.-Dec. 1974 and Jan.-Mar. 1975 based on expected capital expenditures of business. Expected expenditures for the year 1974 appear on p. 20 of the December 1974 SURVEY. ² Includes communication. [†] See corresponding note on p. S-1. [‡] Includes inventory valuation

adjustment. [‡] Personal outlays comprise personal consumption expenditures, interest paid by consumers, and personal transfer payments to foreigners.

[§] Personal saving is excess of disposable income over personal outlays.

[¶] Data for individual durable and nondurable goods industries components appear in the Mar., June, Sept., and Dec. issues of the SURVEY.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1971	1972	1973	1971		1972				1973				1974

[†] Revised. [‡] Preliminary. [†] See corresponding note on p. S-1. [†] Series revised beginning 1971; monthly data prior to May 1973 appear in the Farm Income Situation, July 1974, available from the U.S. Dept. of Agr., Economic Research Service. [‡] More complete details appear in the quarterly reviews in the Mar., June, Sept., and Dec. issues of the SUR-

VEY. [¶] Annual data in the 1973 BUSINESS STATISTICS should read as follows (mil. dol.): 1956 total imports of goods and services, -19,627; 1953-59 direct defense expenditures, -2,615; -2,642; -2,901; -2,949; -3,216; -3,435; -3,107. [¶] Includes data for items not shown separately. [¶] Corrected.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973 *	1973			1974

* Revised. † Preliminary.

† Average for year. ‡ Daily average. § Beginning Jan. 1973, data reflect changes in sample and weighting. ¶ Beginning June 30, 1974, data revised to include one large mutual savings bank that merged with a nonmember commercial bank. Total loans and investments were increased by about \$600 million of which \$500 million were in loans and \$100 million in "other securities." ¶ Beginning Aug. 28, 1974, loans sold outright to banks' affiliates reflect

a new definition of the group of affiliates included, and a somewhat different group of reporting banks; total loans were \$500 million less than they would have been on the old basis. ○ Adjusted to exclude interbank loans. § For bond yields, see p. S-21. ¶ Beginning Jan. 1959, monthly data have been revised to reflect new seasonal factors and adjustment to benchmarks for the latest call date (June 30, 1973). Revisions are in the Nov. 1973 Federal Reserve Bulletin.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

* Revised. ⊖ Preliminary. 1 End of year. 2 Beginning fourth quarter 1973, because of changes in method of consolidation (to minimize the effect of foreign operations of multinational enterprises), data are not comparable with those for earlier periods. The effect of the change can be assessed by comparing the data as originally published for the fourth quarter 1973 (June 1974 Survey) with the revised data shown here. 3 Prior to fourth quarter 1973, for petroleum refining only; data are not comparable with those for earlier periods. ⊕ Effective February 1974 Survey, data revised to reflect: Annual review of seasonal factors; regular benchmark adjustment; effect of changes in check collection procedures (Regulation J); and adjustments to include new figures from internationally oriented bank-

ing institutions. Monthly revisions back to 1971 are in the Feb. 1974 Federal Reserve Bulletin.

4 Beginning Jan. 1974, does not include noncorporate bonds and notes formerly included.

⊕ At all commercial banks.

⊙ Total SMSA's include some cities and counties not designated as SMSA's.

⊖ Includes Boston, Philadelphia, Chicago, Detroit, San Francisco-Oakland and Los Angeles-Long Beach.

⊗ Includes data not shown separately.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

^{*} Revised. ⁹ Preliminary. ^Δ Before extraordinary and prior period items. ^Δ Comparison with year-ago data may be affected by the change in reporting actual tonnage carried instead of billed tonnage, per the ICC Uniform System of Accounts (1/1/74). ⁹ Annual total; monthly data not revised. ⁹ Includes data not shown separately. ^Δ Applies to passengers, baggage, cargo, and mail carried. ⁹ Passenger-miles as a percent of available seat-miles in revenue service reflects proportion of seating capacity actually sold and utilized. ⁹ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled

service. ^Δ Effective July 1973, carrier group referred to as "International"; no change in comparability of data. ^{*} New series. Source: ICC (no comparable data prior to 1972). ⁹ Indexes are comparable for the identical quarter of each year (and from year to year); see ². ⁹ Natl. Railroad Pass. Corp. (Amtrak), not included in AAR data above, operations for 1972 and 1973 (mil. dol.): Operating revenues, 16

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

* Revised. † Preliminary.

1 Annual total; revisions not distributed to the monthly or quarterly data.

2 For six

months ending in month shown. 3 For month shown.

4 Includes data not shown separately.

† Monthly revisions back to 1971 are available upon request.

5 In the footnote of the 1973 BUSINESS STATISTICS a distinction is made between "gross weight" and "sulfur content." However, because the difference is so minute, the Bureau of Mines no longer makes this distinction.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

Revised. Preliminary. 1 Average for Jan.-Sept., and Nov. 2 Average for Apr.-June and Aug.-Dec. 3 Reflects revisions not available by months. 4 Less than 500 sh. tons. 5 Effective June 1974, specification changed from less than carlot, 10-14 lbs. to carlot, 14-17 lbs.; prices are not comparable with those for earlier periods. 6 Cases of 30 dozen. 7 Bags of 132.276 lb. 8 Monthly data reflect cumulative revisions for prior

periods. 9 Includes data not shown separately; see also note "§". 10 Producers' and warehouse stocks. 11 Factory and warehouse stocks. 12 Beginning June 1974 SURVEY, prices are for cartoned, white, shell eggs to volume buyers, delivered to store door, Chicago metropolitan area, and are not comparable with those shown previously. Comparable data back to 1969 are available. 13 Monthly revisions back to 1972 will be shown later. 14 Corrected.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

* Revised. * Preliminary. † Annual data; monthly or quarterly revisions are not available. ‡ For month shown. § Average for 11 months.

† Effective May 1973 SURVEY, prices are in terms of dollars per short ton.

‡ Revised series. Beginning in the Nov. 1974 SURVEY, steel mill inventories at service centers

reflect (beginning 1973) new sample panel for the Census "Wholesale Trade Report" and (beginning 1961), revised unit prices for converting value of merchant wholesalers' iron, steel, etc., inventories to tonnage equivalent. Revised end-of-month data for July 1972-Aug. 1973 appear in footnote in Nov. 1974 SURVEY; earlier revisions are to be published later.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

* Revised. † Preliminary. ‡ Annual data; monthly or quarterly revisions not avail.
 ‡ Excludes figures for rubber-tired dozers. § For month shown. ¶ Data cover 5 weeks;
 other periods, 4 weeks. † Beginning 1st qtr. 1974, tractor shovel-loader class excludes
 shipments of tractor shovel-loader/backhoes (front engine mount); of this type, data for the
 tractor chassis only are now included in the wheel tractor class (1st qtr. 1974 data, 4,239 units
 valued at \$34.0 mil.). † Series discontinued. ‡ Reflects unusually large cancellations for
 Nov. 1974, mostly in the automotive industry.
 † Effective June 1973 SURVEY, index revised back to 1970.
 ‡ Revised monthly data for Jan. 1971-Apr. 1973 are as follows (1967=100): 1971—91.6;

97.3; 94.9; 88.6; 92.4; 99.2; 121.9; 101.6; 103.7; 90.4; 103.7; 110.4; 1972—111.1; 113.8; 112.7; 113.0;
 116.6; 127.2; 131.0; 150.7; 136.2; 130.0; 154.5; 151.0; 1973—159.4; 164.0; 176.2; 185.9.
 † Effective Jan. 1973, data reflect total market as follows: Sets produced in the United States,
 imports by U.S. manufacturers for sale under their brand name and, beginning 1973, sets im-
 ported directly for resale.
 * New series. Source: Association of Home Appliance Manufacturers.
 † Includes data not shown separately.
 ‡ Monthly revisions back to 1972 will be shown later.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS

* Revised. ¹ Less than 50 thousand barrels. ² Reflects revisions not available by months. ³ Average for Jan.-May. ⁴ Average for Jan.-Oct. ⁵ Series discontinued.

Beginning Jan. 1974, data may reflect input of lease condensate, natural gas plant liquids, unfinished oils, and other hydrocarbons which are processed through the crude oil distillation facilities. No comparable data for earlier periods are available.

⁹ Includes data not shown separately. ¹⁰ Includes nonmarketable catalyst coke.

¹¹ Includes small amounts of "other hydrocarbons and hydrogen refinery input," not shown separately. ¹² Monthly revisions for 1972 will be shown later.

¹³ Beginning March 1974 SURVEY, data are restated to account for processing gain and crude losses not previously included; comparable data for earlier periods will be shown later.

¹⁴ Effective with Jan. 1974 data, series known as "Gross input to crude oil distillation units"; see note ⁶ for this page. ¹⁵ See similar note, p. S-36.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

* Revised.

1 Reported annual total; revisions not allocated to the months. 2 Less than 50 thousand barrels.

*New series. The Bureau of Labor Statistics has revised its pricing program and discontinued prices for the former specification. The index shown is developed from revenue and volume data collected directly from petroleum companies. The pricing formerly was based

on spot quotations in trade journals, which over the past year have come to represent a decreasing portion of domestic transactions. Because of the time required to collect the new data there will be a one-month lag in pricing, e.g. the May 1974 index reflects changes in prices from Mar. to Apr. Except for gasoline (p. S-35), 1973 annuals are averages of Jan. and Feb. old indexes and Mar.-Dec. new; for gasoline, it is an average of Feb.-Dec. new indexes. Except for gasoline, comparable data prior to April 1973 are available upon request.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

* Revised. * Preliminary. † Reported annual total; revisions not allocated to months.
¹ Publication of monthly rubber statistics was discontinued by the Census Bureau effective with the Dec. 1972 report (Series M30A). Data beginning Jan. 1973 are from the Rubber Manufacturers Association and are not strictly comparable with earlier data. ‡ Beginning January 1974, data reflect reduction in basis weight of newsprint from 32 to 30 lbs. for 500 sheets measuring 24" x 36"; data for January 1974 on 32-lb. basis (thous. short tons): Canada—production, 840; shipments, 815; stocks, 222; United States—production, 289; shipments, 285; mill stocks, 29; consumption by publishers, 586; stocks at and in transit, 676. † Data for

Jan. 1973–July 1974 are undergoing revision; Aug. and Sept. are not comparable with the un-revised data for earlier periods.

† Represents the sum of uncoated book paper and writing and related papers formerly shown separately; data for new orders no longer available for the individual items.

‡ As reported by publishers accounting for about 75 percent of total newsprint consumption.

§ Monthly data are averages for the 4-week period ending on Saturday nearest the end of the month; annual data are as of Dec. 31.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1973			1974

† Revised. ‡ Annual total includes revisions not distributed by months. § Estimate of production, not factory sales. ¶ Excludes 2 States. ¶ Excludes 1 State. † Revisions appear in "Men's and Women's Selected Apparel Cuttings, 1971-72," MA-23A Suppl., 9/73 (Bu. Census). ⊕ Effective 1973, data reflect new benchmarks and revised sampling; shirts include knits (from knitting mills) not included in data prior to 1973. ⊙ New series. Data cover all types of men's jeans, but exclude dungarees, overalls, and work pants; no data available prior to 1973. Δ Total includes backlog for nonrelated products and services and basic research.

Δ Domestics include U.S.-type cars produced in the United States and Canada; imports cover foreign-type cars and captive imports, and exclude domestics produced in Canada. ¶ Effective Sept. 1973 SURVEY, data include imports of separate chassis and bodies. ⊕ Effective Feb. 1974 SURVEY, excludes shipments of dollies and converter gear. ⊙ Courtesy of R. L. Polk & Co.; republication prohibited. § Excludes railroad-owned private refrigerator cars and private line cars.

INDEX TO CURRENT BUSINESS STATISTICS, Pages S1-S40

SECTIONS

General:

Business indicators.....	1-7
Commodity prices.....	8, 9
Construction and real estate.....	10, 11
Domestic trade.....	11-13
Labor force, employment, and earnings.....	13-17
Finance.....	17-22
Foreign trade of the United States.....	22-24
Transportation and communication.....	24-25

Industry:

Chemicals and allied products.....	25, 26
Electric power and gas.....	26
Food and kindred products; tobacco.....	27-30
Leather and products.....	30
Lumber and products.....	31
Metals and manufactures.....	31-34
Petroleum, coal, and products.....	34-36
Pulp, paper, and paper products.....	36, 37
Rubber and rubber products.....	37
Stone, clay, and glass products.....	38
Textile products.....	38-40
Transportation equipment.....	40

INDIVIDUAL SERIES

Advertising.....	11, 16
Aerospace vehicles.....	40
Agricultural loans.....	17
Air carrier operations.....	24
Air conditioners (room).....	34
Aircraft and parts.....	7, 40
