SURVEY OF CURRENT BUSINESS

UNITED STATES DEPARTMENT OF COMMERCE / BUREAU OF ECONOMIC ANALYSIS

SURVEY OF CURRENT BUSINESS

U.S. Department of Commerce

Robert A. Mosbacher / *Secretary*
Michael R. Darby / *Under Secretary
for Economic Affairs*

Bureau of Economic Analysis

Allan H. Young / *Director*
Carol S. Carson / *Deputy Director*

Editor-in-Chief: Carol S. Carson
Managing Editor: Leland L. Scott

Publication Staff: W. Ronnie Foster,
M. Gretchen Gibson, Donald J. Parschalk,
Mary Zois.

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the *Editor-in-Chief, Survey of Current Business, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.*

Annual subscription: *Second-class mail*—\$23.00 domestic, \$28.75 foreign; *first-class mail*—\$52.00. Single copy—\$6.50 domestic, \$8.13 foreign.

Mail subscription orders and address changes to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

S-pages: Current Business Statistics
(See page S-36 for contents and subject index)

Inside back cover: BEA Information

Note.—This issue of the SURVEY went to the printer on June 1, 1990. It incorporates data from the following monthly BEA news releases:

Gross National Product (May 24),
Personal Income and Outlays (May 25), and
Composite Indexes of Leading, Coincident, and Lagging
Indicators (May 30).

the BUSINESS SITUATION

PRELIMINARY estimates show that real GNP—a measure of U.S. production—increased at an annual rate of 1.3 percent in the first quarter of 1990, a downward revision from the 2.1-percent rate of increase reported in the advance estimates issued a month ago. The increase in real gross domestic purchases—a measure of U.S. demand—was revised down a similar amount, to an annual rate of 0.7 percent from 1.5 percent (see table 1 on page 20). The revisions in the two estimates stemmed from a substantial downward revision in inventory investment (that is, change in business inventories).¹

Revisions in price measures were quite small. The first-quarter increase in the GNP price index (fixed weights) was revised up 0.2 percentage point to 6.7 percent, and the increase in the gross domestic purchases price index (fixed weights) was unrevised at 7.1 percent.

The \$8.5 billion downward revision in change in business inventories was almost entirely in nonfarm inventories. Within nonfarm inventories, manufacturing inventories (in most categories of durables) were revised down \$11.4 billion.

Within net exports, a \$9.2 billion upward revision in exports was more than accounted for by nonagricultural

products (largely in capital goods except autos); an \$8.5 billion upward revision in imports was more than accounted for by nonpetroleum products (largely in autos, capital goods except autos, and consumer goods).

Impact of the revisions.—The preliminary estimates show somewhat less strength in U.S. production and demand in the first quarter of 1990 than was indicated in the advance estimates; both real GNP and real gross domestic purchases now show increases that are only slightly more than those in the fourth quarter of 1989. The differences between the preliminary and the advance estimates are largely traceable to revisions in manufacturing inventories, which now show only moderate accumulation in the first quarter. Within net exports, exports of nonagricultural products now show a substantial increase in the first quarter, and imports of nonpetroleum products now show only a moderate decline.

Corporate Profits

Profits from current production—profits before tax with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj)—increased \$2 billion, to \$288 billion, in the first quarter of 1990 after declining \$9½ billion in the fourth quarter of 1989 (table 1).

Profits of domestic financial corporations, up \$7½ billion, more than accounted for the increase; profits of domestic nonfinancial corporations edged down \$½ billion, and profits from the rest of the world declined \$5 billion. (In the fourth quarter, profits of domestic nonfinancial corporations had been reduced about \$4 billion as a result of uninsured damage caused by October's earthquake in northern California.)

Profits before tax and related measures.—Profits before tax (PBT) increased \$8 billion after declining \$1 ½ billion. The difference between the \$2 billion increase in profits from current production and the \$8 billion increase in PBT reflected declines in the

Looking Ahead...

• *System of National Accounts.* An article describing the United Nations System of National Accounts will be in the June issue.

• *U.S. International Transactions and Investment Positions.* Revised estimates of U.S. international transactions will be presented in the June SURVEY, along with preliminary estimates for the first quarter of 1990. The revisions cover 1986–89. Several changes will be introduced; see page 34 of the March 1989 SURVEY. The June issue will also present preliminary estimates for yearend 1989 of U.S. assets abroad and foreign assets in the United States and the sources of change in the investment positions.

• *National Income and Product Accounts Revisions.* Revised estimates for the 3-year period beginning with the first quarter of 1987 will be presented in the July SURVEY. Selected data will be available as of July 27.

NOTE.—Douglas R. Fox prepared the section on the revisions in the national income and product accounts; Daniel Larkins prepared the section on corporate profits; and David T. Dobbs prepared the section on the government sector.

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes are differences between these rates. Quarter-to-quarter percent changes are annualized.

Real, or constant-dollar, estimates are expressed in 1982 dollars and are based on 1982 weights. (Alternative measures based on more current weights are shown in tables 4 and 5 on page 22.)

IVA and in the CCAdj. (Both adjustments are added to PBT to obtain the current-production measure.)

The IVA is an estimate of inventory profits with sign reversed. Inventory profits increased \$1 1/2 billion, reflecting a pickup in the rate of increase in prices of inventoried goods, especially food products. The CCAdj, which declined \$4 1/2 billion, is the difference between the predominantly tax-based depreciation measure that underlies PBT, on the one hand, and BEA's approximation of economic depreciation, on the other.

Profits tax liability increased about as much as PBT; as a result, profits after tax (PAT) changed little. A decline in profits from the rest of the world, like that in the first quarter, lowers PBT but does not affect profits tax liability.

For domestic corporations, PBT increased \$13 billion and PAT increased \$5 billion (table 1.16 of the "Selected NIPA Tables"). PAT consists of net dividend payments (that is, payments less receipts) and undistributed profits. In the first quarter, net dividend payments of domestic corporations increased, in large part because dividends paid by the

rest of the world, most of which are received by domestic corporations, declined.² Undistributed profits of domestic corporations—the difference between PAT and net dividend payments—declined.

Cash flow from current production, a profits-related measure of internally generated funds available to corporations for investment, declined \$9 billion after declining \$1 billion.

PBT with IVA but without CCAdj.—Profits from current production is not available by industry; PBT with IVA is the best available measure of industry profits.

Profits of domestic financial corporations increased \$8 1/2 billion after declining \$5 billion. Profits of commercial banks rebounded from a fourth-quarter drop that reflected an unusually high level of loan writeoffs. Profits of insurance companies improved; in the fourth quarter, profits had been held down by about \$3 1/2 billion in benefits related to the California earthquake.

Profits of domestic nonfinancial corporations increased \$3 billion after declining \$9 1/2 billion. Of the four major industry groups, only trade registered a decline in the first quarter, reflecting increased costs of inventories that were not fully passed through to prices. Manufacturing registered a substantial gain, partly reflecting increased profits of transportation equipment manufacturers following a fourth-quarter strike at a major aircraft manufacturer.

Profits from the rest of the world declined \$5 billion after increasing \$9 1/2 billion. This component of profits measures inflows of profits from foreign affiliates of U.S. corporations less outflows of profits from U.S. affiliates of foreign corporations. In the first quarter, inflows moved down and outflows increased.

Government Sector

The fiscal position of the government sector deteriorated in the first quarter of 1990, as the combined deficit of the Federal Government and of State and local governments increased \$13 billion to \$134 1/2 billion (table 2). The deficit of the Federal Government increased \$15 1/2 billion, and the surplus of State and local governments increased \$3 billion.

The Federal sector.—The Federal Government deficit increased to \$172 billion, as expenditures increased more than receipts.

Receipts increased \$28 1/2 billion, compared with a \$13 billion increase in the fourth quarter. Personal tax and nontax receipts increased \$6 billion, one-half of the increase in the fourth quarter; the deceleration was attributable to the annual indexation of the individual income tax withholding table. Corporate profits tax accruals increased \$6 1/2 billion, in contrast to a \$4 1/2 billion decline in the fourth quarter. Indirect business tax and nontax accruals increased \$1 billion after a slight decline in the fourth quarter. Contributions for social insurance increased \$15 1/2 billion, compared with a \$5 1/2 billion increase in the fourth quarter. Contributions were boosted by three special factors, all of which were effective January 1, 1990: (1) An increase in the social security tax base to \$51,300 from \$48,000 (\$3 1/2 billion); (2) an increase in the social security tax rate to 15.3 percent from 15.02 percent (\$6 billion); and (3) an increase in the contribution for military retirement (\$1 billion).

Expenditures increased \$44 billion, compared with a \$24 1/2 billion increase in the fourth quarter. Transfer payments to persons increased \$19 billion, compared with an \$8 1/2 billion increase in the fourth quarter. Cost-of-living adjustments (COLA's) accounted for \$14 1/2 billion of the increase. The largest COLA's were for social security (\$10 1/2 billion), civilian and military retirement (\$2 1/2 billion), and veterans pensions and disability payments (\$1 1/2 billion). Defense purchases increased \$8 billion; \$3 billion was for a January pay raise for defense employees. Subsidies less the current surplus of government enterprises increased \$8 1/2 billion; the increase was more than accounted for by a \$5 billion increase in payments to farmers and a \$4 billion increase in the enterprise deficit of the

NOTE.—Levels of these and other profits series are found in tables 1.14, 1.16, 6.18B, and 7.18 of the "Selected NIPA Tables."

2. The dividend component of national income (shown in table 1.14 of the "Selected NIPA Tables") equals net dividend payments of domestic corporations plus net dividend payments from the rest of the world. Thus, the national income measure is not affected if a decline in dividend payments from the rest of the world is offset by an increase in net dividend payments of domestic corporations. Similarly, the dividend component of personal income (shown in table 2.1 of the "Selected NIPA Tables") is not affected; it is equal to the dividend component of national income less dividends received by government.

Commodity Credit Corporation (CCC). Grants-in-aid to State and local governments increased \$7 billion, largely in grants for medicaid, food and nutrition programs, and social services. Net interest paid increased \$5 $\frac{1}{2}$ billion. Nondefense purchases increased \$ $\frac{1}{2}$ billion; a \$5 $\frac{1}{2}$ billion decrease in net purchases of agricultural commodities by the CCC was offset by a \$2 billion increase in National Aeronautics and Space Administration purchases, a \$1 $\frac{1}{2}$ billion pay raise, and other increases. Transfer payments to foreigners declined \$4 billion from an unusually high level in the fourth quarter.

Cyclically adjusted surplus or deficit.—When measured using cyclical adjustments based on a 6-percent unemployment rate trend GNP, the Federal deficit on the national income and product accounts basis increased from \$192 $\frac{1}{2}$ billion in the fourth quarter to \$205 billion in the first (see table 3 on page 21). The cyclically adjusted deficit as a percentage of the 6-percent unemployment rate trend GNP increased from 3.7 percent in the fourth quarter to 3.9 percent in the first.

The State and local sector.—The State and local government surplus increased to \$37 $\frac{1}{2}$ billion, as receipts increased more than expenditures.

Receipts increased \$19 $\frac{1}{2}$ billion, compared with a \$10 $\frac{1}{2}$ billion increase in the fourth quarter. Indirect business tax and nontax accruals increased \$7 $\frac{1}{2}$ billion; \$3 billion was in sales taxes and \$2 $\frac{1}{2}$ billion was in property taxes. Grants-in-aid increased \$7 billion, and personal tax and nontax receipts increased \$2 $\frac{1}{2}$ billion. Corporate profits tax accruals increased \$1 $\frac{1}{2}$ billion, and contributions for social insurance increased \$1 billion.

Expenditures increased \$16 $\frac{1}{2}$ billion, compared with a \$20 $\frac{1}{2}$ billion increase in the fourth quarter. All cat-

egories of expenditures contributed to the deceleration. Purchases of goods and services increased \$15 $\frac{1}{2}$ billion, compared with a \$17 billion increase in the fourth quarter; the deceleration

was attributable to purchases of structures. All other categories of expenditures combined increased \$1 billion, compared with a \$3 $\frac{1}{2}$ billion increase in the fourth quarter.

NATIONAL INCOME AND PRODUCT ACCOUNTS

Selected NIPA Tables

New estimates in this issue: First quarter 1990, revised.

The selected set of 54 national income and product accounts (NIPA) tables shown in this section presents quarterly estimates, which are updated monthly. (In most of these tables, annual estimates are also shown.) The full set of 132 tables usually shown in July presents annual NIPA revisions. For more information on the presentation of the estimates, see "National Income and Product Accounts Estimates: When They are Released, Where They Are Available, and How They Are Presented" in the July 1988 SURVEY.

The tables shown are available the day of the GNP news release on printouts and diskettes on a subscription basis or from the Commerce Department's Economic Bulletin Board. Estimates for 1986-88 are in the July 1989 issue of the SURVEY; estimates for 1985 are in the July 1988 issue; estimates for 1984 are in the July 1987 issue; estimates for 1983 are in the July 1986 issue. Estimates for 1929-82 are in *National Income and Product Accounts, 1929-82: Statistical Tables*. For more information, write to National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the National Income and Wealth Division and the Government Division.

1. See footnote 5 and the box on page 21 of the July 89 SURVEY OF CURRENT BUSINESS.

2. Estimates beginning with the first quarter of 1986 exclude repairs and alterations of equipment, which was reclassified to "other" services.

3. Line 6 less line 13 equals rest-of-the-world product as shown in table 1.7.

4. Estimates beginning with the first quarter of 1986 exclude noninterest income of banks, which was reclassified to "other" services.

5. Estimates beginning with the first quarter of 1986 cover many business, professional, and technical services and incorporate improved measurement of telecommunications services and insurance services; incorporate new source data on travel and passenger fares; cover foreign students' expenditures in the United States; cover repairs and alterations of equipment; and cover noninterest income of banks.

6. See footnote 7 and the box on page 21 of the July 89 SURVEY OF CURRENT BUSINESS.

7. Estimates beginning with the first quarter of 1986 cover many business, professional, and technical services and incorporate improved measurement of telecommunications services and insurance services; incorporate new source data on travel and passenger fares; cover U.S. students' expenditures abroad; cover repairs and alterations of equipment.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

1. Percent changes for 1986 and the first quarter of 1986 reflect discontinuities in the series.
Note.—The fixed-weighted price index and the chain price index, both of which are weighted averages of the detailed prices used in the deflation of GNP, are measures of price change. In calculating changes in these indexes, the composition of GNP is held constant. Consequently, these changes reflect only changes in prices. The fixed-weighted price index measures price change over any period, using as weights the composition of GNP in 1982. The chain price index measures price change between two consecutive periods, using as weights the composition of GNP in the first period. The implicit price deflator is a byproduct of the deflation of GNP. It is derived as the ratio of current- to constant-dollar GNP (multiplied by 100). It is the average of the detailed prices used in the deflation of GNP, but the prices are weighted by the composition of GNP in each period. Consequently, the implicit price deflator reflects not only changes in prices but also changes in the composition of GNP, and its use as a measure of price change should be avoided.

U.S. Business Enterprises Acquired or Established by Foreign Direct Investors in 1989

OUTLAYS by foreign direct investors to acquire or establish U.S. businesses in 1989 were \$64.6 billion, down from a record \$72.7 billion in 1988, but still well above the levels of previous years (table 1).¹ As discussed later, the figure for 1989 is preliminary and will be revised up to include late reports.

As in past years, acquisitions accounted for much of the investment—over four-fifths of total outlays. Large transactions dominated the results: Ten investments of \$1 billion or more accounted for 40 percent of outlays; 109 investments of \$100 million or more accounted for 79 percent of outlays (tables 2A and 2B).

NOTE.—James Bomkamp, Chief, Direct Investment in the United States Branch, International Investment Division, supervised the survey from which the data were drawn. Joseph F. Cherry III was project leader for editing and processing the forms. Angela Roberts designed the computer programs for data retrieval and analysis.

1. These data are from a BEA survey of new foreign direct investments in the United States, which covers (1) existing U.S. business enterprises in which foreign investors acquired, directly or through their U.S. affiliates, at least a 10-percent voting interest, and (2) new U.S. business enterprises established by foreign investors or their U.S. affiliates. Acquisitions of additional equity or voting interests in existing U.S. affiliates are not covered.

The data presented in the article are limited to U.S. enterprises that, in the year they were acquired or established, had total assets of over \$1 million or owned at least 200 acres of U.S. land. Although partial reports, primarily for identification purposes, were required to be filed for investments not meeting these criteria, the data from them are not included in the accompanying tables. For 1989, 627 partial reports were filed; total assets of the U.S. business enterprises that filed partial reports were \$144.1 million.

In addition to the data on new foreign direct investments presented here, BEA also publishes quarterly balance of payments flows and the annual direct investment position for both new and existing investments. The position estimates first appear in the June issue of the SURVEY OF CURRENT BUSINESS; more detailed estimates follow in the August issue. Estimates covering the operations of U.S. affiliates of foreign companies are also available from BEA's annual survey or, in a benchmark year, from its quinquennial benchmark survey of foreign direct investment in the United States. These estimates usually appear in the May issue of the SURVEY; however, in 1990, as in 1989, they will appear in the July issue. That issue will present revised estimates for 1987 from the benchmark survey and preliminary estimates for 1988 from the annual survey.

The continued importance of many of the factors that helped generate a 55-percent average annual increase in outlays between 1983 and 1988 ensured that 1989 outlays would also be high by historical standards. U.S. economic growth encouraged foreign direct investment by creating broader and more profitable consumer markets. Some foreign companies' U.S. affiliates, profiting from the economic expansion, may have been better able to finance new acquisitions and establishments. State and local govern-

ments continued to offer tax and other incentives to foreign investors.

International economic conditions also were conducive to a continuation of high levels of foreign direct investment. Relatively high saving rates in several major industrialized countries and renewed strength in some foreign stock markets held down the cost of capital. Sustained economic growth in many industrialized countries supported corporate profitability abroad and thus facilitated the financing of U.S. investments. Public de-

Data Availability

Only summary data are published in this article. A set of 25 supplementary tables containing additional detail for 1987, 1988, and 1989 on the number of investments and investors, investment outlays, and selected operating data for the U.S. business enterprises acquired or established is available for \$10.00 from Economic and Statistical Analysis/BEA, U.S. Department of Commerce, Citizens and Southern National Bank, 222 Mitchell St., P.O. Box 100606, Atlanta, Georgia 30384. When ordering, refer to the "BE-13 Supplementary Tables for the May 1990 SURVEY Article," Accession No. BEA IID 90-105, and make checks payable to Economic and Statistical Analysis/BEA. Comparable tables for 1980–86 are also available from the same address: Accession No. 89-106, price \$18.00.

bate related to the U.S. trade deficit may have led some foreign manufacturers to build or acquire U.S. plants as a contingency against any measures that might limit their ability to service U.S. markets through exports. Finally, the substantial dollar depreciation that occurred between 1985 and 1987, which made it cheaper to invest and produce in the United States, probably helped sustain foreign direct investment outlays even as late as 1989.

By the end of 1989, however, some factors that might limit foreign direct investment in the United States had emerged. A general slowing of U.S. corporate restructuring, combined with apparently expanding investment opportunities in the European Communities and Eastern Europe, may have diverted some interest from the United States. In addition, foreign investors may have judged the climate for foreign direct investment in the United States to have become somewhat less favorable: Foreign mergers and acquisitions that might have implications for the national security of the United States began to be scrutinized under the Exxon-Florio provision of the Omnibus Trade and Competitiveness Act of 1988; legislative proposals for greater disclosure of information on foreign investments were introduced in Congress; and increased public concern was expressed about foreign investment generally.

Revisions.—Each year, preliminary data for the previous year are revised to include survey reports received since publication of the data the year before. Typically, the revisions to investment outlays are considerably smaller than those to numbers of investments because every effort is made to include large transactions in the preliminary data. Revisions in the data on new investments have been sizable in some years, because of the large number, and total value, of investments for which reports were received too late for inclusion in the preliminary totals. The revisions for 1988, however, are proportionately smaller than those for the previous few years. The number of investments was revised up from 1,012 to 1,424; total outlays were revised up from \$65.0 billion to \$72.7 billion. Although the revision to 1989 outlays cannot be forecasted with certainty, if it is comparable to the revision for 1988, outlays in each of the 2 years would be of approximately the same size.

Organization of the article.—The remainder of this article consists of two parts. The first part discusses investment transactions by industry, by country, and by source of funding; the second part presents selected data on the operations of the U.S. businesses acquired or established. In the analysis, information from outside sources, mainly press reports, has been used to supplement BEA's survey data.

Investment Transactions

By type of investment, most outlays in 1989, as in past years, were for acquiring existing U.S. businesses (\$55.8 billion) rather than for establishing new U.S. businesses (\$8.7 billion) (table 3). By type of investor, most outlays—\$44.1 billion—were made by existing U.S. affiliates; only \$20.4 billion were made by the foreign direct investors themselves. However, according to data by source of funding, which are published here for the first time, about two-thirds of the total outlays were financed with funds provided by foreign parents or foreign (non-U.S.) affiliates of the foreign parents; the remainder was financed by existing U.S. affiliates, either from U.S. or foreign borrowing or from internally generated funds (for further discussion, see "Source of funding").

Industry

Changes in outlays in individual industries in 1989 were quite mixed. Outlays in manufacturing, at \$28.3 billion, were lower than in 1988; a sizable increase in chemicals was more than offset by declines elsewhere. Outlays in services, "other industries," and finance (except banking) rose to record highs, partly offsetting declines in some of the remaining industries.

Within manufacturing, outlays were largest in chemicals and "other manufacturing." In chemicals, where foreign investors' presence was already substantial, outlays surged to a record level—\$11.0 billion. The largest investment involved the merger of a British and a U.S. drug manufacturer that were seeking to increase their research and marketing power in the global pharmaceutical market. Of the numerous Japanese investments in chemicals, the only two that exceeded \$100 million each were also in pharmaceuticals—the establishment of a U.S. affiliate in New York and the acquisition of a California-based concern. A Netherlands multi-

national intent upon gaining world leadership in the personal products market made two major acquisitions of cosmetics firms. A West German firm acquired a division of a New York-based petrochemical corporation, and Taiwanese investors financed the establishment of three sizable petrochemical companies. Another large transaction involved the acquisition of a Pennsylvania-based industrial chemicals concern by a U.S. affiliate of a French Government-owned firm that had been seeking expansion opportunities in the United States.

Outlays in "other manufacturing" were \$9.3 billion. Four of the six largest investments—each involving outlays of over \$300 million—were in printing and publishing, an industry that has undergone increasing globalization in recent years. The largest transaction in printing and publishing involved a joint venture between two prominent New York publishing companies, one of which is owned by a British investor with extensive media holdings; the other three transactions were the acquisitions of a New York-based publisher by a U.S. affiliate of a Canadian firm, an Arizona-based commercial printing concern by a Swiss printing and publishing firm, and a Maryland-based printing business by a U.S. affiliate of a British printing concern. The other two large investments in "other manufacturing" were the acquisition of an instruments division of a California-based company by the U.S. affiliate of a British manufacturing firm and the acquisition of a Michigan-based automotive parts concern by a Canadian transportation equipment company.

Outlays in machinery were \$3.9 billion; the largest share of outlays was in the computer and office equipment industry. To maintain its foothold in the U.S. market, a Japanese computer company purchased a large stake in the California-based computer manufacturer that also was a distributor of the Japanese company's mainframe computers. A French Government-owned computer firm acquired the computer unit of an Illinois-based corporation that wanted to reduce its outstanding debt and concentrate on television manufacturing. As a result of this transaction, the French firm's global operations may now be larger than those of any other European-based computer company. In electronic components and accessories, a U.S. affiliate of a different French

Government-owned firm purchased a Connecticut-based maker of electrical and electronic connectors.

In primary and fabricated metals, outlays were \$3.4 billion. The largest single investment, involving outlays of well over \$1 billion, was the acquisition of a Connecticut-based firm by a Swiss conglomerate. Japanese in-

* Less than \$500,000.

vestment in the U.S. steel industry, which accelerated after the Japanese Government agreed in 1985 to limit steel exports to the United States for 4 years, continued in 1989; as in previous years, much of this investment was in the form of joint ventures. By the end of 1989, when the Japanese export limitations were renewed, most of the major U.S. integrated producers had embarked upon at least one joint venture with a Japanese steel manufacturer.

In food and kindred products, outlays were only \$0.7 billion. (It should be noted, however, that 1989 acquisitions in retail trade included a diversified U.S. firm with extensive food manufacturing operations.) The only investment of over \$100 million was the acquisition of a Wisconsin ice cream manufacturer by a U.S. affiliate of the Netherlands multinational mentioned earlier.

Aside from manufacturing, outlays were largest in services, retail trade, and "other industries." In services, outlays were \$9.0 billion. They were particularly large in the motion picture industry. The largest investment in that industry—the purchase of a major movie studio by a U.S. affiliate of a major Japanese electronics manufacturer—accounted for more than one-third of total outlays in services. This purchase, which followed the Japanese manufacturer's 1988 acquisition of a large New York-based record company, confirmed the manufacturer's strategy of expanding into additional markets within the entertainment industry. Another services industry with sizable outlays was hotels. One of Hong Kong's largest real estate concerns purchased one of the world's largest hotel chains, based in Arizona. In addition, Japanese and other Asian investors continued to purchase and build hotels on both the west and east coasts. In advertising, a British concern became one of the world's largest advertising agencies when it acquired a New York-based agency.

In 1989, as in 1988, the largest single investment was in retail trade. The hostile takeover of a Minnesota-based restaurant operator and food products manufacturer by a U.S. affiliate of a British food, drink, and hotel conglomerate accounted for much of the \$7.3 billion in total outlays in this industry. A Wisconsin-based department store chain owned by Swiss investors purchased an Illinois-based

retail trade business. Additionally, the largest jewelry retailer in the United States, an affiliate of a Canadian firm, acquired the second-largest jewelry retailer, based in Texas.

In "other industries," three investments dominated the \$6.3 billion in outlays. In the largest, a U.S. holding company in which Australian investors had a minority interest acquired a Minnesota-based airline. In the other two, a large British communications concern attained a significant presence in the U.S. telephone market through acquisitions of communications businesses based in Washington State and California.

Outlays in real estate, finance (except banking), and wholesale trade were again sizable, together amounting to more than \$10 billion. In real estate, outlays were \$4.7 billion. Japanese investors made numerous purchases, the two largest being the acquisitions of office buildings in New York and Georgia by two different Japanese life insurance

companies.² In another large transaction, a Japanese investor purchased a Hawaii development company. The Government of Singapore made several real estate investments, including a sizable one in California.

In finance (except banking), outlays were \$3.4 billion, primarily reflecting several large acquisitions and the establishment of a number of new businesses. Acting to strengthen its relatively weak capital base, a New York-based bank sold its majority stake in a diversified business-financing company to a Japanese bank. In another large transaction, a State-owned Austrian bank purchased a California-based financial institution.

In wholesale trade, total outlays were \$2.4 billion. The largest investment involved a U.S. conglomerate's sale of a tropical foods business to a British food and electronics firm. The

2. The purchase by a Japanese firm of an interest in a New York-based corporation that owns several well-known buildings had not been completed as of December 31, 1989; thus, this transaction was not included in the data in this article.

¹ Revised.

² Preliminary.

³ Suppressed to avoid disclosure of data of individual companies.

1. Where more than one investor participated in a given investment, each investor and each investor's outlays are classified by country of each ultimate beneficial owner.

2. See footnote 3 in text for explanation.

3. European Communities (12) comprises Belgium, Denmark, France, Germany (Federal Republic of), Greece, Ireland, Italy, Luxembourg, Netherlands, United Kingdom, Portugal, and Spain.

4. OPEC is the Organization of Petroleum Exporting Countries. Its members are Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela.

sale was part of the ongoing divestiture of assets acquired in a major leveraged buyout.

Although outlays in insurance, petroleum, and banking were less substantial, several individual investments were sizable. Most of the \$1.8 billion of outlays in the insurance industry were the result of two acquisitions: The purchase of a Maryland property-liability insurer by a Swiss insurance company and the purchase of a Texas life insur-

ance firm by a Netherlands insurance company's U.S. subsidiary.

In petroleum, outlays were \$1.1 billion. The largest investment involved the purchase of an energy concern by a U.S. affiliate of an Australian manufacturer. In another large transaction, a company owned by the Venezuelan Government increased its presence in the U.S. market by entering into a refining and marketing joint venture with a California-based firm.

In banking, outlays were \$0.4 billion; most of this amount was accounted for by two acquisitions, one by a U.S. affiliate of a British bank and the other by a Spanish bank.

Country

Outlays are classified by country of ultimate beneficial owner (UBO) in ta-

⁴ See footnote 3, table 4.

3. See footnote 4, table 4.

NOTE.—Data for 1988 are revised. Where more than one investor participated in a given investment, each investor and each investor's outlays are classified by the country of each individual ultimate beneficial owner.

bles 4, 5A, and 5B.³ In 1989, UBO's from 21 countries made at least 1 investment of \$100 million or more.

³ Investment outlays can be classified by country of foreign parent as well as by country of UBO. The foreign parent is the first foreign person in the ownership chain of the acquired or established U.S. business; the UBO is the person in the ownership chain, beginning with the foreign parent, that is not owned more than 50 percent by another person. The country of UBO is often the same as that of the foreign parent, but it may be a different foreign country or the United States. Data classified by country of foreign parent are available in a set of supplementary tables (see the box on page 23).

UBO's in the European Communities (EC(12)) and in Japan accounted for about one-half and one-fourth, respectively, of total outlays; Australian, Swiss, and Canadian UBO's accounted for much of the remainder.

By country, UBO's from the United Kingdom were the largest investors. British UBO's accounted for \$22.0 billion in outlays, or approximately two-thirds of the EC(12) total. They were involved in 4 of the 10 investments

of \$1 billion or more (including the 2 largest) and 28 of the 109 investments of \$100 million or more. The six largest British investments accounted for approximately two-thirds of British outlays and almost one-fourth of total outlays. Each of these investments was in a different industry: In retail trade (the takeover of the Minnesota-based restaurant operator and food manufacturer by the U.S. affiliate of a British food, drink, and hotel conglomerate), in chemicals (the merger of

⁴ See footnote 3, table 4.

³ See footnote 4, table 4.

NOTE.—Data for 1989 are preliminary. Where more than one investor participated in a given investment, each investor and each investor's outlays are classified by the country of each individual ultimate beneficial owner.

the British and U.S. drug manufacturers), in "other industries" (the acquisition of the communications business based in Washington State by a large British communications concern), in "other manufacturing" (the joint venture between the two New York publishing companies), in services (the acquisition of the New York-based advertising agency by a British firm), and in wholesale trade (the acquisition of the U.S. conglomerate's tropical food business by a British food and electronics firm). These transactions and most of the transactions alluded to hereafter were discussed in the previous section of this article.

UBO's from the Netherlands, France, and the Federal Republic of Germany accounted for most of the remainder of the EC(12) total outlays. The Netherlands outlays were \$3.3 billion; much of the investment was in chemicals, including the outlays involved in the sizable acquisitions in the cosmetics industry. French UBO's invested \$3.1 billion, most of it for the previously mentioned acquisitions by Government-owned firms. Outlays by West German UBO's were \$2.5 billion. Three investments accounted for most of these outlays: The purchase of the division of the New York-based chemical corporation by the U.S. affiliate of a West German chemicals and consumer goods firm, and investments in two units—one in Connecticut and the other in California—of a New York-based computer manufacturer by a West German electronics company.

Japanese outlays, at \$14.9 billion, were second only to those of the United Kingdom. Japanese UBO's were involved in 2 investments of \$1 billion or more and 24 of \$100 million or more. Japanese investors accounted for over one-half of total outlays in services, in finance (except banking), and in real estate. In services, the largest transaction was the purchase of the major movie studio by the U.S. affiliate of a Japanese electronics manufacturer. Numerous hotel investments, including a sizable one in Hawaii by a Japanese insurance company, also contributed substantially to total outlays in services. Japanese UBO's made three of the four largest investments in finance (except banking), including the Japanese bank's purchase of a stake in the business-financing company of a New York-based bank. In addition to making the three largest investments in real estate, Japanese UBO's made by far the greatest number of real es-

tate investments (more than all the EC(12) countries combined). Other sizable Japanese outlays included the two investments in the pharmaceuticals industry, several joint ventures with U.S. steel companies, and the Japanese computer company's purchase of an interest in its distributor of mainframe computers.

Swiss UBO's accounted for \$4.8 billion in outlays. Sizable investments included the purchases of the Connecticut-based equipment manufacturer, the Maryland property-liability insurer, and the Illinois-based retail trade business. Much of the \$4.5 billion in outlays attributed to Australian UBO's was accounted for by the purchase of the Minnesota-based airline by a U.S. holding company in which the Australian investors held a minority interest. Total outlays of Canadian UBO's were \$3.9 billion; the largest outlay was for the acquisition of the New York-based publisher.

Source of funding

Of the \$64.6 billion in total outlays in 1989, \$44.1 billion, or 68 percent, were funded by foreign parent groups (which consist of the foreign parents and the foreign (non-U.S.) affiliates of the foreign parents) (table 6). It should be noted that some

of these funds financed investments made through existing U.S. affiliates and some financed investments made directly by the foreign parents or their foreign affiliates.⁴

The remaining \$20.4 billion of total outlays were funded by existing U.S. affiliates from sources other than the foreign parent groups. For example, the existing U.S. affiliates may have borrowed the funds from unaffiliated foreign persons or from U.S. persons, or they may have generated the funds internally.

4. Outlays funded by foreign parent groups represent the portion of total capital inflows for foreign direct investment in the United States that is to finance acquisitions and establishments. (Total capital inflows consist of funding from foreign parent groups to finance both these new affiliates and existing U.S. affiliates.) It should be noted, however, that total capital inflows for foreign direct investment in 1989 recorded in the U.S. international transactions accounts in the March 1990 SURVEY exclude data for several large, new investment transactions that were not reported in BEA's quarterly direct investment survey in time for inclusion in the March estimates. Data for these transactions will be included in the revised capital flow estimates to be published in the June 1990 SURVEY. Until then, comparisons between the data for outlays funded by foreign parent groups presented in this article and the data for total capital inflows for foreign direct investment in the United States should be made with caution. Furthermore, it should be noted that, when disaggregated by country, the outlays data in this article are shown by country of UBO, whereas the capital flow data are shown by country of foreign parent; data on outlays by country of foreign parent are included in the set of supplementary tables to this article (see the box on page 23).

² Suppressed to avoid disclosure of data of individual companies.

¹ Where more than one investor participated in a given investment, each investor and each investor's outlays are classified by country of each ultimate beneficial owner.

² See footnote 3 in text for explanation.

³ See footnote 3, table 4.

⁴ See footnote 4, table 4.

By industry, the percentage of financing by foreign parent groups was significantly below average in petroleum, "other industries," and services and significantly above average in trade, finance, and real estate. By country, particularly large shares of EC(12) and Middle Eastern outlays—80 percent and 85 percent, respectively—were financed by foreign parent groups. Within the EC(12), the share of British investment financed by foreign parent groups, at 86 percent, was particularly large. In contrast, only 63 percent of outlays for investments of Japanese UBO's were financed by foreign parent groups.

Selected Operating Data

Total assets of U.S. businesses acquired or established in 1989 were \$120.6 billion, down from \$142.6 billion in 1988 (tables 7A and 7B). This decrease reflects declines in most industries; however, assets in finance

(except banking) were up sharply because of four transactions that involved the largest asset values and together accounted for about 20 percent of total assets.

Assets of U.S. businesses acquired by foreigners, at \$95.4 billion, were much larger than those of U.S. businesses established by foreigners, at \$25.2 billion. However, because many of the investments in finance (except banking) that involved large assets were new establishments, total assets of newly established businesses rose considerably in 1989, from \$19.0 billion in 1988.

Assets in manufacturing and in finance (except banking) were \$35.1 billion and \$32.1 billion, respectively, and together accounted for more than one-half of the total assets of U.S. businesses acquired or established in 1989. Within manufacturing, assets in "other manufacturing," at \$11.0 billion, and in chemicals, at \$10.6 billion, predominated. Outside manufacturing, the acquisitions of the minority share in the

Minnesota-based airline, of the major movie studio, and of the Minnesota-based restaurant operator and food manufacturer together accounted for well over \$10 billion in assets. Assets in banking and insurance were also large.

Acquired businesses employed 679,106 workers. Retail trade accounted for the largest share of these employees, mainly reflecting the acquisition of the Minnesota-based restaurant operator and food manufacturer. Newly established businesses employed 13,088 workers.

Foreign investors obtained 310,598 acres of land as a result of acquisitions; much of this land was acquired as a result of the purchase of the Connecticut-based equipment manufacturer by a Swiss conglomerate and of a stock swap involving a Pennsylvania-based manufacturer and a West German firm. As a result of establishing new businesses, mainly in the real estate industry, foreign investors obtained 269,205 acres.

^a Suppressed to avoid disclosure of data of individual companies.

* Less than \$500,000 (\pm).

1. Sales, or gross operating revenue, excluding sales taxes.

NOTE.—Data for 1989 are preliminary. For acquired businesses, data are for, or as of the end of, the fiscal year preceding the year of acquisition; for newly established businesses, data are projections for, or as of the end of, the first full year of operation.

Regional and State Projections of Income, Employment, and Population to the Year 2000

THIS article presents regional and State projections to 2000 of earnings and employment—each of which is shown for 14 industries—and of total personal income, population, and per capita personal income. All projections are based on data through 1988. (An article in the May 1985 SURVEY OF CURRENT BUSINESS presented projections of these measures to 2000 based on data through 1983.)

These projections are based on an extension of past economic relationships and assume no major policy changes; they are baseline projections. They are neither goals for, nor limits on, future economic activity in any region or State. These projections have three major uses: (1) Assessing future demand for goods and services by households, businesses, and government, (2) analyzing economic trends to anticipate future economic problems, and (3) providing baselines with which to compare policy forecasts in measuring the effects of policies.

The first part of this article discusses projected trends in earnings by industry and in total personal income, population, and per capita personal income. The second part summarizes projection methodology.

Projected Trends to 2000

Earnings by industry

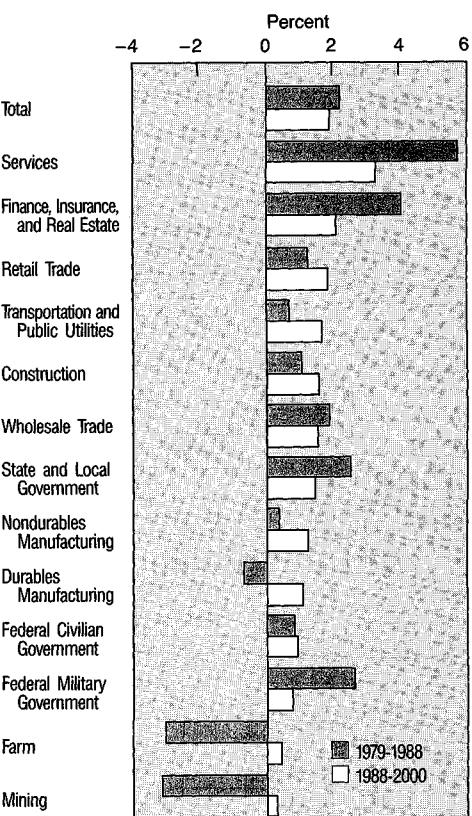

For the United States, as shown in table 1, earnings (in 1982 dollars) is projected to grow 1.94 percent per year in 1988–2000, slower than in 1979–88 (2.02 percent per year). Likewise, employment is projected to grow slower in 1988–2000 (1.12 percent per year) than in 1979–88 (1.92 percent per year).

NOTE.—BEA's regional projections program was for many years under the general guidance of Daniel H. Garnick, Associate Director for Regional Economics, who retired at the end of 1989. The program is now under the direction of Hugh W. Knox, Chief of the Regional Economic Analysis Division (READ). The regional and State projections were prepared under the supervision of Kenneth P. Johnson, Chief of the Projections Branch, READ, by Lyle Spatz, Duane G. Hackmann, Gerard P. Aman, George K. Downey, and John Turner. Alternative projections for 1995 were prepared under the supervision of John R. Kort, Chief of the Analysis Branch, READ, by C. Thomas Lienesch, Zoe O. Ambargis, Dean J. Fusco, and M. Lakshminarayanan Sastry. The projections were developed from historical estimates of earnings, income, and employment prepared by the Regional Economic Measurement Division under the direction of Linnea Hazen, Chief, and from historical estimates of gross state product prepared under the supervision of Edward A. Trott, Jr., Assistant to the Chief, READ.

The major industries in which the earnings growth rate is projected to exceed or about equal the all-industry growth rate of 1.94 percent per year are services; finance, insurance, and real estate; and retail trade (chart 1). In the first two industries, earnings also grew at above-average rates in 1979–88. In contrast, retail trade earnings grew at a below-average rate in 1979–88; the projected pickup reflects a return to a long-term growth path.

CHART 1

Average Annual Growth Rate in Earnings by Industry, 1979-1988 and 1988-2000, United States

Note.—Industries ranked by average annual growth rate in earnings, 1988-2000.

The major industries in which earnings is projected to grow more slowly than average are mining, farming, Federal civilian government, durables manufacturing, nondurables manufacturing, wholesale trade, construction, transportation and public utilities, State and local government, and Federal military government. In all but the last two industries, earnings also grew at below-average rates in 1979-

88. In contrast, in State and local government and in Federal military government, earnings grew at above-average rates in 1979-88. The Federal military projections reflect an assumption of no growth in employment for this sector, and the projected slowdown in State and local government reflects a return to a long-term growth path.

Earnings (and employment) projections for regions reflect a continuation

of a 1979-88 pattern of faster growth in coastal regions than in interior regions (table 2). This growth disparity is smaller in the projected period than in 1979-88. In 1988-2000, earnings is projected to grow 1.98 percent per year in coastal regions and 1.87 percent per year in interior regions. In 1979-88, earnings grew 2.79 percent per year in coastal regions and 0.76 percent per year in interior regions. Among coastal

regions, earnings is projected to grow faster than the U.S. average in the Southeast and Far West and slower than average in New England and the Mideast. Among interior regions, earnings is projected to grow slower than the U.S. average in the Great Lakes and Plains regions and faster than average in the Rocky Mountain and Southwest regions.

Coastal regions.—The slow growth in earnings projected for New England is centered in manufacturing and related service industries and in construction. Manufacturing will be adversely affected by the slowing of the national defense buildup and by the weakening of the region's competitive position in high-technology industries. Industries that provide computer, data processing, and research and development services to the high-technology industries also will be adversely affected. Construction earnings is projected to grow at about one-tenth of the 1979–88 rate in the region. Total earnings is projected to grow slower than the U.S. average in all New England States except New Hampshire and Vermont; growth

per year will range from 2.05 percent in New Hampshire to 1.44 percent in Connecticut (chart 2).

The slow growth in earnings in the Mideast region in 1988–2000 reflects weakness in manufacturing, government, and private service-type industries. Weakness in manufacturing and Federal civilian government stems partly from the slowing of the national defense buildup. Slow growth in investment services and business services reflects the reduced role of the New York metropolitan area as a supplier of these services to national and international markets. Total earnings is projected to grow slower than the U.S. average in each Mideast State; growth per year will range from 1.92 percent in Maryland to 1.46 percent in New York.

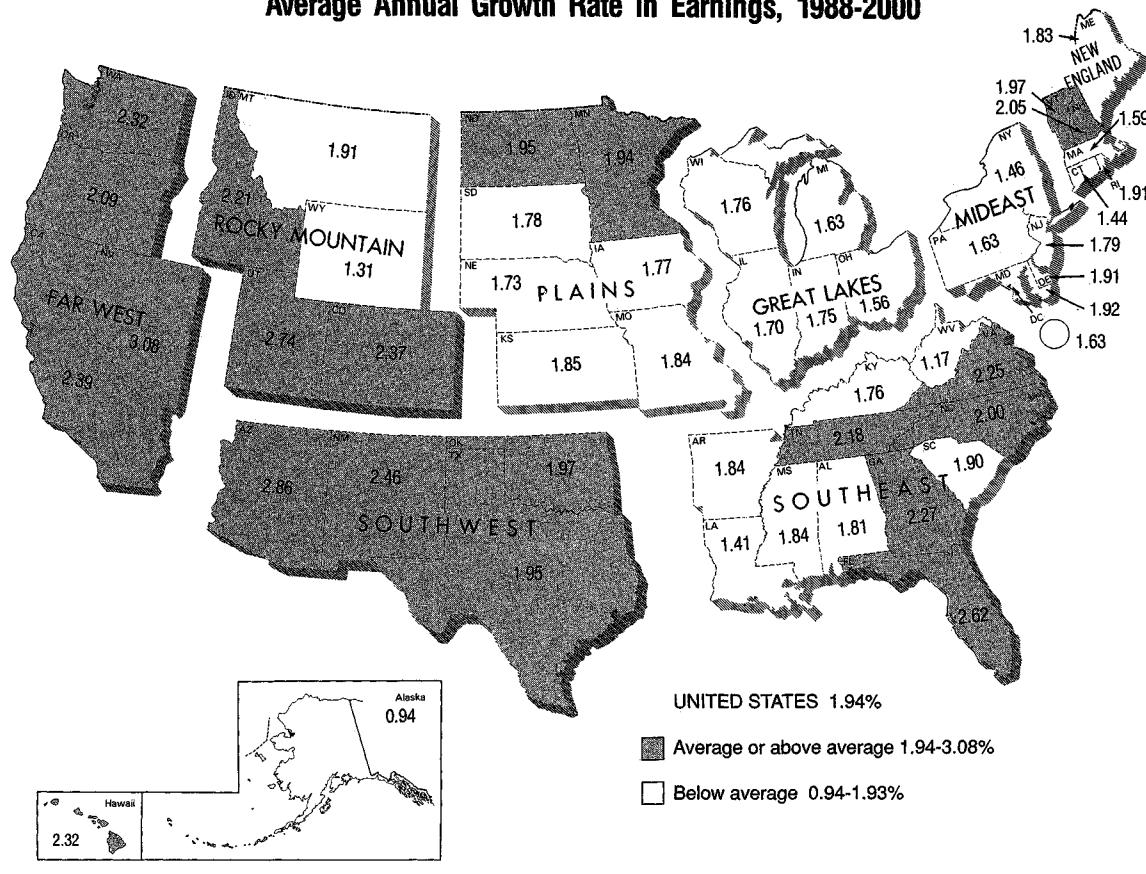

In the Southeast, projected strength in earnings reflects above-average growth in most major industries. In durables manufacturing, firms in the motor vehicles industry and related industries, such as metals and machinery, will continue to benefit from the Southeast's relatively low wage rates.

Strength in tourism will boost earnings in amusement and recreation services. Strong gains in wholesale and retail trade reflect continuing growth in the region's relative market size. Total earnings is projected to grow faster than the U.S. average in Florida, Georgia, Virginia, Tennessee, and North Carolina, and slower than average in the seven other Southeast States. Growth per year will range from 2.62 percent in Florida to 1.17 percent in West Virginia.

The Far West's above-average earnings growth in 1988–2000 is centered in durables manufacturing and private service-type industries. The region's competitive position is projected to strengthen in technologically advanced industries, such as electronic equipment, scientific instruments, and civilian aircraft. In turn, demand for services by the technologically advanced industries will boost earnings in research and development, data processing, and consulting. Above-average gains in construction and related financial and real estate services reflect increased demand for structures by the

CHART 2

Average Annual Growth Rate in Earnings, 1988-2000

Data Availability

BEA Regional Projections to 2040 is being published in three volumes. Volume 1—*State Projections*—presents projections for 1995, 2000, 2005, 2010, 2020, and 2040 of total personal income classified by major income components, per capita personal income, population for three age groups, and earnings and employment—each of which is shown for 57 industrial groups. Volume 1 also contains a detailed discussion of projection methodology. Volume 1 (GPO Stock No. 003-010-00199-2) is available from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402; for price and ordering, call (202) 783-3238. The State projections are also available on diskettes from Economic and Statistical Analysis/BEA, U.S. Department of Commerce, Citizens and Southern National Bank, 222 Mitchell Street, P.O. Box 100606, Atlanta, GA 30384. Payment (\$40 for two diskettes, Accession No. BEA REA 90-420) may be by check or money order (made payable to Economic and Statistical Analysis/BEA). For further information, write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0971. Volume 2—*Metropolitan Area Projections*—and volume 3—*BEA Economic Area Projections*—will be published in late 1990.

Among nonmanufacturing industries, earnings in amusement and recreation services and in air transportation is projected to grow faster in the region than in the Nation, reflecting the region's attractiveness to tourists. In contrast with manufacturing and services, the mining industry is projected to continue to be weak. Total earnings is projected to grow faster than the U.S. average in each Southwest State; growth per year will range from 2.86 percent in Arizona to 1.95 percent in Texas.

The fast growth in earnings in the Rocky Mountain region in 1988–2000 mainly reflects strength in manufacturing and private service-type industries. Fast growth in earnings is projected for technologically advanced industries within durables manufacturing. Manufacturing strength, along with rapid population growth, will boost earnings in construction and related financial and real estate services. In contrast with these fast-growing industries, mining is projected to grow slowly in the region. Total earnings is projected to grow faster than the U.S. average in Utah, Colorado, and Idaho and slower than average in Wyoming

region's fast-growing industries and for housing by the region's rapidly growing population. Total earnings is projected to grow faster than the U.S. average in each Far West State; growth per year will range from 3.08 percent in Nevada to 2.09 percent in Oregon.

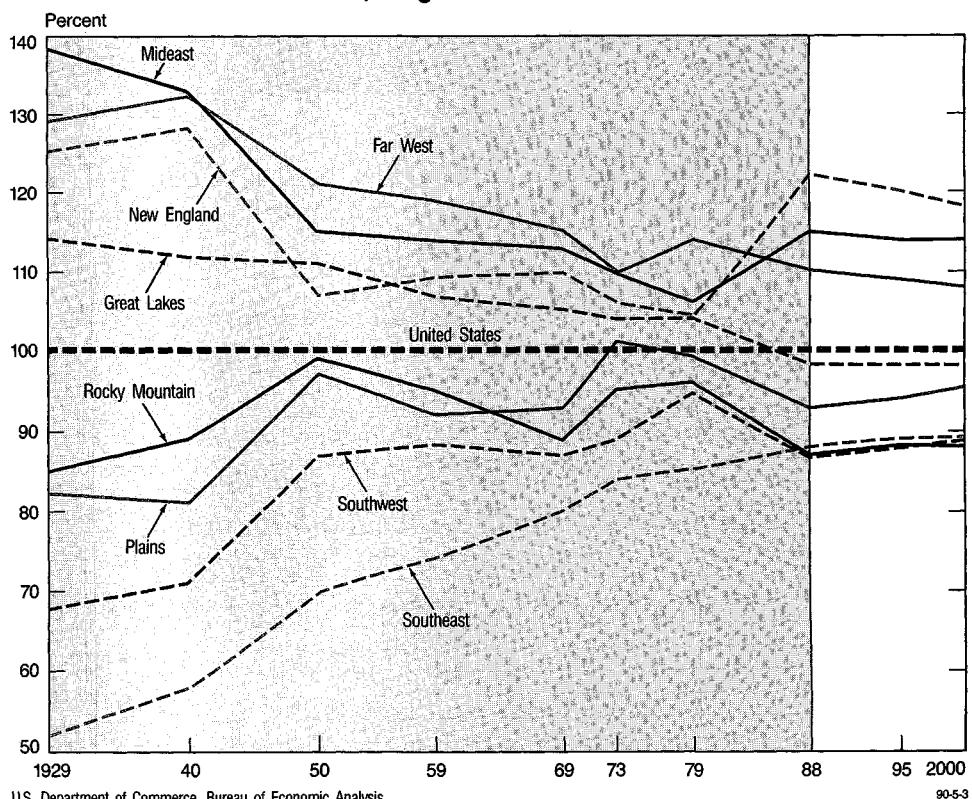

Interior regions.—The slow growth in earnings projected for the Great Lakes region reflects weakness in durables manufacturing and in most major nonmanufacturing industries. The tendency for durables manufacturing to disperse to southern and western regions to benefit from their relatively low wage rates, energy and land costs, and State and local taxes is projected to continue to limit growth in the region. In addition, strong foreign competition is projected to continue to limit growth in the motor vehicles industry, and so suppliers of inputs to the motor vehicles industry, such as the fabricated metals and machinery industries, will experience reduced demand for their products. Among nonmanufacturing industries, retail trade and services will grow slowly; a projected rate of population growth that is slower than in any other region will dampen the demand for consumer goods and services. Total earnings is projected to grow slower than the U.S. average in each Great Lakes State. Growth per year will range from 1.76 percent in Wisconsin to 1.56 percent in Ohio.

In the Plains region, projected slow growth in food processing and related private service-type industries will contribute to the region's weak earnings growth in 1988–2000. The relationship between food processing and private service-type industries is most apparent in the slow growth projected for the marketing and trucking of food products. In contrast with earnings in private service-type industries,

earnings in durables manufacturing industries will grow faster in the region than in the Nation. Total earnings is projected to grow slower than the U.S. average in all Plains States except North Dakota and Minnesota; growth per year will range from 1.95 percent in North Dakota to 1.73 percent in Nebraska.

In the Southwest, strength in industries that manufacture transportation and electronic equipment will boost earnings growth in 1988–2000.

CHART 3
**Per Capita Personal Income as a Percentage of the U.S. Average,
 Selected Years 1929–2000, Regions**

and Montana; growth per year will range from 2.74 percent in Utah to 1.31 percent in Wyoming.

Total personal income, population, and per capita personal income

U.S. per capita personal income (in 1982 dollars) is projected to grow 1.23 percent per year in 1988–2000, compared with 1.53 percent per year in 1979–88. The growth rate in the

projected period slows as a result of the relationship between total personal income (TPI) growth and population growth. As shown in table 3, TPI (in 1982 dollars) is projected to grow slower in 1988–2000 (1.96 percent per year) than in 1979–88 (2.56 percent per year), and so is population (0.71 percent per year, compared with 1.01 percent). The slowdown in TPI growth tends to dampen per capita income

growth, and the slowdown in population growth tends to boost per capita income growth. However, the dampening effect of the TPI slowdown more than offsets the boosting effect of the population slowdown. The projected slowdown in TPI growth is mainly in personal dividend, interest, and rental income and in transfer payments.

In 1988–2000, regional differences in per capita income are projected to

Table 3.—Total Personal Income and Population, Selected Years 1979–2000, United States, Regions, and States

	Total personal income								Population							
	Millions of 1982 dollars				Average annual growth rate (percent)		Percentage-point difference from U.S. growth rate		Thousands of persons				Average annual growth rate (percent)		Percentage-point difference from U.S. growth rate

narrow (chart 3). Per capita income will grow slower than the U.S. average in all high-income regions (those with above-average per capita income in 1988) and faster than the average in nearly all low-income regions (those with below-average per capita income in 1988). The projected narrowing is a resumption of a trend that was interrupted in 1979-88: Regional differences in per capita income had narrowed in each decade from the 1930's (the first complete decade for which estimates are available) through the 1970's and then widened in 1979-88.¹

Coastal regions.—Per capita income for a region can change relative to the U.S. average because its TPI or its population, or both, grows faster or slower than the U.S. average. Projections of slow per capita income growth in the three high-income coastal regions reflect a variety of conditions: (1) In New England and the Mideast, below-average TPI growth that more than offsets below-average population growth, and (2) in the Far West, above-average population growth that more than offsets above-average TPI growth. Between 1988 and 2000, per capita income is projected to decrease from 122 to 118 percent of the U.S. average in New England, from 115 to 114 percent of the average in the Mideast, and from 110 to 108 percent of the average in the Far West (table 4).

In the Southeast, a low-income region, per capita income in 2000 is projected to be 89 percent of the U.S. average, up from 88 percent in 1988; above-average TPI growth in the projection period will more than offset above-average population growth.

In the Southeast and Far West, the projected convergence of per capita income toward the U.S. average in 1988-2000 is a continuation of the 1979-88 pattern. In New England and the Mideast, the projected convergence in 1988-2000 contrasts with the pattern of divergence in 1979-88.

Interior regions.—Projections of fast per capita income growth in three of the four low-income regions reflect the following conditions: (1) In the Plains region, below-average population growth that more than offsets below-average TPI growth; (2) in the Rocky Mountain region, above-average TPI growth that more than offsets above-average population growth; and

(3) in the Southwest, above-average TPI growth and near-average population growth. Between 1988 and 2000, per capita income is projected to increase from 93 to 95 percent of the U.S. average in the Plains region, from 87 to 88 percent of the average in the Rocky Mountain region, and from 87 to 89 percent of the average in the Southwest. In all three regions, the pro-

jected convergence in 1988-2000 contrasts with the pattern of divergence in 1979-88.

The Great Lakes, a low-income region, is the only interior region for which per capita income is projected to grow at the U.S. average rate. Below-average TPI growth will offset below-average population growth, and per capita income will hold steady at 98

1. See Daniel H. Garnick, "Accounting for Regional Differences in Per Capita Personal Income Growth: An Update and Extension," SURVEY OF CURRENT BUSINESS 70 (January 1990): 29-40.

percent of the U.S. average from 1988 to 2000. This steadiness contrasts with the pattern of divergence in 1979–88.

Projection Methodology

The methodology underlying the projections presented in this article is similar, for the most part, to that discussed in the BEA regional projections volume published in 1985.² A new element is the extensive use of econometric modeling of the State economies to make alternative projections for 1995, the first year of the long-term projections.³ The use of an econometric approach permits the consideration of more complex economic

and demographic interrelationships at the State level than was previously possible. For example, the econometric projections reflect the direct effects of industrial growth in one State on the economies of each of the other States.

The projections were made in two major steps—for the Nation and then for the States. In the first major step, long-term national projections were developed for 1995, 2000, 2005, 2010, 2020, and 2040. Gross national product (GNP) was projected based on projections of population, labor force, employment, and GNP per employee. The population projections were based mainly on the work of the Census Bureau, and the labor force projections were based mainly on the work of the Bureau of Labor Statistics. The GNP projections, for the most part, were the basis for the derivation of other national measures, including total personal income by component and both employment and earnings by industry. For 1995, alternative national projections of total personal income by component and of both employment and earnings by industry were derived by summing 1995 econometric projections for the States. These sum-of-state econometric projections

then were used to modify the national long-term projections for 1995.

In the second major step, State projections of employment and earnings by industry, population, and total personal income by component were made within the framework of the corresponding projected national totals. First, State long-term projections for 1995, 2000, 2005, and 2010 were made, based on historical economic relationships within each State between basic industries—those that mainly serve national markets—and service industries—those that mainly serve local markets. Next, in some cases the State long-term projections to 2010 were modified to be consistent with the State econometric projections for 1995. Then, the State long-term projections to 2010 were extended to 2020 and 2040, based on simplified techniques and assumptions. Finally, the State long-term projections from 1995 to 2040 were evaluated intensively by BEA staff and by State government agencies that participate in the Federal-State Cooperative Program for Population Projections.

For a reference to further information on projection methodology, see the box on data availability.

Table 5 begins on the next page.

2. For a detailed discussion of the 1985 methodology, see U.S. Department of Commerce, Bureau of Economic Analysis, *1985 OBER BEA Regional Projections, Volume 1, State Projections to 2035* (Washington, DC: U.S. Government Printing Office, 1985).

3. See John R. Kort, Joseph V. Cartwright, and Richard M. Beemiller, "Linking Regional Economic Models for Policy Analysis," in *Regional Econometric Modeling*, ed. M. Ray Perryman and James Schmidt (Boston, MA: Kluwer Academic Press, 1986), for a discussion of the model—the National-Regional Impact Evaluation System (NRIES II).

If you need economic data on the States, you need this!

STATE PERSONAL INCOME: 1929-87

HALF A CENTURY OF ECONOMIC DATA—ALL IN ONE PLACE

The information in *State Personal Income* offers a unique opportunity to assess the performance of each State's economy from the year preceding the Great Depression to the late 1980's. These comprehensive personal income estimates for all 50 States are found in *no other publication*.

DETAILED ESTIMATES AT YOUR FINGERTIPS

This handy publication presents, for each State and also for eight regions and the United States:

- Annual total and per capita personal income for 1929-87
- Annual total and per capita disposable personal income for 1948-87
- Detailed estimates of the sources of personal income by major type of payment and by industry for 1929-87
- Quarterly total personal income for 1969-88

Maps and charts bring into focus the whole array of estimates. One section of the publication describes the sources and methods used in preparing the information presented.

HOW ARE THESE ESTIMATES USED?

BEA's personal income estimates are used for environmental impact statements, market research, government budgets and programs, plant location studies, economic planning and forecasting, economic research, prospectuses for government bond offerings, and much, much more.

ORDER YOUR COPY OF THIS BRAND NEW PUBLICATION TODAY!

Estimates are available on diskette, printout, and tape from BEA. For more information, call (202) 523-0966.

BUSINESS STATISTICS, 1961-88

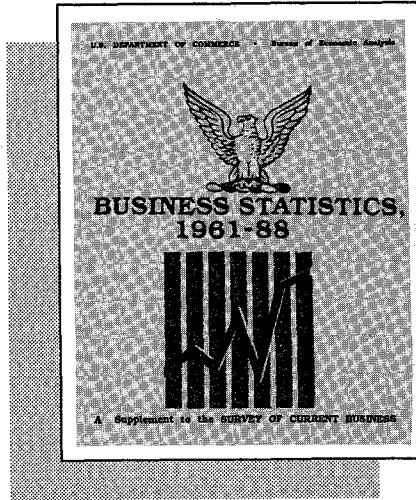

**Historical data, sources, definitions, and methods
of compilation for over 2,000 series, including . . .**

General business activities, such as:

- Business sales and inventories
- Construction and real estate
- Consumer, producer, and farm prices
- Finance
- Foreign trade
- Industrial production
- Labor force, employment, and earnings
- Personal income and outlays

And industries, such as:

- Chemicals
- Electric power and gas
- Food and tobacco
- Lumber
- Metal and machinery
- Petroleum and coal
- Pulp and paper
- Textiles

The new edition, the 26th of this supplement to the SURVEY OF CURRENT BUSINESS, presents monthly data for 1985-88 and annual data for 1961-88 for all series that appear in the SURVEY's blue pages. For key series, the monthly data extend back to 1961.

The volume also presents quarterly and annual data for 1957-88 for selected series prepared by the Bureau of Economic Analysis: National income and product accounts and U.S. international transactions.

L,C,Lg Cyclical indicator series are classified as L (leading), C (coincident), or Lg (lagging) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses at the end of series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Composite Indexes of Leading, Coincident, and Lagging Indicators" in the November 1987 issue of the SURVEY OF CURRENT BUSINESS (pages 24–27) and "Business Cycle Indicators: Revised Composite Indexes" in the January 1989 issue of the SURVEY (pages 23–28).

References to series in this section use the prefix "BCI—" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged.

High values reached by cyclical indicators since the last reference cycle trough (November 1982) are bolded; high values reached prior to the period shown in the table are listed in the notes. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-27 and C-28 in the April 1990 SURVEY.

Page C-1

NOTE.—The following series reached current high values before March 1989: BCI-910 (146.0) in January 1989 and BCI-940 (116.1) in January 1984.

1. Excludes BCI-57, for which data are not available.

2. Excludes BCI-77 and BCI-95, for which data are not available.

Page C-2

NOTE.—The following series reached current high values before March 1989: BCI-5 (290) in October 1988; BCI-46 (162) in November 1987; BCI-60 (0.736), BCI-7 (113.53), and BCI-8 (92.64) in December 1988; BCI-82 (85.1) in January 1989; BCI-92 change (8.31), BCI-92 smoothed (4.40), BCI-58 (101.0), and BCI-83 (97.7) in March 1984; BCI-32 (67.5) in November 1983; BCI-122 (120.7) in February 1989; BCI-123 (124.3) in May 1983; BCI-13 (65.318) in December 1986; BCI-9 (93.19) in September 1985; and BCI-11 (50.01) in 1st Q 1989.

1. Data exclude Puerto Rico, which is included in figures published by the source agency.

2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan's Survey Research Center, Institute for Social Research, P.O. Box 1248, Ann Arbor, MI 48106-1248.

Page C-3

NOTE 1.—The following series reached current high values before March 1989: BCI-87 (151.4) in 2d Q 1985; BCI-28 (2,260) and BCI-29 (158.5) in February 1984; BCI-89 (200.3) in 4th Q 1986; BCI-30 (83.4) and BCI-22 (6.9) in 1st Q 1984; BCI-31 (93.7) in October 1987; BCI-77 (1.58) and BCI-62 change (29.1) in March 1986; BCI-99 change (3.21) in August 1983; BCI-99 smoothed (2.09) in November 1983; BCI-120 change (8.4) in July 1984; BCI-16 (175.6) in 4th Q 1988; BCI-18 (151.8) and BCI-35 (424.9) in 3d Q 1988; BCI-81 (8.6) and BCI-26 (99.8) in 3d Q 1985; BCI-62 smoothed (6.3) in January 1985; BCI-85 (2.66) December 1986; BCI-102 (2.67) in January 1983; BCI-105 (637.4) in July 1988; and BCI-106 (2,472.5) in June 1988.

NOTE 2.—Major data revision: Index of new private housing units authorized by local building permits (BCI-29) has been revised from 1988 forward to reflect the source agency's annual updating of basic data and computation of new seasonal adjustment factors. Further information concerning this revision may be obtained from the U.S. Department of Commerce, Bureau of the Census, Construction Statistics Division, Washington, DC 20233.

* Preliminary May values: BCI-23 = 314.1, BCI-19 = 347.66, BCI-85 = -0.33; anticipated 2d quarter values: BCI-61 = 509.08, BCI-100 = 499.41.

1. Copyrighted. This series may not be reproduced without written permission from Commodity Research Bureau, Inc., 75 Wall Street, 22nd Floor, New York, NY 10005.

Page C-4

NOTE 1.—The following series reached current high values before March 1989: BCI-107 (7.034) in 4th Q 1984; BCI-112 (114.13), BCI-111 (23.2), BCI-116 (14.49), BCI-115 (13.00), and

BCI-117 (10.67) in June 1984; BCI-113 in (132.08) in September 1985; BCI-110 (897.756) in 4th Q 1985; BCI-14 (829.2) in July 1983; BCI-39 (1.78) in February 1984; BCI-93 (-2,380), BCI-94 (8.017), BCI-119 (11.64), BCI-114 (10.49), and BCI-109 (13.00) in August 1984; BCI-118 (15.01) in May 1984; and BCI-95 (15.96) in January 1989.

Note 2.—Major data revisions: Series based wholly or in part on consumer installment credit (BCI-66, -95, -111, and -113) have been revised from 1980 forward to reflect updating of the statistics based on newly available data and the computation of new seasonal adjustment factors. Further information concerning these revisions may be obtained from the Board of Governors of the Federal Reserve System, Division of Research and Statistics, Mortgage and Consumer Finance Section, Washington, DC 20551 (BCI-66 and BCI-113), and from the U.S. Department of Commerce, Bureau of Economic Analysis, Business Outlook Division, Washington, DC 20230 (BCI-95 and BCI-111).

* Preliminary May values: BCI-119 = 8.18, BCI-114 = 7.78, BCI-116 = 9.98, BCI-115 = 8.91, BCI-117 = 7.41, and BCI-109 = 10.00.

1. These indexes are compiled by Columbia University's Center for International Business Cycle Research (CIBCR), Graduate School of Business, Columbia University, New York, NY 10027. The components of each index are:

Long-leading index: Building permits for new private housing units (BCI-29), bond prices (Dow-Jones & Company), ratio of price to unit labor cost in manufacturing (CIBCR), and deflated M2 money supply (BCI-106).

Short-leading index: Average weekly hours in manufacturing (BCI-1), average weekly initial claims for unemployment insurance (BCI-5), layoff rate under 5 weeks (CIBCR), deflated new orders for consumer goods and materials (BCI-8), vendor performance (BCI-32), change in business population (CIBCR), deflated contracts and orders for plant and equipment (BCI-20), inventory change (National Association of Purchasing Management), change in industrial materials prices (*Journal of Commerce*), stock prices (BCI-19), and change in deflated total debt (CIBCR).

Page C-5

Note.—Major data revisions: U.S. international transactions series on merchandise trade (BCI-618, -620, and -622) have been revised from 1988 forward. These revisions incorporate the computation of new seasonal adjustment factors, retabulation of Census data to reflect the actual month of transaction, adjustment of Census-basis data for crude petroleum imports from Canada in 1988 and 1989, and allocation of re-exports (foreign merchandise) to the end-use categories. These revisions eventually will be carried back to 1978. Further information concerning these revisions may be obtained from the U.S. Department of Commerce, Bureau of Economic Analysis, Balance of Payments Division, Washington, DC 20230.

* Preliminary May values: BCI-19 = 378.2, BCI-748 = 2117.7, BCI-745 = 404.8, BCI-746 = 951.8, BCI-747 = 414.3, BCI-743 = 374.4, BCI-750 = 91.90, BCI-758 = 155.47, BCI-755 = 1.6548, BCI-756 = 5.5694, BCI-752 = 0.5987, BCI-757 = 1215.88, and BCI-753 = 1.1703.

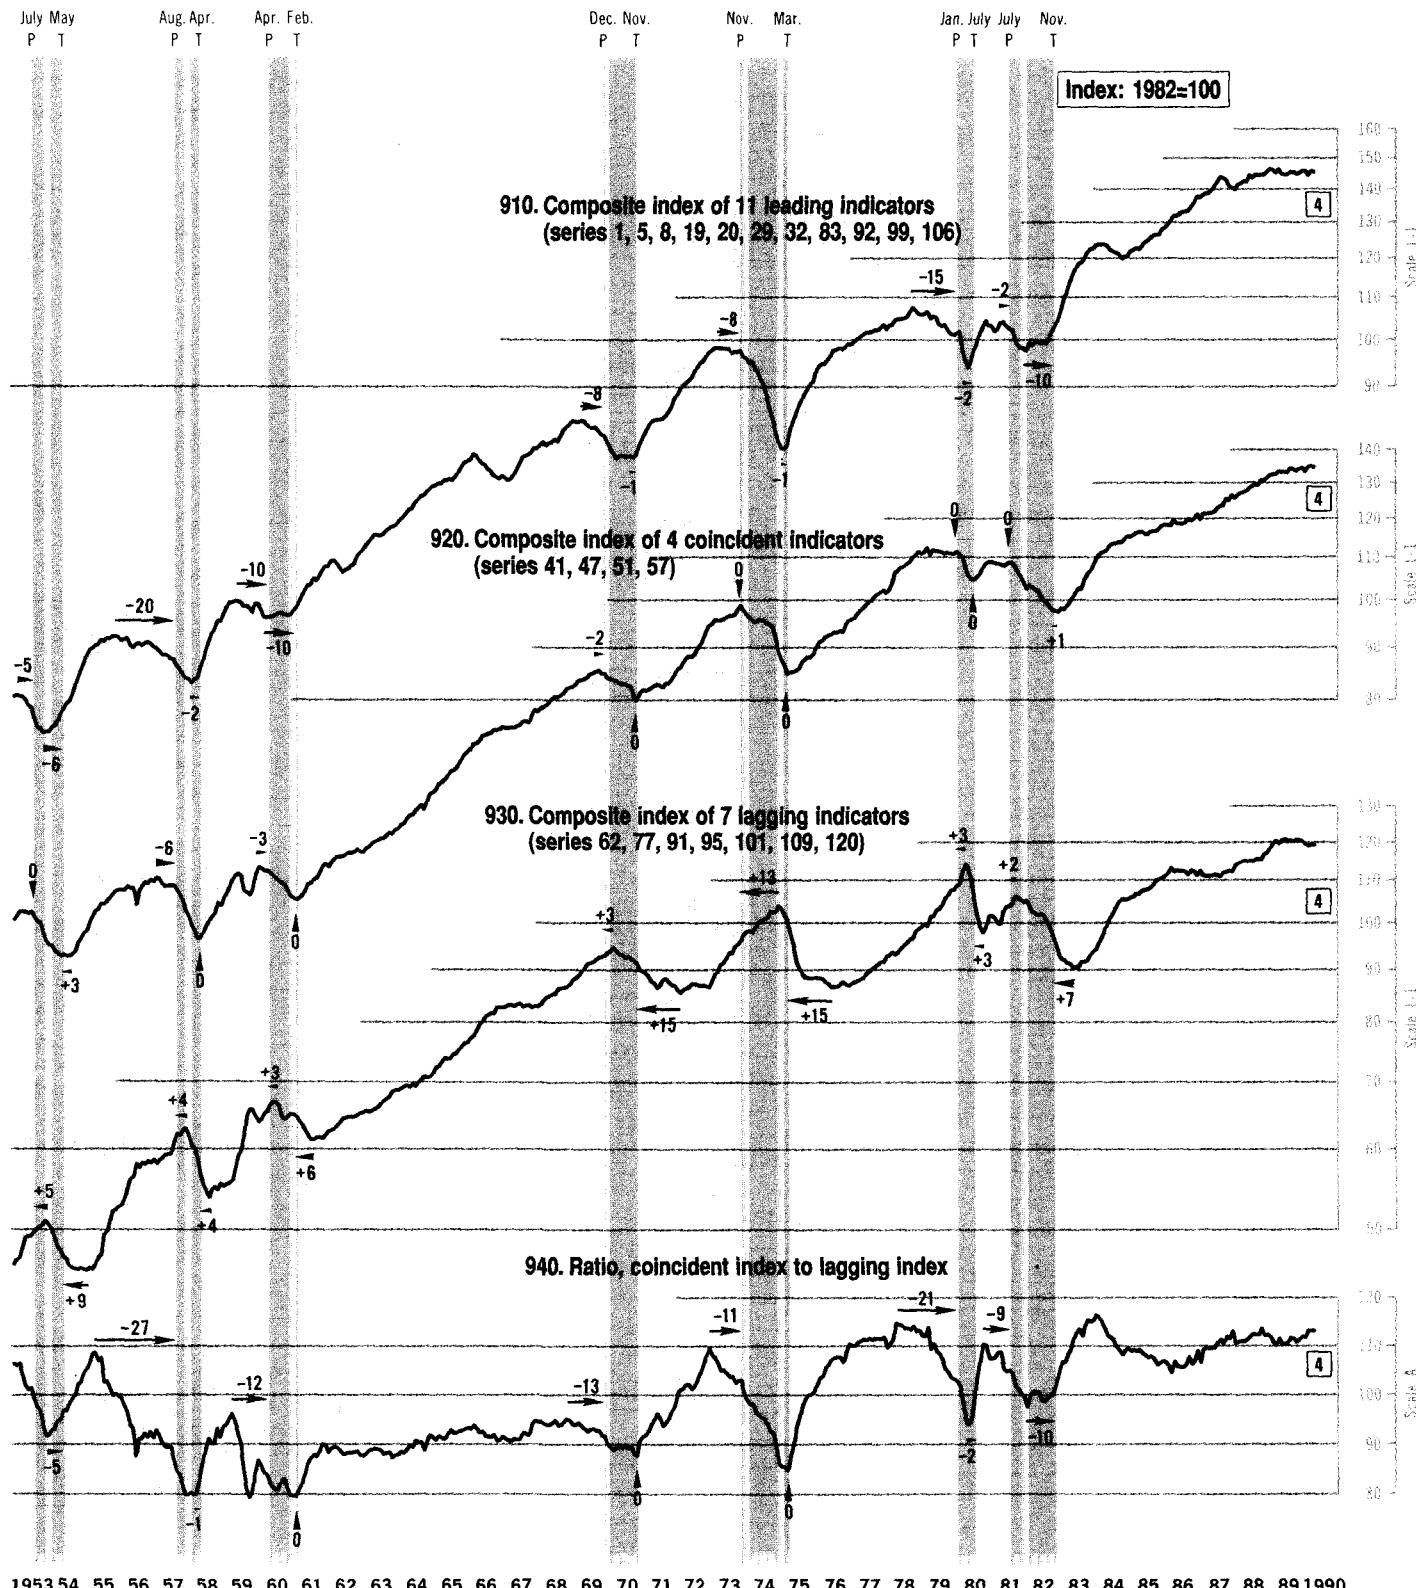

1. Balance of payments basis: Excludes transfers under military grants and Department of Defense sales contracts (exports) and Department of Defense purchases (imports).

2. Organisation for Economic Co-operation and Development.

3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Weights are the 1972–76 global trade of each of the 10 countries. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).

CURRENT BUSINESS STATISTICS

Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

Current data for the series shown in the S-pages are available on diskette on a subscription basis or from the Commerce Department's Economic Bulletin Board. Historical data, data sources, and methodological notes for each series are published in **BUSINESS STATISTICS, 1961-88**. For more information, write to Business Statistics Branch, Current Business Analysis Division (BE-53), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the Business Statistics Branch.

Unless otherwise stated in footnotes below, data through 1988 and methodological notes are as shown in BUSINESS STATISTICS, 1961-88	Units	Annual		1989										1990

FOOTNOTES FOR PAGES S-1 THROUGH S-32

General Notes for all Pages:

- r Revised.
- p Preliminary.
- e Estimated.
- c Corrected.

Page S-1

[†] Includes inventory valuation and capital consumption adjustments.

[§] Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.

[◊] See note "◊" for p. S-2.

Page S-2

1. Based on data not seasonally adjusted.

[◊] Effective April 1990 SURVEY, the industrial production index has been revised back to 1977 and has a new base year of 1987. A more detailed explanation of this revision is in the April 1990 *Federal Reserve Bulletin*. Historical data are available from the Industrial Output Section, Mail Stop 82, Division of Research and Statistics, Federal Reserve Board, Washington, DC 20551.

Includes data not shown separately.

Page S-3

Includes data for items not shown separately.

Page S-4

1. Based on data not seasonally adjusted.

Includes data for items not shown separately.

[‡] Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.

[◊] For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

Page S-5

@ Compiled by Dun & Bradstreet, Inc.

Includes data for items not shown separately.

[§] Ratio of prices received to prices paid (parity index).

[‡] See note "‡" for p. S-4.

[†] In the Feb. and July issues of the SURVEY each year, data for the most recent six to eight years are subject to revise and are available upon request.

Page S-6

[§] For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

Includes data for items not shown separately.

[‡] Effective with the Feb. 1990 SURVEY, data have been revised back to 1985 and are available upon request.

Page S-7

1. Computed from cumulative valuation total.

2. Index as of May 1, 1990: building, 399.3; construction, 437.2.

3. Beginning Dec. 1988, series has been discontinued by the Bureau of the Census.

Includes data for items not shown separately.

[§] Data for Mar., June, Aug., and Nov. 1989, and Mar. 1990 are for five weeks; other months four weeks.

[◊] Effective Feb. 1990 SURVEY, data for seasonally adjusted housing starts have been revised back to 1987. These revisions are available upon request.

[◊] Effective Feb. 1990 SURVEY, data for seasonally adjusted manufacturers' shipments of mobile homes have been revised back to 1987.

[†] Effective May 1990 SURVEY, data for seasonally adjusted building permits have been revised back to 1988 and are available upon request.

Page S-8

1. Advance estimate.

2. Beginning with Feb. 1989 data, associations in conservatorship are excluded.

[◊] Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.

[§] Data include guaranteed direct loans sold.

Address requests for data to:

Business Statistics Branch
Current Business Analysis Division (BE-53)
Bureau of Economic Analysis
U.S. Department of Commerce
Washington, D.C. 20230

Includes data for items not shown separately.

@ Data are for closed mortgage loans of thrift institutions insured by the Savings Association Insurance Fund (SAIF)—FSLIC-insured institutions prior to Sept. 1989.

[†] Effective April 1990 SURVEY, wholesale trade data have been revised back to Dec. 1980. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade Sales and Inventories BW89-R*, available from the Bureau of the Census, Washington, DC 20233.

[†] Effective April 1990 SURVEY, retail trade data have been revised. Estimates of retail sales and inventories have been revised back to January 1982. Revised data and a summary of changes appear in the report *Revised Monthly Retail Sales and Inventories BR89-R*, available from the Bureau of the Census, Washington, DC 20233.

Page S-9

1. Advance estimate.

Includes data for items not shown separately.

[◊] Effective with the January 1990 SURVEY, the seasonally adjusted labor force series have been revised back to January 1985. The January 1990 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1985–89 revision period appear in the February 1990 issue of *Employment and Earnings*.

[†] The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.

@ Data include resident armed forces.

[‡] See note "‡" for p. S-8.

Page S-10

[◊] See note "◊" for p. S-9.

Page S-11

[‡] This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

[◊] Production and nonsupervisory workers.

Page S-12

1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.

2. The hourly earnings index has been discontinued.

[◊] Production and nonsupervisory workers.

[†] Earnings in 1977 dollars reflect changes in purchasing power since 1977 by dividing by Consumer Price Index. Effective Feb. 1990 SURVEY, this series has been revised back to 1985 to reflect new seasonal factors for the CPI-W. Revised data are available upon request.

^{§§} Wages as of May 1, 1990: Common, \$18.16; Skilled, \$23.88.

[†] Excludes farm, household, and Federal workers.

^{‡‡} See note "‡" for p. S-11.

@ Effective with the April 1990 SURVEY, the employment cost index is based on June 1989=100, rather than June 1981=100. Historical data for both June 1989 and June 1981 bases are available from the Bureau of Labor Statistics, Division of Employment Cost Trends, 441 G Street, N.W., Washington, DC 20212.

Page S-13

1. Effective Feb. 28, 1989, there was a break in the series due to the enlargement of the panel of reporting dealers to 17 and of reporting direct issuers to 36. End of month figures on the old basis are as follows: All issuers, 481,734; financial companies, 373,717; dealer placed, 172,330; directly placed, 201,387; and nonfinancial companies, 108,017.

2. Average for Dec.

Includes data for items not shown separately.

[§] Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

[†] Covers 50 States and the District of Columbia. Only regular benefits are included.

[@] Average weekly insured unemployment for 12-month period divided by average monthly covered employment (lagging 4 full quarters for annual figure and 2 full quarters for monthly figure).

[†] Effective Oct. 1989 SURVEY, loans by loan type are provided by the Federal Farm Credit Banks Funding Corporation.

◊ Effective with the April 1990 SURVEY, the reserves of depository institutions have been revised back to 1984 and are available upon request.

Page S-14

1. Data are for fiscal years ending Sept. 30 and include revisions not distributed to the months.

2. Weighted by number of loans.

3. Beginning Feb. 1988, data suspended by the Farm Credit Administration, which is revising the information it collects and amending the reports it distributes.

4. Effective May 1990 SURVEY, seasonally adjusted data for types of credit by holder are no longer available. Owing to increased securitization activity and other structural changes in consumer lending markets, large irregular movements in the holder series have made it difficult to identify seasonal adjustment factors at the holder level.

§ Effective Mar. 1990 SURVEY, data have been revised to reflect new benchmark and seasonal adjustments and are available from the Banking and Money Market Statistics Section of the Division of Monetary Affairs at the Federal Reserve Board, Washington, DC 20551.

Includes data for items not shown separately.

◊ Excludes loans to commercial banks in the U.S.

† Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

‡ Courtesy of *Metals Week*.

© Average effective rate.

† Effective May 1990 SURVEY, the consumer installment credit series have been revised back to 1980 to incorporate new information and updated seasonal adjustment factors. These revisions are available upon request.

Page S-15

1. Beginning Jan. 1989, the primary public offering statistics have been discontinued by the Securities and Exchange Commission.

† Effective Feb. 1990 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

‡ Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◊ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

© Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

Page S-16

1. The railroad average was discontinued by Moody's on July 13, 1989. Therefore, the July average reflects only eight working days.

© See note "4" for p. S-19 regarding the new commodity classification systems introduced Jan. 1989. Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because the revisions to the totals are not reflected in the component items.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

† For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

† Effective with the Mar. 1990 SURVEY, seas. adj. exports and imports have been revised back to Jan. 1988, and are available upon request.

Page S-17

1. Beginning with Jan. 1989 data, undocumented exports to Canada are now included, resulting in a break with Dec. 1988 data.

2. Beginning Jan. 1989, buses are excluded from "Motor vehicles and parts" and included in "Other manufactured goods," resulting in a break with Dec. 1988 data.

@ See note "@" for p. S-16.

† See note "†" for p. S-16.

Includes data not shown separately.

◊ Data include undocumented exports to Canada, which are based on official Canadian import totals.

Page S-18

1. Reported annual total; quarterly or monthly revisions are not available.

2. For month shown.

3. Beginning Aug. 1989, the export and import indexes have been discontinued by the Census Bureau.

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◊ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

† Before extraordinary and prior period items.

© Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

† Effective with the Dec. 1989 SURVEY, data for 1981-88 have been revised and are available upon request.

‡ Effective with the Mar. 1990 SURVEY, data for 1985-89 have been revised and are available upon request.

Page S-19

1. Reported annual total; monthly or quarterly revisions are not available.

2. Less than 500 metric tons.

3. Figure suppressed because it did not meet Census publication standards.

4. Beginning with 1989 data, merchandise trade data are based upon two new commodity classification systems; the International Harmonized System and, Revision 3 of the Standard International Trade Classification and, as a result, data may not be directly comparable to 1988 and earlier years.

Includes data for items not shown separately.

§ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.

2. Quarterly data are no longer available.

3. See note 4 for p. S-19.

§ Data are not wholly comparable from year to year because of changes from one classification to another.

@ Includes less than 500 electric generation customers not shown separately.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

◊ Effective with the Dec. 1989 SURVEY, revisions for 1987-88 are available upon request.

Page S-21

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1-Aug. 31).

2. Crop estimate for the year.

3. Stocks as of June 1.

4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year).

5. Series has been discontinued.

6. Stock estimates are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column. See also note 13 for this page.

7. Stocks as of Dec. 1.

8. See note 4 for p. S-19.

§ Excludes pearl barley.

@ Quarterly data represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. Annual data represent Dec.-Nov.

† Coverage for 21 selected States, representing approximately 85 percent of U.S. production.

Page S-22

1. Series has been discontinued.

2. See note 4 for p. S-19.

§ Cases of 30 dozen.

Page S-23

1. Crop estimate for the year.

2. Reported annual total; revisions not distributed to the months.

3. Data suppressed because they did not meet Census publication standards.

4. See note 4 for p. S-19.

Totals include data for items not shown separately.

Page S-24

1. Reported annual total; monthly revisions are not available.

2. See note 4 for p. S-19.

3. Less than 500 tons.

Page S-25

1. Reported annual total; monthly revisions are not available.

2. For month shown.

3. Effective with Jan. 1989, import data are for consumption; earlier periods of data are general imports. See also note 4 for p. S-19 regarding the introduction of new classification systems.

@ Includes foreign ores.

§ Source: *Metals Week*.

Page S-26

1. Reported annual total; monthly revisions are not available.
2. Less than 50 tons.
3. See note 3 for p. S-25.
- ◊ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
- † Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
- # Includes data not shown separately.
- † Includes bookings (new orders) for automatic guided vehicles, automated storage and retrieval systems, below hook lifters, cranes, hoists, monorails, racks, shelving, casters and floor trucks, and conveyors.
- @@ Price represents North American Mean.

Page S-27

1. Annual total includes revisions not distributed to the months.
2. See note 4 for p. S-19.
- # Includes data for items not shown separately.
- § Includes nonmarketable catalyst coke.
- ◊ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
- †† March, June, September and December are five-week months. All others consist of four weeks.

Page S-28

1. Reported annual total; revisions not allocated to the months.
2. See note 4 for p. S-19.
- # Includes data for items not shown separately.

Page S-29

1. Reported annual total; revisions not allocated to the months.
2. See note 4 for p. S-19.
- ◊ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users. See also note "†" for this page.
- # Compiled by the American Newspaper Publishers Association.
- † Effective with the March 1990 SURVEY, Canadian newsprint statistics have been revised back to Jan. 1982 to exclude supercalendered and some soft-nip calendered paper that was originally classified as newsprint and is now classified as uncoated groundwood papers. This revision also affects estimated consumption. Revised data are available upon request.

Page S-30

1. Reported annual total; revisions not allocated to the months.
2. Data are being withheld to avoid disclosing data from individual firms.
3. Data cover five weeks; other months, four weeks.
4. Beginning Jan. 1989, sales of industrial plasters are included with building plasters.
5. Jan. 1, 1990 estimate of the 1989 crop.
- # Includes data for items not shown separately.
- ◊ Cumulative ginnings to the end of month indicated.
- § Bales of 480 lbs.

Page S-31

1. Less than 500 bales.
2. Annual total includes revisions not distributed to the months.
3. Average for crop year; Aug. 1-Jul. 31.
4. For five weeks; other months four weeks.
5. See note 4 for p. S-19.
- ◊ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- § Bales of 480 lbs..

Page S-32

1. Annual total includes revisions not distributed to the months.
2. Production of new vehicles (thous. of units) for Apr. 1990: *passenger cars*, 572; *trucks and buses*, 331.
3. Data are reported on an annual basis only.
4. See note 4 for p. S-19.
5. Beginning Jan. 1989, shipments of trailer bodies are included with trailer chassis to avoid disclosure of data from individual firms.
- # Total includes backlog for nonrelated products and services and basic research.
- § Domestics comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
- ◊ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some states are not available, month-to-month comparisons are not strictly valid.
- † Excludes railroad-owned private refrigerator cars and private line cars.

BEA Information

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Available From GPO

TO ORDER: The GPO publications listed below must be ordered from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. To order by phone: (202) 783-3238, by fax (202) 275-0019.

SURVEY OF CURRENT BUSINESS. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; a 28-page section of business cycle indicators containing tables for over 250 series and charts for about 130 series; and a 36-page section of current business statistics presenting over 1,900 major economic series obtained from public and private sources. Monthly. Annual subscription: \$23.00 second class mail, \$52.00 first class mail. Single copy: \$6.50.

Business Statistics, 1961-88. (1989) Provides monthly or quarterly data for 1985-88 and annual data for 1961-88 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 328 pages. \$16.00 (GPO Stock No. 003-010-00198-4).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pages. \$23.00 (GPO Stock No. 003-010-00174-7).

NIPA Methodology Paper No. 1: Introduction to National Economic Accounting. (1985) Introduces the concepts of the national income and product accounts by placing these accounts within the framework of national economic accounting. Shows how the national income and product accounts, capital finance accounts, and input-output accounts—the major branches of national economic accounting in the United States—are derived from the conventional accounting statements. 19 pages. \$1.25 (GPO Stock No. 003-010-00158-5).

NIPA Methodology Paper No. 2: Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends. (1985) Describes the concepts, sources, and methods of the corporate profits components of the national income and product accounts. 61 pages. \$2.50 (GPO Stock No. 003-010-00143-7).

NIPA Methodology Paper No. 3: Foreign Transactions. (1987) Describes the preparation of estimates in the national income and product accounts (NIPA's) of net exports (both current- and constant-dollar), transfer payments to foreigners, capital grants received by the United States, interest paid by Government to foreigners, and net foreign investment. Also describes the relationship between foreign transactions estimates in the NIPA's and those in the balance of payments accounts. 52 pages. \$2.75 (GPO Stock No. 003-010-00178-0).

NIPA Methodology Paper No. 4: GNP: An Overview of Source Data and Estimating Methods. (1987) Provides basic information

about GNP, including the conceptual basis for the account that presents GNP, definitions of each of the components on the income and product side of that account, and a summary, presented in tabular form, of the source data and methods used in preparing estimates of current- and constant-dollar GNP. Also provides an annotated bibliography, with a directory, of the more than 50 items over the last decade that provided methodological information about GNP. 36 pages. \$2.00 (GPO Stock No. 003-010-00179-8).

NIPA Methodology Paper No. 5: Government Transactions. (1988) Presents the conceptual basis and framework of government transactions in the national income and product accounts; describes the presentations of the estimates; and delineates the sources and methods used to prepare estimates of Federal transactions and of State and local transactions. 112 pages. \$5.50 (GPO Stock No. 003-010-00187-9).

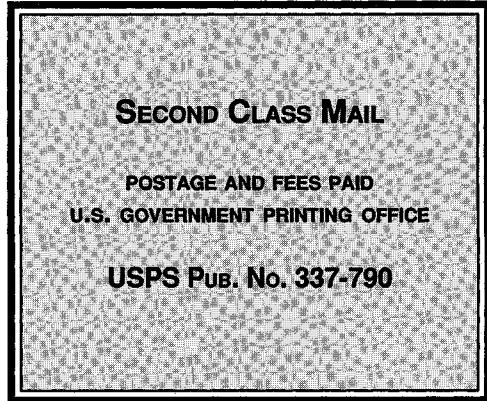

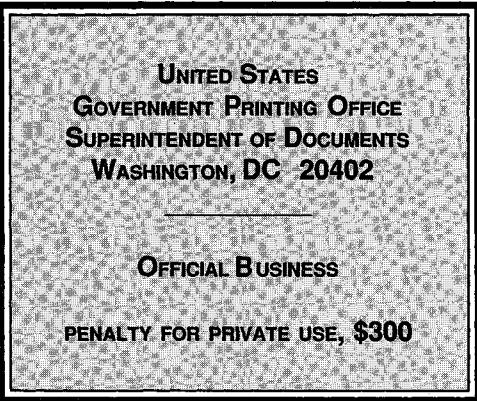

Fixed Reproducible Tangible Wealth in the United States, 1925-85. (1987) Contains annual estimates of the stock of privately owned and government-owned durable equipment and structures and of durable goods owned by consumers in the United States for 1925-85. Estimates are for fixed nonresidential private capital by major industry group (farm, manufacturing, and nonfarm nonmanufacturing), for residential capital by tenure group (owner-occupied and tenant-occupied), for government-owned fixed capital by type of government (Federal and State and local), and for 11 types of durable goods owned by consumers. 400 pages. \$18.00 (GPO Stock No. 003-010-00177-1).

State Personal Income: 1929-87. (1989) Contains annual estimates for 1929-87 of total personal income, annual estimates for 1948-87 of disposable personal income, and quarterly estimates for 1969-88 of total personal income. Also contains a statement of methodology. 320 pages. \$16.00 (GPO Stock No. 003-010-00197-6).

Foreign Direct Investment in the United States: 1987 Benchmark Survey, Preliminary Results. (1989) Presents preliminary results of BEA's 1987 benchmark survey of foreign direct investment in the United States. Contains information on the financial structure and operations of U.S. affiliates of foreign direct investors in 1987. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 100 pages. \$5.00 (GPO Stock No. 003-010-00188-7).

Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies, Revised 1986 Estimates. (1989) Contains information on the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 160 pages. \$3.25 (GPO Stock No. 003-010-00190-9).

U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates. (1989) Presents results of BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of both U.S. parent companies and their foreign affiliates. Data are classified by country and industry of foreign affiliate and by industry of U.S. parent. 80 pages. \$4.25 each. **Preliminary 1987 Estimates:** GPO Stock No. 003-010-00191-7. **Revised 1986 Estimates:** GPO Stock No. 003-010-00189-5.

Schedule of Upcoming BEA News Releases

<i>Subject</i>	<i>Release Date</i>
Summary of International Transactions, 1st quarter 1990.....	June 12
Gross National Product, 1st quarter 1990 (final).....	June 21
