Survey of Current Business

Table of Contents November/December 1995

Special in this issue

1. Gross Domestic Product, Third Quarter 1995 (Preliminary); Corporate Profits, Third Quarter 1995 (Preliminary); and Revised Estimates, 1959–95

As this issue of the SURVEY OF CURRENT BUSINESS went to press, BEA released revised estimates of GDP and related measures for 1959 through the third quarter of 1995 from a comprehensive revision of the NIPA's. The revised estimates show that real GDP increased 3.2 percent in the third quarter of 1995, following a 0.5-percent increase in the second. For 1959–94, the revised estimates of real GDP show an average annual growth rate of 3.2 percent, 0.2 percentage point faster than the previously published estimates.

48. Personal Income and Outlays, October and November 1995

As this issue of the SURVEY went to press, BEA released new monthly estimates of personal income and related measures for October and November 1995 and revised estimates beginning with 1959 from the comprehensive NIPA revision. Personal income increased 0.2 percent in November 1995 after increasing 0.7 percent in October (not at annual rates). Personal income was revised up for all years, largely reflecting upward revisions to rental income of persons and to other labor income.

Regular features

58. U.S. International Transactions, Third Quarter 1995

The U.S. current-account deficit decreased \$3.8 billion, to \$39.5 billion, in the third quarter. The decrease was more than accounted for by a smaller deficit on trade in goods and services, as exports rose and as imports fell. In contrast, both net unilateral transfers and the deficit on investment income increased.

Reports and statistical presentations

56. Selected Monthly Estimates

84. Subject Guide: Volume 75 (1995)

- C-29. Sources for business cycle indicators

CHANGES IN THE PUBLICATION OF THE SURVEY

Federal Government shutdowns resulted in the suspension of BEA operations on November 14–19 and on December 18–January 5; in addition, a major East Coast snowstorm halted operations on January 8–10 and January 12. As a result, the schedules for the preparation and release of BEA's national, regional, and international accounts estimates have been changed substantially. In particular, BEA was forced to delay the release of the revised estimates from its comprehensive revision of the NIPA's by over a month. For information about BEA's news release schedule, see the back cover of this issue. In turn, the publication schedule for the SURVEY has also been affected. The following is a tentative schedule beginning with this issue:

November/December issue. Publication of this issue was delayed from mid-December to late January. As noted in the October 1995 SURVEY, this issue includes the revised estimates from the comprehensive NIPA revision. As a result of the transfer of responsibility for preparation and dissemination of the composite indexes to The Conference Board, this issue is the last one that will carry the regular presentation of the "Business Cycle Indicators" (C-pages) section; a listing of sources for the series that appear in that section begins on page C-29.

January/February issue. The January and February issues of the SURVEY will be consolidated into a single issue to be published in mid-February. This consolidation will result in the skipping of one issue of the SURVEY; however, subscribers will still receive 12 issues of the SURVEY. This issue will include an article describing the comprehensive NIPA revision, along with detailed annual tables for 1991–94 and summary historical tables back to 1959. It will also include a presentation of historical data from the "Business Cycle Indicators" section and the listing of data sources.

March issue. Beginning with this issue, to be published in early March, the cover date designation of the SURVEY will match the month of publication. This issue will include the remainder of the historical data presentation from the "Business Cycle Indicators" section and the listing of data sources.

GROSS DOMESTIC PRODUCT: THIRD QUARTER 1995 (PRELIMINARY)

CORPORATE PROFITS: THIRD QUARTER 1995 (PRELIMINARY)

REVISED ESTIMATES, 1959-95

REAL GROSS DOMESTIC product—the output of goods and services produced by labor and property located in the United States—increased at an annual rate of 3.2 percent in the third quarter of 1995, according to preliminary estimates released by the Commerce Department's Bureau of Economic Analysis. In the second quarter, real GDP increased 0.5 percent. In chained (1992) dollars, real GDP increased \$53.8 billion in the third quarter, following an increase of \$7.8 billion in the second.

About one-half of the 3.2-percent increase in third-quarter GDP was accounted for by personal consumption expenditures. Fixed investment and exports each accounted for about one-quarter of the increase in GDP. A slight increase in imports and a slight decrease in government moderated the increase in GDP.

The *price index for gross domestic purchases*, which measures prices paid by U.S. residents, increased 2.0 percent in the third quarter, compared with an increase of 2.9 percent in the second.

Real personal consumption expenditures increased 2.9 percent in the third quarter, compared with an increase of 3.4 percent in the second. *Real nonresidential fixed investment* increased 5.3 percent, compared with an increase of 3.6 percent. *Real residential fixed investment* increased 8.4 percent, in contrast to a decrease of 13.3 percent.

Real Federal Government consumption expenditures and gross investment decreased 5.5 percent in the third quarter, compared with a decrease of 1.1 percent in the second. National defense decreased 7.5 percent, in contrast to an increase of 0.9 percent. Nondefense decreased 1.2 percent, compared with a decrease of 5.2 percent. *Real State and local government* increased 2.8 percent, compared with an increase of 2.1 percent.

Real exports of goods and services increased 8.3 percent, compared with an increase of 4.6 percent. *Real*

imports of goods and services increased 1.2 percent in the third quarter, compared with an increase of 7.7 percent.

Real final sales of domestic product, the sum of the above expenditure components, increased 3.5 percent in the third quarter, compared with an increase of 1.8 percent in the second.

The *real change in business inventories* subtracted \$3.5 billion from the third-quarter change in real GDP, after subtracting \$23.9 billion from the second-quarter change. Businesses increased inventories \$27.1 billion in the third quarter, following increases of \$30.6 billion in the second quarter and \$54.5 billion in the first.

Gross national product

Real gross national product—the goods and services produced by the labor and property supplied by U.S. residents—increased 2.9 percent in the third quarter, compared with an increase of 0.3 percent in the second. GNP includes, and GDP excludes, net receipts of factor income from the rest of the world.

Current-dollar GDP

Current-dollar GDP—the market value of the nation's output of goods and services—increased 5.7 percent, or \$100.7 billion, in the third quarter. In the second quarter, current-dollar GDP increased 2.8 percent, or \$48.7 billion.

Revisions

The preliminary estimate of the third-quarter increase in real GDP is 1.0 percentage point smaller than the advance estimate issued October 27, 1995. The downward revision was mainly due to the shift to new chain-type measures of real GDP.

Corporate Profits

Profits from current production (profits before tax with inventory valuation and capital consumption adjustments) increased \$53.3 billion in the third quarter. In the second quarter, profits increased \$1.5 billion. Current-production cash flow (net cash flow with inventory valuation and capital consumption

adjustments)—the internal funds available to corporations for investment—increased \$44.9 billion in the third quarter, compared with an increase of \$8.5 billion in the second.

[Percent change from preceding quarter at quarterly rate]

	1994		1995	
	IV	I	II	III
Corporate profits from current production.....	3.5	-1.6	0.3	9.5
Profits before tax	4.2	4.2	-1.0	3.6
Profits after tax.....	3.7	5.6	-0.7	2.9
Current-production cash flow9	-1.9	1.5	7.8

Domestic profits of financial corporations increased \$17.7 billion in the third quarter, in contrast to a decrease of \$1.6 billion in the second.

Domestic profits of nonfinancial corporations increased \$40.2 billion in the third quarter, in contrast to a decrease of \$0.1 billion in the second. In the third quarter, both real gross corporate product and profits per unit of real product increased. The sharp increase in unit profits reflected larger increases in the prices corporations received than in the unit costs they incurred; both unit labor and nonlabor costs decreased.

The foreign component of profits decreased \$4.6 billion in the third quarter, in contrast to an increase of \$3.0 billion in the second. This component measures receipts by U.S. residents of dividends and reinvested earnings of foreign affiliates of U.S. corporations, less corresponding payments to foreign residents. The third-quarter decrease was accounted for by a decrease in receipts and an increase in payments.

Profits before tax with inventory valuation adjustment is the best available measure of industry profits because estimates of the capital consumption adjustment by industry do not exist. According to this measure, domestic profits of financial corporations increased. Commercial banks, reflecting lower deposit insurance premiums, accounted for more than half of the increase. Manufacturing accounted for a third of the increase in the domestic profits of nonfinancial corporations. Profits increased in all of the other industry groups.

Profits before tax increased \$21.2 billion in the third quarter, in contrast to a decrease of \$5.7 billion in the second. The before-tax measure of profits does not reflect, as does profits from current production, the capital consumption and inventory valuation adjustments; these adjustments convert depreciation and inventories reported by business to the measures used in the national income and product accounts. The capital consumption adjustment decreased \$0.4 billion in the third quarter (from \$15.0 billion to \$14.6 billion), compared with a decrease of \$2.4 billion in the second. The inventory valuation adjustment increased \$32.5 billion (from -\$42.3 billion to -\$9.8 billion), compared with an increase of \$9.6 billion.

Profits tax liability increased \$10.3 billion in the third quarter, in contrast to a decrease of \$3.1 billion in the second. Profits after tax increased \$11.0 billion, in contrast to a decrease of \$2.7 billion. Dividends increased \$3.9 billion, compared with an increase of \$2.9 billion; undistributed profits increased \$7.0 billion, in contrast to a decrease of \$5.5 billion.

Comprehensive Revision of the National Income and Product Accounts

BEA is releasing today national income and product account (NIPA) estimates beginning with 1959 that reflect the results of the 10th comprehensive revision of the accounts. A comprehensive revision incorporates (1) definitional and classificational changes that update the accounts to portray more accurately the evolving U.S. economy, (2) statistical changes that update the accounts to reflect the introduction of new and improved methodologies and the incorporation of newly available and revised source data, and (3) presentational changes that update the NIPA tables to reflect definitional, classificational, and statistical changes and to make the tables more informative. The last comprehensive revision was completed in December 1991.

The major improvements incorporated in this comprehensive revision include new featured measures of real output and prices, the treatment of government expenditures for structures and equipment as investment, and the implementation of an improved empirical basis for the estimates of depreciation. The revised estimates also reflect the incorporation of newly available source data and improved estimating methodologies. The most important source data that affect the current-dollar estimates are the following: BEA's benchmark 1987 input-output (I-O) tables; the 1991 Residential Finance Survey; the 1992 Economic Censuses; Internal Revenue Service (IRS) tabulations

Availability of Revised Estimates and Related Information

Revised estimates, beginning with 1959, for selected NIPA tables are available through the Commerce Department's STAT-USA (Economic Bulletin Board and Internet).

The revised estimates will be available on diskette. To obtain an order form indicating the cost of obtaining these estimates and the schedule and cost of other materials, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-9700.

The following recent issues of the SURVEY OF CURRENT BUSINESS contain information about the comprehensive revision:

- July 1995: Preview of BEA's new featured measures of output and prices.
- September 1995: Definitional and classification changes.
- October 1995: New and redesigned tables.

of tax returns for corporations for 1992–93 and for sole proprietorships and partnerships for 1993; Census Bureau annual surveys of manufactures, wholesale trade, and retail trade for 1993, of services for 1993–94, and of State and local governments for 1992–94; and tabulations of wages of employees covered by State unemployment insurance for 1994. New source data for prices are the following: BEA estimates for exports and imports of semiconductors for 1981–94, Bureau of Labor Statistics (BLS) price indexes for hospitals beginning with 1993 and for physicians beginning with 1994, and prices for food and housing for 1978–94 based on BLS improvements to the Consumer Price Index. The most important improvements in methodologies, in addition to the one for depreciation, affect the estimates of expenditures for new automobiles and trucks and the estimates of employer and employee contributions to private pension plans.

The tables in this release, and the related tables that will appear in the SURVEY OF CURRENT BUSINESS, have been changed to reflect the new featured measure of output, including the use of "chained" dollar series and the presentation of new information on contributions to growth in real GDP. The chained (1992) dollar estimates are presented for all series that previously were shown in constant dollars; this change does not affect the presentation of any current-dollar series. Additional information about the new featured measures is provided in the newly added "explanatory note" at the end of the release.

For this revision, most current-dollar series are revised from the present back to 1983, and many are revised back to 1959, the earliest year for which the revised estimates are now available. Current-dollar GDP and other current-dollar series affected by the new treatment of government expenditures for structures and equipment will be revised back to 1929, as will all "real" series to reflect the shift to the chain-type measure. The tables in this release provide revised annual estimates for 1959 and annual and quarterly estimates beginning with 1982 for most major series. For information about the availability of additional estimates, see the box on page 2.

The revisions

Real GDP.—For 1959–94, the average annual growth rate of real GDP, using the chain-type measure, is 3.2 percent, 0.2 percentage point higher than in the previously published estimates, which were measured using fixed (1987) weights. The revised estimates over this period show higher growth rates for all major components of GDP except for imports of goods and services, which was unrevised. The growth rates for personal consumption expenditures (PCE) for durable goods and for nonresidential producers' durable equipment (PDE) are revised up the most. For the GDP and most of its major components, the shift from fixed weights to chain weights for the featured measures accounts

for most of the higher growth rates. (See **table A** and **table 1A**.)

The revisions for the entire 1959–94 period reflect offsetting revisions for two subperiods—1959–87 and 1987–94. (The selection of 1987 as the intermediate year reflects the use of fixed 1987 weights in the previously published featured measures.) For 1959–87, the average annual growth rate of real GDP is now 3.4 percent, 0.3 percentage point higher than in the previously published estimates; for 1987–94, the growth rate is 2.3 percent, or 0.1 percentage point lower.

Annually, the rates of change in real GDP for 1959–87 are unrevised for 1960, 1967, and 1970 and revised up in all other years except 1961 and 1987. These revisions are primarily due to the shift to the chain-type measure. Upward revisions of 0.5 percentage point or more are recorded in 9 of these years; the largest upward revision (0.9 percentage point) is for 1965.

For 1988–94, the direction of the revisions to annual changes in real GDP is mixed. The largest upward revisions are recorded for 1989 (up 0.9 percentage point to 3.4 percent) and for 1992 (up 0.4 percentage point to 2.7 percent). The largest downward revisions are recorded for 1991 (down 0.4 percentage point to –1.0 percent), for 1993 (down 0.9 percentage point to 2.2 percent), and for 1994 (down 0.6 percentage point to 3.5 percent). These downward revisions are more than accounted for by revisions both to the current-dollar estimates and to the shift to the chain-type measure; they are partly offset by "other" revisions, such as revisions to prices.

The pattern of annual accelerations and decelerations in the change in real GDP is unrevised for most periods. However, for 1992 and 1993, the revised estimates show a slowdown in growth, from 2.7 percent for 1992 to 2.2 percent for 1993. In the previously published estimates, GDP growth accelerated from 2.3 percent for 1992 to 3.1 percent for 1993. Most of this revision is due to the revised current-dollar estimates.

The size and direction of the revisions to the changes in real GDP are largely consistent with the difference between the previously published chain-type measure and fixed (1987) weighted measure and, as noted, result from use in the new featured measure of weights that allow for the effects of changes in relative prices over time. The previously used fixed-weighted measures, which are calculated using a single set of weights over the entire time period, include a "substitution bias" for periods other than those close to the weight year. (For further information, see "**Preview of the Comprehensive Revision of the NIPA's: BEA's New Featured Measures of Output and Prices**" in the July 1995 SURVEY OF CURRENT BUSINESS.)

To facilitate analytical comparisons, BEA is making available estimates of real GDP using fixed (1992) weights. On the revised basis, this measure of real GDP shows an average annual increase for 1959–87 of 3.1 percent, 0.3 percentage point lower than the increase in the revised chain-type measure, and an average an-

nual increase for 1987–94 of 2.2 percent, 0.1 percentage point lower than the increase in the revised chain-type measure. (Detailed tables based on fixed (1992) weights will be made available from STAT-USA shortly after the news release.)

Business cycles.—As in the previously published estimates, real GDP reached the most recent cyclical trough in the first quarter of 1991. The total decrease in real GDP from the second quarter of 1990 to the first quarter of 1991 is now 2.0 percent (not at an annual rate);

in the previously published estimates, the decrease had been 1.5 percent. The larger decrease in the revised estimates primarily reflects revised current-dollar estimates. From the first quarter of 1991 to the third quarter of 1995, the average annual rate of increase in real GDP is now 2.5 percent; in the previously published estimates, the increase had been 3.1 percent. The smaller increase for this part of the expansion reflects both downward revisions to current-dollar estimates and the shift in the featured measure. For the most recent complete expansion, which began in the third

n.a. Not applicable.

1. Change in revised chain-type measure less change in fixed (1987) weighted measure.

2. Change in previously published chain-type measure less change in previously published fixed

(1987) weighted measure.

3. Consists primarily of revisions to prices.

quarter of 1982 and ended in the second quarter of 1990, real GDP shows an average annual increase of 3.8 percent, 0.3 percentage point higher than in the previously published estimates.

Prices.—For 1959–94, the average annual increase in GDP prices is 4.4 percent. Because BEA had determined that using 1987 weights for measuring prices for years before 1982 was inappropriate, no comparison can be made with the previously published estimates. For 1987–94, the revised chain-type index for GDP prices increases 3.4 percent, compared with a 3.7-percent increase in the previously published fixed (1987) weighted measure. Most of this difference is due to the shift in the featured measure. For prices of gross domestic purchases, the revised change in the chain-type index is 3.4 percent, compared with 3.6 percent.

Real disposable personal income (DPI).—For real DPI, the average annual increase for 1959–94, at 3.3 percent, is 0.1 percentage point higher than in the previously published estimate. For 1959–87, the average annual increase in revised real DPI is 3.6 percent, 0.2 percentage point higher; for 1987–94, the average increase is 2.2 percent, 0.2 percentage point lower.

Personal saving rate.—For 1959–94, the personal saving rate is revised up for all years except 1983 and 1994. For 1994, the rate was revised down 0.3 percentage point. In combination with upward revisions of 0.4 percentage point to 1992 and to 1993, the revised rates show a steeper dropoff for 1992–94; the revised rates are 5.9, 4.5, and 3.8 percent, respectively (see table 3A). The largest upward revision, 0.9 percentage point, is for 1963. As in the previously published estimates, the highest saving rate during this period was for 1973; the rate was revised up 0.3 percentage point to 9.3 percent.

Major sources of the revision

The revisions to the NIPA estimates released today reflect the incorporation of definitional and classificational as well as statistical changes. The revisions to current-dollar GDP, to personal income and its disposition, and to national income are shown in table 1C; revisions to corporate profits are shown in table 1D.

In this comprehensive revision, there are two definitional and classificational changes: The recognition of government investment and the redefinition of the Federal Government's contributions to both civilian and military retirement programs. Both of these changes increase the level of GDP; the redefinition of contributions also increases national income. The recognition of government expenditures for structures and equipment as investment, which affects all periods, provides a more complete measure of investment through the consistent treatment of assets whether purchased by the public or private sector. It also improves the international comparability of U.S. estimates of saving and investment by moving toward the treatment of government investment in the

international System of National Accounts. (For further information, see "Preview of the Comprehensive Revision of the National Income and Product Accounts: Recognition of Government Investment and a New Methodology for Calculating Depreciation" in the September 1995 SURVEY OF CURRENT BUSINESS.) The redefinition of the contributions to the retirement programs includes, as contributions, payments that began in 1969 to the Civil Service Retirement Fund for interest on unfunded liability; similar payments by private firms are included in the contributions to private funds. For the military retirement programs, contributions beginning with the fourth quarter of 1984, when a formal retirement trust fund was established, are now recorded as the actual contributions. Previously, contributions were "imputed" to equal the benefits paid out of the current operating budget.

Several types of statistical changes were incorporated: (1) Improved estimates of changes in output and prices; (2) new estimating procedures; (3) new and revised data from regular sources that become available less often than annually; (4) new and revised data from regular sources that are usually incorporated at the time of the annual NIPA revision, and (5) updated seasonal factors for quarterly estimates.

The first change, the shift to featuring chain-weighted measures, which results in revisions to both the real estimates and price indexes for all periods, was discussed earlier. Of the new estimating procedures, the most important in terms of the revisions is the implementation of a new methodology for estimating depreciation, or consumption of fixed capital, which affects current-dollar estimates for all years. The new methodology puts these estimates on a firmer empirical foundation, by replacing the straight-line depreciation patterns used in the previous method with new estimates based on studies of the prices of used equipment and structures in resale markets. Although the total revision to the consumption of private fixed capital is downward, there are significant variations in the revisions to the depreciation for different types of assets and to the corresponding income estimates. For example, depreciation on structures, which have long service lives, such as residential dwellings, is revised downward. (For further information on BEA's new methodology for estimating depreciation see "Preview of the Comprehensive Revision of the National Income and Product Accounts: Recognition of Government Investment and a New Methodology for Calculating Depreciation," SURVEY, September 1995.) The most important new and revised source data incorporated in this comprehensive revision are discussed in the next section.

Current-dollar GDP is revised up for all years. The average revision to the level of GDP is 2.8 percent; the smallest revisions were 2.3 percent for 1964–66, and the largest revision was 3.7 percent, for 1992. For all years, the upward revisions are almost entirely accounted for by two components—PCE and "government consump-

tion expenditures and gross investment." (The latter component is the redefined government component of GDP; it replaces "government purchases.") The most significant downward revisions are to nonresidential PDE.

The revision to government consumption expenditures and gross investment for all years is primarily accounted for by the definitional and classificational changes, mostly by the recognition of government investment. This change raises government consumption expenditures and GDP by including as expenditures the services of government fixed assets, which is measured as depreciation, or consumption of fixed capital. Excluding the definitional and classificational changes, GDP is revised up for all years beginning with 1968, and the largest revision is 1.7 percent for 1992.

The upward revisions to PCE, which begin in the late 1960's, increase in size until 1992 and then taper somewhat in 1993 and 1994. Through 1992, the largest upward revisions are to services. Nondurables goods also are revised up during this period; durable goods are revised up through 1990 and are revised down in subsequent years.

For services, the estimates are revised upward beginning with 1983, primarily because of the incorporation of the results of the 1991 Residential Finance Survey (a follow-on survey to the 1990 Census of Housing) into the estimates of housing services. For tenant-owned units, this survey provides direct estimates of rental payments for tenant-occupied dwellings. For owner-occupied units, the rental payments represent an estimate of how much owners would pay if they rented their dwellings instead of owning them. These estimates are based on the actual rental payments data and information from the residential finance survey on the value of tenant- and owner-occupied units. The smaller upward revisions to PCE services for 1993 and 1994 primarily reflect the incorporation of newly available data from the Census Bureau's service annual survey and other source data usually incorporated as part of a regular annual revision.

The estimates of nondurable goods are revised upward beginning with the late 1960's. The revisions through 1987 primarily reflect the incorporation of the results of the 1987 1-o table; the revisions from 1988 to 1992 primarily reflect the extrapolation of the revised 1987 estimates using data on merchandise line receipts from the 1992 Census of Retail Trade; and the revisions for 1993-94 primarily reflect the extrapolation of the 1992 estimates using newly available retail store sales data from the 1993 Annual Retail Trade Survey and revised monthly store sales for 1994. The upward revisions are more than accounted for by revisions to the food category and primarily reflect the use of a higher consumer share for purchases of restaurant meals. The higher share was estimated as part of the preparation of the 1987 1-o table and was based on a detailed analysis of restaurant receipts by type of restaurant using data from the 1987 Census of Re-

tail Trade. For 1983 to 1987, the upward revisions to food are partially offset by downward revisions to other nondurable goods categories, primarily household supplies; beginning with 1988, these downward revisions were more than offset by upward revisions to purchases of prescription drugs and to food purchased at grocery stores.

The pattern of the revisions to durable goods PCE reinforces the upward revisions to nondurable goods through 1990; beginning with 1991, durable goods are revised down. The upward revisions reflect the incorporation of data for 1987 from the 1-o table, primarily for purchases of tires and motor vehicle accessories and of furniture and household equipment. The downward revisions reflect the incorporation of data from the 1992 Census of Retail Trade, also primarily to household furniture and, beginning with 1991, revisions to purchases of motor vehicles. The revisions to motor vehicles reflect lower estimates of both new and used vehicles. The revisions to new vehicles primarily reflect lower estimates of average expenditures per car based on an improved methodology that utilizes more comprehensive information on average list prices and that more completely takes account of rebates and optional equipment prices. The revisions to used vehicles primarily reflect newly incorporated trade association data on business retention of vehicles.

The downward revisions to PDE, which begin to be significant in 1988, are primarily accounted for by lower purchases of new automobiles and of communications equipment. Purchases of new automobiles are revised downward for 1988-94 to reflect the incorporation of the new estimates of average expenditures per car and, for 1992-94, lower unit sales. Purchases of communications equipment are revised down for 1987-94 to reflect newly available data from the 1987 1-o table, the 1992 Census of Manufactures, the 1993 Annual Survey of Manufactures, and revised monthly shipments data for 1994.

Personal income is revised up for all years (see middle panel of table 1c). The average revision to the level of personal income is 1.1 percent. The size of these revisions increases from 0.6 for 1959 to 2.5 percent for 1989 and for 1990. The revisions are slightly smaller for 1991-93, and for 1994, personal income is revised up by only 0.9 percent. Except for 1994, the revisions are primarily accounted for by upward revisions to rental income of persons and to other labor income. The smaller upward revision for 1994 is primarily accounted for by downward revisions to wage and salary disbursements and to personal interest income.

The upward revision to rental income of persons reflects two major revisions. The first, which affects all years, is the implementation of the improved methodology for estimating depreciation, which is deducted in the calculation of rental incomes. The second, which begins in 1982, is the incorporation of revised owner- and tenant-occupied rental payments based on data from the 1991 Residential Finance Survey—the

same revised payments that increased PCE. The revisions due to the new depreciation estimates account for almost all of the revisions prior to 1985; the upward revisions due to higher rental payments, and also due to lower expenses, increased gradually through 1994, when they account for about half of the revision to rental income.

The upward revisions to other labor income primarily reflect two changes. Beginning with 1984, the revisions reflect the incorporation of revised estimates of employer contributions to private health insurance based primarily on revised estimates from the Health Care Financing Administration. Beginning with 1983, they reflect the incorporation of newly developed estimates of private employer contributions to pension plans, based on Department of Labor tabulations of contributions data reported on Form 5500. The smaller upward revision to personal income for 1994 (\$48.9 billion), compared with the upward revision for 1993 (\$104.4 billion), is primarily accounted for by downward revisions to wage and salary disbursements and to personal interest income, both of which are revised upwards for 1993. The upward revisions to wage and salary disbursements, which begin in 1979, primarily reflect a new adjustment to account for voluntary contributions by employees to thrift savings plans, which had not been included in the source data. For 1994, the downward revision reflects the incorporation of newly available tabulations of wages of workers covered by State unemployment insurance. The upward revision to personal interest income for 1993 and the downward revision for 1994 primarily reflect the incorporation of newly available IRS tabulations of corporate, sole proprietorship, and partnership tax return data for 1993, reports of several Federal regulatory agencies for 1994, and other source data usually incorporated as part of a regular annual revision.

There were also downward revisions to nonfarm proprietors' income for almost every year beginning with 1959, with large downward revisions for 1986–87 and 1993–94. The downward revisions through 1982 primarily reflect the incorporation of the new depreciation estimates, which affect the capital consumption adjustment. The revisions for 1986–87 primarily reflect the incorporation of revised adjustments for misreporting on tax returns, based largely on the results of the IRS taxpayer compliance measurement program for 1988. The downward revisions for 1993–94 primarily reflect the incorporation of the tabulations of sole proprietorship and partnership tax return data for 1993.

National income is revised up for all years, and revisions to the levels of national income are generally larger than those to personal income except for 1993 and 1994 (see bottom panel of table 1c). These larger revisions primarily reflect revisions to employer contributions for social insurance (a component of supplements to wages and salaries), which is included

in national income but excluded from personal income. The upward revisions to these contributions primarily are due to the definitional change that redefined contributions to Federal Government pension plans beginning with 1969. For 1993–94, the smaller revisions to national income than to personal income are primarily accounted for by corporate profits, which is included in national income and excluded from personal income, and by net interest, which differs from personal interest income primarily because the latter includes net interest paid by government.

The revisions to the level of corporate profits are downward for all years except for upward revisions for 1981–82 and 1984–85; the downward revisions for 1993–94 are larger than those for the other years. The profits before tax component is revised up in all years beginning with 1983 to reflect the incorporation of the latest balance-of-payments accounts estimates of profits from the rest of world and of improved estimates for the impact of amortization of intangible assets on tax returns. Revisions for 1992–94 reflect the incorporation of revised 1992 and preliminary 1993 corporate tax return data. The capital consumption adjustment component, which is the difference between BEA's estimates of depreciation and depreciation based on tax return data, is revised down for almost every year. Except for the upward revisions for 1981–84 and the unusually large downward revisions for 1993–94, the revisions reflect the incorporation of the improved estimates of depreciation. Revisions for the other years reflect revised adjustments to tax return depreciation, such as adjustments for amortization of intangibles and for depreciation at foreign branches, or newly available tax return data, including revised estimates for 1981–84.

The downward revision to net interest for 1994 is significantly larger than the downward revision to personal interest income for that year. The difference is accounted for by downward revisions to both Federal and State and local government net payments. The revisions to Federal net interest primarily reflect the incorporation of the results of a more detailed analysis of budget documents, including those related to recent changes in the budget treatment of credit programs. The revisions to State and local government net interest primarily reflect the incorporation of newly available regular source data for 1993–94.

Explanatory Note: Measures of Output and Prices

Changes in current-dollar GDP measure changes in the market value of goods and services produced in the economy in a particular period. For many purposes, it is necessary to decompose these changes into quantity and price components. This note describes the indexes used by the Bureau of Economic Analysis (BEA) to estimate the quantity and price changes presented in

this release and in the related tables that appear in the SURVEY OF CURRENT BUSINESS.

To compute the quantity indexes, changes in the quantities of individual goods and services are weighted by their prices. (Quantity changes for GDP are often referred to as changes in "real GDP.") For the price indexes, changes in the prices for individual goods and services are weighted by quantities produced. (In practice, the current-dollar value and price indexes for most GDP components are determined largely using data from Federal Government surveys, and the real values of these components are calculated by deflation at the most detailed level for which all the required data are available.)

Except for the most recent period, the annual and quarterly changes in real GDP and prices are "chain-type" measures that are both based on the "Fisher Ideal" formula that incorporates weights from two adjacent years. For example, the 1992–93 percent change in real GDP uses prices for 1992 and 1993 as weights, and the 1992–93 percent change in price uses quantities for 1992 and 1993 as weights. Because the quantity and price index numbers calculated in this way are symmetric, the product of the annual change in real GDP and the annual change in prices equals the annual change in current-dollar GDP.

In the most recent period (currently, for quarters beginning with the third quarter of 1994), a variant of the formula is used because only 1 year's information is available for computing the index number weights. Accordingly, BEA uses a single year's weights (currently 1994) and, as a consequence, the product of the percentage changes in the price and quantity indexes does not equal the current-dollar change during this period. For this reason, another measure, known as the "implicit price deflator," is presented in this release. The implicit price deflator is calculated as the ratio of current-dollar value to the corresponding chained-dollar value multiplied by 100.

The quantity and price indexes and implicit price deflators for GDP and its major components are pres-

ented in this release as index numbers in table 4 and in the form of percentage changes from the preceding period in tables 1, 2, 5A, and 5B. Table 5A also presents the contributions of the major components to the change in real GDP. In addition, BEA prepares measures of real GDP and its components in a dollar-denominated form, designated "chained (1992) dollar estimates." These estimates, which are presented in tables 2 and 3 of this release, are computed by multiplying the 1992 current-dollar value of GDP, or of a GDP component, by the corresponding quantity index number. For example, if a current-dollar GDP component equaled \$100 in 1992 and if real output for this component increased by 10 percent in 1993, then the "chained (1992) dollar" value of this component in 1993 would be \$110 ($\100×1.10). Note that percentage changes in the chained (1992) dollar estimates and the percentage changes calculated from the quantity indexes are identical, except for small differences due to rounding.

Because of the formula used for calculating real GDP, the chained (1992) dollar estimates for the detailed GDP components shown in tables 1 and 3 do not add to the chained-dollar value of GDP or to any intermediate aggregates. The "residual" line shown in these tables is the difference between GDP and the sum of the most detailed components shown in each table. For current periods, the residual is small. However, the residual tends to become larger as one moves further from the base period. In such cases, the table of contributions of the major components to the change in real GDP provides a better basis for determining the composition of GDP growth than the chained-dollar estimates.

Repost of Recruitment Announcement: Chief, National Income and Wealth Division

BEA is recruiting for the position of Chief of the National Income and Wealth Division. The main responsibility of this position is directing the preparation of estimates for the national income and product accounts of the United States, including gross domestic product, corporate profits, and personal income and outlays.

This is a career reserved position in the Senior Executive Service, salary range: \$97,991–\$122,040. The application deadline is February 27, 1996. (This announcement has been extended as a result of the recent Federal Government shutdowns—there is no need to reapply.) For a copy of the job announcement, please contact the BEA Administrative Office, (202) 606-5556. BEA is an Equal Opportunity Employer.

PERSONAL INCOME AND OUTLAYS: OCTOBER AND NOVEMBER 1995

PERSONAL INCOME INCREASED \$11.5 billion, or 0.2 percent, in November 1995 and \$45.2 billion, or 0.7 percent, in October, according to the Commerce Department's Bureau of Economic Analysis. Disposable personal income (DPI) increased \$12.5 billion, or 0.2 percent, in November 1995 and \$40.7 billion, or 0.8 percent, in October. Personal consumption expenditures (PCE) increased \$45.7 billion, or 0.9 percent, in November, after decreasing \$13.9 billion, or 0.3 percent, in October. In September, personal income increased \$30.8 billion, or 0.5 percent, DPI increased \$26.0 billion, or 0.5 percent, and PCE increased \$2.9 billion, or 0.1 percent, based on revised estimates.

Personal Income and Personal Consumption Expenditures

[Percent change from preceding month]

Chained (1992) dollars3	-.2	.5	.5	.2
Personal consumption expenditures:					
Current dollars1	.6	.1	-.3	.9
Chained (1992) dollars	-.1	.4	0	-.6	.9

Wages and salaries

Private wage and salary disbursements decreased \$3.8 billion in November, in contrast to an increase of \$30.0 billion in October. Commodity-producing industries' payrolls decreased \$0.2 billion, in contrast to an increase of \$0.6 billion; manufacturing payrolls increased \$0.2 billion, in contrast to a decrease of \$0.2 billion. Distributive industries' payrolls increased \$0.5 billion, compared with an increase of \$11.6 billion. Service industries' payrolls decreased \$4.1 billion, in

contrast to an increase of \$17.8 billion. Government wage and salary disbursements increased \$0.4 billion, compared with an increase of \$0.1 billion.

Other personal income

Proprietors' income increased \$1.1 billion in November, compared with an increase of \$4.6 billion in October. Farm proprietors' income increased \$0.6 billion, compared with an increase of \$1.6 billion. Nonfarm proprietors' income increased \$0.5 billion, compared with an increase of \$3.0 billion.

Transfer payments to persons increased \$5.3 billion in November, compared with an increase of \$4.0 billion in October. Rental income of persons increased \$3.5 billion, compared with an increase of \$3.7 billion. Personal interest income and personal dividend income increased a total of \$3.3 billion, compared with an increase of \$3.1 billion.

Personal taxes and disposable personal income

Personal tax and nontax payments decreased \$1.0 billion in November, in contrast to an increase of \$4.4 billion in October. Disposable personal income (DPI)—personal income less personal tax and nontax payments—increased \$12.5 billion, or 0.2 percent, in

Availability of Revised Estimates and Related Information

Revised estimates, beginning with 1959, for selected NIPA tables are available through the Commerce Department's STAT-USA (Economic Bulletin Board and Internet).

The revised estimates will be available on diskette. To obtain an order form indicating the cost of obtaining these estimates and the schedule and cost of other materials, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-9700.

The following recent issues of the SURVEY OF CURRENT BUSINESS contain information about the comprehensive revision:

- July 1995: Preview of BEA's new featured measures of output and prices.
- September 1995: Definitional and classification changes.
- October 1995: New and redesigned tables.

November, compared with an increase of \$40.7 billion, or 0.8 percent, in October.

Personal outlays and personal saving

Personal outlays—personal consumption expenditures (PCE), interest paid by persons, and personal transfer payments to the rest of the world (net)—increased \$46.5 billion in November, in contrast to a decrease of \$12.5 billion in October. PCE increased \$45.7 billion, in contrast to a decrease of \$13.9 billion.

Personal saving—disposable personal income less personal outlays—was \$244.8 billion in November, compared with \$278.8 billion in October. Personal saving as a percentage of disposable personal income was 4.5 percent in November, compared with 5.2 percent in October.

Chained (1992) dollar estimates

Real DPI—DPI adjusted to remove price changes—increased \$10.8 billion, or 0.2 percent, in November, compared with an increase of \$22.8 billion, or 0.5 percent, in October.

Real PCE—PCE adjusted to remove price changes—increased \$41.6 billion, or 0.9 percent, in November, in

contrast to a decrease of \$26.7 billion, or 0.6 percent, in October. Purchases of durable goods increased \$14.7 billion, in contrast to a decrease of \$9.2 billion; purchases of motor vehicles accounted for about half of the November increase and three-quarters of the October decrease. Purchases of nondurable goods increased \$9.7 billion in November, in contrast to a decrease of \$13.4 billion in October. Purchases of services increased \$17.4 billion, in contrast to a decrease of \$4.6 billion.

Revisions

Estimates have been revised for all periods, beginning with 1959. Personal income, personal outlays, personal saving, and personal saving as a percentage of disposable personal income for the years 1992–94 and November 1994 through September 1995, revised and as previously published, are shown in [Table 5](#). The large revisions to the pattern of monthly personal income in December 1993 and January 1994 are primarily due to the incorporation of new information on the timing of bonus payments.

Tables 1 through 5 follow.

1. Disposable personal income in chained (1992) dollars equals the current-dollar figure divided by the implicit price deflator for personal consumption expenditures.
 2. Monthly estimates equal personal saving for the month as a percentage of disposable personal income for

that month.

1. Monthly estimates equal the centered 3-month moving average of personal saving as a percentage of the centered 3-month moving average of disposable personal income.

2. Monthly estimates equal personal saving for the month as a percentage of disposable per-

sonal income for that month.

U.S. International Transactions, Third Quarter 1995

By Douglas B. Weinberg

THE U.S. current-account deficit decreased to \$39.5 billion in the third quarter from \$43.3 billion (revised) in the second (table A).¹ A decrease in the deficit on goods and services more than offset an increase in the deficit on investment income and higher net unilateral transfers.

In the capital account, net recorded capital inflows were \$62.8 billion in the third quarter, up from \$24.1 billion in the second. Capital outflows for U.S. assets abroad slowed sharply as a result of a shift to net inflows for bank-reported claims. Outflows for most other U.S. assets abroad strengthened. Capital inflows for foreign assets in the United States slowed as a result of a shift to net outflows for bank-reported

liabilities. Inflows for other foreign assets in the United States strengthened.

The statistical discrepancy—errors and omissions in recorded transactions—shifted to an outflow of \$23.3 billion in the third quarter from an inflow of \$19.2 billion in the second.

U.S. dollar in exchange markets

In the third quarter, the U.S. dollar appreciated 2 percent on a trade-weighted quarterly average basis against the currencies of 10 industrial countries and 3 percent against the currencies of 22 OECD countries plus 4 newly industrialized countries in Asia (table B, chart 1). The dollar appreciated particularly strongly against the Japanese yen.

The dollar appreciated 11 percent on a quarterly average basis against the Japanese yen, rising to roughly the same level that prevailed at the begin-

1. Quarterly estimates of U.S. current- and capital-account components are seasonally adjusted when statistically significant seasonal patterns are present. The accompanying tables present both adjusted and unadjusted estimates.

ning of 1995. Factors contributing to the dollar's rise included coordinated exchange-market intervention by U.S. and foreign monetary authorities and several initiatives by the Japanese Gov-

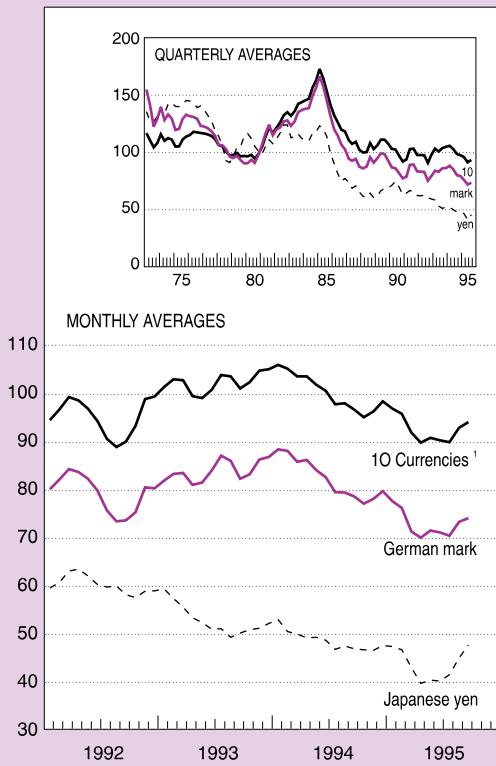

ernment to bolster their economy, including a lowering of short-term interest rates ([chart 2](#)).

The dollar appreciated less strongly—1 to 3 percent—against most major European

currencies. Coordinated exchange-market intervention and a decline in German short-term interest rates helped boost the dollar against most European currencies. However, these gains were partly reversed near the end of the quarter, when renewed concerns about the future of European monetary union contributed to appreciation of the German mark against other European currencies and the dollar.

The dollar changed little against the Mexican peso, as Mexican financial markets continued to stabilize and as the Mexican Government continued to reduce short-term debt obligations. The dollar depreciated slightly against the Canadian dollar.

Against the currencies of the newly industrialized countries in Asia, the U.S. dollar appreciated 5 percent against the Taiwan dollar and 1 percent against the Singapore dollar. The U.S. dollar was unchanged against both the South Korean won and the Hong Kong dollar.

Current Account

Goods and services

The deficit on goods and services decreased to \$27.5 billion in the third quarter from \$33.4 billion in the second. The deficit on merchandise trade decreased \$5.4 billion, and the surplus on services increased \$0.5 billion.

Merchandise trade.—The merchandise trade deficit decreased to \$43.4 billion in the third quarter from \$48.8 billion in the second. The decrease resulted from a moderate rise in exports and a moderate fall in imports.

Exports.—Exports increased \$2.5 billion, or 2 percent, to \$145.3 billion in the third quarter. Volume, measured in constant (1987) dollars, increased 4 percent (table C). Nonagricultural exports slowed and agricultural exports surged.

Nonagricultural exports increased \$1.1 billion, or 1 percent, to \$130.5 billion; volume increased 4 percent. Capital goods excluding civilian aircraft more than accounted for the current-dollar increase. Within capital goods, computers, peripherals, and parts surged 12 percent, semiconductors climbed 9 percent, telecommunications rose 8 percent, and electric generating machinery increased 5 percent. Automotive vehicles, engines, and parts increased after a sharp decline in the previous quarter; the rebound was mostly attributable to a rise in passenger cars to Japan. Industrial supplies and materials decreased, largely as a result of a fall in nonmonetary gold; a decline in export prices for industrial supplies and materials also contributed to the decrease in value.

Agricultural exports increased \$1.4 billion, or 10 percent, to a record \$14.8 billion; volume increased 5 percent. Wheat surged 52 percent and corn rose 31 percent, as tightened supplies and strong demand contributed to increases in both prices and volume. Soybeans and meat products also rose strongly.

Imports.—Imports decreased \$2.9 billion, or 2 percent, to \$188.7 billion in the third quarter. Volume, measured in constant (1987) dollars, increased 1 percent (table C). Despite a third-quarter rebound in U.S. domestic demand, current-dollar nonpetroleum imports decreased for the first time since the first quarter of 1991. Petroleum imports also fell.

Nonpetroleum imports decreased \$2.4 billion, or 1 percent, to \$174.7 billion; volume increased 1 percent. The largest decrease was in industrial supplies and materials, particularly nonmonetary gold, bauxite and aluminum, and iron and steel products. Automotive vehicles, engines, and parts also declined, mostly as a result of a fall in passenger cars from Japan. Consumer goods decreased because of the first decline in durable goods in more than a year. In contrast,

^r Revised.^p Preliminary.

capital goods continued to increase, led by strong rises in computers, peripherals, and parts and in semiconductors.

Petroleum imports decreased \$0.5 billion, or 4 percent, to \$14.1 billion. The decrease was attributable to a sharp decline in prices, which fell to an average of \$16.00 per barrel from \$17.55. The average number of barrels imported daily rose to 9.62 million from 9.10 million.

Balances by area.—Deficits with Japan, Western Europe, Canada, and Mexico all decreased in the third quarter, while deficits with China and the newly industrialized countries in Asia swelled.

Exports to Mexico increased 13 percent after decreasing in the previous three quarters (chart 3). The increase occurred despite continued economic contraction in Mexico and little change in the value of the dollar against the Mexican peso. Exports to Japan continued to rise, aided in part by past depreciation of the dollar against the yen. Exports to Singapore, Korea, and China also increased strongly. In contrast, exports to Western Europe and to Canada decreased for the first time in several quarters.

Imports from Western Europe decreased 12 percent, with declines widely spread among most countries in the region. Imports from Canada and Japan also fell. In contrast, imports from China surged 25 percent, and imports from the newly industrialized countries in Asia rose 13 percent.

Services.—The surplus on services increased to \$15.9 billion in the third quarter from \$15.4 billion in the second. Service receipts increased to \$52.3

billion from \$51.7 billion, and service payments were unchanged at \$36.4 billion.

Travel receipts decreased to \$14.8 billion from \$15.0 billion. Decreases in receipts from overseas visitors to the United States, who account for 85 percent of total travel receipts, and from Canadian visitors more than offset an increase in receipts from Mexican visitors. Travel payments decreased to \$11.1 billion from \$11.5 billion. Payments by U.S. visitors to Canada, Mexico, and countries overseas all decreased.

Passenger fare receipts were unchanged at \$4.5 billion, and passenger fare payments decreased slightly to \$3.3 billion from \$3.4 billion.

Other transportation receipts were unchanged at \$7.1 billion. A decrease in freight receipts—attributable to lower ocean, air, and truck receipts—was offset by an increase in port services receipts. Other transportation payments increased slightly to \$7.5 billion from \$7.4 billion. An increase in freight payments, attributable to higher ocean payments, more than offset a decrease in port services payments.

Receipts for other private services increased to \$15.8 billion from \$15.4 billion. The increase resulted from a surge in U.S. affiliates' service receipts from their foreign parents and a rise in education receipts. Payments for other private services increased to \$9.7 billion from \$9.4 billion, mostly as a result of a rise in securities transaction commission payments.

Investment income

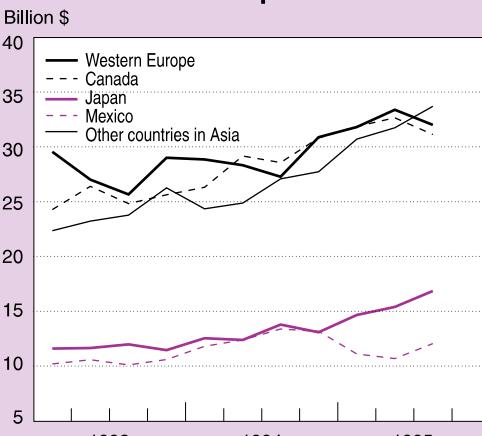

The deficit on investment income increased to \$4.2 billion in the third quarter from \$2.6 billion in the second. Income receipts on U.S. assets abroad decreased to \$44.6 billion from \$45.5 billion, and income payments on foreign assets in the United States increased to \$48.8 billion from \$48.1 billion.

Direct investment income.—Income receipts on U.S. direct investment abroad decreased to \$22.1 billion in the third quarter from \$22.5 billion in the second. A decline in earnings accounted for most of the decrease. Earnings of U.S. parents' foreign affiliates in the petroleum industry fell sharply, partly as a result of a drop in oil prices. Net interest receipts decreased a small amount.

Income payments on foreign direct investment in the United States increased to a record \$8.3 billion from \$7.8 billion. A surge in earnings more than accounted for the increase. Earnings of foreign parents' U.S. affiliates in insurance,

CHART 3

U.S. Merchandise Exports

U.S. Department of Commerce, Bureau of Economic Analysis

wholesale trade, and banking rose the most. Net interest payments decreased.

Portfolio investment income.—Other private income receipts increased to \$21.6 billion in the third quarter from \$21.5 billion in the second. The slight increase was accounted for by rises in receipts on both bank and nonbank claims, resulting from increases in average claims outstanding. U.S. Government income receipts decreased to \$0.9 billion from \$1.4 billion.

Other private income payments decreased to \$24.6 billion from \$25.2 billion. The decrease was accounted for by a drop in payments on U.S. corporate and other bonds that was attributable to a decline in interest rates. U.S. Government income payments increased to \$15.9 billion from \$15.1 billion. In the first three quarters of 1995, U.S. Government income payments increased as a result of exceptionally strong net foreign purchases of U.S. Treasury securities.

Unilateral transfers

Net unilateral transfers were \$7.8 billion in the third quarter, compared with \$7.2 billion in the second. The increase was largely attributable to a rise in U.S. Government grants that mostly resulted from forgiveness of debt owed by Jordan.

Capital Account

Net recorded capital inflows were \$62.8 billion in the third quarter, up from \$24.1 billion in the second. Capital outflows for U.S. assets abroad and capital inflows for foreign assets in the United States slowed as a result of reductions in bank-reported claims and liabilities. Securities transactions increased strongly, partly reflecting (1) rallies in U.S. stock and bond markets, following early- to mid-quarter price declines, (2) strong price increases in most major foreign stock markets, and (3) an upturn in the value of the U.S. dollar (chart 4).

U.S. assets abroad

U.S. assets abroad increased \$42.9 billion in the third quarter, following an increase of \$100.2 billion in the second. The third-quarter increase was more than accounted for by a surge in net U.S. purchases of foreign securities and a strengthening in U.S. direct investment abroad. U.S. claims reported by U.S. banks decreased, following an exceptionally strong second-quarter increase.

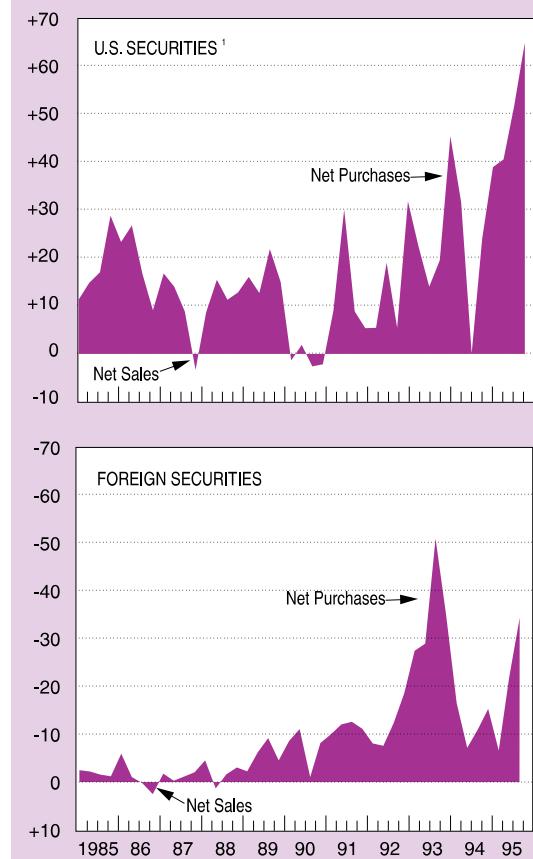

U.S. official reserve assets.—U.S. official reserve assets increased \$1.9 billion in the third quarter, following an increase of \$2.7 billion in the second (table D). Most of the third-quarter increase was accounted for by a rise in U.S. holdings of foreign currencies; these holdings were boosted by a \$2.5 billion increase in holdings of Mexican pesos that resulted from additional currency swaps between U.S. and Mexican monetary authorities under a medium-term swap facility. The increase in Mexican peso balances was partly offset by a \$1.5 billion decrease in holdings of German marks and Japanese yen that resulted from intervention sales of these currencies in foreign exchange markets by U.S. monetary authorities.

Claims reported by banks.—U.S. claims on foreigners reported by U.S. banks decreased \$14.9 billion in the third quarter, in contrast to an increase of \$40.0 billion in the second.

CHART 4

Securities Transactions

Billion \$

1. Includes marketable U.S. Treasury bonds and notes.

U.S. Department of Commerce, Bureau of Economic Analysis

Banks' own claims payable in dollars decreased \$7.1 billion, in contrast to an increase of \$28.2 billion. The decrease was largely accounted for by a reduction in claims on banks in Western Europe that was partly a result of both a slowdown in European economic activity and a larger decline in the cost of credit denominated in European currencies than in the cost of credit denominated in U.S. dollars. Claims on banks in the Caribbean were unchanged after a large second-quarter increase. Claims on other private foreigners increased as a result of substantial mid-quarter lending to the Caribbean, which coincided with a surge in net purchases of U.S. Treasury securities by investors from that area.

Banks' own claims payable in foreign currencies decreased \$7.9 billion, in contrast to an increase of \$4.7 billion. The decrease was largely attributable to a reduction in claims on Japan.

Banks' domestic customers' claims payable in dollars increased \$3.5 billion, following an increase of \$5.7 billion. A substantial increase in foreign commercial paper outstanding in the United States and a smaller rise in other negotiable and transferable instruments more than offset a drop in U.S. dollar deposits abroad.

Foreign securities.—Net U.S. purchases of foreign securities were \$34.3 billion in the third quarter, up from \$21.7 billion in the second. Net U.S. purchases of foreign stocks were a record \$20.5 billion, up from \$9.3 billion, and net U.S. purchases of foreign bonds were \$13.8 billion, up from \$12.5 billion.

The step-up in net U.S. purchases of foreign stocks was largely attributable to a substantial increase in net purchases from Japan. U.S. investors were attracted in part by a sharp upturn in

Japanese stock prices, which rose strongly for the first time in over a year. Net U.S. purchases from Western Europe also increased, as stock markets rallied in several European countries.

Net U.S. purchases of foreign bonds were boosted by an increase in foreign new issues in the United States. After being curtailed in the first and second quarters, placements in the United States by Latin American and other emerging market countries picked up. Placements by Canadian borrowers also rose. Net U.S. purchases of outstanding foreign bonds decreased, largely as a result of a fall in net purchases from the United Kingdom.

Direct investment.—Net capital outflows for U.S. direct investment abroad were \$21.7 billion in the third quarter, up from \$17.1 billion in the second. Net capital outflows were very strong in the first three quarters of 1995, surpassing the total for all of 1994. Third-quarter outflows were boosted by a shift to substantial net equity capital outflows from inflows; the shift resulted from an increase in acquisitions abroad and a decrease in liquidations of foreign affiliates. Transactions in intercompany debt shifted to small net inflows from net outflows, and reinvested earnings decreased slightly, but remained strong.

Foreign assets in the United States

Foreign assets in the United States increased \$105.7 billion in the third quarter, following an increase of \$124.3 billion in the second. The third-quarter increase was more than accounted for by exceptionally strong net foreign purchases of U.S. securities, a step-up in foreign direct investment in the United States, and a record increase in foreign official assets in the United

³ Consists of transactions of the Federal Reserve System and the U.S. Treasury Department's Exchange Stabilization Fund.

States. U.S. liabilities reported by U.S. banks decreased, following a second-quarter increase.

Foreign official assets.—Foreign official assets in the United States increased a record \$39.5 billion in the third quarter, following an increase of \$37.8 billion in the second (table D). The cumulative increase in foreign official assets in the first three quarters of 1995 has already surpassed the record annual increase in 1993.

Much of the third-quarter increase was accounted for by the assets of non-OPEC developing countries. A few developing countries boosted their dollar reserves substantially, partly as a result of both foreign capital inflows into their domestic economies and an increase in the attractiveness of dollar-denominated assets in comparison with assets denominated in other major currencies. Assets of industrial countries increased, partly as a result of exchange market intervention to support the dollar. Assets of OPEC members also increased.

Liabilities reported by banks.—U.S. liabilities reported by U.S. banks, excluding U.S. Treasury securities, decreased \$20.0 billion in the third quarter, in contrast to an increase of \$12.2 billion in the second.

Banks' own liabilities payable in dollars decreased \$15.5 billion, in contrast to an increase of \$6.1 billion. The decrease was more than accounted for by a sharp reduction in liabilities to banks in the Caribbean; the reduction partly resulted from a slowdown in bank lending in the United States that weakened U.S. banks' demand for funds. In contrast, liabilities to banks in Japan surged, as U.S. branches of Japanese banks, which encountered above-market funding costs in the interbank market, borrowed funds from home offices in Japan. Liabilities to other private foreigners and to international financial institutions increased by small amounts.

Banks' own liabilities payable in foreign currencies decreased \$4.6 billion, in contrast to an increase of \$9.9 billion. The decrease was more than accounted for by a reduction in liabilities to Japan.

U.S. Treasury securities.—Net foreign purchases of U.S. Treasury securities were a record \$36.8 billion in the third quarter, up from \$30.3 billion in the second. Net foreign purchases of

U.S. Treasury bonds were exceptionally strong for the fourth consecutive quarter. Third-quarter net purchases by investors from Western Europe surged to \$24.4 billion, aided in part by an increase in the yields available on U.S. bonds in relation to those available on European bonds. Net purchases by Japanese investors decreased but remained strong. Net purchases by investors from the Caribbean declined despite a mid-quarter surge.

Other U.S. securities.—Net foreign purchases of U.S. securities other than U.S. Treasury securities were \$30.0 billion in the third quarter, up from \$20.5 billion in the second. Net foreign purchases of U.S. stocks were \$4.8 billion, up from \$1.9 billion, and net foreign purchases of U.S. corporate and other bonds were \$25.2 billion, up from \$18.6 billion.

Net foreign purchases of U.S. stocks were encouraged by rising U.S. stock prices and by the upturn in the value of the U.S. dollar. Gross trading by foreigners picked up substantially for the second consecutive quarter, as the rally in the U.S. stock market faltered temporarily but then resumed. Third-quarter net purchases were largest by investors from the United Kingdom, the Caribbean, and Singapore.

Net foreign purchases of U.S. bonds were boosted by the strongest net foreign purchases of U.S. federally-sponsored agency securities since the fourth quarter of 1993. New issues sold abroad by U.S. corporations also increased. U.S. corporate issuance abroad was exceptionally strong in the first three quarters of 1995, partly reflecting both a step-up in financing for mergers and acquisitions and foreign investors' desire to profit from the U.S. bond market rally.

Direct investment.—Net capital inflows for foreign direct investment in the United States were \$19.3 billion in the third quarter, up from \$12.9 billion in the second. The increase was mostly accounted for by a surge in net equity capital inflows, which was largely attributable to a small number of large transactions between U.S. affiliates and foreign parents in Western Europe. Reinvested earnings also increased as a result of rises in both earnings and the proportion of earnings that were reinvested. Net intercompany debt inflows decreased.

Tables 1 through 10 follow. 

FOOTNOTES TO U.S. INTERNATIONAL TRANSACTIONS TABLES 1-10

General notes for all tables: ^r Revised. ^p Preliminary. *Less than \$500,000 (\pm). n.a. Not available.

^D Suppressed to avoid disclosure of data of individual companies.

Table 1:

1. Credits, +: Exports of goods, services, and income; unilateral transfers to United States; capital inflows (increase in foreign assets (U.S. liabilities) or decrease in U.S. assets); decrease in U.S. official reserve assets; increase in foreign official assets in the United States.

Debits, -: Imports of goods, services, and income; unilateral transfers to foreigners; capital outflows (decrease in foreign assets (U.S. liabilities) or increase in U.S. assets); increase in U.S. official reserve assets; decrease in foreign official assets in the United States.

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2.

3. Includes some goods: Mainly military equipment in line 4; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 18; and fuels purchased by airline and steamship operators in lines 7 and 21.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. For all areas, amounts outstanding Sept. 30, 1995, were as follows in millions of dollars: Line 34, 87,152; line 35, 11,051; line 36, 11,035; line 37, 14,681; line 38, 50,385. Data are preliminary.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

13. Conceptually, the sum of lines 70 and 62 is equal to "net foreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appear in the "Reconciliation and Other Special Tables" section in this issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPA tables (published annually in the July issue of the SURVEY).

Additional footnotes for historical data in June issues of the SURVEY:

14. For 1974, includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions," June 1974 SURVEY, p. 27.

15. For 1978-83, includes foreign currency-denominated notes sold to private residents abroad.

16. Break in series. See Technical Notes in the June 1989, June 1990, June 1992, June 1993, and June 1995 issues of the SURVEY.

Table 2:

- Exports, Census basis, represent transactions values, f.a.s., U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 SURVEY), except for 1974-81, when they represent transactions values, f.a.s., foreign port of exportation (see June issues of the SURVEY for historical data).

From 1983 forward, both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" and "revised statistical" month data supplied by the Census Bureau (see Technical Notes in the December 1985 SURVEY).

Seasonally adjusted data reflect the application of seasonal factors developed jointly by Census and BEA. The seasonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see Technical Notes in the June 1980 SURVEY, in the June 1988 SURVEY, and in the June 1991 SURVEY). Prior to 1983, annual data are as published by the Census Bureau, except that for 1975-80 published Census data are adjusted to include trade between the U.S. Virgin Islands and foreign countries.

2. Beginning in 1990, the Census Bureau replaced its compiled export statistics with counterpart Canadian import statistics. Similarly, Statistics Canada replaced its compiled export statistics with counterpart U.S. import statistics. This exchange of data has eliminated the need for the inland freight adjustment on U.S. exports, but not on U.S. imports.

3. Adjustments in lines A5 and A13, B12, B47, and B82 reflect the Census Bureau's reconciliation of discrepancies between the merchandise trade statistics published by the United States and the counterpart statistics published in Canada. These adjustments are distributed to the affected end-use categories in section C. Beginning in 1986, estimates for undocumented exports to Canada, the largest item in the U.S.-Canadian reconciliation, are included in Census basic data shown in line A1.

4. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from Customs declarations. The exports are included in tables 1 and 10, line 4 (transfers under U.S. military agency sales contracts); the imports are included in tables 1 and 10, line 18 (direct defense expenditures).

5. Addition of electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and alterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area. Also includes deduction of exports to the Panama Canal Zone before October 1, 1979, and for 1975-82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the SURVEY for historical data).

6. Deduction of foreign charges for repair of U.S. vessels abroad, which are included in tables 1 and 10, line 21 (other transportation); coverage adjustments for special situations in which shipments were omitted from Census data; and the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair. Also includes addition of understatement of inland freight in f.a.s. values of U.S. merchandise imports from Canada in 1974-81; deduction of imports from the Panama Canal Zone before October 1, 1979; and for 1975-82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the SURVEY for historical data).

7. For 1988-89, correction for the understatement of crude petroleum imports from Canada.

8. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 2 and 16. Trade with international organizations includes purchases of nonmonetary gold from the International Monetary Fund, transfers of tin to the International Tin Council (ITC), and sales of satellites to Intelsat. The memoranda are defined as follows: *Industrial countries*: Western Europe, Canada, Japan, Australia, New Zealand, and South Africa; *Members of OPEC*: Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, and Gabon (beginning in January 1993, excludes Ecuador); *Other countries*: Eastern Europe, Latin America and Other Western Hemisphere, and other countries in Asia and Africa, less OPEC. Before 1984, complete geographic area detail was not available for some balance of payments adjustments. Therefore, the detail shown does not always sum to the values shown for the area aggregates. For all years, "Asia" and "Africa" exclude certain Pacific Islands and unidentified countries included in "Other countries in Asia and Africa."

9. Includes the former German Democratic Republic (East Germany) beginning in fourth quarter of 1990. In earlier periods, the German Democratic Republic was included in Eastern Europe.

10. Beginning in 1986, New Zealand and South Africa are included in "Other countries in Asia and Africa," with New Zealand included as part of "Asia" and South Africa as part of "Africa."

11. Includes nuclear fuel materials and fuels.

Table 3:

- Patented techniques, processes, and formulas and other intangible property rights that are used in goods production.

1. Patented techniques, processes, and formulas and other intangible property rights that are used in goods production.

2. Copyrights, trademarks, franchises, rights to broadcast live events, and other intangible property rights.

3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States. Payments (imports) include mainly wages of foreign residents temporarily employed in the United States and Canadian and Mexican commuters in U.S. border areas.

Table 4:

1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93-199, section 4, and subsequently authorized (for many recipients) under similar legislation—are included in line A3. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A3 items, part of these military expenditures is applied in lines A40 and A43 to reduce short-term assets previously recorded in lines A38 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A3 expenditures finance future deliveries under military sales contracts for the recipient countries and is applied directly to lines A39 and C9. A third part of line A3, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A34. A fourth part of line A3, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A45.

2. Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are not included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.

3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency.

4. Line A35 includes foreign currency collected as interest and line A40 includes foreign currency collected as principal, as recorded in lines A13 and A14, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry for the part of line C10 that was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

Table 5:

1. Beginning with 1991, payments and receipts of interest related to interest rate and foreign currency swaps between affiliates and parents are netted and are shown as either net payments or net receipts. Receipts and payments of other types of interest are shown on a gross basis.

2. Petroleum includes, and manufacturing and "other" industries exclude, the exploration, development, and production of crude oil and gas, and the transportation, refining, and marketing of petroleum products, exclusive of petrochemicals. "Other" industries includes wholesale trade; banking; finance (except banking); insurance, and real estate; services; and other industries—agriculture, forestry, and fishing; mining; construction; transportation, communication, and public utilities; and retail trade.

3. Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany debt, and other equity contributions.

4. Sales (total and partial), liquidations, returns of capital contributions, and other dispositions of equity holdings.

Table 6:

1. Primarily provincial, regional, and municipal.

2. Largely transactions by International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).

3. Estimate for scheduled redemptions and identifiable early retirements. Includes estimates based on Canadian statistics for redemptions of Canadian issues held in the United States. Unidentified and nonscheduled redemptions appear in line A30.

Table 7:

1. Deposits (line A5) include other financial claims (line A6) for some countries due to the commingling of these categories in foreign source data.

2. Primarily mortgages, loans, and bills and notes drawn on foreigners.

3. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

4. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

5. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Beginning in January 1993, excludes Ecuador.

Table 8:

1. Includes central governments and their agencies and corporations; state, provincial, and local governments and their agencies and corporations; and international and regional organizations.

2. U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' accounts may be commingled in some categories. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.

3. Commercial paper issued in the U.S. market by foreign incorporated entities; excludes commercial paper issued through foreign direct investment affiliates in the United States.

4. Negotiable and readily transferable instruments other than commercial paper, payable in dollars; consists largely of negotiable certificates of deposit.

5. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

6. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

7. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Beginning in January 1993, excludes Ecuador.

8. Includes Eastern Europe and international and regional organizations.

Table 9:

1. Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities and are separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.

2. Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other than deposits.

3. Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.

4. Mainly International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (IDB), and the Trust Fund of the International Monetary Fund.

5. U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' liabilities may be commingled in some categories. Foreign-owned banks are U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.

6. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

7. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

8. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Beginning in January 1993, excludes Ecuador.

9. Includes Eastern Europe and international and regional organizations.

Table 10:

For footnotes 1-13, see table 1.

14. The "European Union" includes the "European Union (6)." Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

15. The "European Union (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld, current-cost adjustments associated with U.S. and foreign direct investment, and small transactions in business services that are not reported by country.

17. Details not shown separately; see totals in lines 49 and 56.

18. Details not shown separately are included in line 61.

S U B J E C T G U I D E

VOLUME 75 (1995)

This guide lists articles and "Business Situation" sections by subject—giving the title, issue number, and beginning page number.

General

- BEA Customer Satisfaction Report. 9:32.
- Mid-Decade Strategic Review of BEA's Economic Accounts. Maintaining and Improving Their Performance, 2:36; An Update. 4:48.
- User's Guide to BEA Information. 1:35.

National

Corporate profits

- Annual Estimates and Property Income for 1994. 4:6.
- Preliminary Estimates. Fourth Quarter 1994, 3:2; First Quarter 1995, 5:8; Second Quarter 1995, 8:8; Third Quarter 1995, 11:12:1.
- Revised Estimates. First Quarter 1995, 6:3; Second Quarter 1995, 9:3.

Government transactions

- Federal Budget Estimates, Fiscal Year 1996. 2:67.
- Government Sector. Fourth Quarter 1994, 3:3; First Quarter 1995, 5:9; Second Quarter 1995, 8:9.
- State and Local Government Fiscal Position in 1994. 3:33.

Gross domestic product

- Business Situation: Advance Estimates. Fourth Quarter 1994, 1:1; First Quarter 1995, 4:1; Second Quarter 1995, 7:1; Third Quarter 1995, 10:1.
- Business Situation: Final Estimates. Fourth Quarter 1994, 3:1; First Quarter 1995, 6:1; Second Quarter 1995, 9:1.
- Business Situation: Preliminary Estimates. Fourth Quarter 1994, 2:1; First Quarter 1995, 5:1; Second Quarter 1995, 8:1.
- Preliminary Estimates for Third Quarter 1995 and Revised Estimates for 1959-95. 11:12:1.

Gross product by industry

- Gross Product by Industry, 1993. 4:46.

Inventories and sales

- Constant-Dollar Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade. 3:31; 6:29; 9:30.

Motor vehicles

- Motor Vehicles, Model Year 1995. 10:40.

National income and product accounts (NIPA's)

- Comprehensive Revision of the National Income and Product Accounts. A Preview of BEA's New Featured Measures of Output and Prices, 7:31; A Preview of Recognition of Government Investment and Incorporation of a New Methodology for Calculating Depreciation, 9:33; A Preview of New and Redesigned Tables, 10:30; A Summary, 11:12:2.

A Look at How BEA Presents the NIPA's. 2:31.

- National Income and Product Accounts Tables. Selected NIPA Tables: 1:7; 2:9; 3:7; 4:11; 5:12; 6:5; 7:8; 8:11; 9:5; 10:7. Selected Annual NIPA Tables, 1993-94. 4:32. Errata: 4:24.

- Personal Income and Outlays, October and November 1995. 11:12:48.

- Personal Income and the Disposition of Personal Income, Monthly Estimates: 1:28; 2:34; 3:29; 4:44; 5:34; 6:27; 7:29; 8:33; 9:28; 10:28; 11:12:56.

Pollution abatement and control

- Pollution Abatement and Control Expenditures, 1993. 5:36.

Reconciliation and other special tables

- Reconciliation of BEA Compensation and BLS Earnings. 2:30; 5:33; 8:32.

- Reconciliation of NIPA Net Exports of Goods and Services and Net Receipts of Factor Income with BPA Balance on Goods, Services, and Income. 3:28; 6:26; 9:26.

International

Balance of payments

Reconciliation of the U.S.-Canadian Current Account, 1993-94. 10:62.

U.S. International Transactions. Fourth Quarter and Year 1994, 3:56; First Quarter 1995, 6:76; Second Quarter 1995, 9:42; Third Quarter 1995, 11/12:58; Errata, 8:117. Revised Estimates for 1983-94. 6:69.

U.S. International Transactions in Goods and Services, Monthly Estimates. 1:29; 2:35; 3:30; 4:45; 5:35; 6:28; 7:30; 8:34; 9:29; 10:29; 11/12:57.

Foreign direct investment in the United States

Detail for Historical-Cost Position and Related Capital and Income Flows, 1994. 8:53.

New Investment in 1994 and Affiliate Operations in 1993. 5:57.

An Ownership-Based Disaggregation of the U.S. Current Account, 1982-93. 10:52.

International services

U.S. International Sales and Purchases of Private Services: U.S. Cross-Border Transactions, 1994, and Sales by Affiliates, 1993. 9:68.

Investment position

Direct Investment Positions on a Historical-Cost Basis, 1994: Country and Industry Detail. 6:61.

International Investment Position of the United States in 1994. 6:52.

Reconciliation and other special tables

Reconciliation of NIPA Net Exports of Goods and Services and Net Receipts of Factor Income with BPA Balance on Goods, Services, and Income. 3:28; 6:26; 9:26.

U.S. direct investment abroad

Detail for Historical-Cost Position and Related Capital and Income Flows, 1994. 8:88.

A Guide to BEA Statistics on U.S. Multinational Companies. 3:38.

U.S. Multinational Companies: Operations in 1993. 6:31.

Regional

BEA economic areas

Redefinition of the BEA Economic Areas. 2:75.

Gross state product

Gross State Product, 1991-92. 5:47.

Personal income

Local Area Personal Income, 1991-93. 4:67.

Personal Income by State and Region. Third Quarter 1994, 1:30; Fourth Quarter and Year 1994, 4:58; First Quarter 1995, 7:39; Second Quarter 1995, 10:46. Per Capita Personal Income, 1994. 4:58.

State Personal Income, Revised Estimates for 1992-94. 8:35.

Projections

Regional and State Projections of Economic Activity and Population to the Year 2005. 7:44.

BUSINESS CYCLE INDICATORS

As a result of a reprogramming of resources at BEA, this section will be discontinued after this issue. A listing of sources, including addresses and telephone numbers, for series in this section begins on page C-29. Historical data for selected Business Cycle Indicators series will appear in the January/February and March 1996 issues.

The Conference Board—which has taken over preparation and dissemination of the composite indexes—will begin publishing in February a monthly report patterned after this section and will make the first three issues available to SURVEY subscribers free of charge. For more information, call The Conference Board at (212) 339-0345.

The Business Cycle Indicator series that pertain to national income and product accounts (NIPA's) estimates have not been updated to reflect the just released comprehensive revision of the NIPA's. All series reflect data available at the time of BEA's December 6 composite index release; they do not incorporate The Conference Board's January 17 composite index release.

For more information, contact the Business Cycle Indicators Branch, Business Outlook Division (BE-52), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. (Telephone: (202) 606-5366; fax: (202) 606-5313.)

NOTE.—This section of the SURVEY is prepared by the Business Cycle Indicators Branch.

L,C,Lg,U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Business Cycle Indicators: Upcoming Revision of the Composite Indexes" in the October 1993 SURVEY OF CURRENT BUSINESS and "The Composite Index of Coincident Indicators and Alternative Coincident Indexes" in the June 1992 SURVEY.

References to series in this section use the prefix "BCI—" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged. Diffusion index data are centered within the spans: 1-month indexes are placed in the ending month and 6-month indexes are placed in the 4th month.

High values reached by cyclical indicators in the expansion following the last reference cycle trough (March 1991) are shown in boldface type; high values reached prior to the period shown in the table are listed at the bottom of each page. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-53 through C-59.

Page C-1

NOTE.—Major data revision: Index of industrial production (BCI-47)—see note for page C-2.

* Preliminary November 1995 values: BCI-32 = 45.8, BCI-19 = 595.53, and BCI-109 = 8.75.

1. Data exclude Puerto Rico, which is included in figures published by the source agency.

2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Surveys of Consumers, P.O. Box 1248, Ann Arbor, MI 48106-1248.

3. Excludes BCI-62, -77, and -95, for which data are not available.

Page C-2

NOTE.—Major data revisions: Industrial production indexes (BCI-47, -73, -74, -75, -76, and -557) and related measures of capacity utilization (BCI-82 and BCI-124) have been revised from 1991 forward to incorporate updated source data, seasonal factors, and productivity relationships. For further information, contact the Board of Governors of the Federal Reserve System, Division of Research and Statistics, Industrial Output Section, Washington, DC 20551.

* Preliminary November 1995 value: BCI-32 = 45.8.

1. Data exclude Puerto Rico, which is included in figures published by the source agency.

2. Copyrighted. This series may not be reproduced without written permission from F.W. Dodge, McGraw-Hill, Inc., 24 Hartwell Avenue, Lexington, MA 02173.

Page C-3

* Preliminary November 1995 value: BCI-23 = 339.2.

1. Copyrighted. This series may not be reproduced without written permission from Knight-Ridder Financial, 30 South Wacker Drive, Suite 1810, Chicago, IL 60606.

Page C-4

* Preliminary November 1995 values: BCI-122 = 101.4, BCI-123 = 93.1, and BCI-85 = -0.36.

1. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Surveys of Consumers, P.O. Box 1248, Ann Arbor, MI 48106-1248.

2. Copyrighted. This series may not be reproduced without written permission from the American Bankers Association, 1120 Connecticut Avenue, NW, Washington, DC 20036.

Page C-5

NOTE.—Major data revision: Industrial production indexes (BCI-47 and BCI-557)—see note for page C-2.

* Preliminary November 1995 values: BCI-119 = 5.80, BCI-114 = 5.35, BCI-116 = 7.20, BCI-115 = 6.31, BCI-117 = 5.64, BCI-109 = 8.75, BCI-19 (1941-43=10) = 595.53, BCI-19 (1967=100) = 647.8, BCI-748 = 1,307.8, BCI-745 = 366.4, BCI-746 = 934.9, BCI-742 = 1,599.8, BCI-747 = 604.1, BCI-743 = 526.7, BCI-750 = 84.14, BCI-758 = 101.94, BCI-755 = 1.4173, BCI-756 = 4.8882, BCI-752 = 0.6400, BCI-757 = 1,592.67, and BCI-753 = 1.3534.

1. Balance of payments basis: Excludes transfers under military grants and Department of Defense sales contracts (exports) and Department of Defense purchases (imports).

2. Organisation for Economic Co-operation and Development.

3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Each country is weighted by its 1972-76 global trade. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).

4. This index is compiled by the Center for International Business Cycle Research (CIBCR), Columbia University, 645 Madison Avenue, 19th Floor, New York, NY 10022.

Notes for Pages C-7 Through C-27

The following notes explain general features of the charts that appear in this section:

- Business cycle peaks (P) and troughs (T), as designated by the National Bureau of Economic Research, Inc., are indicated at the top of each chart. The shaded areas represent recessions.

- For each series classified as a cyclical indicator, the timing classifications at peaks, at troughs, and overall are shown in a box adjacent to the title. (L = leading, C = coincident, Lg = lagging, U = unclassified.) A complete list of series titles and sources is shown on pages C-53 through C-59.

- Arithmetic scales are designated "Scale A." On the same arithmetic scale, equal vertical distances represent equal differences in data. (For example, the vertical distance from 10 to 15 is the same as the distance from 100 to 105.)

- Logarithmic (log) scales are designated L-1, L-2, or L-3 to indicate their relative size. On log scales of the same size, equal vertical distances represent equal percentage changes. (For

example, the vertical distance from 10 to 15 is the same as the distance from 100 to 150.) Compared with an L-1 scale, the same percentage change covers half the distance on an L-2 scale and one-third the distance on an L-3 scale.

- Data are monthly unless otherwise indicated. Quarterly data are indicated by a "Q" following the series title.

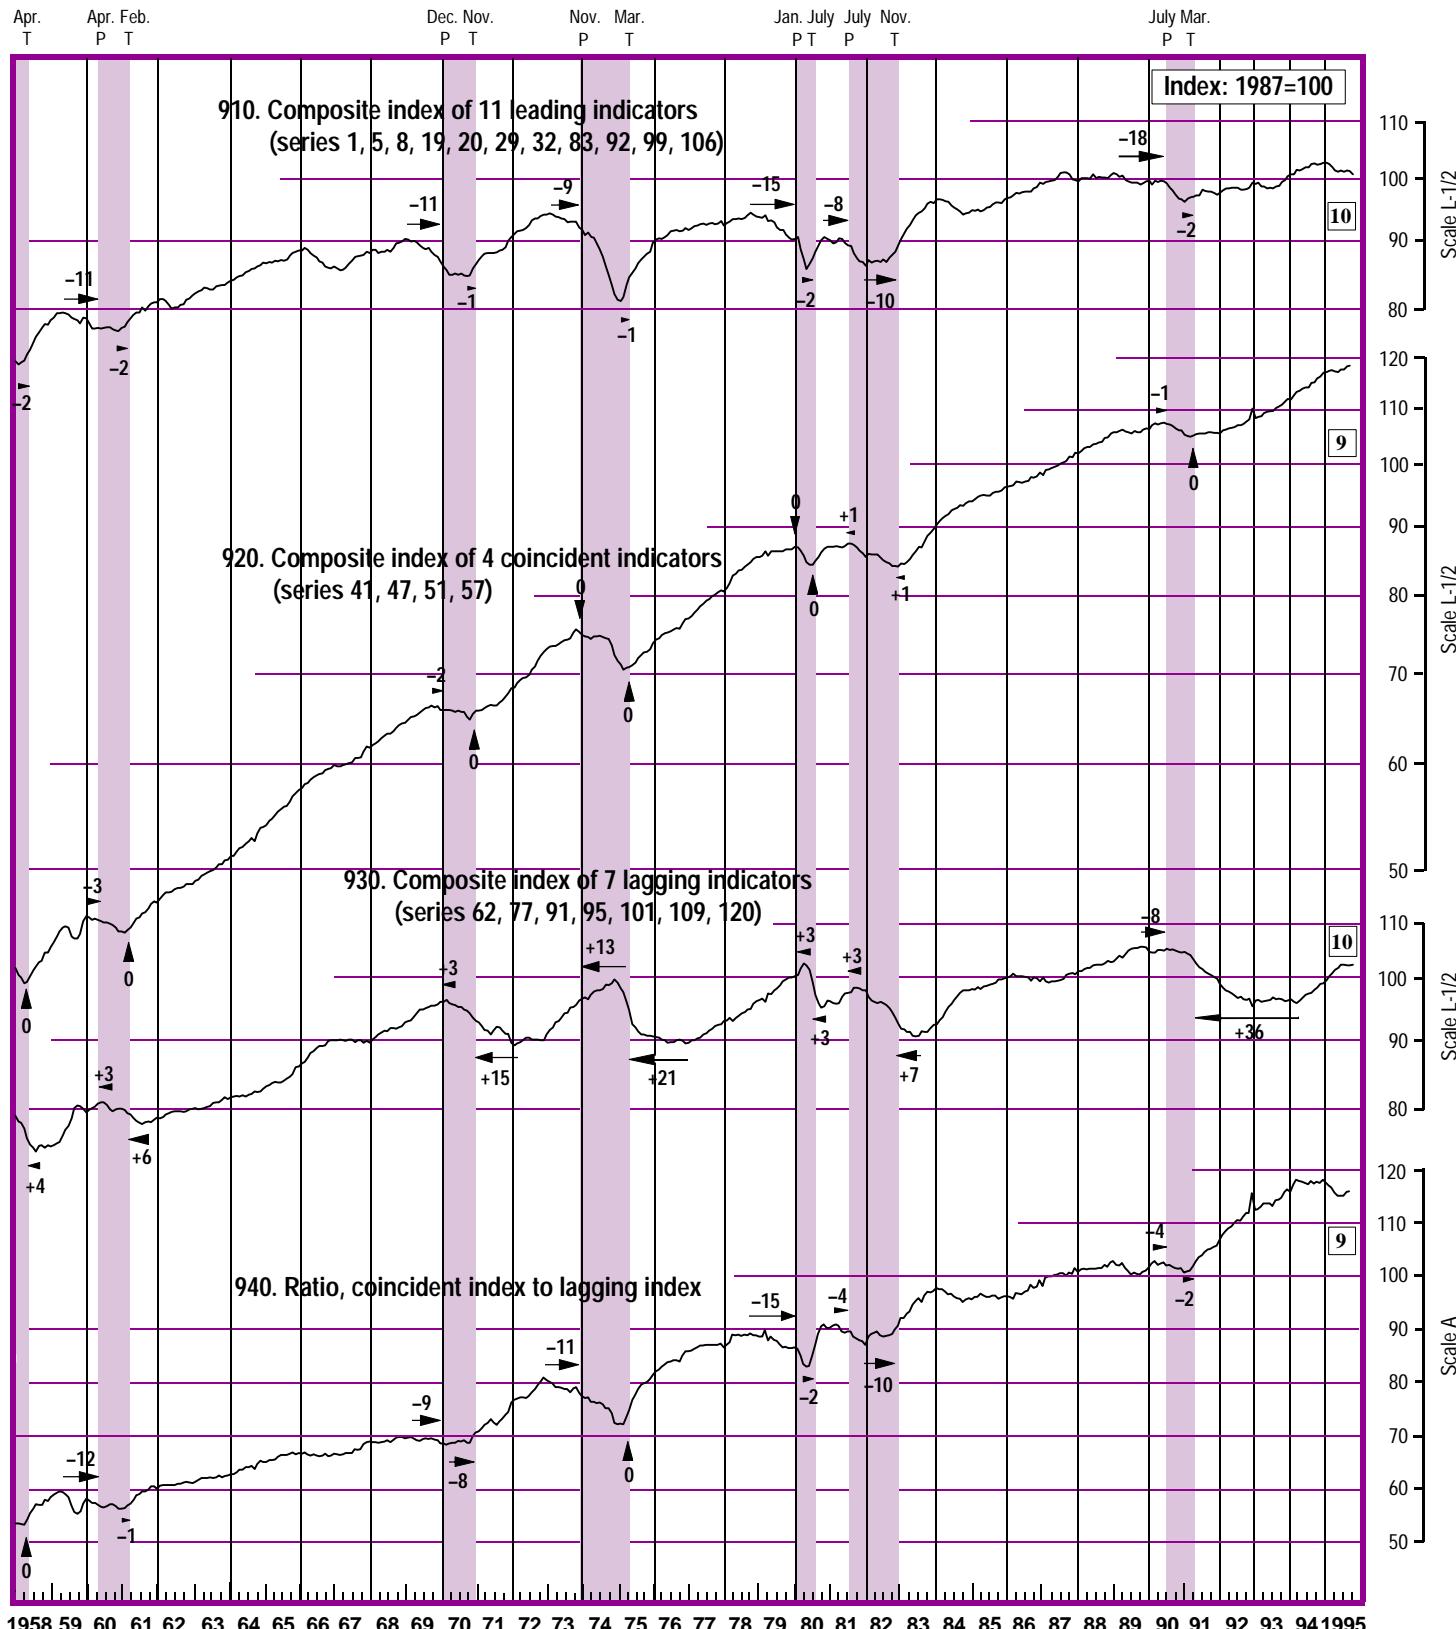

- Some series include a centered moving average, which is shown as a heavy line superimposed on the actual monthly data.

- Parallel lines across a plotted series indicate a missing data value, change in definition, or other significant break in continuity.

- The box near the end of each plotted series indicates the latest data month (Arabic numeral) or quarter (Roman numeral) shown or, for series computed over a span of time (diffusion indexes and rates of change), the latest data period used in computing the series.

Sources for Business Cycle Indicators

The "Business Cycle Indicators" section will be discontinued after this issue. This listing provides the address and telephone number of each data source for the Business Cycle Indicators series. Series are listed according to their series numbers. Series identified with an asterisk are constructed by the source or the Business Cycle Indicators staff specifically for use in this publication; they may not be available in the same form elsewhere.

1. Average weekly hours of production or nonsupervisory workers, manufacturing

U.S. Department of Labor, Bureau of Labor Statistics, Office of Employment and Unemployment Statistics, Division of Monthly Industry Employment Statistics, Washington, DC 20212; (202) 606-6555

***5. Average weekly initial claims for unemployment insurance, State programs**

Mr. Tom Stngle, U.S. Department of Labor, Employment and Training Administration, Unemployment Insurance Services, Division of Actuarial Services, Washington, DC 20210; (202) 219-4630

***7. Manufacturers' new orders in 1987 dollars, durable goods industries**

Ms. Kathy Menth (new orders), U.S. Department of Commerce, Bureau of the Census, Manufacturing and Construction Division, Manufacturers' Shipments, Inventories, and Orders Branch, Washington, DC 20233; (301) 457-4804

Mr. James Webbenhurst (Producer Price Index, durable manufactures), U.S. Department of Labor, Bureau of Labor Statistics, Office of Prices and Living Conditions, Division of Industrial Prices and Price Indexes, Washington, DC 20212; (202) 606-7711

***8. Manufacturers' new orders in 1987 dollars, consumer goods and materials industries**

Ms. Kathy Menth (new orders), U.S. Department of Commerce, Bureau of the Census, Manufacturing and Construction Division, Manufacturers' Shipments, Inventories, and Orders Branch, Washington, DC 20233; (301) 457-4804

U.S. Department of Commerce (deflators), Bureau of Economic Analysis, National Income and Wealth Division, BE-54, Washington, DC 20230; (202) 606-9736

***9. Construction contracts awarded for commercial and industrial buildings, floor space**

Mr. Michael Levoshko, F.W. Dodge, Division of McGraw-Hill Companies, Market Analysis Group, 24 Hartwell Avenue, Lexington, MA 02173; (617) 860-6113

***10. Contracts and orders for plant and equipment in current dollars**

Mr. Michael Levoshko (contracts), F.W. Dodge, Division of McGraw-Hill Companies, Market Analysis Group, 24 Hartwell Avenue, Lexington, MA 02173; (617) 860-6113

Ms. Kathy Menth (new orders), U.S. Department of Commerce, Bureau of the Census, Manufacturing and Construction Division, Manufacturers' Shipments, Inventories, and Orders Branch, Washington, DC 20233; (301) 457-4804

***12. Index of net business formation**

Mr. Neil DiBernardo (new business incorporations and business failures), The Dun & Bradstreet Corporation, Economic Analysis Department, 187 Danbury Road, Wilton, CT 06897; (203) 834-4263
(Other component data are not available to the public.)

13. Number of new business incorporations

14. Current liabilities of business failures

Mr. Neil DiBernardo, The Dun & Bradstreet Corporation, Economic Analysis Department, 187 Danbury Road, Wilton, CT 06897; (203) 834-4263

16. Corporate profits after tax in current dollars

U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Wealth Division, BE-54, Washington, DC 20230; (202) 606-5304

18. Corporate profits after tax in 1987 dollars

U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Wealth Division, BE-54, Washington, DC 20230; (202) 606-9720

19. Index of stock prices, 500 common stocks

Standard & Poor's Corporation, 25 Broadway, New York, NY 10004; (212) 208-8000

***20. Contracts and orders for plant and equipment in 1987 dollars**

Mr. Michael Levoshko (contracts), F.W. Dodge, Division of McGraw-Hill Companies, Market Analysis Group, 24 Hartwell Avenue, Lexington, MA 02173; (617) 860-6113

Mr. George A. Roff (contracts deflator), U.S. Department of Commerce, Bureau of the Census, Manufacturing and Construction Division, Construction Progress Branch, Washington, DC 20233; (301) 457-1605

Ms. Kathy Menth (new orders), U.S. Department of Commerce, Bureau of the Census, Manufacturing and Construction Division, Manufacturers' Shipments, Inventories, and Orders Branch, Washington, DC 20233; (301) 457-4804

U.S. Department of Commerce (new orders deflators), Bureau of Economic Analysis, National Income and Wealth Division, BE-54, Washington, DC 20230; (202) 606-9736

- 21. Average weekly overtime hours of production or nonsupervisory workers, manufacturing**
U.S. Department of Labor, Bureau of Labor Statistics, Office of Employment and Unemployment Statistics, Division of Monthly Industry Employment Statistics, Washington, DC 20212; (202) 606-6555
- *22. Ratio, corporate domestic profits after tax to total corporate domestic income**
U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Wealth Division, BE-54, Washington, DC 20230; (202) 606-5304
- *23. Index of spot market prices, raw industrial materials**
Mr. Chris Lown, Knight-Ridder Financial, 30 South Wacker Drive, Suite 1810, Chicago, IL 60606; (800) 621-5271
- *26. Ratio, implicit price deflator to unit labor cost, all persons, nonfarm business sector**
Ms. Phyllis Otto, U.S. Department of Labor, Bureau of Labor Statistics, Office of Productivity and Technology, Division of Productivity Research, Washington, DC 20212; (202) 606-5606

BEA INFORMATION

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, write to the Public Information Office, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-9900.

Recent Publications from GPO

ORDER FROM: Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. Phone (202) 512-1800 or fax (202) 512-2250.

Fixed Reproducible Tangible Wealth in the United States, 1925-89. (1993) Contains annual estimates of the stock of privately owned and government-owned durable equipment and structures and of durable goods owned by consumers in the United States for 1925-89. Estimates are for fixed nonresidential private capital by major industry group, for residential capital by tenure group, for government-owned fixed capital by type of government, and for 11 types of durable goods owned by consumers. 460 pp. \$25.00 (GPO STOCK NO. 003-010-00235-2).

Benchmark Input-Output Accounts of the United States, 1987. (1994) Presents summary and detailed make and use tables for industries and commodities; tables showing commodity and industry output requirements per dollar of commodity demanded; and tables showing the input-output (I-O) commodity composition of personal consumption expenditures and producers' durable equipment expenditures in the national income and product accounts. Presents concepts and methods used in the 1987 benchmark accounts; concordance between I-O and 1987 Standard Industrial Classification codes; description of the components of the measures of output, intermediate inputs, and value added; and mathematical derivation of total requirements tables. 468 pp. \$29.00 (GPO STOCK NO. 003-010-00251-4).

State Personal Income, 1929-93. (1995) Presents detailed annual estimates for States and regions of personal income for 1929-93, including estimates of per capita personal income, personal income by major source, and earnings by industry. Also presents annual estimates for States and regions of disposable personal income and per capita disposable personal income for 1948-93 and quarterly estimates of personal income for 1969-93. Provides information about the sources and methods used to prepare the estimates for 1987-93 and samples of all the detailed tables of personal income and employment that are available for regions, States, counties, and metropolitan areas. 444 pp. \$27.00 (GPO STOCK NO. 003-010-00257-3).

Local Area Personal Income, 1969-92. (1994) Presents the estimates of personal income and per capita personal income for 1969-92 for the United States, regions, States, counties, and metropolitan areas. Also presents the Census Bureau's estimates of population that were used in the derivation of per capita personal income. Provides information about the sources and methods used to prepare the estimates for 1987-92 and samples of all the detailed tables of personal income and employment that are available for regions, States, counties, and metropolitan areas. 784 pp. \$41.00 (GPO STOCK NO. 003-010-00249-2).

BEA Regional Projections to 2045: Volume 1, States. (1995) Presents regional projections for selected economic and population variables for the Nation and States for 1998, 2000, 2005, 2010, 2015, 2025, and 2045. Includes projections for gross state product, employment, and earnings by industry, for personal income by component, and for population for three major age groups. Also includes a statement of methodology. 212 pp. \$13.00 (GPO STOCK NO. 003-010-00256-5).

New!

Foreign Direct Investment in the United States: 1992 Benchmark Survey, Final Results. (1995) Presents detailed data on the financial structure and operations of U.S. affiliates of foreign direct investors, on the foreign direct investment position in the United States, and on balance-of-payments transactions between U.S. affiliates and their foreign parent companies in 1992. Includes data for items, such as employment covered by collective bargaining agreements and merchandise trade by product and country of destination and origin, that are only collected in benchmark surveys. Benchmark surveys are conducted every 5 years and are BEA's most comprehensive surveys in terms of both the number of companies covered and the amount of information gathered. The data are classified by industry of affiliate and by country of ultimate beneficial owner, and selected data are classified by State. Provides information about the coverage, concepts and definitions, and classifications used in the survey. 312 pp. \$20.00 (GPO STOCK NO. 003-010-00259-0).

Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies, Preliminary 1993 Estimates. (1995) Presents preliminary results for 1993 from BEA's annual survey covering the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 104 pp. \$6.50 (GPO STOCK NO. 003-010-00255-7).

Foreign Direct Investment in the United States: Establishment Data for Manufacturing, 1991. (1994) A joint effort by BEA and the Bureau of the Census, this is the latest in a series of publications that present new data for foreign-owned U.S. manufacturing establishments (plants), including data on their number, value added, shipments, employment, total employee compensation, employee benefits, hourly wage rates of production workers, cost of materials and energy used, inventories by stage of fabrication, and expenditures for new plant and equipment. The data are disaggregated by detailed industry (up to 459 industries), by State, and by country of investor. 220 pp. \$14.00 (GPO STOCK NO. 003-010-00250-6). *Also available in this series are publications presenting data for: 1990, 216 pp. \$14.00 (GPO STOCK NO. 003-010-00242-5) and 1988, 204 pp. \$13.00 (GPO STOCK NO. 003-010-00244-1).*

U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates. (1995) Two publications containing results for 1992 and 1993 from BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of U.S. parent companies and their foreign affiliates. Data are classified by country and industry of affiliate and by industry of U.S. parent. 100 pp. \$6.50 each. **Preliminary 1993 Estimates:** GPO STOCK NO. 003-010-00254-9; **Revised 1992 Estimates:** GPO STOCK NO. 003-010-00253-1.

New!

U.S. Direct Investment Abroad: Balance of Payments and Direct Investment Position Estimates, 1982-88. (1995) Presents estimates of the U.S. direct investment position abroad valued at historical cost and of balance-of-payments transactions between U.S. parent companies and their foreign affiliates for calendar years 1982-88. Balance-of-payments transactions consist of capital outflows and its components, income, royalties and license fees, and charges for other services. The estimates, which are disaggregated by country and industry of foreign affiliate, are linked to BEA's 1982 and 1989 benchmark surveys, or censuses, of U.S. direct investment abroad. 96 pp. \$6.50 (GPO STOCK NO. 003-010-00258-1).
