

Source Data and Other Information About State and Local Estimates

The estimates of state and local government current receipts and expenditures and total receipts and expenditures are mainly based on compilations of data for state and local government finances. The U.S. Census Bureau (Census) produces the primary source data: the Census of Governments that is conducted in years that end in a 2 or a 7 and the government finances series of surveys for the other years. In addition, other sources of Census data are from the Quarterly Summary of State and Local Government Tax Revenue and the monthly Value of Construction Put in Place. Data sources from the U.S. Bureau of Labor Statistics include the Quarterly Census of Employment and Wages and the Employment Cost Index.

Quarterly and annual estimates are available monthly in National Income and Product Accounts (NIPA) table 3.3. Detailed annual estimates of state and local government transactions by component are available in NIPA tables 3.4, 3.5, 3.6, 3.7, 3.8, 3.12, and 3.13, and quarterly estimates for selected series are available in NIPA [underlying detail](#) tables. For a historical time series of reconciliations of the NIPA estimates with the Census data from government finances, see NIPA table 3.19.

Annual estimates of receipts and expenditures of state governments and of local governments are available in NIPA table 3.20 (state government receipts and expenditures) and in NIPA table 3.21 (local government receipts and expenditures).¹
