SURVEY OF CURRENT BUSINESS

UNITED STATES DEPARTMENT OF COMMERCE / BUREAU OF ECONOMIC ANALYSIS

SURVEY OF CURRENT BUSINESS

U.S. Department of Commerce

C. William Verity / *Secretary*
Robert Ortner / *Under Secretary
for Economic Affairs*

Bureau of Economic Analysis

Allan H. Young / *Director*
Carol S. Carson / *Deputy Director*

Editor-in-Chief: Carol S. Carson
Managing Editor: Leland L. Scott
Manuscript Editor: Dannelet A. Grosvenor

Staff Contributors to This Issue: Gurmukh S. Gill, Daniel J. Larkins, David J. Levin, National Income and Wealth Division; James E. Rankin, Charles S. Robinson, Joseph C. Wakefield.

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Annual subscription: *second-class mail*—\$18.00 domestic, \$22.50 foreign; *first-class mail*—\$46.00. Single copy—\$6.50 domestic, \$8.13 foreign.

Mail subscription orders and address changes to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

18 Composite Indexes of Leading, Coincident, and Lagging Indicators

19 Federal Fiscal Programs

25 State and Local Government Fiscal Position in 1987

Blue pages: Current Business Statistics

Inside back cover: BEA Publications

NOTE.—This issue of the SURVEY went to the printer on March 8, 1988. It incorporates data from the following monthly BEA news releases:

Gross National Product (Feb. 25),
Personal Income and Outlays (Feb. 26), and
Composite Indexes of Leading, Coincident, and Lagging
Indicators (Mar. 1).

the BUSINESS SITUATION

REVISED (45-day) estimates show that real GNP increased at an annual rate of 4½ percent in the fourth quarter of 1987; the preliminary (15-day) estimates had shown a 4-percent increase (table 1 on page 16). The increase in the GNP price index (fixed weights) was unrevised at an annual rate of 3½ percent.¹

The small upward revision in real GNP was more than accounted for by personal consumption expenditures and nonresidential fixed investment. In personal consumption expenditures, nondurable goods were revised up \$4½ billion, reflecting revised retail sales data for November and December. In nonresidential fixed investment, producers' durable equipment was revised up \$4 billion, reflecting revised November data and newly available December data for manufacturers' shipments of equipment. Largely offsetting these upward revisions was a downward revision in net exports; imports were revised up \$4½ billion, reflecting newly available merchandise trade data for December.

Despite the size of the revisions in some of the major components of GNP, the fourth-quarter direction of change for all of them was the same as in the preliminary estimates. The broad picture of the economy as sketched in last month's "Business Situation" was not much altered. However, a somewhat different view did emerge within two of the major components. In business inventories, the fourth-quarter accumulation in both manufacturing and wholesale

trade durables was not nearly as strong as had been estimated last month. In contrast, the accumulation of retail trade inventories—especially autos and nondurables—was substantially stronger than estimated earlier. In imports, the fourth-quarter increase in nonpetroleum merchandise imports was considerably stronger than estimated earlier. In contrast, petroleum imports fell even more sharply than estimated earlier.

Leading Indicators

BEA's composite index of leading indicators declined 0.6 percent in January, according to estimates based on 9 of its 11 component series, after increasing 0.3 percent in December. The preliminary estimate for December (based on 9 components) had shown a decline of 0.2 percent; both of the series that were unavailable at that time—change in credit and change in inventories—made positive contributions to the revised December index.

Average weekly initial claims for unemployment insurance made the largest negative contribution to the January change. The stock price

index, which had declined 26.8 percent over the previous 4 months, increased 4 percent and made the largest positive contribution. The contributions of these and other components of the leading index are given in table 1.

The leading index has now declined in 3 of the 4 months since September 1987, and for January the index was 1.4 percent lower than for September. The January decline, of course, increases the probability that September's level will eventually be identified as a cyclical peak in the leading index. It would be premature to identify it as such now, however, if only because data revisions could alter the path of the index over the last several months.

In the cyclical indicators approach, the direction of the leading index's movement is obviously important in drawing inferences. Less obviously important, perhaps, is the extent to which its direction of movement is shared by its component series. For example, a decline of given depth and duration may be judged more ambiguous if it is the result of declines in only 1 or 2 components than if it is the result of declines in 10 or 11.

Looking Ahead . . .

- **Local Area Personal Income.** A comprehensive revision of county and metropolitan area estimates of personal income is nearing completion. Total and per capita personal income for 1984-86 will appear in the April SURVEY. More detailed estimates of personal income by type and industry, 1969-86, will be available as of May 4.

- **Gross State Product.** Estimates of gross State product will be introduced in an upcoming issue of the SURVEY. The estimates are by industry for 1963-86.

- **Business Statistics.** The 25th edition of this biennial volume is available from the Government Printing Office. It contains historical data and methodological notes for all series in the "S" (or blue) pages of the SURVEY and for selected BEA series. See page 28 for more information.

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes in them are differences between these rates. Quarter-to-quarter percent changes are compounded to annual rates. Real, or constant-dollar, estimates are expressed in 1982 dollars.

It will be recognized immediately that taking the leading index apart to examine component movements is somewhat at odds with the rationale for constructing a composite index. The incongruity, however, merely highlights the pragmatic nature of the indicator approach and the frequently repeated reminder that the leading index must be used in conjunction with other analytical tools.

The extent to which the components move in the same direction as the leading index may be investigated in several ways. One is a diffusion index, which shows what percentage of the components is increasing. BEA has published a diffusion index for the leading index for as long as it has published the leading index itself.² This diffusion index tends to be quite volatile on a month-to-month basis. Nevertheless, near a peak in the leading index, the diffusion index typically falls from a value of more than 50—showing that more than one-half of the components had been increasing—to a value of less than 50. This pattern has manifested itself recently: The diffusion index dropped below 50 in November and stayed there in December and January (based on the 9

available components). However, the fact that the diffusion index remained above 50 in October—1 month after the high point of the leading index—is not at all typical. In the past, the diffusion index was always below 50 in the month following a peak in the leading index.

While a limitation of the leading index itself is that it conveys no information about how many of its components are moving in a given direction, a limitation of the diffusion index is that it conveys no information about the magnitude of changes in the components. One way to get a sense of both concerns (following peaks) is to ask: What is the smallest number of components that would have to be removed in order to eliminate the decline in the index? If, say, 10 components would have to be removed, then the weakness is obviously very widespread; if, in contrast, only 1 or 2 would have to be removed, then the weakness is much less widespread.

Declines in the leading index in the 4 months following September 1987 would be eliminated by removing 1, 2, 0, and 2 components, respectively. According to this gauge, then, the weakness does not seem to have been very widespread in any of these months. The pattern over the 4 months as a whole describes weakness that was somewhat less widespread than was typical of past peaks: The typical number of components that would

have to be removed to eliminate declines in the leading index in the 4 months following past peaks were 2, 3, 4, and 2, respectively. (These “typical” figures are medians, based on the 9 previous peaks in the leading index after 1948—including 2 that were not followed by business cycle peaks—and are based on the same 11 components that currently constitute the index.)

A related approach would be to ask: How would the leading index behave if the component responsible for the single largest negative contribution were removed? In the 4 months since September 1987, removing the single largest negative contribution would result in an index that increased ½ percent or more in October and December and that declined slightly in November and January. Following past peaks in the leading index, removing the single largest negative contribution typically resulted in an index that was flat in the first month after a peak and that declined slightly in each of the next 3 months.

These three approaches paint similar pictures of the extent to which the movement in the leading index is shared by the components of the index: Since September 1987, the scope of the weakness in the leading index has been somewhat more moderate than was typical in earlier episodes, although not so different as to look out of place in the context of those earlier episodes.

Table 1.—Net Contributions of the Individual Components to Changes in the Leading Index

Component	1987											1988

n.a. Not available.

^pPreliminary.

^rRevised.

NOTE.—The net contribution of an individual component is that component's share in the composite movement of the group. The percent change in the index equals (except for rounding differences) the sum of the net contributions of the individual components plus the trend adjustment factor of 0.139 for the leading index.

National Income and Product Accounts Tables

Selected NIPA Tables

New estimates in this issue: Fourth quarter and annual 1987, revised (*).

The selected set of 52 national income and product accounts (NIPA) tables shown in this section presents quarterly estimates, which are updated monthly. (In most of these tables, annual estimates are also shown.) The full set of 130 tables usually shown in July presents annual NIPA revisions. For more information on the presentation of the estimates, see "National Income and Product Accounts Estimates: When They are Released, Where They Are Available, and How They Are Presented" in the January 1988 SURVEY.

The full set of estimates for 1984-86 is in the July 1987 issue of the SURVEY; estimates for 1983 are in the July 1986 issue. Estimates for 1929-82 are in *National Income and Product Accounts, 1929-82: Statistical Tables* (GPO Stock No. 003-010-00174-7, price \$23.00). These publications are available from the Superintendent of Documents; see address on inside front cover.

The full set of NIPA tables is available on diskette for \$240 per year (12 updates, for the quarterly estimates prepared each month). For more information, write to the Bureau of Economic Analysis (BE-54), U.S. Department of Commerce, Washington, DC 20230.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics. Prior to 1973, the two IVA's are the same because information required for separate estimates is not available.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

NOTE.—The fixed-weighted price index and the chain price index, both of which are weighted averages of the detailed prices used in the deflation of GNP, are measures of price change. In calculating changes in these indexes, the composition of GNP is held constant. Consequently these changes reflect only changes in prices. The fixed-weighted price index measures price change over any period, using as weights the composition of GNP in 1982. The chain price index measures price change over any period, using as weights the composition of GNP in the first period. The implicit price deflator is a byproduct of the deflation of GNP. It is derived as the ratio of current- to constant-dollar GNP (multiplied by 100). It is the average of the detailed prices used in the deflation of GNP, but the prices are weighted by the composition of GNP in each period. Consequently, the implicit price deflator reflects not only changes in prices but also changes in the composition of GNP, and its use as a measure of price change should be avoided.

NOTE.—Quarterly data are averages of monthly figures. Quarterly percent changes are computed from quarterly data.

Long-Term Perspective: January 1968 to January 1988

Note.—Peak (P) indicates the end of business cycle expansion and the beginning of recession (shaded area). Trough (T) indicates the end of business cycle recession and the beginning of expansion. Business cycle peaks and troughs are designated by the National Bureau of Economic Research, Inc. The numbers entered on the chart indicate the length of leads (−) and lags (+) in months from the business cycle turning dates.

1. Beginning with data for January 1984, the net business formation component has been suspended from this index.

U.S. Department of Commerce, Bureau of Economic Analysis

Federal Fiscal Programs

THE fiscal year 1989 budget veers from the fiscal course charted by the administration over the past 7 years. In the budget message, the President states that "This budget does not fully reflect my priorities" but instead complies with the bipartisan budget agreement negotiated by the Congress and the administration late last year. That agreement was made to meet the deficit-reduction targets for fiscal years 1988 and 1989 set by the Balanced Budget and Deficit Control Act of 1985, as amended last fall.

The budget, submitted to Congress in mid-February, embodies the Omnibus Budget Reconciliation Act of 1987 and the Continuing Resolution for 1988. These two acts provide the legislation needed to implement the budget agreement. They provide—and the budget includes—increased revenues, lower defense spending, and marginally lower nondefense spending. The administration proposes additional modest reductions from current services outlays that are required, according to the administration, to meet fully the targeted deficit.

The legislation implementing the bipartisan budget agreement pares \$30 billion from the deficit projected last fall for 1988 and \$46 billion from that projected for 1989. Part of the deficit reduction comes from revenue increases of \$11.5 billion in 1988 and \$17.5 billion in 1989. The reconciliation act provides for the bulk of these increases: Extension of the 3-percent telephone excise tax; extension of social security coverage to certain earnings, such as those of inactive duty reservists; acceleration of corporations' estimated tax payments; and repeal of the installment method of accounting. The administration proposes additional increases, mainly by an extension of medicare hospital insurance coverage to State and local government employees not currently covered.

The agreement-implementing legislation also reduces national defense outlays from those presented in the mid-session review of the budget. After reductions of \$9.1 billion in 1988 and \$18.2 billion in 1989, national defense outlays increase 3 percent in 1989, one-half of the increase planned last year. In real terms, according to the administration, national defense outlays decline 1 percent, in contrast

to a 1.8-percent increase planned last year.

Nondefense spending, excluding social security and net interest, increases 2.9 percent in 1989, compared with a 5.3-percent increase planned last year. The agreement-implementing legislation provides for spending reductions in medicare, agricultural price supports, and the Postal Service and for substantial asset sales. The administration proposes additional modest spending reductions and certain asset sales to meet fully the targeted deficits.

Table 1.—Economic Assumptions Underlying the Fiscal Year 1989 Budget

Insured unemployment rate: ³				
Annual average	2.8	2.4	2.2	2.1
Interest rate: ⁴				
91-day Treasury bills.....	6.0	5.8	5.3	5.2
10-year Treasury notes.....	7.7	8.4	8.0	7.4

1. Consumer Price Index for urban wage earners and clerical workers.

2. Percent of labor force, including armed forces residing in the United States.

3. Insured unemployment under the State regular unemployment insurance program, excluding recipients of extended benefits, as percentage of covered employment under that program.

4. Average rate on new issues within a year. The estimates assume, by convention, that interest rates vary with the rate of inflation.

Source: *The Budget of the United States Government, Fiscal Year 1989*.

Economic assumptions

According to the administration, "[the] forecast for 1988 takes account of the favorable effects of tax reform, i.e., full implementation in January 1988 of the reduced marginal tax rates mandated by the Tax Reform Act of 1986 and continued confidence in the preservation of the tax reform's incentives for growth and efficiency." Further, the forecast is based on expectations that the budget compromise will be followed and that demand growth in other industrial countries will be sufficient to sustain world output growth while the U.S. trade deficit is being reduced. "Also critical for the forecast is the assumption that monetary authorities will provide sufficient liquidity to support real growth without fueling an acceleration of inflation." Other economic assumptions underlying the fiscal year 1989 budget are shown in table 1.

GNP in constant dollars is forecast to increase 2.4 percent from the fourth quarter of 1987 to the fourth quarter of 1988 and 3.5 percent to the fourth quarter of 1989. Prices are not expected to accelerate in 1988 and 1989. According to the Council of Economic Advisers, "Acceleration of inflation is not seen as a likely danger

in 1988." Although higher import prices are expected to continue to contribute to inflation, the Consumer Price Index is forecast to increase 4.3 percent (fourth quarter to fourth quarter), several tenths of a percentage point less than in 1987. The GNP deflator, which is not affected directly by import prices, is forecast to increase 3.9 percent in 1988. The 0.6-percentage-point step-up from 1987 primarily reflects a shifting of weights attached to different component prices used to calculate the deflator, not an acceleration of inflation. Prices, as measured by both the GNP deflator and the Consumer Price Index, are expected to increase less in 1989. Although slower real growth in 1988 is not expected "to bring further immediate reductions in the unemployment rate... some 1½ million new jobs will be created as employment growth keeps pace with an expanding labor force." The stronger real growth in 1989 is expected to lower the unemployment rate to 5.5 percent by the fourth quarter of that year.

For 1988, the Council based the real GNP increase (fourth quarter to fourth quarter) on the following assessment. Personal consumption expenditures are expected to increase 1.9 percent, up from 0.6 percent in 1987. The Council notes that "it was widely anticipated late last year that there would be some downward adjustment in consumer spending, [and] it appears that much of that adjustment occurred in the fourth quarter," when consumer spending actually fell. The modest 1.9-percent increase in 1988 is slightly below the projected growth rate of real disposable income. Nonresidential fixed investment is expected to increase 4.4 percent, compared with 3.7 percent in 1987. "The improving trade picture, which is lifting capacity utilization rates in manufacturing industries, will provide much of the motivation for increased investment." Residential investment is expected to increase 3.4 percent, in contrast to a 2.9-percent decline in 1987; housing starts of 1.7 million reflect the lower interest rates in 1988. Inventories are expected to "accumulate at a slower and more sustainable pace," reflecting the renewed growth of final sales. Net exports are expected to provide "nearly half of overall output growth," as the expansion of exports continues and the growth of

imports is restrained. Federal purchases of goods and services are expected to decline 4.6 percent, compared with a 2.9-percent increase in 1987; the decline in 1988 reflects the bipartisan budget agreement to reduce the deficit. State and local purchases are expected to increase 2.9 percent, about the same as in 1987.

Current services estimates

Current services estimates show what receipts and outlays would be without policy change. In concept, they are neither recommended amounts nor forecasts; they are a base with which administration or congressional proposals can be compared. The level of receipts generally assumes that tax changes occur as scheduled under current law. The level of outlays generally is that needed to maintain ongoing Federal programs and activities in real terms. The major exception is for national defense, for which the current services level of outlays is defined to be the same as the administration's unified budget proposal. The current services estimates for fiscal years 1988 and 1989 embody the Omnibus

Budget Reconciliation Act of 1987 and the Continuing Resolution for 1988.

Unified budget receipts in 1989 are \$0.7 billion higher than current services receipts, reflecting the administration proposals to increase receipts, as previously discussed (table 2). Unified budget outlays are \$8.2 billion lower than current services outlays; proposed program reductions (\$16.4 billion) exceed program increases (\$8.3 billion).

The largest program increase—\$2.2 billion—is for education, including \$0.5 billion for compensatory education for the disadvantaged. Increased spending for a proposed space station, the shuttle program, and basic research contribute to the \$1.6 billion increase for general science, space, and technology. Increased spending for Federal law enforcement and correctional activities contribute to the \$1.4 billion increase in the administration of justice. A proposal to link cost-of-living adjustments for veterans disability compensation to the annual change in the Consumer Price Index accounts for one-half of the \$0.8 billion increase in veterans benefits and services.

The largest program reduction—\$6.3 billion—is for a new function, central Federal credit activities. The new function is to record the nonsubsidy elements of the various Federal credit activities, and the reduction is

the result of a proposal to reform these activities. A proposal to substitute private loans for Rural Electrification Administration loans reduces energy outlays \$1.7 billion. A proposal to terminate all Amtrak subsidies accounts for about one-half of the reduction in ground transportation. The administration is proposing further reductions in indirect medical education payments and limits on graduate medical education payments to reduce outlays for medicare by \$1.0 billion. The administration also proposes to sell the naval petroleum reserves, reducing current services outlays \$3.2 billion.

Unified budget

The unified budget deficit decreases from \$146.7 billion in fiscal year 1988 to \$129.5 billion in fiscal year 1989 (table 3 and chart 1). Of the \$17.2 billion decline in the deficit, \$9.0 billion is the result of an assumed decline in the current services budget deficit and \$8.2 billion is the result of administration deficit-reduction proposals.

Receipts increase \$55.5 billion—or 6.1 percent—in 1989, to \$964.7 billion. Receipts in 1988 are \$909.2 billion, up 6.5 percent from 1987. Administration proposals increase receipts \$0.7 billion in 1989. The largest proposed increase is \$1.6 billion from the extension of medicare hospital insurance coverage to State and local government employees not currently covered by social security. This increase is partly offset by proposals to make permanent the research and experimentation tax credit and to liberalize the al-

location rules; combined, these proposals reduce receipts \$1 billion.

Outlays increase \$38.3 billion—or 3.6 percent—in 1989, to \$1,094.2 billion. Outlays in 1988 are \$1,055.9 billion, up 5.1 percent from 1987. The 1989 increase is the net result of \$52.6 billion in increases and \$14.3 billion in decreases. Table 4 shows unified budget outlays by function; four functions—national defense, social security, net interest, and medicare—account for 60 percent of the \$52.6 billion in increases. The \$14.3 billion in decreases is the result of \$7.7 billion in administration proposals and \$6.6 billion in enacted legislation, particularly the Omnibus Budget Reconciliation Act of 1987. The largest decline—\$4.5 billion—is for commerce and housing credit and reflects both proposed and enacted legislation. The en-

acted legislation includes the use of housing vouchers to replace lending for rural housing programs, reducing outlays \$1.8 billion in 1989. A large increase in undistributed offsetting receipts in 1989 is the result of the proposals to sell the naval petroleum reserves and the Alaska Power Administration.

Federal sector

BEA has prepared estimates of the Federal sector on the national income and product accounts (NIPA) basis consistent with the unified budget estimates (table 2). Estimates of the Federal sector, which are integrated conceptually and statistically with the rest of the NIPA's, differ in several respects from the unified budget.

1. Consists of social security tax rate and base changes since 1986.

Unlike the unified budget, they exclude financial transactions, such as loans, and record several categories of receipts and expenditures on a timing basis that is different from the budget. (For a more detailed discussion of the differences, see the February 1980 SURVEY OF CURRENT BUSINESS.) Table 5 shows the relation between unified budget receipts and NIPA receipts, and table 6 shows the relation between unified budget outlays and NIPA expenditures.

Federal receipts on the NIPA basis are \$1,029.1 billion in fiscal year 1989, up \$55.3 billion from 1988 (chart 2). The increase is the net result of a \$59.7 billion increase due to higher tax bases and a \$4.4 billion decrease due to tax changes (table 7). The tax changes are the net result of a \$16.8 billion decrease due to the Tax Reform Act of 1986, a \$6.5 billion increase due to higher social security tax rates and bases, a \$5.2 billion increase due to the Omnibus Budget Reconciliation Act of 1987, and a \$0.7 billion increase due to proposed legislation. The Tax Reform Act reduces personal taxes and nontax receipts \$16.0 billion. A proposal to exempt mutual fund shareholder expenses from the 2-percent floor for miscellaneous deductions reduces personal

taxes, and the proposal to make permanent (with modifications) the research and experimentation tax credit reduces corporate profits tax accruals. The proposal to extend medicare hospital insurance coverage for State and local government employees increases contributions for social insurance.

Federal expenditures on the NIPA basis are \$1,145.9 billion in 1989, up \$47.8 billion from 1988 (charts 3 and 4). Table 8 highlights the major factors that contribute to recent changes in Federal expenditures. The largest increase in 1989—\$13.6 billion—is for social security benefits, including \$9.2 billion for cost-of-living adjustments. Within purchases, the “other” category of nondefense purchases increases \$7.1 billion, including \$1.8 billion for space programs and \$0.5 billion for the strategic petroleum reserve; purchases of agricultural commodities by the Commodity Credit Corporation (CCC) increase \$7.0 billion. Medicare transfer payments increase \$5.7 billion, and net interest paid increases \$4.9 billion. Partly offsetting these increases are declines in the surpluses of the CCC and the Postal Service. The decline in the Postal Service surplus is partly due to a 16-percent average postal rate increase, effective in April 1988.

Table 9 shows the relation between national defense outlays in the unified budget and national defense purchases on the NIPA basis. In 1989,

outlays, which are measured on a checks-issued basis, increase more than purchases, which are recorded on a delivery basis. The smaller increase in purchases reflects a decline in deliveries—particularly for the B-1 bomber and the C-58 cargo plane.

Quarterly pattern.—Table 10 shows the major factors that affect the quarterly pattern of receipts and expenditures through fiscal year 1989. Receipts reflect the pattern of enacted and proposed legislation and the administration's projected quarterly pat-

tern of wages and profits. Expenditures reflect the pattern of proposed legislation and selected other items, mainly pay raises for Federal employees and cost-of-living adjustments in social security and Federal employee retirement benefits.

The Federal deficit declines substantially in the first quarter of calendar year 1988: Receipts increase strongly despite a decline in personal tax and nontax receipts that is due to the final rate reductions under the Tax Reform Act, and expenditures de-

cline, reflecting a large drop in purchases of agricultural commodities by the CCC. The deficit again declines substantially in the second quarter as personal taxes rebound—reflecting large temporary effects from the capital gains provisions of the tax act—and expenditures continue to decline. The deficit increases slightly in the third quarter as receipts decline more than expenditures. Personal taxes more than account for the decline in receipts, reflecting the absence of the temporary effects of the capital gains

provisions of the tax act. Agricultural subsidies and the CCC deficit account for the decline in expenditures. The deficit increases for two more quarters as expenditures grow faster than receipts, particularly in the fourth quarter of 1988 when CCC purchases and agricultural subsidies increase. The deficit then declines through the remainder of fiscal year 1989.

Cyclically adjusted deficit.—Cyclically adjusted receipts, expenditures, and surplus or deficit are estimates of what these measures would be if the

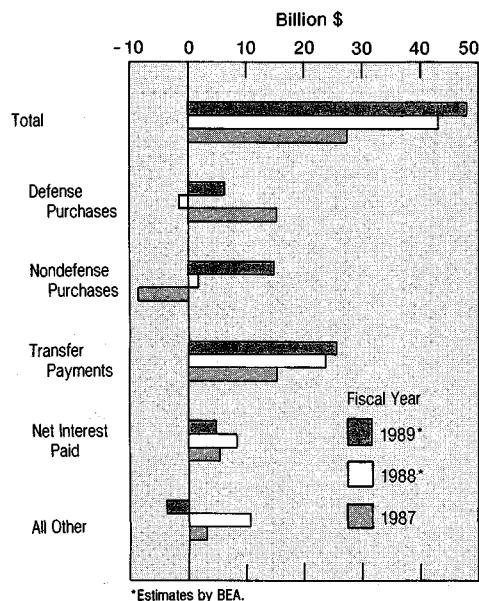

economy were moving along a trend GNP path—a path free from cyclical fluctuations—rather than along its actual path. Consequently, cyclical fluctuations in the economy do not affect cyclically adjusted budgets. Two measures of the cyclically adjusted budget, one a “middle-expansion” trend GNP and one based on a 6-percent unemployment rate trend GNP, are shown in table 11.

As measured using cyclical adjustments based on middle-expansion trend GNP, the Federal sector of the NIPA's was in deficit in calendar year 1986. The deficit declined in 1987 and

is expected to continue to decline in 1988. In 1988 and 1989, the cyclically adjusted deficit follows a quarterly pattern very similar to that of the NIPA deficit. It declines substantially through mid-1988 and increases in the second half of the year. Thereafter, it is relatively stable, increasing slightly in early 1989 and declining for the rest of the fiscal year.

The cyclically adjusted budget based on middle-expansion trend GNP is associated with a middle-expansion trend unemployment rate of 7.4 percent. The cyclically adjusted deficit based on a 6-percent unemployment rate is lower, but follows the same quarterly pattern.

State and Local Government Fiscal Position in 1987

THE surplus of State and local governments, as measured on a national income and product accounts (NIPA) basis, was \$44½ billion in 1987, \$12½ billion less than in 1986 (table 1). This decline in the overall fiscal position was the net result of a \$2 billion increase in the surplus of social insurance funds and a \$14½ billion swing to a deficit in the other funds measure. The other funds surplus had declined steadily from 1984 to 1986, reflecting strong growth in capital spending financed by borrowing and, to some extent, weakness in revenue growth in the Southwest and several farm States.¹ The swing to a deficit in 1987 was largely the result of a strong acceleration in other purchases of goods and services from business and a decline in Federal grants-in-aid.

Receipts increased \$32½ billion in 1987, \$6½ billion less than in 1986. The deceleration was more than accounted for by Federal grants-in-aid, which declined \$3½ billion following a \$7 billion increase in 1986. Expenditures increased \$45 billion, about the same as in 1986.

Receipts

State and local government receipts increased 5½ percent in 1987, 1½ percentage points less than in 1986 (table 2). As just indicated, Federal grants-in-aid declined after a sizable increase, and contributions for social insurance increased less in 1987. The slowing from these sources was only partly offset by an acceleration of general own-source receipts (GOSR).

The decline in Federal grants-in-aid, following increases that averaged 7½ percent from 1983 to 1986, was

1. In the NIPA's, State and local government receipts exclude proceeds from borrowing, while spending financed by this borrowing is included in State and local government expenditures. Consequently, when capital spending, which is largely financed by borrowing, increases, the other funds measure tends to move toward a deficit.

Note.—These estimates are found in NIPA table 3.3. For 1986 and 1987, see the "Selected National Income and Product Accounts Tables" in this issue; for 1983-85, see the July 1987 SURVEY OF CURRENT BUSINESS.

more than accounted for by the end of the general revenue sharing program. General revenue sharing, under which State governments (from 1972 to 1980) and local governments (from 1972 to 1986) received funds distributed by formula and with few restrictions on their use, had amounted to \$4 billion in 1986.

The acceleration in GOSR was paced by corporate profits tax accruals, which increased 28 percent following a 3½-percent increase in 1986. About one-fourth of the \$6 billion increase in 1987 was traceable to the effects of the Federal Government's Tax Reform Act of 1986, which broadened the corporate tax base for States that follow Federal practices with respect to deductibility of costs (including depreciation) in determining taxable income.

Personal tax and nontax payments also accelerated; they increased 8 percent in 1987, up from a 7-percent increase in 1986. The Tax Reform Act added an estimated \$½ billion to personal income taxes in both 1986 and 1987, reflecting two major responses by taxpayers to the act. First, taxpayers realized a large volume of capital gains in late 1986 to take advantage

GOSR General own-source receipts.

Note.—Estimates of the effect on receipts of law changes are calculated as follows. For changes of which BEA is aware (hence the use of "selected" in the line title in the table), the estimate is of the amount of the change over the 12-month period after the change is introduced. For personal taxes, the change is introduced when the tax is paid/refunded or when withholding is changed. For indirect business taxes, the change is introduced to coincide with the transaction affected. The calculations are made by months for personal taxes and nontaxes (because they are used to prepare monthly estimates of disposable personal income) and by quarters for other taxes. Two characteristics of the resulting estimates should be noted. First, aggregation of the monthly or quarterly estimates to calendar years may give results that appear anomalous. For example, a sales tax imposed for 1 year beginning July 1 would be recorded as follows: (a) For quarters, an increase in receipts by the amount of the 12-month yield in the third quarter of that year and a decrease by the same amount in the third quarter of the following year, and (b) for calendar years, an increase in receipts by the amount of 12-month yield divided by 4 in the year that the increase takes place, no change in receipts in the following year, and a decrease by the amount of the 12-month yield divided by 4 in the year after that (i.e., 2 years after the increase). Second, a law change after July, which is the beginning of the fiscal year for many States, would have more impact on receipts of the next calendar year than those of the calendar year in which it occurs.

The effect of tax law changes excluded from receipts to derive the addenda items in the table are the changes beginning with those introduced in 1982. The 12-month effects, recorded for calendar years as described above, are cumulated.

of the preferential tax treatment of capital gains income before its repeal in 1987. Taxes paid on these transactions added an estimated $\frac{1}{2}$ billion to income taxes in 1986 and \$2 billion in 1987. Second, taxpayers deferred income from 1986 to 1987 or later to take advantage of the lower tax rates provided by the act after 1986. Such deferrals removed income from the 1986 tax base and lowered final net settlements in 1987 by an estimated $\frac{1}{2}$ billion. (To the extent that deferred income was taken in 1987, taxes on that income either were paid in 1987 declarations or will be paid in 1988 final settlements. Deferrals extending into 1988 will generate taxes in both 1988 and 1989.) In contrast, State legislative actions reduced personal income taxes in both 1986 and 1987. The reduction was an estimated $\frac{1}{2}$ billion in each year. In the absence of the State legislative actions, income taxes would have increased 9 $\frac{1}{2}$ percent in 1986 and 10 $\frac{1}{2}$ percent in 1987.

Indirect business tax and nontax accruals decelerated in 1987; they increased 5 $\frac{1}{2}$ percent, down from a 7-percent increase in 1986. Sales taxes and property taxes each increased at the same pace as in 1986. All other indirect business taxes, to which the deceleration is traceable, declined 3 percent following a 6-percent increase. Changes in both years reflected energy-related receipts. In 1986, the combination of severance taxes and of rents and royalties (revenues from leases of State-owned land) declined \$3 billion. One-time payments resulting from the settlement of court cases involving violations of Federal oil pricing regulations offset the decline. (See "State and Local Government Fiscal Position in 1986" in the February 1987 SURVEY OF CURRENT BUSINESS for a more detailed discussion.) In 1987, the combination of severance taxes and of rents and royalties declined $\frac{1}{2}$ billion more; however, in the absence of the one-time payments, total energy-related receipts declined $\frac{1}{2}$ billion. In the absence of these energy-related receipts, all other indirect business taxes would have increased about 12 percent in both 1986 and 1987.

Sales taxes increased 7 percent in 1987—the same rate of increase as in 1986. This stability was the result of legislative actions that added more than \$3 billion to taxes in 1987; they

had added about \$1 billion in 1986. In the absence of these actions, sales taxes would still have increased about 7 percent in 1986, but only 5 $\frac{1}{2}$ percent in 1987.

Contributions for social insurance decelerated in 1987; they increased 3 $\frac{1}{2}$ percent, down from a 5 $\frac{1}{2}$ -percent increase in 1986. This deceleration was due to a one-time contribution of $\frac{1}{2}$ billion to the Los Angeles County, California, general employees retirement system at the end of 1986. In the absence of this transaction, contributions would have increased 4 $\frac{1}{2}$ percent in both years.

Expenditures

State and local government expenditures increased 8 percent in 1987, compared with a 9-percent increase in 1986 (table 3). All major categories of expenditures recorded smaller increases in 1987.

Purchases of goods and services increased 8 percent, compared with 8 $\frac{1}{2}$ percent in 1986. This deceleration was

accounted for by purchases of structures, which increased 3 percent—or about \$2 billion—following a 14 $\frac{1}{2}$ -percent increase in 1986. Increases in these purchases in 1987 were widespread but small; although construction of education buildings, buildings in the miscellaneous category (such as office buildings and prisons), water supply facilities, and sewers all increased, the combined increase was less than \$2 billion. In 1986, these four categories had increased about \$5 billion. Highway construction, the largest category, was flat in 1987 following a $\frac{1}{2}$ billion increase in 1986.

Other purchases of goods and services from business accelerated in 1987; they increased 10 $\frac{1}{2}$ percent, compared with 7 percent in 1986. In constant (1982) dollars, in contrast, these purchases decelerated (table 4). Accordingly, the current-dollar acceleration was traceable to a rebound in the rate of price increases. The most notable price movement was for nondurable goods, which includes petroleum products. The fixed-weighted price

index for nondurable goods purchased by State and local governments increased 5 percent in 1987, following a 9-percent decline in 1986 (see NIPA table 7.16).

Expenditures other than purchases also decelerated in 1987; they increased 9½ percent, compared with 12½ percent in 1986. Transfer payments to persons increased 1½ percentage points less than in 1986. All the major types of transfer payments contributed to the deceleration. A decline in transfers for low-income energy assistance held down the increase in public assistance, and a decline in transfers for job training held down other transfer payments. Interest paid decelerated 1 percentage point, as additions to new borrowings declined for the second consecutive year.

Fiscal position

The other funds measure for State and local governments moved into a deficit position in 1987, shifting \$14½ billion from a \$7½ billion surplus in 1986.² A deficit first appeared in the fourth quarter of 1986 (chart 5). Compensation of employees accelerated in that quarter as a result of the Los Angeles County retirement contribution mentioned earlier, and all other purchases (other than structures, which declined 1½ percent) accelerated as a result of price increases, particularly for petroleum products.

As mentioned earlier, the surplus recorded by the other funds measure declined steadily in 1984–86 as a result of strong increases in capital spending. From the fourth quarter of 1983 to the fourth quarter of 1986, purchases of structures increased at an average quarterly rate of 2½ percent. However, from the fourth quarter of 1986 to the fourth quarter of 1987, purchases of structures increased at an average quarterly rate of only 1 percent. In contrast, all other purchases from business in-

creased at an average rate of 3 percent and were the major factor in the shift to a deficit in 1987.

Outlook

An assessment of the State and local fiscal position for 1988 is complicated by continuing effects of the Tax Reform Act of 1986 on State and local receipts. Many States tied to Federal practices in determining taxable income have reduced tax rates and increased the value of personal exemptions to compensate for the effect in 1987 of the broadening of the tax base by the tax act. Some base-broadening provisions, such as the ending of the deductibility of consumer interest expense, will be phased in over a period

of several years. It is uncertain whether States will make further compensating adjustments as these tax act provisions become fully effective.

The effect in 1988 of taxpayers' behavioral responses to the tax act is also uncertain. If realizations of capital gains in 1986, which added to personal income taxes in 1986 and 1987, were borrowed from the future, then realizations, incomes, and taxes will be lower in 1988. However, if large amounts of income were deferred in the past 2 years to take advantage of the lower tax rate in 1988, then personal taxes will be boosted by declarations paid on the realization of the income in 1988. An additional complication is that the termination of preferential treatment of capital gains income may generate a larger volume of capital transactions, higher incomes, and higher taxes. The larger volume of transactions may occur because there is no longer an incentive to hold assets for a specific period—in 1986, at least 6 months for most assets—to qualify for a lower tax rate.

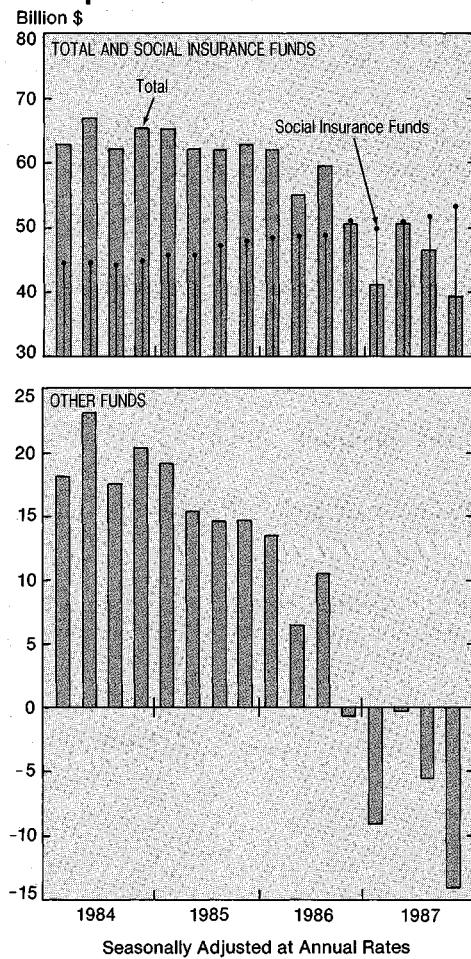

In the absence of new legislative actions, GOSR is likely to increase about 7½ percent (assuming economic growth of somewhat less than the almost 3 percent attained in 1987 and inflation of around 4 percent). Grants-in-aid are likely to increase about 5 percent, bringing total receipts—excluding social insurance funds—to about \$650 billion.

On the expenditures side, borrowing already accomplished and a level of grants for capital purposes equal to that in 1987 would support a year-over-year increase in purchases of structures of about 5 percent. Assuming the 5-percent increase in structures, total purchases would increase about 7½ percent. The increase in all other expenditures—excluding social insurance funds—is expected to range from 7 to 8 percent, bringing total expenditures—excluding social insurance funds—to about \$660 billion.

Accordingly, the all other funds deficit is likely to increase to about \$10 billion. The social insurance funds surplus will increase \$2 to \$3 billion to about \$54 billion, so that the NIPA surplus would be unchanged.

CHART 5

State and Local Government Surplus or Deficit, NIPA Basis

U.S. Department of Commerce, Bureau of Economic Analysis 88-2-5

2. The 1986 surplus was enhanced by \$4 billion in one-time petroleum-related payments (part in indirect business nontaxes and part in grants-in-aid). In the absence of these payments, the 1986 surplus would have been only \$3½ billion, the 1986 decline would have been \$12½ billion, and the 1987 change would have been only \$11 billion.

A Comprehensive Reference on the U.S. Economy

BUSINESS STATISTICS: 1986

Historical data, sources, definitions, and methods of compilation
for over 2,000 series, including...

General business activities, such as:

- Business sales and inventories
- Construction and real estate
- Consumer, producer, and farm prices
- Finance
- Foreign trade
- Industrial production
- Labor force, employment, and earnings
- Personal income and outlays

And industries, such as:

- Chemicals
- Electric power and gas
- Food and tobacco
- Lumber
- Metal and machinery
- Petroleum and coal
- Pulp and paper
- Textiles

The new edition, the 25th of this supplement to the SURVEY OF CURRENT BUSINESS, presents monthly data for 1983-86 and annual data for 1961-86 for all series that appear in the SURVEY's blue pages. For key series, the monthly data extend back to 1961.

The volume also presents quarterly and annual data for 1953-86 for selected series prepared by the Bureau of Economic Analysis: National income and product accounts, plant and equipment expenditures, and U.S. international transactions.

FOOTNOTES FOR PAGES S-1 THROUGH S-32

General Notes for all Pages:

- r Revised.
- p Preliminary.
- e Estimated.
- c Corrected.

Page S-1

‡ Includes inventory valuation and capital consumption adjustments.
 § Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.
 ◇ See note "◇" for p. S-2.

Page S-2

1. Based on data not seasonally adjusted.
 ◇ Effective Oct. 1987 SURVEY, the industrial production index has been revised back to Jan. 1985. These revisions are available upon request.
 # Includes data not shown separately.

Page S-3

Includes data for items not shown separately.

Page S-4

1. Based on data not seasonally adjusted.
 # Includes data for items not shown separately.
 § Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.
 ◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

Page S-5

1. Based on unadjusted data.
 @ Compiled by Dun & Bradstreet, Inc.
 # Includes data for items not shown separately.
 § Ratio of prices received to prices paid (parity index).
 ‡ See note "‡" for p. S-4.
 † Effective with the Feb. 1988 SURVEY, data (back to 1984, for some commodities) have been revised. These revisions are available upon request.
 ◇ See note "†" for p. S-6.

Page S-6

§ Effective with the release of the January 1988 index, all producer price indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982=100. Only indexes with a base later than December 1981 will remain unchanged. Selection of the 1982 period was made to coincide with the reference year of the shipment weights, which have been taken primarily from the 1982 Census of Manufactures. The last rebasing of these indexes occurred in February 1971, when the 1967 base was substituted for the 1957-59 base. Historical data on the new base are available upon request. For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

Includes data for items not shown separately.
 † Effective with the release of the January 1988 index, all consumer price indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982-84=100. Only indexes with a base later than December 1981 will remain unchanged. Selection of the 1982-84 period was made to coincide with the updated expenditure weights, which are based upon data tabulated from the Consumer Expenditure Surveys for 1982, 1983, and 1984. The last rebasing of these indexes occurred in February 1971, when the 1967 base was substituted for the 1957-59 base. Historical data on the new base are available upon request. Beginning with January 1987, data are calculated using 1982-84 expenditure patterns and updated population weights. Additional information regarding these changes is available from the Bureau of Labor Statistics, Washington, DC 20212.

Address requests for data to:

Statistical Series Branch
 Current Business Analysis Division
 Bureau of Economic Analysis
 U.S. Department of Commerce
 Washington, D.C. 20230

Page S-7

1. Computed from cumulative valuation total.
 2. Index as of Feb. 1, 1988: building, 382.0; construction, 415.2.
 # Includes data for items not shown separately.
 § Data for Jan., April, July, and Oct. 1987 are for five weeks; other months four weeks.
 ◇ Effective Feb. 1988 SURVEY, data for seasonally adjusted housing starts have been revised back to 1985.
 ‡ Effective July 1986 SURVEY, this index has been revised to a new comparison base of 1982=100. Revisions back to 1964 are available upon request.

Page S-8

1. Advance estimate.
 ◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.
 § Data include guaranteed direct loans sold.
 # Includes data for items not shown separately.
 @ Effective Oct. 1987 SURVEY, data are for mortgage loans closed as FSLIC-insured institutions. Historical data back to 1976 are available upon request.

Page S-9

1. Advance estimate.
 2. Data beginning Jan. 1986 are not strictly comparable with earlier data because of a change in estimation procedures.
 # Includes data for items not shown separately.
 ‡ Effective with the January 1988 SURVEY, the seasonally adjusted labor force series have been revised back to January 1983. The January 1988 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1983-87 revision period are in the February 1988 issue of *Employment and Earnings*.
 † The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.
 @ Data include resident armed forces.

Page S-10

◇ See note "◇" for p. S-9.
 § Effective June 1987 SURVEY, data have been revised back to April 1985 (not seasonally adjusted) and January 1982 (seasonally adjusted) to reflect new benchmarks and seasonal adjustment factors. The June 1987 issue of *Employment and Earnings* will contain a detailed discussion of the effects of the revisions.

Page S-11

‡ This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.
 ◇ Production and nonsupervisory workers.
 § See note "§" for p. S-10.

Page S-12

1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.
 § See note "§" for p. S-10.
 ◇ Production and nonsupervisory workers.
 ‡ Earnings in 1977 dollars reflect changes in purchasing power since 1977 by dividing by Consumer Price Index. Effective Feb. 1988 SURVEY, this series has been revised back to 1983 to reflect new seasonal factors for the CPI-W. Revised data are available upon request.
 §§ Wages as of Feb. 1, 1988: Common, \$17.07; Skilled, \$22.45.
 @ New series. The Employment Cost Index (ECI) is a quarterly measure of the average change in the cost of employing labor. See p. S-36 of the August through October 1984 issues of the SURVEY for a brief description of the ECI.
 † Excludes farm, household, and Federal workers.
 §§ See note "‡" for p. S-11.

Page S-13

1. Average for Dec.
 2. Reported annual; monthly revisions are not available.
 3. Effective December 31, 1987, eight brokers and dealers in commercial paper were added to the reporting panel resulting in a series break. End of month figures on the old basis are as follows: All issuers, 352,915; financial companies, 275,907; dealer placed, 103,667; directly placed, 172,240; and nonfinancial companies, 77,008.

† Effective January 1984, series revised due to changes in the reporting panel and in the item contents. The new panel includes 168 banks that had domestic office assets exceeding \$1.4 billion as of December 31, 1982. Beginning Jan. 1985, data are as of the last Wednesday of the month. Earlier data are as of the Wednesday nearest the end of the month or year (meaning some data are as of the first Wednesday of the next month).
 # Includes data for items not shown separately.

‡ Reflects offsetting changes in classification of deposits of thrift institutions. Deposits of thrifts were formerly grouped with deposits of individuals, partnerships, and corporations, instead of with deposits of commercial banks in the United States.

* "Transaction balances other than demand deposits" consists of ATS, NOW, super NOW, and telephone transfer accounts, which formerly were classified with savings deposits. "Nontransaction balances" reflects the combination of deposits formerly reported separately as time deposits and the savings deposits remaining after deduction of the items now reported separately under "transaction balances".

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

◇ Securities of Federal agencies and corporations have been shifted out of "other securities" and are now combined with U.S. Treasury securities. Also, loan obligations of States and political subdivisions have been shifted out of "other securities" and are now shown separately among the loan items.

@ Insured unemployment (all programs) data include claims filed under extended duration provisions of regular State laws; amounts paid under these programs are excluded from state benefits paid data.

@@ Insured unemployment as a percent of average covered employment in a 12-month period.

** Effective Aug. 1987 SURVEY, data are provided by the Farm Credit Corporation of America on a quarterly basis. Quarterly data are available back to first quarter 1985, with annual data available back to 1961.

Page S-14

1. Data are for fiscal years ending Sept. 30 and include revisions not distributed to the months.

2. Weighted by number of loans.

3. Effective Sept. 1987 SURVEY, the outlays for the Federal Deposit Insurance Corporation have been adjusted by \$442 million for 1986 and \$158 million for 1987 to reflect Federal Deposit Insurance Corporation debentures issued in lieu of cash and not reported previously as outlays.

-# Includes data for items not shown separately.

◇ Adjusted to exclude domestic commercial interbank loans and federal funds sold to domestic commercial banks.

‡ Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

† Courtesy of *Metals Week*.

@@ Average effective rate.

† Revised for periods between October 1986 and February 1987. During this interval, outstanding gold certificates were inadvertently in excess of the gold stock.

Page S-15

† Effective Feb. 1988 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

‡ Composition of the money stock measures is as follows:

M1.—This measure is currency plus demand deposits at commercial banks and interest-earning checkable deposits at all depository institutions—namely NOW accounts, automatic transfer from savings (ATS) accounts, and credit union share draft balances—as well as a small amount of demand deposits at thrift institutions that cannot, using present data sources, be separated from interest-earning checkable deposits.

M2.—This measure adds to M1 overnight repurchase agreements (RP's) issued by commercial banks and certain overnight Eurodollars (those issued by Caribbean branches of member banks) held by U.S. nonbank residents, money market mutual fund shares, and savings and small-denomination time deposits (those issued in denominations of less than \$100,000) at all depository institutions. Depository institutions are commercial banks (including U.S. agencies and branches of foreign banks, Edge Act corporations, and foreign investment companies), mutual savings banks, savings and loan associations, and credit unions.

M3.—This measure equals M2 plus large-denomination time deposits (those issued in denominations of \$100,000 or more) at all depository institutions (including negotiable CD's) plus term RP's issued by commercial banks and savings and loan associations.

L.—This broad measure of liquid assets equals M3 plus other liquid assets consisting of other Eurodollar holdings of U.S. nonbank residents, bankers acceptances, commercial paper, savings bonds, and marketable liquid Treasury obligations.

‡ Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◇ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

Page S-16

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

† For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

@ Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because of revisions to the totals not reflected in the component items.

Page S-17

Includes data not shown separately.

§ Data may not equal the sum of geographic regions, or commodity groups and principal commodities, because of revisions to the totals not reflected in the components.

Page S-18

1. Annual total; quarterly or monthly revisions are not available.

2. Restaurant sales index data represent hotels and motor hotels only.

3. For month shown.

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

* Data have been revised back to 1981. They now include commuter railroads and small transit systems. Revised data are available upon request.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◇ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

† Before extraordinary and prior period items.

@ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

Page S-19

1. Reported annual total; monthly revisions are not available.

2. For month shown.

3. Less than 500 short tons.

Includes data for items not shown separately.

§ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.

@ Because of deregulation, carriers are free to enter both domestic and international markets. Previously, carriers were limited either to domestic or overseas markets. Separate data for domestic or overseas are no longer available.

† Data for 1985-86 (and 1984, for inorganic chemical production items) have been revised and are available upon request.

◇ Beginning January, 1986, data are not directly comparable to earlier periods because the data represent only companies that have annual revenues over \$100 million.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.

2. Data are no longer available.

§ Data are not wholly comparable from year to year because of changes from one classification to another.

◇ Data for 1985-86 have been revised and are available upon request.

@ Includes less than 500 electric generation customers not shown separately.

Page S-21

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1-Aug. 31).

2. Crop estimate for the year.

3. Stocks as of June 1.

4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year).

5. Less than 50,000 bushels.

6. Stock estimates for barley and oats are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column.

7. Stocks as of Dec. 1.

8. See note "§" for p. S-6 regarding a change to a new reference base in 1988.

9. Prices are no longer available.

10. Effective with 1986 reporting, coverage has been reduced to 21 selected States, representing approximately 85 percent of U.S. production. Comparable data for 1985 are available upon request.

11. Crop estimate for 1987.

12. Reported annual total; monthly revisions are not available.

§ Excludes pearl barley.

Bags of 100 lbs.

§ Quarterly data now represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. Annual data represent Dec.-Nov.

Page S-22

1. Figure covers 20 selected States, representing approximately 84 percent of U.S. production.

2. See note "§" for p. S-6 regarding a change to a new reference base in 1988.

§ Cases of 30 dozen.

◇ Bags of 60 kilograms.

Page S-23

1. Crop estimate for the year.
 2. Reported annual total; revisions not distributed to the months.
 3. Crop estimate for 1987.
 4. See note "§" for p. S-6 regarding a change to a new reference base in 1988.
 5. Data suppressed because it did not meet publication standards of the Bureau of the Census.
- # Totals include data for items not shown separately.

Page S-24

1. Annual data; monthly revisions not available.
 2. Less than 500 tons.
 3. Beginning January 1985, data have been revised because of a new estimation procedure and may not be comparable to earlier periods.
 4. See notes 1 and 3 for this page.
 5. See note "§" for p. S-6 regarding a change to a new Reference base in 1988.
- * New series from the American Metal Market. The composite scrap price represents the average of consumers' buying prices, delivered, at the following markets: Chicago, Pittsburgh, and Philadelphia. Annual and monthly composite price data are available back to January 1982.

Page S-25

1. Annual data; monthly revisions are not available.
 2. For month shown.
 3. Includes foreign ores.
- † Beginning January 1982, data represent metallic (mostly aluminum) content. Data for 1981 and prior years represent aluminum content only.
- ◊ The source for these series is now the Bureau of Mines.
- § Source: *Metals Week*.

Page S-26

1. Annual data; monthly revisions are not available.
 2. Less than 50 tons.
 3. Beginning 1st quarter 1984, data have been revised because of a new sample and may not be comparable to earlier periods.
 4. Total for 8 months; no data for March, April, September, and October.
 5. Total for 10 months; no data for November and December.
 6. Beginning July 1986, data are not comparable with earlier periods.
 7. Total for 5 months; data for May, June, Sept., Nov., and Dec.
 8. Total for 10 months; no data for Jan. and Feb.
- ◊ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
- @ All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment.
- ‡ Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
- # Includes data not shown separately.
- § Beginning with the Aug. 1985 SURVEY, unadjusted fluid power shipments indexes are shown. Seasonally adjusted indexes are no longer available.
- † For an explanation of material handling equipment shipments and historical data, see p. S-35 of the Dec. 1985 SURVEY.
- @@ Beginning Oct. 1986, the Lead price represents North American Mean.

Page S-27

1. Data are for five weeks; other months 4 weeks.
 2. Beginning January 1986, data have been restated because a new methodology has been adopted.
 3. See note "§" for p. S-6 regarding a change to a new reference base in 1988.
- # Includes data for items not shown separately.
- § Includes nonmarketable catalyst coke.
- ◊ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
- † Effective with the Oct. 1987 SURVEY, coal production data for 1986 have been revised. These revisions are available upon request.
- @ Includes U.S. produced and imported microwave ovens and combination microwave oven/ranges.
- ‡ "Tractor shovel loaders" includes some front engine mount wheel tractors that had previously been included in "Tractors, wheel, farm, and nonfarm."

Page S-28

1. Reported annual totals; revisions not allocated to the months.
 2. See note "§" for p. S-6 regarding a change to a new reference base in 1988.
- # Includes data for items not shown separately.

Page S-29

1. See note 1 for p. S-28.
 2. See note "§" for p. S-6 regarding a change to a new reference base in 1988.
- ◊ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users.
- # Compiled by the American Newspaper Publishers Association.

Page S-30

1. Reported annual total; revisions not allocated to the months.
 2. Crop for the year.
 3. Data cover five weeks; other months, four weeks.
- # Includes data for items not shown separately.
- ◊ Cumulative ginnings to the end of month indicated.
- § Bales of 480 lbs.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year: Aug. 1-Jul. 31.
 4. For five weeks; other months four weeks.
 5. Estimated figure.
 6. See note "§" for p. S-6 regarding a change to a new reference base in 1988.
- ◊ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- # Includes data not shown separately.
- § Bales of 480 lbs.
- † Beginning 1st qtr. 1987, data are not comparable with earlier periods because they represent production of women's and girls' apparel and changes in representation of some items.

Page S-32

1. Annual total includes revisions not distributed to the months.
 2. Production of new vehicles (thous. of units) for Jan. 1988: *passenger cars*, 485; *trucks and buses*, 328.
 3. Data are reported on an annual basis only.
 4. Effective with the Feb. 1988 SURVEY, data have been revised back to 1985 and are available upon request.
 5. Beginning with January 1987, data include Honda, Nissan, and Toyota passenger cars produced in U.S. plants.
 6. Beginning with January 1987, data include Nissan trucks produced in U.S. plants.
 7. Beginning with 1st qtr. 1987, jeans, jean-cut casual and dungarees are included with trousers.
 8. Effective with 1987, frequency of reporting has been changed from a monthly to a quarterly basis.
- # Total includes backlog for nonrelated products and services and basic research.
- § Domestics comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
- ◊ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some states are not available, month-to-month comparisons are not strictly valid.
- ‡ Excludes railroad-owned private refrigerator cars and private line cars.

BEA Publications

Available From GPO

SURVEY OF CURRENT BUSINESS. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; and 36 pages of tables that present over 1,900 major economic series obtained from other public and private sources. Monthly. \$6.50 single copy; \$18.00 per year.

Business Statistics: 1986. (1987) Provides monthly or quarterly data for 1983-86 and annual data for 1961-86 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 325 pages. \$16.00 (GPO Stock No. 003-010-00181-0).

Business Conditions Digest. Contains tables and charts for 300 series, including business cycle indicators and other series that help evaluate business conditions. Features the composite indexes of leading, coincident, and lagging indicators. Also included are cyclical comparison charts and data sources. Monthly. \$4.00 single copy; \$44.00 per year.

Handbook of Cyclical Indicators. (1984) Contains series descriptions and data for 1947-82 for all series that appear in Business Conditions Digest. Features the composite indexes of cyclical indicators. 195 pages. \$5.50 (GPO Stock No. 003-010-00127-5).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pages. \$23.00 (GPO Stock No. 003-010-00174-7).

BEA Methodology Paper No. 1: Introduction to National Economic Accounting. (1985) Introduces the concepts of the national income and product accounts by placing these accounts within the framework of national economic accounting. Shows how the national income and product accounts, capital finance accounts, and input-output accounts—the major branches of national economic accounting in the United States—are derived from the conventional accounting statements. 19 pages. \$1.00 (GPO Stock No. 003-010-00158-5).

BEA Methodology Paper No. 2: Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends. (1985) Describes the concepts, sources, and methods of the corporate profits components of the national income and product accounts. 61 pages. \$2.50 (GPO Stock No. 003-010-00143-7).

BEA Methodology Paper No. 3: Foreign Transactions. (1987) Describes the preparation of estimates in the national income and product accounts (NIPA's) of net exports (both current- and constant-dollar), transfer payments to foreigners, capital grants received by the United States, interest paid by Government to foreigners, and net foreign investment. Also describes the relationship between foreign transactions estimates in the NIPA's and those in the balance of payments accounts. 52 pages. \$2.75 (GPO Stock No. 003-010-00178-0).

BEA Methodology Paper No. 4: GNP: An Overview of Source Data and Estimating Methods. (1987) Provides basic information about GNP, including the conceptual basis for the account that presents GNP, definitions of each of the components on the income and product side of that account, and a summary, presented in tabular form, of the source data and methods used in preparing estimates of current- and constant-dollar GNP. Also provides an annotated bibliography, with a directory, of the more than 50 items over the last decade that provided methodological information about GNP. 36 pages. \$2.00 (GPO Stock No. 003-010-00179-8).

Index of Items Appearing in the National Income and Product Accounts Tables. (1987) Indexes general subject areas as well as detailed line items in the national income and product accounts tables. 18 pages. \$1.25 (GPO Stock No. 003-010-00180-1).

U.S. Direct Investment Abroad: Balance of Payments and Direct Investment Position Estimates, 1977-81. (1987) Contains revised estimates of U.S. direct investment abroad and balance of payments transactions between U.S. parent companies and their foreign affiliates for 1977-81. Includes estimates by country and industry of foreign affiliate. 51 pages. \$2.75 (GPO Stock No. 003-010-00175-5).

U.S. Direct Investment Abroad: 1982 Benchmark Survey Data. (1985) Contains estimates by country and industry of foreign affiliate and by industry of U.S. parent on the financing and operations of foreign

affiliates and U.S. parent companies, on the U.S. direct investment position abroad, and on balance of payments transactions between U.S. parents and their foreign affiliates. 462 pages. \$18.00 (GPO Stock No. 003-010-00161-5).

1985 OBERS BEA Regional Projections. (1985) Two volumes. Contains estimates for 1969, 1973, 1978, and 1983, and projections for 1990, 1995, 2000, 2005, 2015, and 2035 for total personal income, population, per capita personal income, and employment and earnings by industry for the United States and States.

Vol. 1. State Projections to 2035. 131 pages. \$4.75 (GPO Stock No. 003-010-00157-7).

Vol. 2. Metropolitan Statistical Area Projections to 2035. 356 pages. \$12.00 (GPO Stock No. 003-010-159-3).

Regional Multipliers: A User Handbook for the Regional Input-Output Modeling System (RIMS II). (1986) Contains an explanation of how to use regional input-output multipliers, by industry, for output, earnings, and employment. Includes information on how to perform systematic analyses of regional economic impacts of projects and programs. Also contains multipliers from the RIMS II, sample tables of input-output multipliers, and hypothetical case studies. 131 pages. \$6.50 (GPO Stock No. 003-010-00163-1).

BEA Staff Paper No. 43: The Use of National Income and Product Accounts for Public Policy: Our Successes and Failures. (1985) Uses two indirect approaches to evaluate the national income and product accounts' successes and failures as tools for public policy. 26 pages. \$1.25 (GPO Stock No. 003-010-00162-3).

BEA Staff Paper No. 44: The BEA Quarterly Econometric Model of the U.S. Economy: 1985 Version. (1986) Contains a detailed description of the component sectors and individual equations contained in the BEA quarterly econometric model as of fall of 1985. 87 pages. \$4.50 (GPO Stock No. 003-010-00164-0).

BEA Staff Paper No. 45: Cyclical Adjustment of the Federal Budget and Federal Debt: Updated Detailed Methodology and Estimates. (1986) Describes the models that BEA uses to estimate the cyclically adjusted Federal budget and inflation-induced changes in the cyclically adjusted budget. The quarterly data for the variables in the models and the regression equations underlying the coefficients in the models are presented. Cyclical adjustment of Federal debt is also discussed. 171 pages. \$8.50 (GPO Stock No. 003-010-00176-3).

TO ORDER: The GPO publications listed above must be ordered from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. To order by phone: (202) 783-3238.

Available From BEA

BEA Reports. Provides subscribers with BEA's estimates on a prompt basis. *Gross National Product*, monthly, \$18.00 per year (Accession No. BEA-15-S). *Personal Income and Outlays*, monthly, \$18.00 per year (Accession No. BEA-14-S). *Composite Indexes of Leading, Coincident, and Lagging Indicators*, monthly, \$18.00 per year (Accession No. BEA-16-S). *Plant and Equipment Expenditures*, \$7.50 per year (Accession No. BEA-13-S). *Regional Economic Reports*, \$9.00 per year (Accession No. BEA-17-S). *International Economic Reports*, \$19.50 per year (Accession No. BEA-18-S). *All six sets*, \$90.00 per year (Accession No. BEA-19-S).

BEA Working Paper No. 5: Dollar Measures of Energy Production and Consumption in the United States, 1972-82. (1987) Presents a new set of accounts for measuring energy production and consumption and describes the methodology of the new accounts. Pulls together energy data from a wide variety of sources and organizes the data in the framework of the national income and product accounts. 222 pages. \$10.00 (Accession No. CBA-87-101).

TO ORDER: BEA Reports must be ordered from: Economic and Statistical Analysis/BEA, U.S. Department of Commerce, Citizens and Southern National Bank, 222 Mitchell St., P.O. Box 100606, Atlanta, GA 30384. Orders must include a check, payable to Economic and Statistical Analysis/BEA. For information about BEA Reports, call (202) 523-0777.

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.
