D Suppressed to avoid disclosure of data of individual companies.

1. Some parents, primarily those in finance and insurance, include investment income in sales or gross operating revenues. Most other parents consider investment income an incidental revenue source and include it in their income statements in an "other income" category. BEA collects data on investment income to ensure

that—where it is included in sales—it is not misclassified as sales of services.

NOTE: The following ranges are given in employment cells that are suppressed: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

D Suppressed to avoid disclosure of data of individual companies.

1. "Other" consists largely of investment income that is included in "sales or gross operating revenues" in the income statement. In finance and insurance, investment income is included in sales because it is generated by a primary activity of the company. For insurance, "other" consists of investment income remaining after BEA's estimate of investment income earned on funds insurers hold on behalf of policyholders is removed (and included in the services supplied measure) plus the portion of premiums set aside for the settlement of expected or "normal" losses. For banks, "other" consists of the investment income remaining after BEA's esti-

mate of the value of implicit services provided by banks is excluded (and included in services supplied). In industries other than finance and insurance, investment income is generally considered to be an incidental revenue source; this income is included in the income statement in a separate "other income" category, but is not included in sales or in this column.
