

# U.S. Affiliates of Foreign Companies

## Operations in 2011

By Thomas Anderson

ON JULY 31, 2013, the Bureau of Economic Analysis (BEA) released preliminary statistics on the operations of U.S. affiliates of foreign companies in 2011. These statistics cover the finance and operations of U.S. affiliates, including balance sheet details, employment and employee compensation, sales, capital expenditures, trade in goods, and expenditures for research and development (see the box “Data Availability”). Unlike previous years, BEA will not publish an article that analyzes these statistics (see the box “Impact of Sequestration on Analytical Articles”), but some major results are noted below.

The value added of majority-owned U.S. affiliates of foreign companies in current dollars rose 11 percent in 2011, after a similar increase in 2010. The value added of U.S. affiliates, which measures their contribution to gross domestic product, totaled \$736.4 billion in 2011 (table 1).<sup>1</sup>

The value added by affiliates grew more rapidly in 2011 than the overall U.S. economy. As a result, the share of value added by U.S. private industry accounted for by affiliates rose from 5.9 percent to 6.3 percent. The higher growth rate of value added by affiliates reflected both acquisitions of U.S. companies by foreign direct investors and the concentration of affiliates in industries that grew rapidly in 2011, such as mining and manufacturing.

Majority-owned U.S. affiliates employed 5.6 million workers in 2011, an increase of 3.8 percent, following a similar increase in 2010. The share of U.S. private industry employment by U.S. affiliates was 5.0 percent.

Some additional highlights of the data:

- Seven countries—Canada, France, Germany, the Netherlands, Switzerland, the United Kingdom, and Japan—accounted for nearly three-fourths of the value added by affiliates in 2011, roughly the same as in previous years.
- Exports of goods by U.S. affiliates rose 27 percent in 2011.
- Imports of goods by U.S. affiliates rose 17 percent in 2011.

- Research and development performed by affiliates rose 7 percent in 2011.

### Data Availability

Detailed preliminary statistics from the 2011 Annual Survey of Foreign Direct Investment in the United States have been posted in electronic files that can be downloaded at no charge from BEA’s Web site at [www.bea.gov](http://www.bea.gov). Revised statistics will be released in 2014. Detailed statistics on U.S. affiliate operations for 1977–2010 are also available on BEA’s Web site.

More information on these products and how to access them is available at [www.bea.gov/international/di1fdiop.htm](http://www.bea.gov/international/di1fdiop.htm).

### Impact of Sequestration on Analytical Articles

The impact of sequestration and reduced funding levels for fiscal year 2013 for the Bureau of Economic Analysis (BEA) necessitate that BEA eliminate analytical activities related to foreign direct investment and the operations of multinational companies. This includes elimination of the detailed analytical SURVEY OF CURRENT BUSINESS article that has historically accompanied the release of statistics from BEA’s Annual Survey of Foreign Direct Investment in the United States. The collection of data on direct investment flows and on the finance and operations of multinational firms is unaffected by sequestration reductions. The BEA Web site presents the full set of 2011 statistics on the finance and operations of U.S. affiliates of foreign companies.

BEA understands that all of its analytical products and statistical programs are of high value to public and private sector decision-makers. Very careful consideration was given to program reductions in an effort to minimize the impact on data users. For more information, see “BEA FY 2013 Budget Impacts” at [www.bea.gov](http://www.bea.gov) under “Media” and “What’s New.”

1. The estimates of value added for U.S. affiliates were prepared by summing data for costs and profits collected in the annual and benchmark surveys of foreign direct investment in the United States.

Tables 1 and 2.1 through 3.2 follow.

**Table 1. Value Added and Employment of Majority-Owned U.S. Affiliates of Foreign Companies, 1997, 2002, 2007–2011**

p Preliminary

r Revised

n.a. Not available

1. For improved comparability with U.S.-affiliate value added, U.S. private industry value added was adjusted to exclude value added in private households, imputed rental income from owner-occupied housing, and business transfer payments.

For the latest estimates of U.S. private industry value added, see Aaron A. Elrod, Brian M. Lindberg, and Edward T. Morgan "Annual Industry Accounts: Advance Statistics on GDP by Industry for 2012" SURVEY OF CURRENT BUSINESS 93 (May 2013): 26–42.

2. For improved comparability with U.S.-affiliate employment, U.S. private industry employment was adjusted to exclude employment in private households. For consistency with the coverage of the data on U.S. private industry employment, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate totals when the employment shares were computed.

3. Statistics on value added for all majority-owned U.S. affiliates are not available before 2007, because the data needed to estimate value added for bank affiliates were not collected on BEA's annual or benchmark surveys.
