

U.S. International Transactions

Second Quarter of 2016

THE U.S. CURRENT-ACCOUNT DEFICIT—a net measure of transactions between the United States and the rest of the world in goods, services, primary income, and secondary income—decreased to \$119.9 billion (preliminary) in the second quarter of 2016 from \$131.8 billion (revised) in the first quarter (chart 1; see also table A on page 2). The deficit decreased to 2.6 percent of current-dollar gross domestic product from 2.9 percent in the first quarter.

The decrease in the current-account deficit reflected an increase in the surplus on primary income and a decrease in the deficit on secondary income.

Chart 1. U.S. Current-Account Balance and Its Components

Net U.S. borrowing measured by financial-account transactions was \$31.1 billion in the second quarter, a \$14.3 billion decrease from net borrowing of \$45.4 billion in the first quarter. An increase in net U.S. acquisition of financial assets excluding financial derivatives was mostly offset by an increase in net U.S. incurrence of liabilities excluding financial derivatives. Net transactions in financial derivatives other than reserves reflected more net lending in the second quarter than in the first quarter.

The statistical discrepancy—the difference between the net acquisition of assets and the net incurrence of liabilities in the financial account (including financial derivatives) less the difference between total credits and total debits recorded in the current account and the capital account—increased \$2.3 billion in the second quarter to \$88.8 billion.

2. Secondary income receipts include U.S. government and private transfers, such as fines and penalties, withholding taxes, insurance-related transfers, and other current transfers.

NOTE: The statistics are presented in table 2.1, table 3.1, table 4.1, and table 5.1 on BEA's Web site.

Exports of goods and services and income receipts increased \$18.0 billion (2.4 percent) to \$777.0 billion in the second quarter.

- Primary income receipts increased \$10.4 billion to \$198.9 billion, primarily reflecting an increase in direct investment income.
- Exports of goods increased \$6.1 billion to \$360.2 billion, reflecting increases in industrial supplies and materials, primarily petroleum and products, and in foods, feeds, and beverages. These increases were partly offset by a decrease in consumer goods except food and automotive.

2. Secondary income payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

NOTE: The statistics are presented in table 2.1, table 3.1, table 4.1, and table 5.1 on BEA's Web site.

Imports of goods and services and income payments increased \$6.1 billion (0.7 percent) to \$896.9 billion in the second quarter.

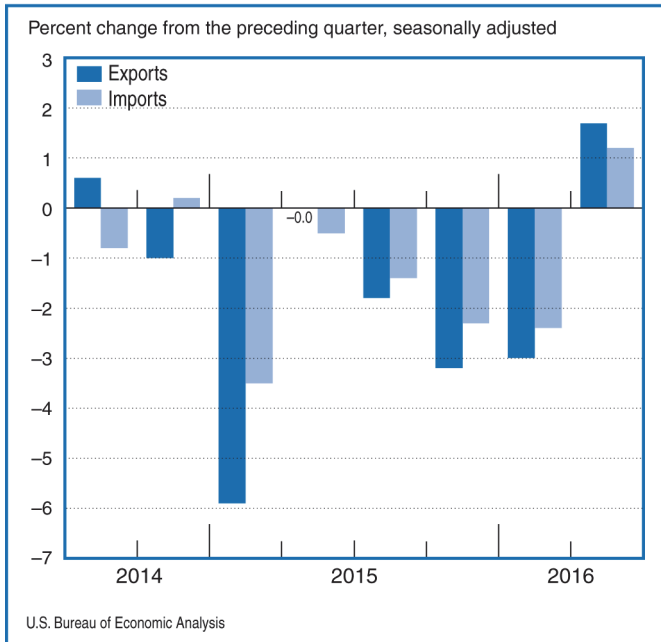

- Imports of goods increased \$6.5 billion to \$546.9 billion, reflecting increases in imports of industrial supplies and materials, mainly energy products, and in capital goods except automotive. These increases were partly offset by a decrease in imports of consumer goods except food and automotive—particularly other household goods, including cell phones—and by a decrease in imports of automotive vehicles, parts, and engines.
- Primary income payments increased \$1.4 billion to \$155.9 billion, reflecting an increase in direct investment income.

p Preliminary r Revised

NOTE: The statistics are presented in table 1.2, table 6.1, table 7.1, and table 8.1 on BEA's Web site.

Net U.S. acquisition of financial assets

Net U.S. acquisition of financial assets excluding financial derivatives increased \$233.8 billion to \$293.7 billion in the second quarter.

- Transactions in portfolio investment assets increased \$167.3 billion to net U.S. acquisition of \$109.9 billion; a shift to net acquisition of equity and investment fund shares more than offset a shift to net sales of debt securities.
- Net U.S. acquisition of direct investment assets increased \$38.7 billion to \$106.1 billion, largely reflecting an increase in net acquisition of equity.
- Net U.S. acquisition of other investment assets increased \$26.5 billion to \$77.5 billion; a shift to net provision of loans to foreigners exceeded a shift to net withdrawal of U.S. residents' deposits abroad (in currency and deposits).

Net U.S. incurrence of liabilities

Net U.S. incurrence of liabilities excluding financial derivatives increased \$232.2 billion to \$350.4 billion in the second quarter.

- Net U.S. incurrence of other investment liabilities increased \$143.9 billion to \$192.0 billion, reflecting a shift to a second-quarter rise in foreign residents' deposits in U.S. banks.
- Net U.S. incurrence of direct investment liabilities increased \$68.3 billion to \$159.6 billion, reflecting increased equity investment by foreign parent companies in their U.S. affiliates and increased net borrowing by U.S. affiliates.
