SUMMARY FOR SEPTEMBER.

In general, manufacturing activity in September declined from the preceding month, decreases being recorded in such basic commodities as pig iron, steel ingots, copper, zinc, lead, bituminous coal, and automobiles. The mill consumption of cotton, wool, silk, and tin also declined during the month, while increases were noted in the output of cement and locomotives. The volume of new construction continued to decline. Unfilled orders for steel locomotives, merchant pig iron, and brick were less, while orders on the books of manufacturers for flooring and steel sheets increased. The index of unfilled orders based on 1920 as 100 declined to 58 on September 30, which may be compared with 72 for the end of September a year ago.

Retail sales of mail-order houses and department

stores increased over the preceding month and over September, 1922. Retail trade of chain stores in general declined in September but was well above the business of a year ago, while wholesale trade not only was in greater volume than a year ago but registered in September the customary seasonal advance over August. Wholesale prices and the cost of living advanced for September. Business failures continued to decline.

The weekly car loadings for September averaged 1,039,018 cars, while the net available surplus of freight cars for the last week of September registered a decline from the previous month. The number of freight cars and locomotives in need of repair was still further reduced, being for October 1 about 50 per cent below a year ago.

BUSINESS INDICATORS.

(1913 monthly average=100. See explanation on inside front cover.)

PIG-IRON PRODUCTION.

BITUMINOUS COAL PRODUCTION.

COTTON CONSUMPTION.

NET FREIGHT TON-MILES.

EXPORTS (VALUES).

BANK CLEARINGS OUTSIDE NEW YORK CITY (VALUES).

DEFAULTED LIABILITIES (VALUES).

WHOLESALE PRICES.

PRICE OF 25 INDUSTRIAL STOCKS.

BUSINESS INDICATORS.

The following table gives comparative index numbers for a selected list of important business movements. It is believed that this table will prove useful, because it separates out from the large mass of material a comparatively small number of items which are often regarded as indicative of business in general.

The table has been divided into two parts, the first containing those items for which index numbers can be calculated, using 1913 as a base. The second part contains items for which comparable data back to 1913 are not available. This latter group of index numbers is calculated by letting the 1919 monthly average equal 100. Care should therefore be exercised in comparing the absolute value of the two sets of data. In either group, however, the upward or downward trend of the index numbers, compared to previous months, does reflect the present tendency in each item and will give a basis for business judgment.

* Monthly statistics on the movements since January, 1913, or as far back as available, are given on pages 47-49 of the December Survey (No. 16).

¹ Yearly figures are monthly averages for the crop year ending July 31 of year indicated.

² Monthly prices are for the 15th of the month indicated.

³ Based on the total computed production reported by 5 associations. Includes southern pine, Douglas fir, western pine, North Carolina pine, and Michigan hard and soft woods. The total production of these associations in 1919 was equal to 11,190,000,000 board feet, compared with a total lumber production for the country of 34,552,000,000 board feet reported by the census.

COMPARISON OF PRESENT WHOLESALE PRICES WITH PEAK AND PRE-WAR

(Relative prices 1913=100.)

WHOLESALE PRICE COMPARISONS—MAXIMUM PRICE COMPARED TO PRICE IN RECENT MONTHS.

NOTE—Prices to the producer on farm products are from *U. S. Department of Agriculture, Bureau of Agricultural Economics*. All other prices are from *U. S. Department of Labor, Bureau of Labor Statistics*, except market price of wool compiled by *U. S. Department of Commerce, Bureau of the Census*. As far as possible all quotations represent prices to the producer or at the mill. See diagram on page 4.

COURSE OF BUSINESS IN SEPTEMBER.

The following pages contain a review, by principal industries, of the more important statistics shown in the table on the "Trend of Business Movements" (p. 29). Summaries of production, stocks, sales, and price changes are given also.

PRODUCTION.

The index of mineral production stood in September at 38 per cent above the 1919 monthly average, which may be compared with 13 per cent above the 1919 average registered in September a year ago. Marketings of animal products declined seasonally, being 8 per cent above the 1919 average and approximately 9 per cent above a year ago. Crop marketings increased in a seasonal movement, but the movement to market was 13 per cent below September, 1922.

Production of manufactures declined in September. Decreases were registered in the production of pig iron, steel ingots, copper, zinc, lead, bituminous coal, in the cut of the various important species of lumber, in the production of clay fire brick, silica brick, face brick, flooring, and in the mill consumption of silk, cotton, and tin. Declines also occurred in the production of passenger automobiles and automobile trucks, steel barrels, anthracite coal, sugar meltings, and the slaughter of cattle, hogs, and sheep.

BUSINESS INDICATORS—COMPARISON OF SEPTEMBER WITH MAXIMUM MONTH OF 1923.

Increases in manufacturing output were recorded in the production of locomotives and cement, while the volume of contracts awarded for new construction continued to decline. Below is given the diagram showing for basic industries the combined

indexes for production, stocks, and unfilled orders, while on page 7 is shown graphically the comparison of the more important September business indicators, with their respective maximum records as registered since January, 1923.

RELATIVE PRODUCTION, STOCKS, AND UNFILLED ORDERS IN BASIC INDUSTRIES.

(Monthly average 1920=100.)

INDEX NUMBERS OF MINERAL PRODUCTION.
(Average monthly production 1919=100.)

INDEX NUMBERS OF MARKETINGS OF CROPS.
(Average monthly production 1919=100.)

INDEX NUMBERS OF MARKETINGS OF ANIMAL PRODUCTS.
(Average monthly marketings 1919=100.)

STOCKS OF COMMODITIES.

The index number of stocks of commodities stood at 112 at the end of September, based on 1919 as 100, as compared with 106 for a year ago. Increases occurred from August in the stocks of the various species of lumber, Lake Superior iron ore, silica brick, clay fire brick, silk, turpentine, and rosin, while stocks of cement, flooring, tin, zinc, rice, and sugar decreased during the month.

The accompanying table gives for principal commodities the stocks on hand at the end of September with comparative months of 1920, 1921, and 1922.

SALES.

Sales of commodities by manufacturers declined generally in September. Sales by wholesalers averaged well above August for all lines for which comparable data are available, the index of wholesale trade on a 1919 base registering an increase over September a year ago amounting to 11 per cent.

STOCKS OF SPECIFIED COMMODITIES HELD AT END OF MONTH.

COMMODITY.	1920		1921		1922		1923

¹ At 15th of each month.

² Represents stocks of finished face brick in yards and does not include formed brick in kilns as prior to September.

The weighted index of unfilled orders on the books of manufacturers of basic commodities continued the decline which set in last April and at the end of September stood at 58, based on the 1920 average as 100, as against 60 for August 31 and 72 for September 30, 1922. The volume of retail trade in chain stores was in general less than in August, but considerably above September a year ago, while department store trade advanced 13 per cent from the preceding month and 7 per cent over a year ago. Sales of mail-order houses increased 26 per cent over the preceding month, the September business being 23 per cent above a year ago. Postal receipts and advertising linage in magazines and newspapers registered increases over the preceding month and over September a year ago. The volume of business done by theaters for the month of August, as seen from revenue collections covering September, showed a decline from the preceding month, but was slightly above a year ago.

Sales of stocks and bonds on the New York Stock Exchange increased in September, but the volume of transactions was considerably below September, 1922. Flotations of new municipal bond issues and sales of new life insurance declined in September, but savings deposits reported by 856 banks throughout the country registered an increase of almost 1 per cent. Life insurance premium collections declined seasonally during the month.

PRICES.

Prices received by producers for their crops and livestock increased in September, being 38 and 9 per cent respectively, above the average prices paid to producers in 1913.

The wholesale price index of the Department of Labor increased from 150 in August to 154 in September, the principal increases occurring in prices of farm products, food, cloths and clothing, and chemicals and drugs. Declines, however, were registered in prices of fuel and lighting, metals and metal products, and building materials. As recomputed by the Federal Reserve Board, increases were shown for agricultural products and animal products, while price declines were registered for forest products and mineral products. Increases in wholesale prices were reflected also in the index number for international comparison, and at 63 per cent above pre-war, the index may be compared with 59 per cent for the preceding month.

The retail food index on September 15 at 49 per cent above pre-war showed an increase over the preceding month, while the cost of living index at 172 for the third quarter of 1923 may be compared with 170 for the preceding quarter and 166 for the third quarter of 1922.

TEXTILES.

Receipts of wool at Boston declined both from August, 1922, and from September, 1923, foreign receipts being considerably less than a year ago. Consumption of wool by textile mills declined from August, while machinery activity showed little change. Imports of raw wool continued to decline and prices of wool and woollens were almost unchanged.

The monthly report of the Department of Commerce, on men's and boys' clothing shows the following comparisons for 331 identical establishments:

MEN'S AND BOYS' CLOTHING (IN NUMBER OF GARMENTS CUT).

KIND.	June.	July.	August.	September.
Men's suits, wholly or partly of wool.....	720,381	625,402	662,002	504,089

EXPORTS AND CONSUMPTION OF COTTON.

Cotton consumption by textile mills in September was slightly smaller than either the previous month or the corresponding month in 1922. Stocks of cotton were considerably lower at the end of September than a year ago. Imports increased slightly and exports

were almost twice as large as in September, 1922. The number of active cotton spindles increased in September, but activity per spindle was less than in August and less than a year ago. Exports of cotton cloth declined slightly from August and were about a third less than in September, 1922. Prices of raw cotton and of cotton goods increased, except sheetings.

COTTON CONSUMPTION IN NORTHERN AND SOUTHERN MILLS.

CUMULATIVE COTTON GINNINGS TO SPECIFIED DATES.

STOCKS OF COTTON: NUMBER OF DAY'S SUPPLY AT DAILY RATE OF CONSUMPTION.

The monthly hosiery report of the Department of Commerce shows the following comparative summary of hosiery operations for 290 identical establishments representing 372 mills for August and September:

HOSIERY (IN DOZEN PAIRS).

	AUGUST.			SEPTEMBER.		
	Total.	Men's.	Women's.	Total.	Men's.	Women's.

Packed.....	10	68,925	90.6	71,736	97.5
Orders booked.....	8	40,021	60.2	49,517	77.3

Fur statistics reported by five hat manufacturers, with about 14 per cent of the forming capacity of the industry, are as follows:

FUR (IN POUNDS).

	September, 1923.	September, 1922.
Consumption.....	78,453	91,185
Stocks, end of month.....	132,798	166,425
On contract, end of month.....	85,345	265,815

IRON AND STEEL.

The eastbound movement of iron ore through the Sault Ste. Marie Canals decreased slightly in a seasonal movement, but was considerably higher than a year ago. Production of both pig iron and steel ingots declined about 10 per cent from August. Slight declines occurred in the production, sales, shipments, and unfilled orders of merchant pig iron; stocks at merchant furnaces increased, while steel plants held less merchant iron than a month ago. Stocks of iron ore were less than a year ago, while consumption increased.

Bookings of steel castings declined slightly, and unfilled orders of the United States Steel Corporation

continued to recede. Exports and imports of iron and steel showed little change from August and prices were also about the same.

PRODUCTION OF PIG IRON AND STEEL INGOTS AND UNITED STATES STEEL CORPORATION'S UNFILLED ORDERS.

Production of sheets by independent mills declined from 80 to 71½ per cent of capacity, but sales and unfilled orders increased and stocks declined. Production of steel barrels at 30 per cent of capacity compares with 41 per cent in August. Shipments and unfilled orders also declined.

The following table shows bookings of fabricated structural steel, as reported to the Department of Commerce by 177 identical firms, with a capacity of 230,675 tons per month, and total sales computed to a capacity of 250,000 tons per month at the rate of sales to capacity of the reporting firms.

BOOKINGS OF FABRICATED STRUCTURAL STEEL.

¹ Reported by 176 firms with a capacity of 229,475 tons.

² Reported by 172 firms with a capacity of 228,240 tons.

Locomotive shipments increased in September, but unfilled orders were further reduced. Freight-car orders declined. Ship construction was also less than in August. Sales of stokers declined slightly, while sales of tubular plumbing goods made a slight increase over August. Steel-furniture shipments were slightly less in value than in August.

LOCOMOTIVE SHIPMENTS AND UNFILLED ORDERS.

The monthly report of the Department of Commerce on malleable castings manufactured for sale (excluding castings used in the plant or finished and sold as other products) shows the following comparisons for 103 identical plants with a capacity for May of 87,698 tons (capacity varies slightly each month due to the varying number of working days).

MALLEABLE CASTINGS.

	July.	August.	September.

NONFERROUS METALS.

Copper production at the mines declined slightly in September, while exports were almost the same as in August. The price of electrolytic copper declined. New orders for brass faucets increased in September, but shipments were less than in August.

Zinc production and stocks declined slightly, while the movement at St. Louis was about half as large as in August. The price of zinc made a fractional advance.

Tin stocks in the United States declined, but the world visible supply increased. Deliveries from warehouses were less than in August, and imports also declined. The price of tin increased.

Receipts and shipments of lead at St. Louis declined, while the price of pig lead rose.

FUELS.

The output of bituminous coal declined slightly in September, while anthracite production was only one-third of the August output, owing to suspension of work in the mines in the early part of the month. Production of both beehive and by-product coke declined slightly. Exports of all kinds of coal and coke declined. Anthracite prices rose in September, while the prices of bituminous coal and coke eased off slightly.

PRODUCTION OF BEEHIVE AND BY-PRODUCT COKE.

PRODUCTION OF BITUMINOUS AND ANTHRACITE COAL.

Production of petroleum declined in September, while stocks continued to increase. The price of petroleum averaged lower during the month.

AUTOMOBILES.

September automobile production declined from August, with passenger cars at 298,910 cars compared with 314,372 in August and trucks at 28,455 cars compared with 30,619 in the previous month. Shipments of automobiles by rail declined slightly, but more cars were shipped by water and driven away than in August.

BUTTONS.

The productive activity of manufacturers of freshwater pearl buttons averaged higher in September than in the preceding month, but was below September a year ago. Stocks of buttons at the end of September increased both over the preceding month and the end of month stocks a year ago.

BUILDING AND CONSTRUCTION.

During September building costs declined about 1 per cent. The material costs for a six-room house as of September 1 declined about 3 per cent from August 1. Plumbing fixtures showed little change in price as compared with August.

Contracts awarded for building construction in the 27 Northeastern States declined slightly in floor space but were slightly larger in value. Increases took place in awards for business and industrial buildings, while

residential and public buildings showed a decline in volume of contracts. Fire losses in the United States and Canada increased slightly, but declined from a year ago.

CUMULATIVE VOLUME OF BUILDING CONSTRUCTION.

VOLUME OF BUILDING CONTRACTS AWARDED BY CLASSES.

BUILDING MATERIALS.

Production of lumber showed a seasonal decline from August, but was larger than in September, 1922, only western pine and North Carolina pine showing decreases. Shipments were, in general, lower than in September, 1922, and stocks also declined from a year ago, except western pine. Exports of lumber declined slightly from August but were larger than a year ago, while prices of lumber were slightly less than in August.

The following table is based on statistics received by the Department of Commerce:

HARDWOOD LUMBER.

¹ A single band mill is considered one unit of production.
² Reports from 184½ identical units for Sept. 1 and Oct. 1 show a decrease from 338,041,000 feet to 334,649,000 feet.

Production of flooring declined from August, with oak flooring output larger than last year and maple flooring less. Orders booked increased for both classes of flooring, and there was little change in stocks during the month. Shipments and unfilled orders for oak flooring increased over August while for maple flooring these items showed declines.

Production and shipments of refractory bricks declined from August while stocks increased. New orders and unfilled orders for clay fire brick and shipments and unfilled orders for face brick were also less than in August. Compared with a year ago, production and stocks increased for clay fire brick but declined as regards silica brick. Shipments of both the refractory bricks were less than a year ago.

Paving-brick figures reported to the Department of Commerce are as follows:

PAVING BRICK (No. 1 Quality).

Cement production was slightly greater than in August, while shipments and stocks made seasonal declines. All three items were considerably higher

PRODUCTION AND STOCKS OF PORTLAND CEMENT.

than a year ago. The price of Portland cement remained unchanged. Concrete paving contracts let in September were slightly larger than a year ago.

Seasonal declines took place in orders, stocks, shipments, and unfilled orders of all classes of enameled sanitary ware. Compared with a year ago, shipments and unfilled orders were larger, while stocks and new orders were smaller.

HIDES AND LEATHER.

Imports of hides declined from August in all classes, and were much smaller than a year ago. Prices of hides and leather were irregular. Exports of leather increased over August.

Boot and shoe production declined from August but exports increased slightly. Prices declined in some grades.

The following table shows the number of leather gloves and mittens cut in August and September as reported to the Department of Commerce by 225 identical establishments.

LEATHER GLOVES AND MITTENS CUT (IN DOZEN PAIRS).

CHEMICALS AND OILS.

Imports of potash and nitrate of soda declined from August. Exports of sulphuric acid declined, but dyes and dyestuffs, measured by value, increased, as did the tonnage of fertilizer exports. Prices of crude drugs and essential oils declined, while drugs and pharmaceuticals advanced.

Turpentine and rosin receipts at Southern ports were larger than a year ago. Stocks of turpentine were larger than last year, but rosin stocks declined.

Exports and imports of vegetable oils were smaller than in August and also less than a year ago. Oleomargarine consumption exceeded September, 1922.

Stocks of cottonseed were larger than at the end of September, 1922, but production and stocks of cottonseed oil declined. The price of cottonseed oil increased over August. Receipts, shipments, and stocks of flaxseed in the Northwest and shipments of oil and oil cake all exceeded the September, 1922, figures.

CEREALS.

Receipts and shipments of wheat at principal markets declined seasonally, but exports of wheat, including flour, increased. All the items were considerably lower than a year ago. The visible supply of wheat at

the end of September was about one-third greater than a year ago. Prices of wheat and flour advanced in September.

The following table shows the operations of 1,057 flour mills reporting to the Department of Commerce for September, which produced over 84 per cent of the wheat flour reported by the 1921 Census. A slightly larger number of mills reported for the previous months.

	May.	June.	July.	August.	September.
Wheat ground.....thous. bushels..	36,210	30,943	35,871	44,179	44,851
Flour produced.....thous. barrels..	7,912	6,735	7,805	9,642	9,734
Grain offal produced...thous. pounds..	635,330	549,484	633,324	772,774	794,405
Per cent of capacity operated...per cent..	44.5	39.2	48.0	54.7	62.1

The corn crop is estimated as of November 1 as about 100,000,000 bushels larger than a year ago. Receipts shipments, visible supply, exports, and grindings are all less than a year ago, while the price of corn increased over August and was more than one-third greater than a year ago.

Receipts of oats were slightly larger than a year ago, but the visible supply was less than half as large. Exports of oats and oatmeal were much smaller than a year ago. The price of oats was higher than in August or in September, 1922.

Exports of barley and rye were also less than a year ago, while prices of these grains increased over the August average and over September, 1922.

Receipts, shipments, and stocks of rice were considerably less than a year ago. Exports also declined from the previous September.

MEATS AND DAIRY PRODUCTS.

Receipts, shipments, and slaughter of hogs and sheep were larger in September than a year ago, except slaughter of sheep. Receipts and total shipments of cattle declined from last year, while stocker and feeder shipments and slaughter were practically the same. Exports of both pork and beef products exceeded the September, 1922, figures, while cold-storage holdings at the end of September showed declines from a year ago in beef and mutton, but an increase in pork. Prices of livestock and meat were irregular as compared with August.

The catch of fish was larger than in September, 1922, and cold-storage holdings also increased. Receipts and cold-storage holdings of poultry exceeded last year's figures also.

Receipts of butter, cheese, and eggs at the principal markets declined in September, but each of these movements was above September, 1922. Cold-storage holdings of butter, cheese, and eggs declined in a seasonal movement, and with the exception of butter the stocks of these foodstuffs on October 1 were considerably above the holdings a year ago. Wholesale

prices of butter and cheese at the principal primary markets advanced 5 per cent during the month. Exports of condensed and evaporated milk increased 28 per cent in September.

TOBACCO.

Consumption of cigars and cigarettes, as shown by tax-paid withdrawals, declined in September, but the cigarette consumption for the first nine months of 1923 registered an increase of 18 per cent over the corresponding period of a year ago. For cigars the increase amounted to 4 per cent over 1922. Exports of unmanufactured leaf tobacco increased in September and for the nine months of this year were 15 per cent above a year ago. Aggregate stocks of tobacco held by dealers and manufacturers on October 1 declined from July 1 but were still considerably above a year ago.

WATER TRANSPORTATION.

Traffic through the Sault Ste. Marie Canals and through New York State canals was less than in August and for the Soo Canal still well above a year ago. The total movement through the Sault Ste. Marie Canals for the months of the present season was 51 per cent ahead of the corresponding period ending September, 1922. August cargo traffic through the Panama Canal was 7 per cent less than in July, but 86 per cent above August, 1922. Tonnage of vessels entered and cleared from United States ports declined from August.

COMPARISON OF CALIFORNIA PETROLEUM PRODUCTION WITH PANAMA CANAL EASTBOUND TRAFFIC.

98690°-23-2

RAILROADS.

Weekly car loadings for September averaged 1,039,018 cars. The daily net available surplus of freight cars averaged less in the last week of September than in the corresponding period of the preceding month. Bad-order freight cars and locomotives in need of repair continued to decline, being on October 1 approximately 50 per cent below October 1, 1922.

SHORTAGE, SURPLUS, BAD-ORDER, AND TOTAL LOADINGS OF FREIGHT CARS.

Total operating railroad revenues increased 4 per cent in August, while the cumulative total for the first eight months of the year was 19 per cent above the corresponding total of a year ago. Operating expenses increased 3 per cent in August and for the eight-month period were 17 per cent in excess of the expenses for the same period of 1922. The net operating income increased 16 per cent during the month, while the cumulative total registered an increase of 33 per cent over the eight months ending August, 1922. The per cent of return on tentative valuation, calculated at 4.94 for August may be compared with 4.93 for July and 2.70 for August, 1922.

LABOR.

Employment in 1,428 representative United States factories totaled 2,030,000 workers on September 30 as against 2,032,000 on August 31. Employment in New York State factories increased, while Wisconsin employment declined during the month. The average weekly earnings of New York State factory employees increased in September, while for Wisconsin no change from the preceding month was registered.

IMMIGRATION, EMIGRATION, AND IMMIGRATION QUOTA.

DISTRIBUTION MOVEMENT.

Total sales of the leading retail mail-order houses increased in September in a seasonal movement, the cumulative volume of business for the nine months of 1923 being 33 per cent in advance of the sales in the corresponding period a year ago. Sales of the leading 10-cent chain-store systems declined in September but were well above September, 1922. Sales of representative department stores increased in September, both over the preceding month and over September a year ago. Wholesale trade in all lines for which comparable data are available increased in September, the weighted index for the country being 12 per cent above September a year ago. Advertising in October magazines increased over the preceding month as well as over a year ago. Newspaper advertising in the principal cities of the country increased in September, both over the preceding month and over September a year ago. Postal receipts in 50 selected cities increased during the month, being \$508,000 greater than September, 1922.

SALES OF MAIL-ORDER HOUSES AND CHAIN TEN-CENT STORES.

PUBLIC FINANCE.

The gross debt of the Government was further reduced, being 3 per cent below September, 1922. Ordinary receipts for the nine months of this year exceeded by 16 per cent the corresponding total for a year ago, while expenditures chargeable against ordinary receipts exceeded a year ago by only 6 per cent. Customs receipts increased 5 per cent in September. The total for the nine months ending September was 31 per cent above the same period last year.

The per capita distribution of money held outside the United States Treasury and Federal Reserve System amounted to \$43.45 on October 1 as against \$42.85 on September 1 and \$41.04 on October 1, 1922.

BANKING AND FINANCE.

Debits to individual accounts and bank clearings in New York City increased in September, while outside New York debits registered a decline and bank clearings an increase over the preceding month. Both debits and bank clearings outside of New York were greater than September a year ago, but for New York City these movements were considerably below September, 1922. On page 20 are given index numbers for October and comparative months showing the trend of debits to individual accounts at the principal clearing-house centers, thus making the tables published on pages 51 to 55 in the October Survey (No. 26) current through October.

DEBITS TO INDIVIDUAL ACCOUNTS, 141 CLEARING-HOUSE CENTERS.

BILLS DISCOUNTED AND TOTAL INVESTMENTS OF FEDERAL RESERVE BANKS.

Bills discounted, notes in circulation, and total deposits of the Federal Reserve banks increased in September, while total investments, total reserves, and the reserve ratio declined. Increased demand for bank credit in September was evidenced by the increase in the loans and discounts of Federal Reserve member banks, the total on September 30 being 8 per cent in advance of September a year ago. Total investments and net demand deposits of member banks also increased in September. Interest rates on prime commercial paper averaged higher in September, while call loan rates declined, both, however, being considerably above the prevailing rates in September, 1922.

LOANS, DISCOUNTS, AND TOTAL INVESTMENTS OF FEDERAL RESERVE MEMBER BANKS.

INTEREST RATES AND BOND PRICES.

Savings deposits in 856 banks throughout the country, representing over one-third of the total balance due savings depositors, totaled \$6,672,204,000 on October 1, registering an increase of almost 1 per cent over the

preceding month and 10 per cent over the corresponding month a year ago. Slight declines in savings deposits were recorded, however, in the Philadelphia, St. Louis, and Kansas City Federal Reserve districts. Savings deposits in the United States Postal Savings System continued to increase, and on September 30 totaled \$133,101,000.

NUMBER OF BUSINESS FAILURES AND AMOUNT OF DEFAULTED LIABILITIES.

Business failures, both in number of firms and in defaulted liabilities, declined in September from the preceding month and from September a year ago. Total dividend and interest payments were larger in October than the disbursements a year ago, all classes of corporations—industrial, steam railroads, and street railways—showing increased payments to stockholders. New capital issues and new incorporations increased in September, but both movements were considerably below September a year ago. New municipal bond issues declined from August.

Prices of railroad stocks averaged higher in September but were 17 per cent below the prices prevailing in September, 1922. Prices of industrial stocks declined in September, being 4 per cent below September a year ago. Sales of stocks on the New York Stock Exchange increased in September but were about 35 per cent below a year ago. Prices of all classes of bonds averaged lower in September. Bond sales on the New York Stock Exchange registered a slight increase in September but were 46 per cent below the volume of September, 1922.

COMPARISON OF WHOLESALE PRICES AND STOCK PRICES.

(Twelve-month moving averages.)

Domestic gold receipts at the mint increased 7 per cent in September, while the Rand output of gold declined during the month. Imports and exports of gold declined in September.

Silver production declined both from the preceding month and from September, 1922, while imports and exports of silver increased markedly in September over the preceding month and over September a year ago.

FOREIGN EXCHANGE AND TRADE.

Of 13 important foreign currencies 6 registered increases in September, 5 declined, and 2 remained stationary. The general index of foreign exchange at 63 for September may be compared with 62 for the preceding month and 68 for September, 1922. Total imports into the United States were \$253,645,000 while exports were \$380,712,000.

EXPORTS FROM THE UNITED STATES AND THE UNITED KINGDOM.

INDEXES OF BUSINESS.

The index numbers presented in this table are designed to show the trend in production, prices, trade, etc., in various groups of industry and commerce. They consist in general in weighted combinations of series of individual index numbers, and often the individual index numbers making up the series are also given. The base year of all the index numbers is 1919, except prices which are on a 1913 base, and unfilled orders, on a 1920 base. The function of index numbers is explained on the inside front cover. A condensed form of this table is given on p. 7.

EXPLANATION. <i>All index numbers are relative to 1919 as 100, except prices, which are relative to 1913, and unfilled orders, which are relative to 1920.</i>	Maximum since Jan. 1, 1920.	Minimum since Jan. 1, 1920.	1922		1923				Per cent increase (+) or decrease (-). September from August.
			August.	September.	June.	July.	August.	September.

DATA PRIOR TO 1921.

In response to many requests for data not shown in current numbers of the Survey, but which have been published in previous issues, the following items are listed with the month of publication and the page on which the information appeared. Back numbers of the Survey can be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

LUMBER AND CONSTRUCTION.

Michigan hardwoods and softwoods, production and shipments, monthly, 1918-1921; April, 1923, p. 49.
Pine lumber production, yellow and western, monthly, 1917-1921; April, 1923, p. 49. (Southern pine revised, 1921-1923, October 26.)
Douglas fir, monthly, 1917-1921; December, 1922, p. 49.
Cement production, shipments and stocks, monthly, 1915-1922; September, 1923, p. 47.
Index of construction costs, monthly, 1914-1922; June, 1923, p. 52.

FUEL.

Coal production, monthly, 1913-1921; December, 1922, p. 48. (Bituminous for 1919 and 1920, and anthracite for 1920 have since been revised.)
Petroleum, production and stocks, monthly, 1917-1921; December, 1922, p. 48. (Production and number of days' supply during 1921 have since been revised.)
Gasoline and kerosene, consumption by States, 1921-1922; (unit=1,000 barrels); July, 1923, p. 45.
Coal and oil, loaded for consumption by outgoing vessels, monthly, 1913-1923; October, 1923, p. 61.

PATENTS GRANTED.

Total and agricultural, monthly, 1913-1922; April, 1923, p. 48.
Internal-combustion engines, monthly, 1913-1922; June, 1923, p. 52.

METALS.

Production of pig iron and unfilled orders of steel, monthly, 1913-1921; December, 1922, p. 47.
Composite prices of 14 iron and steel products, monthly, 1913-1922; April, 1923, p. 48.
Steel furniture shipments, 1919-1922; inclusive, monthly, March, 1923, p. 45.
Sheets, 1920-1922; April, 1923, p. 53.
Hydraulic machinery, 1919-1923; September, 1923, p. 55.

MISCELLANEOUS.

Bradstreet's wholesale price index, monthly, 1913-1922; July, 1923, p. 45.
Fall River mill dividends, quarterly, 1913-1922; September, 1923, p. 48.
Debits to individual accounts at principal clearing-house centers, monthly, 1919-1923; October, 1923, p. 51 and 55 (substituted for similar table published in April, 1923).
Wholesale trade by commodities, 1919-1922; April, 1923, p. 50.
Cotton ginnings, 1913-1922; April, 1923, p. 51.
Sault Ste. Marie Canal traffic, by classes of commodities, 1913-1922; March, 1923, p. 48 and 50.
Stock prices, monthly average for 25 railroads and for 25 industrials, 1913-1921; December, 1922, p. 47.
Total dividend and interest payments, monthly, 1913-1922; September, 1923, p. 51. (The figure for July, 1917, should be \$333,011 instead of \$633,011 appearing on the table.)
Dividend payments, classified, monthly, 1913-1921; October, 1922, p. 46.
Wheat flour production, monthly, 1914-1922; October, 1922, p. 46.
Domestic and foreign money orders, quarterly, 1913-1922; March, 1923, p. 50.
Cotton consumption and stocks, monthly, 1913-1921; December, 1922, p. 49. Revised 1921 stocks, August, 1923, p. 55.
Index numbers of manufacturing production by groups, 1920-1921; inclusive, monthly.
Automobile production, monthly, 1920-1923; July, 1923, p. 50.
Prepared roofing, 1913-1923; September, 1923, p. 55.
Wholesale price of smoked hams, September, 1923, p. 55.

TREND OF BUSINESS MOVEMENTS.

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. The numerical data for the latest months are given and in addition index numbers for the last four months and for two corresponding months of a year ago. In many lines the figures do not lend themselves readily to statistical uniformity, due to lateness of their publication or publication at other than monthly intervals; therefore the following explanations of the various headings are offered to make clear such distinctions and in general to facilitate the use of the table:

August, 1923.—This column gives the August figures corresponding to those for September shown in the next column—in other words, cover the previous month, and in some cases, where indicated by a footnote, refer to the previous quarter; that is, ending June 30, 1923.

September, 1923.—In this column are given the figures covering the month of September, or, as in the case of stocks, etc., the situation on September 30 or October 1. In a few cases (usually where returns are reported quarterly only), the figures are for the quarter ending September 30 or the condition on that date. Where this column is left blank, no figures for September were available at the time of going to press (November 24).

Corresponding month, August, 1922, or September, 1922.—The figures in this column present the situation exactly a year previous to those in the "September, 1923," column (that is, generally September, 1922), but where no figures are available for September, 1923, the August, 1922, figures have been inserted in this column for comparison with the August, 1923, figures. In the case of quarterly figures, this column shows the corresponding quarter of 1922.

Cumulative total through latest month.—These columns set forth, for those items that properly can be cumulated, the cumulative total for the nine months of the calendar years 1922 and 1923, respectively, except where the September, 1923, figures are lacking, in which case the cumulative total for eight months in each year is given.

Percentage increase (+) or decrease (-) cumulative, 1923 from 1922.—This column shows the per cent by which the cumulated total for the nine months ending September, 1923, is greater (+) or less (-) than the total for the corresponding period ended September, 1922.

Base year or period.—For purposes of comparison with a previous more or less normal period, all items, so far as possible, are related to such a period by index numbers. The period taken for each item, called the base, is the monthly average of the year or period stated in this column. Wherever possible, the year 1913 is taken as a base, and if no pre-war figures are available, 1919 is usually taken to avoid using a war year as a basis. In some cases it will be noted that figures were not available prior to 1920 or even 1921, and that sometimes a month, or an average of a few months, has to be used rather than a year's average. Also, for some industries, 1919 would not be a proper base on account of extraordinary conditions in the industry and therefore some more representative year has been chosen.

Index numbers.—In order to visualize the trend of each movement, index or relative numbers are given for the last four months and for two corresponding months of a year ago. These index numbers are computed by allowing the monthly average for the base period, usually 1913 or 1919, to equal 100. If the movement for a current month is greater than the base the index number will be greater than 100. If the converse is true the index number will be less than 100. The difference between 100 and any index number gives at once the per cent increase or decrease compared with the base period. Index numbers may also be used to compute the approximate per cent increase or decrease from one month to the next.

Percentage increase (+) or decrease (-) September from August.—The last column shows the per cent increase or decrease of the figure for the last month compared with the preceding month.

Note.—Detailed tables covering all items are given in this number. Consult index at end of bulletin. In many cases October figures are now available and may be found in the special table on page 23; or in the detailed tables for each subject, pp. 54 to 208.	NUMERICAL DATA. ¹ Weighted average of 62 commodities with comparable monthly figures from January, 1920, and representing about 36 per cent of the entire manufacturing industry based on value added by manufacture; for details, see January, 1923, issue (No. 17) of Survey of Current Business.

² Weighted average; for details, see May, 1923, issue (No. 21) of Survey of Current Business.

³ Weighted average of 9 commodities representing about 87 per cent of the total mineral production; for details, see May, 1922, issue (No. 9) and September, 1922, issue (No. 13) of Survey of Current Business.

⁴ Weighted average of 23 commodities representing about 94 per cent of the total crop production; for details, see July, 1922, issue (No. 11) of Survey of Current Business.

⁵ Weighted average of 9 commodities representing about 99 per cent of marketed livestock and livestock products; for details, see June, 1922, issue (No. 10) of Survey of Current Business.

⁶ Weighted average of 13 commodities representing about 80 per cent of forest products marketed; for details, see August, 1922, issue (No. 12) of Survey of Current Business.

⁷ Weighted average of above groups; for details, see September, 1922, issue (No. 13) of Survey of Current Business.

⁸ Weighted average of 70 commodities with comparable monthly figures from November, 1921, and representing about 44 per cent of the entire manufacturing industry; for details, see January, 1923, issue (No. 17) of Survey of Current Business.

⁹ Weighted average of 14 commodities for agriculture, 7 for mining, and 34 for manufacturing; for details, see March, 1922, issue of Federal Reserve Bulletin.

¹⁰ Weighted average of 22 commodities corrected for seasonal variations; for details, see December, 1922, issue of Federal Reserve Bulletin.

¹ Receipts of wool at Boston compiled by Boston Chamber of Commerce; imports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and quarterly stocks from U. S. Department of Agriculture, Bureau of Agricultural Economics, until April, 1922, beginning with April, 1922, compiled by U. S. Department of Commerce, Bureau of the Census, in cooperation with U. S. Department of Agriculture, Bureau of Agricultural Economics.

² These figures have been revised to include only comparable reports each month and thus do not contain the figures for the American Woolen Company and a few small firms, for which estimates had been made in previous compilations. Stocks include wool, tops, and noils.

³ Average of the last two quarters of 1920.

⁴ Average of the first three quarters of 1921.

⁵ Includes U. S. Government stocks.

⁶ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

⁷ Average of the last three quarters of 1922.

COTTON.

See footnotes on opposite page also.

¹ Except receipts into sight, compiled by *New Orleans Cotton Exchange*, and world visible supply of American cotton, compiled by *Commercial and Financial Chronicle*. Production estimates from *U. S. Department of Agriculture, Bureau of Agricultural Economics*; imports and exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; consumption and domestic stocks from *U. S. Department of Commerce, Bureau of the Census*. Linters are not included in the statistics in this table, except in the exports. It should be noted that the monthly averages of stocks (except visible supply) and consumption are based on the crop year ending July 31 of the year stated, while for ginnings the average is for the crop grown in the year stated. Other averages are based on the calendar years.

² These figures are for fiscal years ending June 30 of the year given; those following are for calendar years.

³ All bales are running bales counting round as half bales, except for imports which are given in equivalent 500-pound bales.

⁴ The yearly figures represent the latest revised estimates of total production for the year (not a monthly average). The monthly figures show the current estimates of total production as reported each month.⁵ Figures for September include first 25 days of the month only; remaining 5 days are included with October. January figures cover the first 16 days of the month, and February figures cover all ginnings of the crop made after Jan. 16.⁶ Computed from figures on ginnings, imports, reexports, exports (excluding linters), consumption, and mill and warehouse stocks, and corrected at the end of each crop year by reports to the Bureau of the Census.⁷ Computed from total crop and ginnings to date. September figures are as of Sept. 25, January as of Jan. 16; otherwise as of last day of the month.⁸ These figures represent world visible supply of American cotton.⁹ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ Except exports of cotton cloth from the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce. The figures for knit underwear are secured from the Associated Knit Underwear Manufacturers of America; those relating to fine cotton goods from the Fine Cotton Goods Exchange.

² These figures are for fiscal years ending June 30 of the years specified; others are for calendar years.

³ Includes duck and other cloth, bleached, unbleached, and colored. Beginning with January, 1921, the figures are reported in square yards instead of linear yards, which probably makes the figures slightly smaller than when given in linear yards.

⁴ Reported by 24 identical mills in the New Bedford district, representing about 50 per cent of the fine cotton goods industry in New England and from 20 to 30 per cent throughout the United States.

⁵ Prorated from percentages of normal production, as reported by the association, representing mills of an estimated normal production of 900,000 dozens per month. Reports on production cover from 50 to 60 mills, while for other items the reports cover from 30 to 40 mills.

⁶ Average for last six months of year.

⁷ Nine months' average, April to December.

¹ Imports of total raw silk, unmanufactured fibers and burlap are from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and stocks at warehouses of raw silk are from the Silk Association of America; sales of elastic webbing are from the Webbing Manufacturers Exchange; Fall River mill dividends from G. M. Haffards & Co.

² Total unmanufactured silk, including raw silk, cocoons, and waste.

³ Consumption figures represent withdrawals from warehouses. Note that February to December, 1920, inclusive, is used as the base period.

⁴ Includes flax, hemp, jute, kapok, manila, New Zealand flax, sisal, etc.

⁵ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

⁶ Dividends for quarter ending in month given. Yearly figures are quarterly averages.

ACTIVE TEXTILE MACHINERY.

¹ Data from U. S. Department of Commerce, Bureau of the Census.² Formerly reported as of the first of the following month representing previous month's operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.³ The monthly averages are for cotton crop years (beginning Aug. 1 and ending July 31). Figures opposite any one year represent the monthly average number of active cotton spindles for the period beginning Aug. 1 of the preceding year.⁴ Data for 1913 collected by the National Association of Wool Manufacturers.

HOURLY ACTIVITY IN TEXTILE MACHINERY.

¹ Compiled by U. S. Department of Commerce, Bureau of the Census.

² Formerly reported as of the first of the following month representing previous month's operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.

³ Overtime was reported sufficient to offset all idle hours and leave an excess.

⁴ The monthly averages are for cotton crop years (beginning Aug. 1 and ending July 31). Figures opposite any one year represent the monthly average number of active cotton spindles for the period beginning Aug. 1 of the preceding year.

⁵ Takes into account working days, on a single-shift basis, exclusive of holidays.

TEXTILE WHOLESALE PRICES.

Table 9.—INDEX NUMBERS.

¹ Price of cotton to the producer on the 1st of each month is a weighted average of prices received by producers throughout the United States for all grades of cotton as compiled by the U. S. Department of Agriculture, Bureau of Agricultural Economics. All other prices are averages of weekly quotations compiled by the U. S. Department of Labor, Bureau of Labor Statistics.

TEXTILE WHOLESALE PRICES.

¹ The price of cotton to the producer, as of the first of the month, represents a composite of all grades as they come from the farms. The market price is quoted on a specific grade and includes handling and transportation charges.² Based on the price of unwashed wool, except prior to 1917 when it was based on the price of washed wool. This difference in 1917 changed the average from \$1.145 on the washed base to \$1.164 on the unwashed base.

¹ Yearly figures represent the monthly averages of total production of all companies as compiled annually by the *American Iron and Steel Institute*. The institute reported up to 1923 monthly production figures for 30 companies which produced 84.2 per cent of the total output of the country in 1920, 87.48 per cent in 1921, and 84.15 per cent in 1922. In order to make the monthly figures comparable, they have been calculated to a 100 per cent production each year on the basis of the above percentages. The 1923 figures are calculated on the basis of reports from companies which produced 95.35 per cent of the total production in 1922, the total computations to 100 per cent in 1922 and 1923 being made by the *American Iron and Steel Institute*.

² Unfilled orders of steel and earnings reported by *U. S. Steel Corporation*.

³ Sheets, blue, black, and galvanized, reported by the *National Association of Sheet and Tin Plate Manufacturers*, representing almost all the independent sheet manufacturers and about 70 per cent of the total output of sheets.

⁴ Bookings of commercial steel castings reported by the *Steel Founders Society* and principal nonmember firms to the *U. S. Department of Commerce, Bureau of the Census*. Reports are by 65 identical firms with a capacity of 96,900 tons per month, of which 53,700 tons are usually devoted to railway specialties. This represents over two-thirds of the castings capacity of the United States devoted to commercial castings (as distinguished from castings used in further manufacture in the same plant). Prior to 1920, figures for companies representing about 6 per cent of the miscellaneous castings are not available and the totals for this class have been prorated by that amount for those years in order to afford comparison with later years. In July, 1923, two companies with a combined capacity of 735 tons devoted to miscellaneous castings ceased operations.

¹ Locomotive shipments and unfilled orders reported direct by principal locomotive companies; Freight car orders by domestic railroads compiled by the *Iron Trade Review*; vessels under construction and vessels completed, U. S. Department of Commerce, Bureau of Navigation; fabricated structural steel by the *Bridge Builders and Structural Society* up to April, 1922, and since then compiled by U. S. Department of Commerce, Bureau of the Census; including reports from the *Structural Steel Society*; iron and steel exports by U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; steel furniture compiled by the U. S. Department of Commerce, Bureau of the Census, including reports from the *National Association of Steel Furniture Manufacturers*.

² Gross ton represents in units of 100 cubic feet the entire cubical capacity of the vessel, including crew and engine space.

³ Tonnage under construction on the first of the month refers to the gross tons of shipping, building or under contract to build for private owners. Includes only steel vessels of over 100 gross tons. Does not include Government ships or ships building or contracted for by U. S. Shipping Board.

⁴ Includes ocean-going, lake and river vessels built and officially numbered by the U. S. Department of Commerce, Bureau of Navigation. Includes vessels of the U. S. Shipping Board and private American owners, but not vessels built for foreign owners.

⁵ Index number less than 1.

See footnotes on opposite page also.

⁵ Percentages of capacity calculated from reports of the *Bridge Builders and Structural Society* up to April, 1922, and applied to estimated total capacity each year based on a special survey by the *Bureau of the Census* (see *January, 1923*, issue, No. 17, p. 13, for details). Beginning with April, 1922, reports received from 177 firms with a total capacity of 230,675 tons have been prorated to the estimated total capacity of the United States, 250,000 tons, for comparison with previous figures.

⁶ This column gives a total of pig iron and rolled products as used in the *Iron Trade Review*, which is comparable each month back to 1913.

⁷ Beginning with January, 1922, all commodities are given in quantities in the export reports, many of which were previously available only on a value basis. This column gives the total of all pig iron and rolling-mill products as compiled by the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*.

⁸ These data comprise shipments from 22 manufacturers, representing practically the entire production of stock goods, which include sections, counters, office and vault verticals, safes and interiors, desks and tables, and small miscellaneous articles, exclusive of shelving and lockers.

⁹ Covers first 21 days only, during which period the old tariff law was in effect. Remaining 9 days of September are included with October

¹ Iron ore movement from the U. S. War Department, Engineer Corps; Lake Superior iron ore movement from the Lake Superior Iron Ore Association; copper production representing for 1913 through 1920, smelter production from domestic ores, from the U. S. Department of the Interior, U. S. Geological Survey, data since the beginning of 1921 from American Bureau of Metal Statistics, representing the primary production of copper by the mines of the United States; exports from the U. S. Department of Commerce; price of copper from U. S. Department of Labor, Bureau of Labor Statistics.

² Twelve month's average June, 1919, to May, 1920, inclusive.

³ No allowance made for seasonal variation in computing these index numbers. The figures represent the total iron ore movement, both for the United States canal and the Canadian canal which is equivalent to about 85 per cent of the total iron ore production of the United States. Figures for 1913 to 1922 represent monthly averages computed from the total movement for the year on a six months' basis during the equivalent of which period the total movement takes place. The canals, however, are open from April to December, inclusive, and the monthly data here shown cover the entire season during which the canals are open.

⁴ Furnaces reporting vary in number from 319 to 341. Beginning with June, 1922, reports from 15 Canadian furnaces are included.

⁵ Index number less than 1.

MISCELLANEOUS IRON PRODUCTS.

¹ Data on gray iron foundries in Ohio from *Ohio State Foundrymen's Association*; steel barrels and drums from the *Steel Barrel Manufacturers' Association*. Monthly data on orders for steel barrels and drums back to January, 1920, may be found in the September, 1923, issue (No. 25), pages 54 to 57.

² Ten months' average, March to December, inclusive.

³ Five months' average, July to December, exclusive of October.

⁴ Represents last half of September only. Previous to September, 1921, reports are for month beginning on 15th, but subsequent to this date all reports are for the calendar month.

⁵ Six months' average, July to December, inclusive.

¹ Data on foundry equipment from *Foundry Equipment Manufacturers' Association*; shipments of agricultural pumps from the *Federal Reserve Bank of Chicago* in cooperation with the *National Association of Farm Equipment Manufacturers* and covers 22 firms, except for May and June, 1922, when only 21 firms reported; data on steam pumps, single and duplex power pumps, and centrifugal pumps, from *The Hydraulic Society*, covering about two-thirds of the industry; monthly data back to January, 1919, may be found in the September, 1923, issue (No. 25), pages 54 to 57.

² Data reported by 13 members of the *Foundry Equipment Manufacturers' Association*, said to represent 65 to 70 per cent of the foundry equipment industry. The principal products are molding machines, sand-cutting machines, sand-blast machines, tumbling barrels, sand-mixing machines, cupolas, ladles, core-making machines, etc.

³ These figures include, besides the articles shown in other two columns, the value of cylinders shipped separately.

⁴ Eleven months' average.

⁵ Seven months' average.

⁶ Eight months' average.

¹ Patents granted compiled from the official records on file in the U. S. Department of the Interior, U. S. Patent Office, Division of Publications; stoker sales through December, 1922, from the Stoker Manufacturers' Association, said to represent approximately 99 per cent of the industry, beginning with January, 1923, from reports to U. S. Department of Commerce, Bureau of the Census, from 15 manufacturers representing practically the entire industry; data on fire extinguishers from the Fire Extinguisher Exchange; data representing the total of 22 different classes of faucets, from the National Association of Brass Manufacturers reported to the association by its members; tubular plumbing sales from the Tubular Plumbing Goods Association.

² It should be noted that inasmuch as patents are granted on Tuesdays only, the number of patents shown for a given month represents the total of either 4 or 5 Tuesdays.

³ Data include patents granted falling within the official classification of "agricultural implements; planters, harrows and diggers, plows, harvesters, scattering unloaders, and threshing implements."

⁴ Figures are incomplete, owing to the failure of 2 or 3 member companies to report.

¹ Except anthracite stocks from the *Anthracite Bureau of Information* and weighted average mine prices of bituminous coal throughout the United States from the *Coal Age*. Data on production of coal and coke from *U. S. Department of the Interior, Geological Survey*; exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; wholesale and retail prices are monthly averages from *U. S. Department of Labor, Bureau of Labor Statistics*. Wholesale price of bituminous coal is based on run of mine lump, while the retail price is average consumer's price of lump, egg, nut, and mine run, averaged according to shipments. The price of coke represents beehive furnace coke (range of prompt and future) at Connellsville ovens.

COAL.

¹ Crude petroleum production, imports, consumption, and completion of oil wells, from U. S. Department of the Interior, Geological Survey; stocks of crude petroleum included in "Total for Comparison" are from the U. S. Department of the Interior, Geological Survey, and include pipe-line stocks and tank farm stocks, producers' stocks in California, and stocks of Mexican petroleum held by importers. Beginning with January, 1923, imported oil and imported oil at refineries have not been reported by the Geological Survey, but the imported stocks reported by the Bureau of Mines have been added to the Geological Survey figures to compensate for the exclusion of the latter. This change in the method of computation reduced the January, 1923, total from 264,675,000 to 263,235,000 barrels, an almost negligible difference. Beginning with January, 1923, the Geological Survey total of stocks, pipe-line tank farm producers' stocks in California, and imported oil held outside refineries are given in the separate column headed "Tank farms and pipe lines." Total at refineries is from U. S. Department of the Interior, Bureau of Mines, and includes both imported and domestic oil. Wholesale price of crude petroleum, average for the month, from U. S. Department of Labor, Bureau of Labor Statistics; data on gasoline from U. S. Department of the Interior, Bureau of Mines. Mexican petroleum shipments are from the Oil Trade Journal, the current month being an approximate from the Wall Street Journal.

² Represents production transported from field of production, does not include oil consumed at locality of production.

³ Figures for earlier years adjusted to represent approximate net stocks to conform with data for current months.

¹ Mexican petroleum shipments from the three ports, Tampico, Port Lobos, and Tuxpam, form the best current measure of Mexican oil production.² "Exports of gasoline," as used by the Bureau of Mines, includes the items "gasoline" and all "other naphtha, etc.," as reported by the U. S. Department of Commerce, less exports to the Philippine Islands.³ Covers first 21 days only, during which period the old tariff law was in effect; remaining nine days included in October.⁴ Stocks held by refiners.⁵ Imports of crude petroleum beginning February, 1923, exclude topped oil; on this basis the January, 1923, imports were only 5,069,000 barrels. Consumption calculated on the new basis was 56,210,000 barrels in January, 1923, while days' supply was 140 at the end of December, 1922, and 138 at the end of January, 1923, on this basis.⁶ Based on total for comparison.

PETROLEUM PRODUCTS.

¹ Automobile shipments from *National Automobile Chamber of Commerce*; current automobile production data from *U. S. Department of Commerce, Bureau of the Census*; yearly figures 1913-1921 from *National Automobile Chamber of Commerce*; internal revenue taxes on automobiles and accessories from *U. S. Treasury Department, Bureau of Internal Revenue*.

² Represents shipments from factories covering almost the entire automobile production of the United States.

³ Total of membership of the *National Automobile Chamber of Commerce*, to which are added reports to the *Bureau of the Census* from outside manufacturers, representing practically complete production. Annual figures through 1921 represent complete production as compiled by *National Automobile Chamber of Commerce*. Monthly figures from January, 1920, through June, 1921, have been estimated by the *Cleveland Trust Company* on the basis of shipments and are given in detail in the July, 1923, issue (No. 23) of the *Survey of Current Business*.

⁴ Data represent internal revenue taxes collected under the revenue acts of 1918 and 1921. For taxes on automobiles and motor cycles ("including tires, inner tubes, parts, and accessories therefor, sold in connection therewith") the rate is 5 per cent and payable by the manufacturer. For taxes on automobile trucks and automobile wagons ("including tires, etc., sold on or in connection therewith") the rate is 3 per cent and payable by the manufacturer. For taxes on "automobile accessories and parts sold to any person other than a manufacturer (of automobiles)" the rate is 5 per cent and payable by the manufacturer.

⁵ Six months' average, July to December, inclusive.

See footnotes on opposite page also.

¹ Data furnished by the Rubber Association of America. The number of firms has increased from 36 in November, 1920, to a maximum of 66 in 1922. It is stated by the Rubber Association that this variation in the number of firms does not change the totals to any great degree, except for the omission of the Firestone Tire Company beginning in September, 1921.

² India-rubber imports, including latex, from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; wholesale prices, average weekly, from U. S. Department of Labor, Bureau of Labor Statistics; stocks in United Kingdom, aggregating stocks at wharves and warehouses in London and in six recognized public warehouses at Liverpool from the Rubber Growers' Association (British).

¹ Computed from census data for the year indicated. The figures are not directly comparable but are given here to show the production of automobile tires as ascertained from the census of manufacturers for the years 1914 and 1919.² Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

HIDES AND LEATHER—PRODUCTION AND STOCKS.

See footnotes on opposite page also.

¹ Based on figures compiled by the U. S. Department of Commerce, Bureau of the Census. The data embrace returns from packers, tanners, dealers, importers, and manufacturers. As given in the detailed monthly reports, which can be obtained upon request from the Bureau of the Census, the returns for hides and skins are expressed in numbers of hides and skins. For the above summary these have been reduced to pounds on the basis of the average weights of each class. Similarly data on leather have been converted to pounds or square feet from reports in skins, sides, backs, butts, pounds, etc.

² Prior to July, 1922, these figures were compiled by the Tanners' Council. Since July, 1922, they have been compiled by the Bureau of the Census and for skiver and harness production represent returns from a much larger number of firms than reported to the Tanners' Council. Hence the figures from July, 1922, on are not directly comparable with those for preceding months. The index numbers in Table 27 for the months after July, 1922, have been computed by chain relatives and take account of the percentage variation rather than the absolute variation in the figures. The index numbers show the trend of the industries irrespective of the change in the number of firms reporting.

See footnotes on opposite page also.

³ Beginning December, 1919, these statistics cover amount of harness leather "stuffed" rather than that produced, but it is stated that the variation between these items is small.

⁴ Includes estimated production of firms outside Tanners' Council.

⁵ Data on sales of oak leather belting from the Leather Belting Exchange, and is estimated to represent from 65 to 75 per cent of the industry.

⁶ Includes skins with and without wool, but does not include weight of wool.

⁷ Compiled by U. S. Department of Commerce, Bureau of the Census, from over 1,000 firms each month. Figures for the years 1919 and 1921 are those reported by the census of manufacturers for those years. Production in 1914 totaled 252,516,603 pairs, or an average of 21,043,000 pairs per month.

⁸ Four months' average, September to December, inclusive.

¹ Newsprint data prior to May, 1923, from the *Federal Trade Commission*; since then these figures have been taken from the *Newsprint Service Bureau*, covering almost the entire industry. Imports and exports from the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; Printing activity from *United Typothetae of America*; book publication from the *Publishers' Weekly*.

² Prior to Sept. 1, 1916, includes only paper valued at not above 2.5 cents per pound; from Sept. 1, 1916, to Apr. 24, 1920, not above 5 cents per pound, and from Apr. 24, 1920, to date not above 8 cents per pound.

³ Printing activities based on productive hours reported by plants in 52 cities in 30 States, each department being weighted for the combined index.

⁴ Between 10 and 15 per cent of the books manufactured in America are new editions, the remainder being new books; while about 95 per cent of the books manufactured in this country are by American authors.

⁵ Books imported are books of foreign manufacture, catalogued and marketed by American publishers.

⁶ Stocks at end of year. ⁷ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

PAPER BOXES.

¹ Data from the *National Container Association*, which merges the statistical activities of the *Container Club* and the *National Association of Corrugated and Fiber Box Manufacturers* who formerly reported separately to *Survey of Current Business*. Thirty identical companies report corrugated board data and 11 report solid fiber data. Data for the former individual associations, extending back to 1919 for the Container Club, are given in the August, 1923, issue (No. 24), but are not comparable with data shown here as the former *National Association* reported in their totals single face board (used principally for wrapping purposes) which is excluded from the tabulation above.

² The outer and inner covering of the combined board.

³ Principally reworked papers used as a filler for solid fiber board.

⁴ Fluted interior of corrugated board; about 90 per cent straw.

PAPER PRODUCTS AND PEARL BUTTONS.

¹ Data from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce. Monthly averages for 5-year period, 1909-1913, on which index numbers are based, are 16,463 tons for mechanical and 25,621 for chemical pulp. Monthly averages and index numbers for years 1913 through 1918 are given in the August, 1923 (No. 24), issue of the Survey, p. 92.

² Folding paper boxes and labels from the Association of Folding Box and Label Manufacturers, said to represent approximately 60 per cent for the folding-box industry and 75 per cent for the label industry.

³ Rope paper sacks from Rope Paper Sack Manufacturers' Association, said to represent approximately 95 per cent of the industry.

⁴ Data compiled by the Abrasive Paper and Cloth Manufacturers' Exchange, estimated to represent 90 per cent of the industry. The totals given include the sales of garnet, emery, flint, and artificial (silicon carbide, and aluminum oxide) paper, cloth, and combinations. Figures are stated in equivalent reams, 9 by 11 inches in size. The data submitted show that in 1919 the total domestic sales were made up of the following approximate percentages: Garnet 39, emery 8, flint 32, and artificial 20 per cent.

⁵ Data on fresh-water pearl buttons from National Association of Button Manufacturers from reports of 17 firms representing 95.2 per cent of the machine capacity of the association members, except prior to July, 1922, when 16 firms reported.

⁶ Twelve months' average, July, 1921, to June, 1922. Numerical data not furnished by the association.

¹ Building material price indexes representing the relative cost of building materials entering into the construction of a six-room frame house and a six-room brick house from the U. S. Department of Commerce, Bureau of Standards, Division of Building and Housing, and Bureau of the Census, which is based on prices paid for material by contractors in some 50 cities of the United States. The prices are weighted by the relative importance of each commodity in the construction of a six-room house: plumbing fixtures, wholesale price, compiled by the Bureau of the Census, is an average of 12 reports of combined net selling prices to retailers, without freight, on the following competitive fixtures: Bath tub, washstand, water-closet, sink, two-part cement laundry tub, and 30-gallon range boiler. The plumbing prices are averages for the month while building material indexes are as of the first of the month.

² This index number, furnished through the courtesy of the *Aberthaw Construction Co.*, is designed to show the relative changes in the cost of constructing a standard concrete factory building. The company believes that the year 1914 gives a normal base and that July, 1920, with an index number of 265, represented the peak of costs. Beginning with June, 1923, the Morton C. Tuttle Company has also prepared an index on a similar basis, with practically identical results. These index numbers are given as of the first day of the month.

³ The construction cost index, computed by the *Engineering News Record*, is based upon the costs of steel (structural shapes, Pittsburgh base), cement (f. o. b. Chicago, exclusive of bags), lumber (southern pine, New York base), and the rates paid common labor in the steel industry through 1920, after which common labor rates are averages reported from about 20 cities by correspondents of the *Engineering News Record*. The prices are weighted on the basis of the total production of steel, cement, and lumber, and the total supply of common labor.

⁴ Compiled by the *Engineering News Record*, on the basis of contracts let as reported by this publication and its construction cost index number, based on 1913 costs.

⁵ Data from *National Bottle Manufacturers Association*, based on reports of identical firms representing approximately 90 per cent of the capacity of the industry.

⁶ Data from reports of identical firms by the *Illuminating Glassware Guild*, estimated to represent from 70 to 75 per cent of the capacity of the industry, based on a normal capacity of 6,000 turns.

⁷ Data from the *Optical Manufacturers Association*, representing about 60 per cent of the industry.

⁸ Twelve months' average, May, 1921-April, 1922.

⁹ Yearly figures are not averages of the monthly data but are computed on the total volume for the year as compared with the 1913 total.

¹ Southern construction from *Manufacturers' Record*. Other data compiled by the *F. W. Dodge Co.*, covering small towns and rural districts as well as large cities. Prior to May, 1921, these figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

² Covers all classes of building in the states of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia.³ Estimates made by the F. W. Dodge Co.⁴ Include the following groups, formerly shown separately: "Hospitals and Institutions," "Public Buildings," "Social and Recreational Buildings," and "Religious and Memorial Buildings." Details through July, 1923, may be found in the August, 1923 (No. 24), issue of the Survey, pp. 94-97.

¹ Data compiled by the F. W. Dodge Co., covering small towns and rural districts as well as large cities in 27 northeastern states, except fire losses in the United States and Canada, included here for convenience, compiled by the *New York Journal of Commerce*, and fire losses in Great Britain compiled by the *London Times*. Prior to May, 1921, the building figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total. Monthly averages of the value of contracts awarded for the years 1913 through 1918 may be found in the August, 1923, issue (No. 24), pp. 96 and 97.

² Prior to January 1923 these figures did not include fires involving losses of less than £1,000.

³ Grand total includes military and naval buildings and miscellaneous, in addition to the groups listed in this and the preceding table (p. 92).

¹ Data on cement is from the U. S. Department of the Interior, Geological Survey, except prices, which are average of weekly prices reported by the U. S. Department of Labor, Bureau of Labor Statistics; data on concrete pavements for roads, streets, and alleys from Portland Cement Association, Highways Bureau. The cement industry is highly seasonal and should be compared with corresponding months of previous years rather than with other months of the current year. Detailed data by months back to 1915, with an 8-year average for each month which can be used for seasonal comparisons, will be found in the September, 1923 (No. 25), issue of the Survey, p. 47.

² Includes streets and alleys besides roads.

³ Of the numerical 1919 monthly average, 3,221,000 yards was actually reported. The remainder is the prorated portion of a total of 3,338,309 yards for the year of pavement less than 6 inches thick not allocated by class of pavement. This has been prorated to roads on the basis of the roads' share of allocated contracts.

¹ Retail lumber sales, compiled by the *Federal Reserve Bank of Minneapolis*, represents the total lumber sales for 637 yards in the Minneapolis (ninth) Federal Reserve District. Details by months back to January, 1920, may be found in the October, 1923, issue (No. 26), pp. 58-60. These sales include softwoods as well as hardwoods.

² Data on Michigan hardwoods (chiefly maple, birch, basswood, and beech) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

³ Quarterly average.

⁴ Ten months' average.

⁵ Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills. These figures represent actual reports from 60 to 75 mills each month. The hardwoods cut are mostly maple, birch, and beech.

¹ These indexes are for the first week in each month as published in "Lumber," and represent a combined weighted average for the respective series of lumber, based on quotations on various grades for each species, and the species weighted according to annual production of the previous year, changing about May of each year, when the new production figures are available. The softwood index is based upon seven species: Yellow pine, Douglas fir, North Carolina pine, white pine, hemlock, spruce, and cypress. The hardwood index is based upon 13 species: Maple, birch, basswood, elm, oak, gum, ash, cottonwood, chestnut, poplar, hickory, and walnut.

² Compiled by American Walnut Manufacturers' Association from reports of identical firms representing from 50 to 60 per cent of the walnut lumber industry.

³ Combined figures representing average shipments and unfilled orders per firm from reports of 50 identical firms of the National Association of Chair Manufacturers, from 42 to 58 firms of the Southern Furniture Manufacturers' Association, and from about 100 firms of the National Alliance of Case Goods Associations.

¹ The figures for yellow pine are computed data furnished by the *Southern Pine Association*. The method of computing is first to find the percentage relation between the actual production, shipments, and orders of the mills reporting and the normal production of these same mills. This per cent is then applied to the normal production of 192 mills. The average production in the first four months of 1916, 484,065,392 feet, is taken as normal production. There are no separate normals for orders and shipments since these two items must be governed by production. Assuming that the mills reporting are a good sample of the industry, the resulting figures are equivalent to the actual production, shipments, and orders of the 192 identical mills, and hence a fair sample of the industry. The same procedure is followed for stocks except that normal in this case is 1,262,450,326 feet, the average stocks during 16 months ending April, 1916.

² Data from *U. S. Department of Labor, Bureau of Labor Statistics*, and represent average weekly prices for the month at Hattiesburg, Miss. The 1913 monthly average, on which the index numbers are based, is \$23.04 per thousand feet.

³ The *Western Pine Manufacturers' Association* has supplied figures showing the actual and normal production for the mills reporting in each of the periods shown. From these figures the per cent of normal production is obtained in each case, and this per cent is applied to the normal production of 54 identical mills. The normal monthly production of these 54 mills is given as 148,000,000 board feet and is estimated to represent 70 per cent of the output of the western pine territory.

⁴ Actual figures reported by about 20 mills each month to the *California White and Sugar Pine Association*; the number of mills varies from 13 to 26.

⁵ Northern pine from the *Northern Pine Manufacturers' Association*, and includes reports from some 24 mills, both member and nonmember, located chiefly in Minnesota.

See footnotes on opposite page also.

¹ The figures of production and shipments of Douglas fir were obtained by applying the percentage figures of actual production and shipments to normal production of reporting mills as supplied by the *West Coast Lumbermen's Association* to the actual production of 124 mills for May, 1920. The production in that month was 447,654,540 board feet.

² Data from *U. S. Department of Labor, Bureau of Labor Statistics*, and represent average weekly prices for the month for the State of Washington.

³ Data on Michigan softwoods (chiefly hemlock) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

⁴ Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills, from actual reports of from 60 to 75 mills each month.

¹ The California Redwood Association has furnished to the Bureau of the Census the figures on the actual production, shipments, and orders received by 7 identical mills for each month of 1918, 1919, and 1920. These 7 mills represent 40 per cent of the capacity of all listed mills for these years. For the first 4 months of 1921 reports were furnished from 10 mills representing 564 per cent of the capacity of all listed mills. For the remaining months of 1921 reports are available from 11 mills representing 71 per cent of the total listed capacity, and for 1922 reports are available from 14 mills representing 73 per cent of the total listed capacity. The actual average monthly production of the 7 reporting mills for 1918 was 14,934,000 feet. On the basis of 40 per cent capacity, the 1918 average monthly production of all mills is computed as 37,460,000 feet. Regarding this as normal production, there has been computed the probable production of the total redwood capacity based on the proportion which capacity of the reporting mills bears to the total of all mills. The columns on shipments and orders received represent a similar relationship between the actual reported figures and the total capacity of all mills.

² Data computed from reports on actual production and shipments as furnished by the North Carolina Pine Association, Inc., for mills varying in number from 31 to 56. The computed figures given are obtained by first determining for a given month the per cent which the actual production is of the normal production of the identical mills reporting. This per cent is then applied to an arbitrary figure of 70,000,000 board feet, which represents the approximate monthly average normal production of the mills which reported in 1919. A similar per cent of actual shipments to normal production is applied to the same figure to obtain the computed shipment figures. The resulting figures represent a computed production as of identical mills for each month. The figures are of the same order of magnitude as the actual reported production and shipments, but avoid the rather wide variations due to different mills reporting in different months.

³ Figures in this column represent the total cut of 10 species of lumber—yellow pine, Douglas fir, hemlock, western pine, redwood, maple, birch, beech, white fir, and sugar pine—representing over 70 per cent of the total cut of lumber in the United States. Annual figures for 1913 and 1914 are from actual reports to the U. S. Department of Agriculture, Forest Service, and from 1915 through 1920 are computed on the basis of actual reports to the Forest Service. Monthly figures for 1920 are obtained by prorating the cut of each species as reported by the associations whose figures are carried in these columns to the Forest Service totals. For subsequent months prorating is done on an approximate average for the years 1917 to 1920.

⁸ Exports of lumber are from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.

¹ Except wholesale prices, monthly averages, from U. S. Department of Labor, Bureau of Labor Statistics. The sources of the other data in this table are: Clay fire and silica brick from the *Refractories Manufacturers' Association* and face brick from the *American Face Brick Association*.

² Figures for 1921 are from reports of 68 identical mills with a monthly capacity of 78,645,942 bricks, which is estimated by the association to represent from 68 to 70 per cent of the total clay fire brick capacity of the United States. Figures for 1919, 1920, and 1922 are computed to this capacity, respectively, from reports from 53, 56, and 60 mills having a monthly capacity for the years in question of 71,572,186 and 73,526,103, and 73,307,190 bricks.

² Figures for 1921 are from reports of 15 identical mills with a monthly capacity of 27,305,500 bricks, which is estimated by the association to represent from 78 to 80 per cent of the total silica brick producing capacity of the United States. Figures for earlier years are computed to this capacity from reports of 12 identical mills with a monthly capacity of 23,448,833 bricks.

⁴ The figures on face brick include data from 32 identical firms reporting to the American Face Brick Association each month. Comparable monthly data for the months of 1919 and 1920 are shown in the April "Survey" (No. 20.)

⁵ Ten months' average.

⁶ Prior to September production figures included common and culls not infrequently burned in face-brick kilns and since September, data represent finished face brick drawn from kilns; however, it is estimated that the difference in the methods of reporting has no serious effect on the comparability of the data. For stocks, data prior to September included the yard or shed inventory plus the estimate of the number of formed brick in the kilns which would turn out to be face brick, while since September data on stocks represent the inventory of finished face brick on yards. From September forward data on stocks are not directly comparable with those given for preceding months.

¹ Data furnished by the *Enameled Sanitary Ware Manufacturers' Association* and said to represent approximately 98 per cent of the total output in the United States. The Association explains that orders shipped are the best current index of the industry. Orders received are likely to pyramid during periods of great activity to be followed by cancellations if the demand drops off. Stocks always increase during the winter and spring months because more efficient work at the enameling ovens can be done in cold weather and manufacturers operate at maximum capacity as long as they can finance operations and find storage capacity for the products.

² Small ware includes lavatories, sinks, and miscellaneous.

³ Average of 8 months, May to December, inclusive.

¹ Prepared roofing data compiled by the *Prepared Roofing Manufacturers' Association*, prorated to 100 per cent of the industry, from reports received from 60 to 90 per cent of the total machine activity; data on roofing felt from the *Felt Manufacturers' Association*, including reports from 16 identical mills.

² Represents reports from 11 mills.

³ Monthly data back to 1919 appeared in the September issue (No. 25), of the *Survey of Current Business*.

¹ Compiled from reports of the *National Wood Chemical Association*, to which are added reports from the principal nonmember firms. Total reports for each month vary from firms with a capacity of 3,200 cords to 4,500 cords daily; all months are therefore prorated to a daily capacity of 4,500 cords, representing about 90 per cent of the industry, on the basis of capacity reporting each month.

² August, 1914.

³ Compiled from weekly wholesale quotations of 35 drugs and pharmaceutical chemicals by the *Oil, Paint, and Drug Reporter*.

⁴ Compiled from weekly wholesale quotations of 20 essential oils by the *Oil, Paint, and Drug Reporter*.

⁵ Compiled from weekly wholesale quotations of 40 crude botanical drugs by the *Oil, Paint, and Drug Reporter*.

⁶ The chemical price index from *Chemical and Metallurgical Engineering* includes quotations on 25 commodities selected on the basis of their importance as representing both qualitatively and quantitatively the principal branches of the chemical industry. These prices are weighted on the basis of total production plus total imports in the year 1919. The figures are averages of weekly prices.

⁷ Wholesale average monthly price of sulphuric acid from *United States Department of Labor, Bureau of Labor Statistics*.

¹ Back data on Argentine cereal exports from the *Boletín Mensual de Estadística Agrícola*; current data from the *Estadística Agro-Pecuaria*, publications directed by the Argentine Minister of Agriculture. Figures are converted from original data in metric tons.

² At end of week nearest to end of month. Visible supply of wheat and corn in chief ports reported by *Modern Miller*. Visible supply of flaxseed as reported in the *Oil, Paint, and Drug Reporter*.

³ Ten-month average.

¹ Except shipments of linseed oil and cake and meal from Minneapolis Chamber of Commerce. The sources of the other data are: Imports and exports of vegetable oil from the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Cottonseed oil from the U. S. Department of Commerce, Bureau of the Census; and Oleomargarine production and consumption from the U. S. Treasury Department, Bureau of Internal Revenue.

² Includes cottonseed, corn, and linseed oils.

³ These figures are for fiscal years beginning July 1 of year stated.

⁴ The following oils are included: Chinese nut, cocoa butter, coconut, cottonseed, olive (inedible), olive (edible), palm, palm kernel, peanut, rapeseed, soya bean, and linseed. Where certain of these are reported in gallons, they have been converted into pounds, allowing 7½ pounds per gallon.

⁵ Colored and uncolored, as represented by tax-paid withdrawals.

⁶ Figures for 1917 to 1922 are monthly averages of cottonseed-oil production and stocks on hand at the end of the month during cotton crop years (beginning August 1 of the preceding year and ending July 31 of the year to which the figure is credited).

⁷ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

VEGETABLE AND FISH OILS.

¹ The figures given on pages 112, 113, 116, and 117 represent the movement of certain more important vegetable and animal fats and oils, as reported quarterly by the Bureau of the Census, Department of Commerce. The data cover factory production, factory consumption, and factory and warehouse stocks. The stock figures refer to the amount on hand at the end of each quarter.

¹ Except receipts of hay at 11 principal markets, which are compiled from weekly reports to the *Hay Trade Journal* and unsold stocks of canned sweet corn at the end of each month in 36 canneries of Iowa and Nebraska, compiled by the *Iowa-Nebraska Canners Association*; other data compiled by U. S. Department of Agriculture Bureau of Agricultural Economics.

² Oranges, lemons, and grapefruit.

³ As of 1st of the month.

⁴ Average of stocks taken January, July, October, and December, 1922.

⁵ November 18, 1921.

¹Wheat flour production, consumption, and stocks reported by *U. S. Grain Corporation*, prior to July, 1920, later months from *Russell's Commercial News*; Visible supply of wheat and corn from *Bradstreet's*; Receipts and shipments of wheat and corn and receipts and visible supply (at nearest week to end of month) of oats, compiled by *Chicago Board of Trade*, from the *Price Current-Grain Reporter*; receipts of barley and rye compiled from reports of commercial organizations by *Federal Reserve Board*; grindings of corn by the wet process in the manufacture of cornstarch, glucose, etc., compiled by the *American Manufacturers Association of Products from Corn* and comprise the entire production of the United States.

²Consumption calculated from production, stocks, imports, and exports. Stocks represent flour in all positions, calculated from actual reports bearing a known relation to total stocks.

³Aggregate stocks in United States and Canada east of the Rocky Mountains, on nearest Saturday to end of the month.

⁴At principal primary markets.

⁵For monthly production figures since January, 1914, see page 47 in the October, 1922 (No. 14) issue of the Survey.

CEREAL EXPORTS.

Table 71.—(A) INDEX NUMBERS AND (B) NUMERICAL DATA.

Based on data from Government sources.¹

[Base year in bold-faced type.]

YEAR AND MONTH.	EXPORTS OF GRAIN (including flour and meal as grains).											
	Barley and barley flour. ²	Corn and corn meal. ³	Oats and oat-meal. ⁴	Rye and rye flour. ⁵	Wheat and wheat flour. ⁶	Total grains.	Barley and barley flour. ²	Corn and corn meal. ³	Oats and oat-meal. ⁴	Rye and rye flour. ⁵	Wheat and wheat flour. ⁶	Total grains.
	Relative to 1913.						Thousands of bushels.

¹ Receipts, shipments and stocks at mills from Rice Millers' Association, comprising movement of the whole rice crop except California rice. Shipments of rice through New Orleans compiled by New Orleans Board of Trade. Imports and exports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, data for rough rice being reduced to the equivalent clean rice at 162 pounds of rough to 100 pounds of clean.

* Rough rice barrels of 162 pounds are equivalent to clean rice pockets of 100 pounds each.

† Covers first 21 days only, during which period the old tariff law was in effect; other 9 days included in October figures.

LIVE-STOCK MOVEMENT.

See footnotes on opposite page also.

¹ Exports reported by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; production of beef and pork from animals slaughtered under Federal inspection reported by the U. S. Department of Agriculture, Bureau of Agricultural Economics. Apparent consumption has been computed from the inspected slaughter plus imports less exports and the change in storage holdings. Wholesale prices are average for the month from U. S. Department of Labor, Bureau of Labor Statistics.

² Cold-storage holdings are distinctly seasonal. No allowance for this has been made in calculating index numbers. Figures represent storage holdings on the first day of each month.

³ Total dressed weight slaughtered under Federal inspection, including veal with beef. The slaughter under Federal inspection, according to census figures in 1919, amounted to 68 per cent of the total number of animals slaughtered in the United States in the case of hogs, 82 per cent in the case of beef and 91 per cent for lamb.

¹ Receipts, stocks, and meltings and Cuban movement reported by the *Statistical Sugar Trade Journal*; Imports and exports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Wholesale and retail sugar prices, from U. S. Department of Labor, Bureau of Labor Statistics.² Figures include reports from seven ports: Boston, New York, Philadelphia, Savannah, New Orleans, Galveston, and San Francisco until 1921, when Baltimore was added upon completion of refinery in that city. Prior to that year it is stated that little sugar moved through Baltimore. Meltings are calculated from weekly reports, the odd days being prorated. Stocks represent the amount of raw sugar in the hands of refiners on the dates nearest the end of the month as reported for each port.³ Covers first 21 days only, during which period the old tariff law was in effect.

POULTRY, EGGS, AND FISH.

¹ Receipts, stocks, and meltings and Cuban movement reported by the *Statistical Sugar Trade Journal*; Imports and exports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Wholesale and retail sugar prices, from U. S. Department of Labor, Bureau of Labor Statistics.

² Figures include reports from seven ports: Boston, New York, Philadelphia, Savannah, New Orleans, Galveston, and San Francisco until 1921, when Baltimore was added upon completion of refinery in that city. Prior to that year it is stated that little sugar moved through Baltimore. Meltings are calculated from weekly reports, the odd days being prorated. Stocks represent the amount of raw sugar in the hands of refiners on the dates nearest the end of the month as reported for each port.

³ Covers first 21 days only, during which period the old tariff law was in effect.

TOBACCO.

¹ Stocks held by manufacturers and dealers reported by the U. S. Department of Commerce, Bureau of the Census; Production of manufactured tobacco and snuff, cigars, and cigarettes by the U. S. Treasury Department, Bureau of Internal Revenue; Crop production by the U. S. Department of Agriculture, Bureau of Agricultural Economics. Exports by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Wholesale prices from U. S. Department of Labor, Bureau of Labor Statistics. Sales of tobacco from loose-leaf warehouses compiled by Federal Reserve Board from reports of State authorities of Kentucky, North Carolina, South Carolina, and Virginia, which states grow about 75 per cent of the total tobacco crop.

² Held by manufacturers and dealers on first day of each quarter. Yearly figures are quarterly averages.

¹ Represents the total of plug, twist, fine-cut, smoking tobacco, and snuff.² The Internal Revenue reports the number of large cigars, i. e., those weighing over three pounds per thousand, and the number of small cigars weighing less than the above amount. Likewise they report the number of large and small cigarettes, the former weighing more than three pounds per thousand. Large cigars and small cigarettes represent more than 90 per cent of the total number manufactured in each case and are the only ones given in this table.³ Yearly figures on crop production represent the latest revised estimates as reported by the U. S. Department of Agriculture, Bureau of Agricultural Economics. The monthly figures for 1921 and 1922 are the current monthly estimates of total production.⁴ Partly estimated. Kentucky sales for first half year not available and are estimated as equal to the sum of the sales in the other States, which is approximately the normal proportion of Kentucky sales to the total.⁵ Index number less than 1.

¹ Data on coffee except imports received from the *New York Coffee and Sugar Exchange, Inc.*; imports of coffee and tea from the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.*

² Represents total receipts at Rio and Santos.

³ Represents total clearances from Rio, Santos, and Victoria.

⁴ Represents total clearances from Rio, Santos, Victoria, and Bahia.

⁵ A bag of coffee averages 132 pounds.

⁶ Given as of the 1st day of the month.

⁷ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ This table is submitted in response to a demand for publication of the figures of sales of individual stores, which have been compiled from published reports. These figures represent money values sales. Data on American Wholesale Corporation placed here for convenience. Mail-order and chain-store sales are reported directly by the companies or compiled from the *Commercial and Financial Chronicle*, except the index of four mail-order houses.

² Compiled by the *Federal Reserve Board, Division of Research and Statistics*, and the index, based upon the combined average sales in 1919, includes Sears, Roebuck & Co., Montgomery Ward & Co., Larkin Co., and the National Cloak & Suit Co.

³ Includes Sears, Roebuck & Co. and Montgomery Ward & Co.

RETAIL SALES.

¹ Compiled by the Federal Reserve Board, Division of Analysis and Research. Index numbers are based upon dollar values.² With the exception of the 4 music chains which operate only locally through the West, these data include the larger individual chain-store systems, which in the aggregate cover practically the entire country. 17,023 unit stores are represented by the 27 grocery chains; 1,828 unit stores by the 5 five and ten cent chains; 463 unit stores by the 10 drug store chains; 2,732 unit stores by the 3 cigar chains; 344 unit stores by the 6 shoe chains; and 58 unit stores by the 4 music chains.³ In calculating bases estimates are made for sales of stores in the Minneapolis and Dallas districts for the months of 1919 for which there are no reports.

¹ Candy sales from U. S. Treasury Department, Bureau of Internal Revenue; postal receipts in 50 selected cities, quarterly data on second-class mail, and monthly data on money orders, from U. S. Post Office Department; magazine advertising as reported by *Printer's Ink*; newspaper advertising compiled by *New York Evening Post*.² Computed on the basis of a 5 per cent excise tax prior to January, 1922, and since January, 1922, on the basis of a 3 per cent tax (revenue act of 1918 superseded by revenue act of 1921). This column thus represents actual value of sales, not the taxes paid on sales.³ The war revenue act of Oct. 3, 1917, provided for an increase in the rate for first-class letter mail from 2 cents per ounce or fraction thereof prior to Nov. 1, 1917, to 3 cents per ounce or fraction thereof, from Nov. 1, 1917, to July 1, 1919, and an increase of the rate on postal and post cards from 1 cent to 2 cents each during the same period. Since July 1, 1919, the old rates on first-class mail have been restored. Under this act a stamp tax of 1 cent for each 25 cents postage charge or fraction thereof is collectible on parcel-post matter.

¹ Note that these data represent quarters ending in the months specified and the annual figures represent quarterly averages for each year, not monthly averages. The war revenue act of Oct. 3, 1917, provided for a series of graduated annual rate increases on second-class mail as follows, compared with a flat rate of 1 cent per pound previous to July 1, 1918: From July 1, 1918, to June 30, 1919, 1½ cents, and since July 1, 1919, 1½ cents per pound, these changes applying, regardless of zone or distance, to portions of publications devoted to reading matter. For the advertising portions the country was divided into eight zones, each with a graduated rate and its corresponding annual increases, beginning with July 1, 1918, and reaching the maximum on July 1, 1921, making, for the first time, a differentiation between the rates on reading and advertising matter.

² Total of 50 cities transacting two-thirds of the total money-order business of the country. Money orders paid include, in addition to those both issued and payable in the 50 cities, those presented for payment but issued at any of the other offices in the United States and the 22 foreign countries, mostly in North America and West Indies, to which domestic postage rates apply.

³ Money orders issued to 10 principal foreign countries, representing approximately 95 per cent of total money orders issued. The countries are Great Britain, Canada, Mexico, France, Italy, Netherlands, Denmark, Norway, Sweden, and Japan.

⁴ These figures represent the number of lines of advertising carried by the leading magazines dated for the month noted.

⁵ Compiled from 22 identical cities: New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Boston, Baltimore, Los Angeles, Buffalo, San Francisco, Milwaukee, Washington, Cincinnati, New Orleans, Minneapolis, Indianapolis, Columbus, Louisville, St. Paul, Birmingham, and Houston. For the years 1916 to 1918 no reports were available for Boston, Louisville, Houston, and Columbus. The totals for those years were computed from the actual reports of the 18 other cities, allowing 13.85 per cent of the total to the four missing cities, the average ratio of those cities to the total in the subsequent years.

⁶ Six months' average, July to December, inclusive.

¹ Data on restaurant sales from Childs Co. and Waldorf System, Inc.; tax collections from Bureau of Internal Revenue, Treasury Department.² The base year, 1913, showed a monthly average of \$710,000; monthly averages for intervening years may be found in the October issue (No. 26), pages 58 and 59.³ Six months' average, July to December, inclusive.⁴ Includes cabarets and concerts. The rate of tax under the act of 1921 (represented by data for 1922) is "1 cent for each 10 cents or fraction thereof of the amount paid for admission," payable by the person paying such admission, except "where the amount paid for admission is 10 cents or less, no tax shall be paid." The act of 1918 provided for the same rate of taxation but allowed no exceptions and, hence, the data for 1922 are not quite as comprehensive as the earlier data. However, the variance is not such as will prohibit comparison.

¹ Index numbers represent retail prices on the first day of the month, except food, which is the retail food index of the U. S. Bureau of Labor Statistics for the 15th of the preceding month. Beginning with March, 1922, all prices shown are as of the 15th of the month indicated. The index is weighted according to the estimated consumption of average wage earners before the war, on the following basis: Food 43.1 per cent, shelter 17.7 per cent, clothing 13.2 per cent, fuel and light 5.6 per cent, sundries 20.4 per cent.

² Index numbers represent averages for the month in 32 cities: food prices reported by 15 to 25 dealers in each city, fuel and light by 10 to 15 firms, including public utilities, in each city; other quotations secured directly from records. Rentals are based on 250 to 950 houses and apartments in each city, and for each item of clothing, furniture, and miscellaneous, four quotations are secured in each city (five in New York City).

WHOLESALE PRICES.

¹ Wholesale prices and retail food prices from the U. S. Department of Labor, Bureau of Labor Statistics; farm prices from the U. S. Department of Agriculture, Bureau of Agricultural Economics.

² The revised wholesale price index number of the U. S. Department of Labor, Bureau of Labor Statistics, is based on quotations of 404 commodities. These commodities are arranged in 9 groups as given in the table. In computing this index, the price of each commodity is weighted by multiplying it by the estimated quantity of that article marketed in the census year 1919. For comparable yearly data for the period 1890 to 1921, see the Monthly Labor Review for September, 1922, p. 46; and for comparable monthly data for period 1913 to 1922, see the Monthly Labor Review for July, 1922, p. 69.

³ The retail food price index compiled by the Bureau of Labor Statistics represents the changes in the price of 22 articles of food as reported by retail dealers in 51 of the larger cities as of the 15th of the month.

⁴ As of the 15th of each month. Farm prices represent the relative average prices to farmers of the 10 leading crops and leading live stock respectively.

¹ First eight columns give the revised wholesale price index numbers of the U. S. Department of Labor, Bureau of Labor Statistics, as reclassified by the Federal Reserve Board into the groupings as shown. The weights are the same as those used by the Bureau of Labor Statistics and the total of all commodities is therefore the same as the revised Department of Labor index. Dun's and Bradstreet's index numbers are calculated as of the first of each month, but really refer to prices in the preceding month; the index numbers have been calculated to a 1913 base from the actual figures as published in these journals. Bradstreet's index is the sum of prices per pound of the commodities, while Dun's is weighted by the amount "annually consumed by each inhabitant."

² The term "consumers' goods" in general applies to those commodities which because of their finished condition are ready for consumption; the term "producers' goods" applies to those products which are essentially still in the raw state or semifinished condition requiring additional manufacture.

EMPLOYMENT BY GROUPS OF INDUSTRIES.

¹ Except railway employment from the Bureau of Railway Economics and Detroit employment from the Employers' Association of Detroit. Data on employment in 1,428 United States factories, compiled by United States Department of Labor, Employment Service; data on New York State factories furnished by the New York Department of Labor; Wisconsin factories by the Wisconsin Industrial Commission; Massachusetts factories from the Massachusetts Department of Labor and Industries, Division of Statistics; total immigration and emigration statistics from U. S. Department of Labor, Bureau of Immigration; arrivals, departures, and passports issued from the U. S. Department of State, Division of Passport Control; index of Illinois employment from "The Employment Bulletin," published by the Illinois Department of Labor. For figures on unemployment in Pennsylvania, compiled monthly from April, 1921, through July, 1923, now discontinued, see August, 1923 issue (No. 24), pages 160 and 161.

² Information is from 1,428 factories, usually employing over 500 workers each.

¹ Figures represent reports from 1,648 firms in New York State employing more than one-third of the factory workers of the State. The 1914 average upon which the index numbers are calculated is an average of the 7 months, June to December, 1914, inclusive. As originally published by the *New York Department of Labor*, the index numbers are based on June, 1914, and have been recalculated to the 7-month average.

² The index numbers are computed on a chain relative basis from data received from an increasing number of firms (202 in September, 1922, and 692 in June, 1923). The chain relatives take account of percentage variation rather than absolute variation in the figures, and show the trends irrespective of the change in the number of firms reporting.

³ Relative to September, 1922.

⁴ Relative to first quarter of 1915.

⁵ On 15th of month.

⁶ A average hourly compensation represents the earnings of the railway employees on Class I carriers, excluding officers, averaged for the month.

⁹ Includes total admitted, both immigrants and nonimmigrants.

¹⁰ Includes total departed, both emigrants and nonemigrants.

¹¹ Excludes passports issued to Government officials.

¹ Compiled from weekly reports to the U. S. Department of Labor, Employment Service, by state and municipal employment agencies. Eastern states included in the report are Connecticut, District of Columbia, Massachusetts, New Jersey, New York, and Rhode Island (Delaware, Maryland, and Pennsylvania, now reporting, are excluded to show true comparison). Central states are Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. Southern states include Alabama, Arkansas, Georgia, Kentucky, North Carolina, Oklahoma, Texas, and Virginia. Western states include Arizona, California, Colorado, Idaho, Oregon, and Washington; Montana is included beginning with March, its figures being so small as not to affect the total.

² One week in July estimated for South Dakota.

³ One week in August estimated for Iowa and Michigan.

⁴ Month of September for South Dakota and one week for Iowa estimated.

⁵ First two weeks in July estimated for Arkansas.

⁶ First two weeks in July estimated for Washington.

See footnotes on opposite page also.

¹ Tonnage entered and cleared in foreign trade, and fuel loaded for consumption by outgoing vessels, from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; index of ocean freight rates from the *Federal Reserve Board, Division of Research and Statistics*.

² The index of ocean freight rates represents rates to 7 ports in the United Kingdom and a total of 17 ports for all of Europe. The index numbers are weighted by the geometric means of these rates. The weights include the relative importance of each port and also the relative importance of the 5 principal products—grain, provisions, cotton, cottonseed oil, and sack flour.

¹ About two-thirds of this traffic is through the Erie Canal and one-third through the Champlain Canal. Figures for 1913 to 1922 represent monthly averages for seven months, during which the canals are usually open.² Nine months' average.³ Data on Ohio River commerce from the United States War Department, Engineer Corps, represent total cargo traffic between Pittsburgh and Lock and Dam 11, located between Wellsburg and Wheeling, W. Va. The total of 3,585,188 short tons shown for the months of 1922, from which the average is computed, does not include the annual total of 1,327,199 short tons not shown separately by months, the total movement for 1922 being 4,912,387. Data are available from 1910 to 1914 for traffic between Pittsburgh and Lock No. 6 (near Beaver, Pa.), and from 1915 to 1921 between Pittsburgh and Lock No. 10 (near Steubenville, Ohio). Traffic between Pittsburgh and Lock 10 amounted to 4,733,620 short tons in 1920 and 2,840,978 in 1921.

¹ Data from the American Railway Association.² Daily average for the last period (7 or 8 days) of the month, exclusive of Canadian roads. The Association reports the number of freight cars which are idle (surplus) and also the number of requests for cars which can not be filled (shortage). The difference between these two figures represents the net freight-car situation for the country as a whole. The car shortages can not ordinarily be filled from the idle cars because of the uneven geographical distribution of the latter.³ Includes other classes than groups listed.⁴ Total includes coke shipments in addition to commodity groups listed.⁵ Index number less than 1.⁶ Number of railroad freight cars in need of repairs on first day of each month. Note that 1913 is the base year, having a monthly average of 150,909 cars in need of repairs, or 6.8 per cent of the total in use.

¹ Telephone earnings are the combined reports of 13 largest telephone companies, and telegraph earnings are the combined reports of the Western Union and Postal Telegraph Cos., as reported to the *Interstate Commerce Commission*; gas and electric earnings are the combined reports to the *U. S. Department of Commerce, Bureau of the Census*, of 73 companies or systems operating gas, electric light, heat, power and traction services and comprising most of the large companies in the United States. Gross earnings are in general the gross operating revenues, while net earnings in general represent the gross less operating expenses and taxes, but owing to a lack of uniformity in the accounts of individual companies, it has not been possible to secure these actual items for each company, and in such cases the nearest comparable figures have been taken. Also in some cases the figures for prior years do not cover exactly the same subsidiaries owing to acquisitions, consolidations, etc., but these differences are not

believed to be great in the aggregate. Gross revenue received from the sale of electrical energy as reported by the *Electrical World* represents the total receipts from the sale of electricity computed to 100 per cent of the industry on the basis of the percentage which the reporting companies bear to the installed central station rating of the country. Fuel consumption and production of electric power by central stations from U. S. Department of the Interior, U. S. Geological Survey.

² One company missing.³ Companies reporting sales are not identical with those reporting fuel consumption and energy produced.

LIFE INSURANCE.

¹ Compiled by the *Association of Life Insurance Presidents*. The data on new business represent only new business that has been paid for, exclusive of revivals, increases, and dividend additions. Premium collections show the amount of money actually invested in life insurance each month, and include total premium collections, new and renewal, and considerations for annuities and for supplementary contracts involving and not involving life contingencies. The 40 companies whose new business is included in this table had in force 77.1 per cent of the total legal reserve life insurance outstanding in the United States as of Dec. 31, 1920.

¹ Includes reports from more than 800 banks in the leading cities in the United States on condition as of last Wednesday of month. Prior to April, 1921, figures are as of last Friday of month.² This column has been recomputed so as to include clearings from 117 identical cities in each year. Estimates had to be made for a few of the smaller cities in the earlier years to complete the data.³ Prior to March, 1921, net deposits were used in calculating reserve ratios.

¹ Prices are averages, as taken at the end of each week, of the closing prices for these stocks on New York Stock Exchange.² These indices are combined from the yields of the average prices of the bonds for each day of the month, the average yields for the 10 bonds of each class being capitalized at 4 per cent to give the index.³ Includes 6 Liberty and Victory bonds (the two issues Victory bonds being replaced at their redemption by the Treasury bonds, this making only 5 issues), 16 foreign government and city, 20 railroads, 10 public utilities, and 5 telegraph and telephone issues taken as of the last day of the month.⁴ Average market yield of bonds of 20 large cities at the first of each month.⁵ Represents an average of seven months, June to December, inclusive.⁶ Five substitutions in this series in January, 1922, account for the violent change in the index.

See footnotes on opposite page also.

¹ Business failures are from *Dun's Review*; Dividend and interest payments, New capital issues, and New incorporations from the *New York Journal of Commerce*; Municipal bond issues from *The Bond Buyer*; Southern bond issues from the *Manufacturers' Record*; Stock, Bonds, and Total Corporate securities from *Commercial and Financial Chronicle*.

² Represents the value of the authorized capital of new enterprises incorporated in the principal eastern states.

³ Monthly data for the period 1913-1921 will be found in the October SURVEY (No. 14), page 46.

⁴ Includes bank dividends not separately shown for those months where such payments are reported. The total interest payments may be obtained by subtracting total dividend payments from total interest and dividend payments, monthly data of which for the period 1913-1921 were published in the September SURVEY (No. 13), p. 51. It is to be noted that the total dividend and interest payments for July, 1918, should be stated as \$333,011,000, instead of \$633,011,000.

CORPORATE AND MUNICIPAL FINANCING.

¹ Data on loans closed by joint-stock banks and Federal farm-loan banks from the *Federal Farm Loan Board*; other agricultural loans from the *War Finance Corporation*; new corporate bond issues are compiled by the *Commercial and Financial Chronicle*.

² Index number less than 1.

³ These data represent loans for agricultural development secured by mortgages on land and buildings. For detailed information as to organization and operations of the Federal Farm Loan Board see the first "Annual Report" of the board, Document No. 714, and subsequent "Annual Reports" of the board. The banks were closed during the greater part of 1920, pending litigation in the Supreme Court involving the constitutionality of the Federal farm-loan act. When operations were resumed the banks were flooded with loan requests, many of which could not be granted because the cessation of bond selling had depleted the resources. These facts will account for the diminished figures of 1920 and 1921.

¹ Advances for "Agricultural and live-stock purposes" under the agricultural credits act of August 24, 1921.

² Loans to banks and live-stock associations were combined because of their parallel trend. Cooperative Marketing Association figures could not well be combined because of their opposite movement.

³ Represents bond issues of the following industries combined: Iron, steel, coal, copper, equipment, manufacturers, motors and accessories, and miscellaneous industrial and manufacturing companies.

CORPORATION STOCKHOLDERS.

¹ These data showing the growth of stockholders in three prominent companies—a railroad, a public utility, and an industrial—have been furnished direct by the respective companies and represent the number of holders of common stock on their books at the end of each quarter, i. e., December figures are for Dec. 31 or Jan. 1.

² Dec. 31 figures; other quarters of 1915 not available.

PUBLIC FINANCE.

¹ From U. S. Treasury Department, except money in circulation, prior to July 1, 1922, from the Federal Reserve Board.² Yearly figures and the monthly figures through September, 1923, are on a warrant basis. The current month is on a cash basis as shown in the preliminary Public Debt Statement.³ Yearly figures are averages for the fiscal year ending June 30 of the year indicated. Monthly figures are taken from the daily Treasury statements. Expenditures represent those chargeable against ordinary receipts.⁴ Represents money held outside the Treasury and Federal Reserve System. The revised yearly figures are as of June 30 and are taken from the Secretary's Annual Report (1923), p. 555.

¹ Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of items reported relating to orders or to creation of indebtedness bears to the total number of transactions reported. As one transaction may cover both an order and an indebtedness or a payment, the sum of the percentages of orders, indebtedness, and payments will usually exceed 100 per cent. The commodities covered are largely textiles, and the individual orders are stated to average from \$250 to \$600, depending on trade conditions. The year 1916 is taken as a base, as it is believed to be more nearly normal than 1919, in which orders and payments were unusually large and indebtedness unusually small.

¹ Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of payment items reported bears to the total number of transactions reported. The commodities covered by these transactions are largely textiles. The year 1916 is taken as a base, as payments were abnormally high in 1919.

² California, Oregon, and Washington.

³ Arizona, New Mexico, Colorado, Utah, Nevada, Idaho, and Wyoming.

⁴ Montana, North and South Dakota, Minnesota, and Wisconsin.

⁵ Kansas, Nebraska, Iowa, Missouri, Illinois, Indiana, Kentucky, and Ohio.

⁶ Texas, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Tennessee, Georgia, Florida, North and South Carolina.

⁷ States east of and including Pennsylvania, West Virginia, and Virginia.

¹ Daily averages or noon rates for cable transfers reported to the Treasury daily by the New York Federal Reserve Bank. Average figures for the years 1914 to 1918, inclusive, where given, are weekly averages of commercial quotations from the *Analyst*. For figures on Germany, which have now been discontinued owing to almost complete collapse of the mark, see August, 1923, issue (No. 24), page 158.

² Parity established October, 1920. Prior to that, par value of the rupee was 32.44 cents.

FOREIGN EXCHANGE.

¹ The foreign exchange index number recently computed by the Federal Reserve Board is based upon the average rates of exchange for 17 countries, Germany excluded, and is here substituted for the weighted geometric average previously published. The index represents the "aggregative" average of cable transfer rates on these countries and is based on the total volume of imports and exports of merchandise, gold, and silver from and to each country for the preceding 12 months. The countries used in computing the index are Belgium, Denmark, England, France, Italy, Netherlands, Norway, Spain, Sweden, Switzerland, Canada, Argentina, Brazil, Chile, China, India, and Japan. The method of computation and the reasons for the change are explained in detail in the *Federal Reserve Bulletin* for October, 1922, page 1260.

² A average value of the paper peso in 1913.

¹ Compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, and represent imports of merchandise only. Up to and including May, 1921, import values represented "actual market value or wholesale price at the time of exportation to the United States, in the principal markets of the country from whence exported, including the value of all containers and coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Tariff act of 1913.) Beginning with June, 1921, the import values are either the actual foreign market value, as defined above, or "the export value, including any export tax imposed by the country of exportation," whichever is higher. (Emergency tariff act of May 27, 1921.)

² Figures for September, 1922, include only the first 21 days of September, during which the old tariff law was in force.

EXPORTS BY GRAND DIVISIONS.¹

¹ Including reexports.² Compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, and represent exports, including reexports, of merchandise only. Values are those at time of exportation in the ports of the United States whence exported, except reexports from bonded warehouses, which are expressed in their import value.³ Total for year 1917 is \$3,275. No figures for 1918.

¹ Prorated from weekly reports.² Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Figures for France include lignite (averaging 66,000 tons per month in 1913). Beginning 1919, Alsace-Lorraine (averaging 203,000 tons monthly in 1919 and 264,000 tons in 1920) is included with France instead of with Germany and beginning 1920 the Saar district (784,000 tons per month) is similarly transferred. Upper Silesia, whose disorders were responsible for the curtailment of German production in May, 1921, was included as a whole with Germany until June, 1922, since which time only the part of Upper Silesia allotted to Germany is included.³ One metric ton is equivalent to 2,204.6 pounds.⁴ Includes upper Silesia from 1923 on. The old territory produced 837,000 tons in July.⁵ Exclusive of the Ruhr.⁶ Tons produced from Apr. 2 to July 4; production curtailed by strike.

¹Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Canadian figures furnished direct by Dominion Department of Labour, Employment Service of Canada. The figures, except in the case of British compulsory insurance, which relate to the operations of the Government labor bureau, represent the percentage of trade-union members employed. They have been converted, by inverting, from the original figures showing percentage unemployed.

² December.

³ Average of quarters, March, June, September, and December.

⁴ Yearly figures are quarterly averages.

⁵ The report for December covers 6,075,750 organized workers of whom only 97,687, or 1.6 per cent, were unemployed.

FOREIGN TRADE OF THE UNITED KINGDOM.

¹ Compiled from British official reports by the U.S. Department of Commerce, Bureau of Foreign and Domestic Commerce. From Apr. 1 south Ireland acquired Dominion status in its trade statistics. The effect is that trade statistics for the United Kingdom beginning with April, 1923, include only Great Britain, north Ireland, and the Isle of Man.

² Figures include exports and reexports.

³ Figures for years 1913-1919, inclusive, are in linear yards.

⁴ Less than 1 per cent.

NOTE.—See p. 189 for exchange rate on pound sterling.

FOREIGN PRICE COMPARISONS.

¹ Data in the first three columns are original compilations of the *Federal Reserve Board* constructed for the purpose of international price comparisons; basic prices are obtained from trade journals and private firms and weighted according to the 1913 volume imported and exported, respectively, for "imported goods" and "exported goods." The total index number includes also goods produced, weighted by production in 1913, and goods consumed, weighted by consumption in 1913.

² Compiled by the *London Economist*; quotations on 44 commodities, mostly raw materials, weighted.

³ Compiled by British Government *Board of Trade*; quotations on 150 commodities.

⁴ Compiled by *Bulletin de la Statistique Generale* of the French Ministry of Labor and Social Welfare; quotations on 45 commodities, mostly raw materials, unweighted.

⁵ Compiled by *Prof. Bachi*; quotations on 38 commodities until 1920, thereafter 76 commodities.

⁶ Compiled by the *Federal Reserve Board* on the same basis as their United States index for international price comparison. Detailed descriptions of these index numbers may be found in the following numbers of the *Federal Reserve Bulletin*: United Kingdom, February, 1922, pp. 147-153; Canada, July, 1922, pp. 801-806; France, August, 1922, pp. 922-929; Japan, September, 1922, pp. 1052-1059.

⁷ Compiled by *Svensk Handelstidning* as of the middle of each month; 47 quotations.

⁸ Compiled by *Neue Zürcher Zeitung* as of the first of each month; quotations on 71 commodities.

⁹ Compiled by the Canadian *Department of Labor*; quotations on 272 commodities, unweighted.

¹⁰ Compiled by the *Bank of Japan*; quotations in Tokyo on 56 commodities, unweighted.

¹¹ Compiled by the *Australian Commonwealth's Bureau of Census and Statistics*; quotations on 92 commodities, weighted by consumption.

¹² Compiled by the *Indian Department of Statistics*; quotations on 75 commodities.

INDEX—Continued.

Page numbers refer to data in detailed tables (53-208) only. Items in the table on "Trend of Business Movements" (pp. 29-52) and in the text are arranged in groups which should make reference easy without the necessity of an index. Note that only the page containing the index number tables is given here. Where the numerical data for these items are in a separate table, they will always be found on the page opposite the index numbers.
